FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5065 of May 25, 1983

National Safe Boating Week, 1983

By the President of the United States of America

A Proclamation

Americans increasingly look to the water for recreation and relaxation, and this year approximately one-quarter of them will enjoy boating in one of its many and varied forms.

It is of paramount importance that those involved in recreational boating recognize that observance of proper safety practices is essential to the enjoyment of boating. In order to protect their families and friends, all persons who use our waters should be courteous and well-versed in safety rules and the techniques of safe boating operation.

Since learning the fundamentals of safe boating adds to the pleasure of boating, participants should take advantage of the many boating courses offered by Federal and State agencies and private organizations.

In addition, all persons should wear a personal flotation device while on the water. Seventy-five percent of those who died in boating accidents last year might have been saved had they worn these devices.

In recognition of the need for boating safety, the Congress enacted the joint resolution of June 4, 1958 (36 U.S.C. 161) as amended, requesting that the President proclaim annually a National Safe Boating Week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby designate the week beginning June 5, 1983, as National Safe Boating Week.

I also invite the Governors of the States, Puerto Rico, the Northern Mariana Islands, the Virgin Islands, Guam, and American Samoa, and the Mayor of the District of Columbia to provide for the observance of this week.

IN WITNESS WHEREOF, I have hereunto set my hand this 25th. day of May, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 48, No. 104
Friday, May 27, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 271, 272, 275, and 277

[Amdt. No. 252]

Food Stamp Program; Error Rate Reduction System

AGENCY: Food and Nutrition Service, USDA.

ACTION: Interim rule.

SUMMARY: This action incorporates in Federal regulations changes to the Food Stamp Error Rate Reduction Program made by provisions of the Food Stamp Act Amendments of 1982. These provisions are aimed at encouraging States to commit themselves to improved administration of the program that will result in progressively lower error rates. States are responsible for the accurate certification and issuance of food stamps to households eligible for participation in the program and receive 50 percent administrative funding from the Department to do so. To encourage States to reduce erroneous certification and issuance, the Department may increase the percentage of administrative funding provided to a State that has a relatively low rate of error, or may reduce the percentage of administrative funding provided to a State with an excessive error rate.

DATES: This action is effective on May 27, 1983. However, the statutory changes it embodies were effective October 1, 1982, except that the negative case provisions for 55 percent enhanced funding contained in 7 CFR 277.4(b)(7) apply from October 1, 1981 through September 30, 1982. Comments must be received on or before August 25, 1983.

ADDRESS: Comments should be submitted to Thomas O'Connor, Acting Branch Chief, Program Design and Rulemaking Branch, Program Planning, Development and Support Division, Food and Nutrition Service, Alexandria, Virginia 22302, 703–756–3429. All written comments will be open to public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday) at 3101 Park Center Drive, Alexandria, Virginia, Room 708.

FOR FURTHER INFORMATION CONTACT: John Hitchcock, Acting Supervisor, State Agency Management Control Section, Program Design and Rulemaking Branch, Program Planning, Development and Support Division, Family Nutrition Programs, Food and Nutrition Service USDA, Alexandria, Virginia 22302; 703–756–3429.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291. This interim rule has been reviewed under Executive Order 12291 and Secretary's Memorandum No. 1512–1, and has been classified "not major." The rule will not have an annual effect on the economy of $100 million or more, nor will it result in a major increase in the cost of prices for consumers, individual industries, Federal, State or local government agencies or geographic regions. Since this rule will not affect the business community, it would not result in significant and adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act. This rule has also been reviewed with regard to the requirements of Pub. L. 96–354, and Robert E. Leard, Administrator of the Food and Nutrition Service, has certified that it will not have a significant economic impact on a substantial number of small entities. The rule changes Federal regulations to incorporate the provisions of Pub. L. 97–253, the Food Stamp Act Amendments of 1982, designed to encourage State agencies to reduce errors made in the certification of households and reduce the resulting dollar loss. State and local welfare agencies would be affected since they administer the program and may be liable, through a reduction in Federal administrative funding, if error rates are not reduced or may receive additional funding if their error rate is very low. Individuals participating in the program who receive incorrect allotments of food stamps will be most affected once error rates are reduced and such allotments are corrected.

Interim rule. Robert E. Leard, Administrator, Food and Nutrition Service has also determined, pursuant to 5 U.S.C. 553, that prior public comment on this rulemaking is impracticable and contrary to public interest and that good cause exists for making this rule effective less than 30 days after publication. Public comment is solicited on this rule for 90 days. All comments received will be analyzed and any appropriate changes in the rule will be incorporated in a subsequent publication.

The Department has no discretion regarding the specific modifications to the sanction/incentive systems addressed by this rule since they are mandated by legislation. As required by Section 193(b) of the 1982 Amendments, all the provisions of Section 180 became effective October 1, 1982.

Paperwork Reduction Act. This action does not contain reporting and recordkeeping requirements subject to approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act.

Background

In the Food Stamp Act Amendments of 1980 (Pub. L. 96–249, 94 Stat. 257, May 26, 1980, referred to herein as the 1980 Amendments), Congress established the quality control (QC) based sanction/incentive systems in the Food Stamp Program. In the October 3, 1980, Federal Register (at 45 FR 65832), the Department issued proposed rules on these systems. On January 23, 1981, the Department published final rules (at 46 FR 7258), governing the previous sanction/incentive systems, based upon comments received from 105 States, counties, and other interested parties. Section 180 of the Food Stamp Act Amendments of 1982 (Pub. L. 97–253, enacted September 8, 1982, hereafter referred to as the 1982 Amendments) provides for continuation of sanction and incentive systems in the Food Stamp Program with a number of significant revisions to the rules governing their operation.

Persons wishing to comment on this interim rule should be aware that requirements imposed by statute cannot be altered through the rulemaking process. The provisions of the sanction/

incentive system mandated by the 1980 Amendments and those of the 1982 Amendments are, therefore, compared and discussed here to ensure a clear understanding by all interested parties.

Sanctions

Section 126 of the 1980 Amendments defined the "payment error rate" as the percentage total of all food stamp allotments that are issued to households which fail to meet the eligibility requirements of the Act, are overissued to eligible households, and are underissued to eligible households. Section 180 of the 1982 Amendments modifies this definition by excluding the percentage of food stamp allotments underissued to eligible households. Thus, payment error rates will now measure only dollars issued to ineligible cases and dollars overissued to eligible cases.

The sanction system established under the 1980 Amendments was based upon four key factors: (1) Each State agency's payment error rate during the first six months of each fiscal year (the base period); (2) the national standard payment error rate (average of all State agencies' error rates) during each base period; (3) the national annual rates of reduction; and (4) States' actual error rates during each 6-month period of the subsequent fiscal year. To avoid liability, State agencies with error rates less than the national standard payment error rate during the base period were required to remain below the standard throughout the two reporting periods of the subsequent fiscal year. State agencies with error rates higher than the standard were required to reduce their error rate to the standard, or to a level set by applying the national annual rate of reduction to their error rates, whichever was higher. A State agency failing to meet its required error rate goal for a given 6-month reporting period was liable for the dollar value equivalent of the difference between its goal and its payment error rate expressed as a percentage of its total food stamp issuance during the 6-month period.

The 1982 Amendments change the sanction system by establishing set goals for all State agencies for each fiscal year. All State agencies are required to achieve a payment error rate of nine percent or less in Fiscal Year 1983, seven percent or less during Fiscal Year 1984, and five percent or less during Fiscal Year 1985 and each subsequent fiscal year to avoid liability based upon error rates. It is important to note that State agencies' performances will now be determined on an annual basis rather than at the end of each 6-month reporting period.

In the 1982 Amendments Congress also modified the sanction system by basing liability for failure to meet the standard upon State agencies' shares of Federal administrative funding, rather than a percentage of the benefits issued. For each percentage point (or fraction thereof) by which a State agency's payment error rate exceeds its goal, the State agency will lose five percent of its normal share of Federal administrative funding for the applicable fiscal year. For each percentage point (or fraction of a point) by which a State agency exceeds its error rate goal by more than three percentage points, it will lose ten percent of its normal Federal administrative funding. These provisions are intended to set "* * * realistic penalties that are much less likely to be waived." See Senate Report No. 97–504, 97th Congress, 2nd Session, p. 69 (1982). Thus, the Department will no longer contribute a relatively high proportion (50 percent) of a State agency's administrative costs when that administration results in excessive Federal dollar loss. (The 75 percent Federal funding of operations such as investigations or administration of the program on Indian reservations would not be affected by these reductions.) For example, if a State agency missed its target error rate by two tenths of a percentage point in a given fiscal year it would be liable for an amount equal to five percent of its Federal administrative funding at the 50 percent rate. If its Federal share of administrative funding were $10,000,000, the State agency would be liable for $500,000. However, the law requires that the Department not reduce a State agency's Federally funded share of administrative costs by more than the difference between its goal and its error rate in terms of actual error dollars issued during a fiscal year. Suppose that the State agency in the above example issued $200,000,000 in food stamps over the fiscal year. Its liability would be two tenths of one percent of $200,000,000 or $400,000, rather than the $500,000 figure computed from administrative funding. This provision ensures that a State agency is not held liable for more money than was lost by its failure to meet the error rate standard.

While both Congress and the Department view error reduction and the elimination of wasteful spending of Federal dollars by State agencies as being one of the program's highest priorities, reduction of Federal administrative funding is not viewed as a desirable goal. Rather, the sanction system is "* * * intended to encourage States to reduce the issuance of erroneous benefits * * *" (See Senate Report No. 97–504, p. 69.)

Therefore, in the 1982 Amendments, Congress included the following provisions (which are incorporated in this interpretive rule). For Fiscal Year 1983, State agencies must achieve a nine percent error rate *or* reduce their payment error rate by at least 33.3 percent of the difference between their payment error rates during the October 1980 through March 1981 reporting period and a five percent error rate to avoid any liability. For Fiscal Year 1984, State agencies must have a seven percent payment error rate *or* reduce their payment error by at least 66.7 percent of the difference between their payment error rates during the October 1980 through March 1981 reporting period and a five percent error rate to avoid any liability. State agencies' payment error rates for the October 1980 through March 1981 period will be recalculated based upon the revised definition of the payment error rate in determining whether the 33.3 and/or 66.7 percent reductions have been met. These provisions of the law and the rule will allow State agencies with high error rates to avoid sanctions so long as substantial reductions are made.

The following examples illustrate how the revised sanction system will work. If a State agency's payment error rate (based upon the revised definition) was 15 percent in the October 1980 through March 1981 period, the State agency would avoid liability by reducing its payment error rate in Fiscal Year 1983 by one third of the difference between 15 percent and 5 percent. This means that the 15 percent payment error rate would need to be lowered by at least 3.33 percentage points to 11.67 percent or lower in Fiscal Year 1983, to 8.33 percent or lower in Fiscal Year 1984 and 5 percent or lower in Fiscal Year 1985 and thereafter.

Suppose that the State agency's actual error rates turn out to be 14 percent in Fiscal Year 1983, 10 percent in Fiscal Year 1984, and 9 percent in Fiscal Year 1985. In that event the State agency would be subject to reduction of administrative funding as follows:

	Percentage points above standard	Percent reduction in Federal funding	Resulting funding level
Year:			
1983	2.33	15	42.5
1984	1.67	10	45
1985	4.0	25	37.5

It should be noted that the dramatic increase in the percentage reduction of Federal funding in 1985 is primarily due to application of a ten percent reduction in Federal funding for the fourth percentage point by which the State agency exceeded its goal. The 37.5 percent funding level is arrived at by multiplying the percent reduction in Federal funding (.25) by the standard level of Federal funding (.50) and subtracting the result from the standard 50 percent rate.

Any State agency with a payment error rate of less than nine percent in Fiscal Year 1983, seven percent in 1984 or five percent thereafter, will avoid liability without regard to the 33.3 and 66.7 percent reduction provision.

While the Department and Congress view the reduction of error rates as critical, they also realize that situations may develop that prevent a State agency from reaching its goal. Congress indicated its intent by saying "the sanctions established in the Committee's proposal, on the other hand, are more realistic and should not be waived except when unusual circumstances intervene." (See S. Rep. No. 97–504, pages 70–71.) Therefore, the statutory changes contemplated retention of the "good cause" provisions of the prior regulations except for the "good faith effort" described in 7 CFR 275.25(d)(5)(i)(G) of the January 23, 1981 regulations. The good faith effort provision will, of course, continue to apply to requests for waivers of sanctions for excess error rates during Fiscal Years 1981 and 1982. With regard to any reporting period subsequent to Fiscal Year 1982, that good faith provision is replaced by the 33.3 and 66.7 percent reduction provisions of the 1982 Amendments described earlier. The intent of the good faith effort provision was to allow State agencies time to show progress toward error reduction through corrective action. Congress discussed the new provisions by saying "State agencies which do not meet these national error rate targets and which cannot show good cause or are not making satisfactory progress toward meeting these goals would receive reduced administrative funding from the Federal government. To qualify as making satisfactory progress in Fiscal Year 1983, a State agency would have to reduce its error rate by at least ⅓ of the difference between its error rate in the period of October 1, 1980 to March 31, 1981, and the ultimate 5 percent target." See S. Rep. No. 97–504, p. 98. This rule places these existing good cause provisions in the context of the new statutory system where progress is carefully defined beyond which intervention of unusual circumstances is necessary for the Department to consider waiver of a sanction. The Department will not waive reductions in Federal administrative funding except in the specific circumstances outlined in 7 CFR 275.25(d)(5) and will review each good cause request carefully.

Incentive Funding

Public Law 97–253 also modifies the provisions dealing with financial incentives for State agencies with low errors. Under the 1980 Amendments, a State agency could obtain: (1) 55 percent funding by reducing its error rate by 25 percent or more in a year's time; (2) 60 percent funding by attaining a payment error rate of eight percent or less; and (3) 65 percent funding by attaining a payment error rate of 5 percent or less.

This rule incorporates the changes made by the 1982 Amendments which provide that, beginning with the Fiscal Year 1983 review period, a State agency's Federal share of administrative funding will be increased to 60 percent if the sum of its payment error rate and its rate of underissuance to eligible households is less than five percent, provided that its rate of invalid decisions in denying and terminating eligibility is less than the national weighted mean rate. The Department, in establishing an acceptable rate of invalid decisions, will continue to follow current regulatory procedures and use the national weighted mean rate. Comments are encouraged on this aspect of the incentive provisions.

This statutory modification to the enchanced funding provisions is consistent with the new sanction provisions of the legislation, i.e., it is inconsistent to require a State agency to achieve a payment error rate of seven percent or less in Fiscal Year 1984 to avoid sanctions and at the same time provide State agencies with additional funding for achieving error rates of less than eight percent.

This rule also contains a modification of current provisions regarding a State agency's entitlement to 55 percent enhanced administrative funding by requiring that a State agency which qualifies for such funding, based upon its active case error rate, also meets the negative case error rate standard. This provision is mandated under Section 1326 of Pub. L. 97–98, the Food Stamp and Commodity Distribution Amendments of 1981 (enacted on December 22, 1981), and is effective for the period of October 1, 1981, through September 30, 1982.

Technical Modifications

Beyond incorporation of the nondiscretionary provisions of the law contained in these rules, this rule makes the following technical modifications that are necessary to the proper operation of the QC system.

Relationship to Suspension/ Disallowance of Funds. In 7 CFR 275.25(d)(4) the provisions dealing with the relationship between the negligence provisions of 7 CFR 276.3 and the QC sanction system have been deleted. These provisions were intended to ensure that State agencies were not held accountable for the same dollar loss under two different accounting procedures. Since the 1982 Amendments changed the basis for determining the amount of sanctions to administrative funding rather than food stamp issuance, the potential for dual liability under the provisions of 7 CFR 276.3 and 275.25 has been eliminated. However, the Department recognizes the new potential for reduction of a State agency's Federal administrative funds under this rule in addition to a disallowance of funds under the provisions of 7 CFR 276.4. Therefore, the Department has, in this rule, included provisions which will ensure a State agency does not lose allowable administrative funding under both 7 CFR 276.4 for noncompliance with a specific program requirement and under 7 CFR 275.25 (for the effect of the noncompliance on the error rate). While FNS may continue to suspend and/or disallow Federal administrative funds if a State agency's administration of the program is ineffective or inefficient, the actual amount of funds withdrawn from the State agency will be adjusted if the specific reason for the disallowance contributes to the State agency's payment error rate and the State agency is held liable for an excesssive payment error rate during a given fiscal year. For example, if a State agency fails to comply with the requirements for testing households' eligibility based upon gross income (FNS disallows $100,000 for this failure under 7 CFR 276.4) and, as a direct result, the State agency also fails to reach its payment error rate goal for a concurrent period of time (and application of the provisions of 7 CFR 275.25(d)(3) would result in a reduction of $200,000 in its administrative funds), FNS would adjust the billings to reflect a total State agency liability of $200,000. However, if in another situation, FNS disallowed funds for failure to provide households with notice of adverse action, the amount of such a disallowance would not be offset

against a QC sanction since the payment error rate would not include such failure. Establishing the relationship between noncompliance with a program requirement and an excessive error rate, in order to demonstrate double billing, shall be each applicable State agency's responsibility.

Definitions. Modifications are also made throughout 7 CFR 275.25 to reflect the revised definitions of "payment error rate" and "review period" and a definition for "underissuance error rate" has also been added.

New Forms. The language of 7 CFR 275.4 and 275.14 has been revised to identify the revised forms now required to be used in the Food Stamp Quality Control Review Process. (Office of Management and Budget approval numbers: 0960–0176 and 0960–0113.)

Future Modifications

Annual Sampling. As discussed earlier, the 1982 Amendments place the determination of State agency liability or enhanced administrative funding for error rates on an annual rather than semiannual basis. As a result, the Department is reexamining the structure of the QC sampling requirements both in terms of the reliability of the error rate estimates generated and the related cost. The Department has determined that the QC system can be placed on annual sampling basis and will propose this change in future rulemaking. This raises the issue of whether a change to current sample sizes is practicable. While the Department is committed to a QC system that produces highly reliable error rate estimates, which depend to a great extent on sufficiently large samples, the Department also recognizes State agencies' desires to dedicate additional resources to error reduction activities in a time of increasing budget difficulties.

In examining the issue of a future shift of the QC sample from a semiannual to an annual basis, the Department recognizes the potential for monthly sample size reductions in the larger States. The Department is carefully examining the reliability and precision of the error rate estimates that the six month sample sizes yield and those that could be expected under an annual sampling system. While it is likely that levels of precision similar to those associated with the six month error rate estimates could be obtained if State agencies' current sample sizes were spread out over a year, there are complicating factors. The precision of each State agency's estimate depends not only on its case sample size, but also on its error rate estimate and on the size and distribution of the dollar amounts issued to sample cases. Neither of these factors can be controlled or known prior to sample selection and will vary from State to State. In addition, the size and findings of the Federal validation sample have a major impact upon the precision of each State agency's final error rate estimate.

The Department plans to continue its examination of this issue together with DHHS officials responsible for the AFDC and Medicaid programs' QC systems, and is particularly interested in comments from State agencies and other interested parties. The Department plans to publish separate proposed regulations revising this and other aspects of the system in the next few months. In commenting upon future sample sizes, the Department expects each State agency to examine its individual circumstances with regard to expected precision of error rate estimates, resource needs, and timeliness of its QC system's data.

The Department will use the weighted average of State agencies' six month error rate estimates to arrive at official error rates for Fiscal Year 1983. For example, if a State agency had an average monthly issuance of $10,000,000 in the first half of Fiscal Year 1983 and $15,000,000 in the second half of the fiscal year, with corresponding payment error rates of 11 and 10 percent, the State agency's payment error rate for the entirety of Fiscal Year 1983 would be calculated as follows. The annual average monthly dollar loss projected from the QC reporting periods $(((.11)(10,000,000)+(.10)(15,000,000))/2=1,300,000)$ would be divided by the annual average monthly issuance $((15,000,000+10,000,000)/2=12,500,000))$ for Fiscal Year 1983 payment error rate of 10.4 percent (1,300,000/12,500,000=.104).

Disposition of Cases

The Department is concerned with the timeliness of QC data for the following reasons. First, with implementation of annual sampling, final reports for a given fiscal year would not be completed under the current system until 15 months after the beginning of the fiscal year. This is too long for either Federal or State managers to wait before beginning analysis and correction of errors.

Second, with implementation of the Integrated Quality Control System Reporting Network, most State agencies now have the capability of entering, editing, and transmitting data from quality control reviews immediately. While the Department does not expect data entry on a daily basis, weekly or monthly submission is anticipated and should not impose an unreasonable burden upon any State agency's QC operation.

Third, compliance with an ongoing monthly case disposition standard would standarize both State agency and Federal review workload over the review period, and avoid the current problem many State agencies experience when incomplete QC reviews pile up at the end of the period. The Department is concerned that the quality of cases selected in the last one or two months of a review period may suffer as State reviewers attempt to simultaneously complete all outstanding cases from previous months of the period.

Finally, any monthly sample size reductions should enable State agencies to focus increased attention on each case selected. Thus, delays in the completion of cases due to the work required by other cases should be significantly reduced and review quality increased.

The Department is aware that the Social Security Administration (SSA), Department of Health and Human Services, has recently issued a final rule in the **Federal Register** (at 45 FR 46507) which establish quality control case completion standards for the Aid to Families with Dependent Children (AFDC) and Adult Assistance Programs. SSA established case completion standards that require completion of 90 percent of the cases selected each month within 75 days after the end of the sample month and 100 percent of the cases selected in a quarter within 120 days after the end of the quarter. While the Department is committed to working closely with SSA in making the rules governing the Food Stamp and AFDC Quality Control Systems compatible, adoption of SSA's case completion standard could result in delaying compilation of final error rate reports by almost a month relative to current food stamp reporting requirements (120 days-vs-95 days). The Department intends to continue working with SSA to eliminate such differences wherever possible and pursue development of a single case disposition standard for both programs. The Department welcomes comment on this issue, and will use any received in developing, through the rulemaking process, a single reporting standard for all State agencies.

Reporting

FNS is currently working closely with DHHS officials responsible for the AFDC and Medicaid Programs' QC systems on implementation of the

Integrated Quality Control System (IQCS) and issues related to this system's potential for supplying the necessary QC reports. Clearly, the automated data entry and transmission aspect of the system eliminates the need for the Form FNS–247 series reports as they now exist. (See 7 CFR 275.21.) Concurrently, until the IQCS is a fully tested and proven system, it is necessary to ensure that no discrepancies exist between the State agencies' QC findings and the information received by the Department. This is most critical with regard to reported error rates and final sample disposition. The Department plans to deal with these issues in a future proposed rulemaking to obtain State agencies' comments prior to establishment of any final reporting requirements.

In the interim, FNS will not require State agencies to submit the Forms FNS–247–2, Distribution of Variances by the Type of Agency and Participant Error, 247–3, Distribution of Variances by Element, or 247–4, Distribution of Administrative Deficiencies. This requirement will be waived in light of State agencies' efforts to transmit information through the IQCS. However, to ensure that there is no confusion over what State agencies' reported error rates are, the Form FNS–247–1, Statistical Summary of Sample Distribution, will continue to be required. State agencies may generate this report using the computer terminals and software of the IQCS or through other systems they may be using. While the regulations will not be changed until a proposed and subsequent final rule is implemented, FNS will waive the regulatory requirements for the Forms FNS–247–2, 247–3, and 247–4 effective with publication of this rule.

FNS is also examining the Form FNS–248, Statistical Summary of Sample Distribution. (See 7 CFR 275.21.) While some form of a monthly status report will continue to be necessary, the IQCS has the potential of rendering this report obsolete in its current form. Again, changes to this report will be addressed in a future proposed rulemaking and State agencies' comments will be solicited. Until final regulations are published, the Department will continue to require submission of the Form FNS–248 or a similar report. FNS will also continue to request that States submit disposition lists and the complete Form FNS–380–1 sample data in a machine-readable form in the Federally specified format.

List of Subjects

7 CFR Part 271

Administrative practice and procedure, Food stamps, Grant programs—social programs.

7 CFR Part 272

Alaska, Civil rights, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements.

7 CFR Part 275

Administrative practice and procedure, Food stamps, Reporting and recordkeeping requirements.

7 CFR Part 277

Food stamps, Government procurement, Grant programs—social programs, Investigations, Records, reporting requirements.

Therefore, 7 CFR Parts 271, 272, 275, and 277 are being amended as follows:

PART 271—GENERAL INFORMATION AND DEFINITIONS

1. In § 271.2 the definitions of "payments error rate" and "review period" are revised and "underissuance error rate" is added in alphabetical order to read as follows:

§ 271.2 Definitions.

* * * * *

"Payment error rate" means the sum of the allotments issued to eligible households to which they were not entitled and the allotments issued to ineligible households expressed as a percentage of all allotments issued to completed active sample case excluding those cases processed by SSA personnel or participating in certain demonstration projects designated by FNS.

* * * * *

"Review period" means the 12-month period from October 1, of each calendar year through September 30 of the following calendar year and is made up of two 6-month reporting periods.

* * * * *

"Underissuance error rate" means an estimate of the proportion of allotments to which eligible households were entitled but did not receive, expressed as a percentage of all allotments issued to active sample cases.

* * * * *

PART 272—REQUIREMENTS FOR PARTICIPATING IN STATE AGENCIES

2. A new paragraph (g)(64) is added to § 272.1 to read as follows:

§ 272.1 General terms and conditions.

* * * * *

(g) *Implementation.* * * *

(64) Amendment 252.

(i) The sanction/incentive provisions of § 275.25 were effective October 1, 1982. The previous provisions of § 275.25 shall continue to apply to the review periods prior to October 1982.

(ii) The funding provisions of § 277.4(b)(2) were effective on October 1, 1982, and shall apply to the October 1982, through September 1983, review period and every review period thereafter.

(iii) The revised funding provisions of § 277.4(b)(7) shall apply to the 6-month review periods October 1, 1981 through March 1982 and April through September 1982.

PART 275—PERFORMANCE REPORTING SYSTEM

3. In § 275.3, paragraph (c)(7) is revised to read as follows:

§ 275.3 Federal monitoring.

* * * * *

(c) Validation of States' payment/cumulative allotment error rates.

* * * * *

(7) FNS will validate the negative case and underissuance error rate for each period a State agency's payment error rate would entitle it to an increased share of Federal administrative funding as outlined in § 277.4(b) (2), (5), (6), or (7). Procedures similar to those of paragraphs (c) (1), (2), (3) and (4) of this section and § 275.25(d) shall be used to validate State agencies' negative case and underissuance error rates.

* * * * *

4. In § 275.4, paragraph (c) is revised to read as follows:

§ 275.4 Record retention.

* * * * *

(c) QC review records consist of Forms FNS–380, Worksheet for Integrated AFDC, Food Stamps and Medicaid Quality Control Reviews, FNS–380–1, Integrated Review Schedule, FNS–245, Negative Quality Control Review Schedule, and Form FNS–248, Status of Sample Cases in Reporting Month and Period; other materials supporting the review decision; sample lists; tabulation sheets; and semiannual reports.

5. In § 275.14, the section title the first two sentences in paragraph (a) and the first sentence in (b) are revised to read as follows:

§275.14 Review schedules.

* * * * *

(a) The Integrated Review Schedule, Form FNS–380 shall be used by the reviewer to record required information

for active cases from the case record, plan and conduct the field investigation, and record findings which contribute to the determination of eligibility and basis of issuance. Decisions reached by the reviewer, for active cases, shall be coded on Form FNS–380–1, Integrated Review Schedule or, for negative cases on Form FNS–245, Negative Quality Control Review Schedule. * * *

(b) In some instances reviewers may need to supplement Form FNS–380 with other forms. * * *

6. In § 275.25:

a. Paragraphs (c)(1)(i) and (c)(1)(iv) are revised;

b. Introductory paragraph (c)(2) is revised, and paragraphs (c)(2)(i), (c)(2)(ii) and (c)(2)(iii) are removed;

c. Paragraph (c)(3) is revised;

d. The title of paragraph (d) and paragraphs (d)(1), (d)(2), and (d)(3) are revised;

e. The title of paragraph (d)(4) and paragraph (d)(4)(ii) are revised, and paragraph (d)(4)(iii) is removed;

f. Paragraph (d)(5)(i) (C), (E) and (F) are revised, and paragraph (d)(5)(i) (G) is removed; and

g. Paragraphs (d)(5)(ii) and (d)(6)(i) are revised, and paragraphs (d)(6)(i) (A), (B) and (C) are added.

The revisions read as follows:

§ 275.25 Determination of State agency program performance.

* * * * *

(c) *Federal Enhanced Funding.* * * *

(1) * * *

(i) Validate the State agency's reported payment error rate and its underissuance error rate as provided for in § 275.3(c);

* * * * *

(iv) Validate the State agency's negative case error rate following the procedures of paragraphs (c)(1) (i), (ii), and (iii) of this section.

(2) Upon completion of the activities specified in paragraph (c)(1) of this section, FNS will, if necessary, correct or adjust a State agency's error rate as described in paragraph (d)(6) of this section. After validation and any necessary adjustment of error rates, a State agency with a combined payment error rate, and underissuance error rate of five percent or less shall be eligible for a 60 percent Federally funded share of administrative costs, provided that the State agency's negative case error rate is less than the national weighted mean negative case error rate for the period of enhanced funding.

(3) State agencies entitled to enhanced funding shall receive the additional funding on a retroactive basis only for the review period in which their error rates are less than the levels described in paragraph (c)(2) of this section.

(d) *State Agencies' Liabilities for Payment Error Rates.* (1) At the end of each fiscal year, each State agency's payment error rate over the entire fiscal year will be computed, as described in paragraph (d)(6) of this section, and evaluated to determine whether the payment error rate goals established in the following paragraphs have been met.

(2) *Establishment of Payment Error Rate Goals.* (i) Each State agency's payment error rate goal for Fiscal Year 1983 shall be nine percent. Each State agency's payment error rate goal for Fiscal Year 1984 shall be seven percent. Each State agency's payment error rate goal for Fiscal Year 1985, and each fiscal year thereafter, shall be five percent. State agencies' payment error rates for any fiscal year shall be derived from the review period corresponding to the fiscal year.

(ii) If a State agency fails to achieve a nine percent payment error rate in Fiscal Year 1983 but reduces its payment error rate for Fiscal Year 1983 by 33.3 percent (or more) of the difference between its payment error rate during the period of October 1980 through March 1981 and a five percent payment error rate, the State agency shall bear no fiscal liability for its payment error rate. If a State agency fails to achieve a seven percent payment error rate in Fiscal Year 1984, but reduces its payment error rate for Fiscal Year 1984 by 66.7 percent (or more) of the difference between its payment error rate during the period of October 1980 through March 1981 and a five percent payment error rate, the State agency shall share no fiscal liability for its payment error rate.

(iii) State agencies' payment error rates shall be rounded to the nearest one-hundredth of a percent with .005 and above being rounded up to the next highest one-hundredth and .004 and below being rounded to the next lowest one-hundredth.

(3) *States Agencies Failing to Achieve Payment Error Rate Goals.* Each State agency which fails to achieve its payment error rate goal during a fiscal year shall be liable as specified in the following paragraphs.

(i) For every percentage point, or fraction thereof, by which a State agency's payment error rate exceeds the goal for a fiscal year, FNS shall reduce the money it pays for the State agency's Food Stamp Program administrative costs by five percent for that fiscal year; provided that for every percentage point, or fraction thereof, by which a State agency's payment error rate exceeds its goal by more than three percentage points, FNS shall reduce the Federally funded share of Food Stamp Program administrative costs by ten percent for the applicable fiscal year. Thus, if a State agency's reported error rate in Fiscal Year 1983 is 10.5 percent, its Federal administrative funding could be reduced by ten percent. A 13.1 percent error rate or 4.1 percentage points above the goal, would result in a reduction of 5 percent for each of the three first points, 10 percent for the fourth point and another 10 percent for the fraction above 4 percentage points. This would amount to a 35 percent reduction in Federal administrative funds unless the provisions of paragraph (ii) are applicable to the State agency's circumstances.

(ii) If a State agency fails to reach its payment error rate goal but reduces its error rate as explained in paragraph (d)(2)(ii) of this section for a given fiscal year it will share no liability for its error rates. If, however, a State agency fails to reach the established goal and fails to meet the reduction percentage for Fiscal Year 1983 and/or 1984, its Federally funded share of program administrative costs shall be reduced by five percent for every percentage point, or fraction thereof, (with a 10 percent reduction applied for every percentage point or fraction above 3 percentage points) by which its error rate exceeds the payment error rate it would have achieved had it met the 33.3 or 66.7 percent reduction percentage for the applicable fiscal year. Thus, if a State agency's payment error rate during the October through March 1981 period was 13 percent and its error rate for Fiscal Year 1983 is 11 percent, it will have failed to achieve a 33.3 percent reduction (13−(13−5)(33.3)=10.34 percent, i.e., the rate the State agency would have achieved had it met the reduction percentage) and incurred a liability equal to five percent of its Federal administrative funding. If the State agency's payment error rate increased to 13 percent in Fiscal Year 1984, it will have missed a 66.7 percent reduction by 5.34 percentage points (13−(13−5)(66.7)=7.66 percent) and incurred a liability equal to 45 percent of its Federal administrative funding. In the latter example, the 45 percent funding reduction results from a 15 percent reduction for the first three percentage points and 30 percent for the additional 2.34 percentage points by which the State agency exceeded a 7.66 percent error rate.

(iii) If a State agency is found liable for an excessive payment error rate, the amount of liability will be calculated by: (A) Multiplying the percent the Federal share is to be reduced by the base

Federal reimbursement rate of 50 percent; (B) subtracting the product of (A) from 50 percent; and (C) multiplying the result of (B) by the State agency's costs covered under the base Federal reimbursement rate for the fiscal year in which the State agency incurred the liability. For example, if the total administrative costs (State and Federal) in a State agency are $4,000,000 for the fiscal year, and the State agency's Federal funding is to be reduced by 25 percent, the State agency would be reimbursed at a rate of 37.5 percent (i.e., 50 percent minus 25 percent times 50 percent) or $1,500,000. The State agency's liability would be $500,000 or 12.5 percent of its administrative costs.

(iv) A State's Federally funded share of administrative costs shall not be reduced by an amount that exceeds the difference between its payment error rate goal (or what its error rate would have been had it met the reduction criteria of paragraph (ii) above) and its actual error rates expressed as a percentage of its total issuance during the fiscal year. Therefore, if the State agency in the above example issued $10,000,000 in food stamps in the fiscal year and exceeded its goal by four percentage points (as demonstrated by a 25 percent reduction in Federal funding), the State agency's liability would be capped at $400,000 [(.04)(10,000,000)], even though the calculation based upon administrative funds would result in a liability of $500,000.

(4) *Relationship to Warning Process and Disallowance of Funds.* * * *

(ii) FNS may reduce a State agency's share of Federal administrative funding under the provisions of this section or disallow administrative funds under the provisions of § 276.4(c). If a State agency's administrative funding is reduced under the provisions of this section and a portion is also disallowed under § 276.4(c), FNS shall adjust the billing if the disallowance is based upon noncompliance with a program requirement that would constitute a dollar loss reflected in the State agency's payment error rate to the extent that the disallowance and reduction are for the same deficiency and period of time. This adjustment shall ensure that a State agency is not double-billed for the same deficiency in its administration of the program. It shall be each State agency's responsibility to demonstrate the need for any adjustments.

(5) *Good Cause and Appeals.*

(i) * * *

(C) Significant caseload growth prior to or during a fiscal year of, for example, 15 percent;

* * * * *

(E) Misapplication of Federal policy where such misapplication directly affects the State's QC error rates and was incorrectly provided or approved by an FNS representative who is reasonably believed to have the necessary authority; and

(F) Other circumstances beyond the control of the State.

(ii) If FNS determines that there was good cause for all or part of a State agency's error rate to exceed its goal in a fiscal year, FNS shall reduce or eliminate the State agency's liability as appropriate.

* * * * *

(6) *Determination of Payment Error Rates.* * * *

(i) FNS will adjust State agencies' reported error rates through findings of rereviewed cases. Once the Federal case rereviews have been completed and all differences with the State agency have been resolved, the State agency's reported error rate will be adjusted using the following linear regression equation.

(A) $y' = y + b(X - x)$ where y' is the average value of allotments overissued to eligible and ineligible households; y is the average value of allotments overissued to eligible and ineligible households in the rereview sample according to the Federal finding; b is the estimate of the slope parameter; x is the average value of allotments overissued to eligible and ineligible households in the rereview sample according to State agency findings; and X is the average value of allotments overissued to eligible and ineligible households in the full quality control sampling according to the State agency's findings.

(B) The adjusted error rates are given by $r = y'/u$, where u is the average value of allotments issued to participating households.

(C) After application of the provisions of paragraph (d)(6)(iii) of this section, the adjusted payment error rate will then become the State agency's official payment error rate for use in the reduced and enhanced funding determinations described in paragraphs (c) and (d) of this section.

* * * * *

PART 277—PAYMENT OF CERTAIN ADMINISTRATIVE COSTS OF STATE AGENCIES

4. In § 277.4, paragraphs (b)(2), (b)(5), (b)(6), and (b)(7), are revised, and a new paragraph (b)(8) is added. The revisions and addition read as follows:

§ 277.4 Funding.

* * * * *

(b) *Federal Reimbursement Rate.* * * *

(2) For the period beginning October 1, 1982, a State agency's Federally funded share of the Food Stamp Program administrative costs shall be increased to 60 percent when the sum of the State agency's payment and underissuance error rates is less than five percent; provided that the State agency's negative case error rate is less than the national weighted mean negative case error rate for the fiscal year of enhanced funding. The State agency's error rates shall be determined through the quality control review process as described in Part 275.

* * * * *

(5) For the period beginning October 1, 1980, a State agency's Federally funded share of Food Stamp Program administrative costs shall be increased to 65 percent when the State agency's cumulative allotment error rate is less than five percent; provided that the State agency's negative case error rate is less than the national weighted mean negative case error rate for the 6-month period of enhanced funding. This provision shall not apply to any period after the April through September 1982 period.

(6) For the period beginning October 1, 1980, a State agency's Federally funded share of Food Stamp Program administrative costs shall be increased to 60 percent when the State agency's cumulative allotment error rate is less than eight percent; provided that the State agency's negative case error rate is less than the national weighted mean negative case error rate for the 6-month period of enhanced funding. This provision shall not apply to any period after the April through September 1982 period.

(7) For the 6-month period beginning October 1, 1980, a State agency with a 25 percent or greater reduction in its cumulative allotment error rate from one 6-month period to the comparable period of the next fiscal year shall be entitled to a 55 percent Federally funded share of Food Stamp Program administrative costs; provided that, effective with the 6-month period beginning October 1, 1981, the State agency's negative case error rate is less than the national weighted mean negative case error rate for the period of enhanced funding. This provision shall not apply to any period after the April through September 1982 period.

(8) Beginning October 1982, the Federally funded share of administrative costs, as identified in paragraph (b) of this section, may be decreased based upon its payment error rate as described in § 275.25. The rates of Federal funding for the activities identified in paragraphs (b)(1), (b)(3), and (b)(4) of this section shall not be reduced based upon the agency's payment error rate.

BILLING CODE 3410–30–M

7 CFR Part 285

[Amdt. No. 239]

Noncash Nutrition Assistance in Commonwealth of Puerto Rico

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This rulemaking amends the regulations published July 27, 1982 at 47 FR 32409 concerning the Commonwealth of Puerto Rico's Nutrition Assistance Program. These changes are required to implement a provision of the Food Stamp Act Amendments of 1982. This rule will prohibit the use of cash for providing food assistance in the Commonwealth of Puerto Rico after September 30, 1983.

EFFECTIVE DATE: This rule will be effective on June 27, 1983.

FOR FURTHER INFORMATION CONTACT: William B. Fisher, Acting Supervisor, Eligibility and Certification Section, Family Nutrition Programs, Food and Nutrition Service, USDA, Alexandria, Virginia 22302. Phone: (703) 756–3429.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

This regulation does not contain reporting and recordkeeping requirements subject to approval by OMB under the Paperwork Reduction Act.

Classification

This final rule has been reviewed under Executive Order 12291 and the Secretary's Memorandum No. 1512–1 and has been classified as "not major". The final rule will not have an annual effect on the economy of $100 million or more, nor is it likely to result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions. This final rule will not affect the business community and will not result in significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

This final rule has also been reviewed in relation to the requirements of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354, 94 Stat. 1164, September 19, 1980). Robert E. Leard, Administrator of the Food and Nutrition Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This rule will implement that provision of the Food Stamp Act Amendments of 1982 which prohibits the use of cash for providing food assistance in the Commonwealth of Puerto Rico after September 30, 1983. The State and local welfare agencies will be affected to the extent that they administer the current program.

Background

The Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) provided for the conversion of the Food Stamp Program in the Commonwealth of Puerto Rico to a nutrition assistance grant effective July 1, 1982. Following publication of an interim rule on March 12, 1982 (at 47 FR 10767), a final rule implementing this legislative provision was published on July 27, 1982 (47 FR 32409).

The July 27, 1982 rulemaking required that the Commonwealth of Puerto Rico submit a plan of operation for fiscal years 1982 and 1983. The Commonwealth submitted its plan to provide nutrition assistance in the form of cash. The Department approved the plan and on July 1, 1982, the Commonwealth began issuing checks for food assistance.

During the deliberation of proposed legislation which eventually became the Food Stamp Act Amendments of 1982 (Pub. L. 97–253 enacted September 8, 1982), the House Agriculture Committee expressed concern "* * * that using cash for nutrition assistance in Puerto Rico would jeopardize the integrity of the food assistance program and would preclude close monitoring for potential abuse. The Committee, not wanting the Food Stamp Program to become an income transfer program in Puerto Rico or in any of the fifty States, declared its opposition to a block grant concept that cashes out food assistance." H.R. Rep. No. 97–687, 97th Cong, 2d Sess. p. 57 (1982). Additionally, the General Accounting Office's Inspector General testified that a cash-out system in the Commonwealth of Puerto Rico would make the prevention or detection of fraud difficult and perhaps impossible. (H.R. Rep. No. 97–687, p. 68). In response to these concerns, Section 184 of the Food Stamp Act Amendments of 1982 prohibits the use of cash for food assistance in the Commonwealth of Puerto Rico after September 30, 1983. In enacting this amendment Congress is not suggesting a return to coupons as the medium of nutrition assistance. Legislative history shows, however, that Congress believes that cash or checks are an unacceptable medium for this purpose in the Commonwealth of Puerto Rico or elsewhere (H.R. Rep. No. 97–687, p. 77).

In response to this legislative enactment the Department issued a proposed rulemaking on January 4, 1983 at 48 FR 259, that would require a noncash nutrition assistance program in the Commonwealth of Puerto Rico.

The Department received five comments on the proposal, two of which did not address specifically any of the regulatory provisions proposed. Most of the discussion in the other three comments addressed the provision of the January 4, 1983 proposal which would restrict cash change returned to a recipient from any nutrition assistance grant transaction to no more than 99 cents. This proposed restriction was based, in part, on current procedures in use in the Food Stamp Program.

One commenter suggested a liberalization of our proposed 99 cent restriction that would lead to substantially more cash returned from transactions. The commenter said that our 99 cent limitation would require that retailers issue credit slips for change in excess of 99 cents that could only be redeemed at the issuing store, thus requiring the household to return again to the same store. (If the recipient household does not redeem the credit slip the store would realize an unearned profit.)

However, throughout the legislative history Congressional intent has plainly been to provide nutrition assistance rather than a simple income supplement This philosophy, we believe, would support the stricter cash change limitation in our proposal. Accordingly this provision is retained intact in the final rule. Both of the other two commenters who addressed this issue favored the 99 cent limitation we proposed.

Implementation

In accordance with Section 184(b) of the Food Stamp Act Amendments of 1982, the provisions in this rulemaking would be implemented no later than October 1, 1983.

List of Subjects in 7 CFR Part 285

Accounting, Food assistance programs, Grant programs—agriculture, Grant programs—social programs, Intergovernmental relations, Puerto Rico, Technical assistance, Reporting and recordkeeping requirements.

Accordingly, 7 CFR Part 285 is amended as follows:

PART 285—PROVISION OF A NUTRITION ASSISTANCE GRANT FOR THE COMMONWEALTH OF PUERTO RICO

§ 285.2 [Amended]

1. In § 285.2(a), the first sentence is amended by inserting the word "noncash" before the words "food assistance" wherever it appears.

2. In § 285.3:

a. Paragraph (b)(3)(i) is amended by replacing the semicolon at the end of the paragraph with a period and by adding three new sentences after the period.

b. Paragraph (b)(3)(ii) is amended by replacing the period at the end of the paragraph with a semicolon.

c. A new paragraph (b)(3)(iii) is added.

The additions read as follows:

§285.3 Plan of operation.

* * * * *

(b) * * *

(3) * * *

(i) * * * This nutrition assistance shall be in the form of a noncash benefit that can only be used for obtaining food. Noncash nutrition assistance shall be in a form other than cash or checks. Alternate benefit delivery systems include but are not limited to: food vouchers, electronic funds transfer and food coupons;

* * * * *

(iii) If change in an amount of less than 1-dollar is required, the Commonwealth of Puerto Rico may allow eligible households to receive the change in cash. At no time may cash change be in excess of 99 cents. Food stores may not engage in a series of transactions of less than one dollar in order to provide the same customer an amount of cash change greater than the maximum 99 cents cash change allowed in one transaction.

BILLING CODE 3410-30-M

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 413]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period May 29–June 4, 1983. Such action is needed to provide for orderly marketing of fresh lemons for the period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: May 29, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona lemon crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910; 47 FR 50196), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on July 6, 1982. The committee met again publicly on May 24, 1983, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

PART 910—[AMENDED]

Section 910.713 is added as follows:

§ 910.713 Lemon Regulation 413.

The quantity of lemons grown in California and Arizona which may be handled during the period May 29, 1983, through June 4, 1983, is established at 300,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: May 26, 1983.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

Rural Electrification Administration

7 CFR Part 1701

Public Information; Appendix A—REA Bulletins; REA Specification for Filled Buried Wire, PE–54

AGENCY: Rural Electrification Administration, USDA.

ACTION: Final rule.

SUMMARY: REA is amending Appendix A—REA Bulletins (7 CFR Part 1701) by removing Bulletin 345–70, Specification

for Filled Buried Wire, PE–54. This action will eliminate problems associated with the frequent misapplication of the product and result in cost savings for both producers and users of wire and cable. This product was used in REA systems as a distribution wire and service drop. When station carrier was applied to long runs of this product, attenuation problems were encountered which rendered service difficult. Use of the superior products characterized in REA Bulletin 345–87, Specification for Filled Telephone Cables (PE–39) and REA Bulletin 345–86, Specification for Filled Buried Service Wire (PE–86), will permit borrowers to take advantage of the economies of service provided by station carrier which renders the product characterized by REA Bulletin 345–70, Specification for Filled Buried Wire (PE–54), obsolete.

EFFECTIVE DATE: May 19, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph M. Flanigan, Director, Telecommunications Engineering and Standards Division, Rural Electrification Administration, Room 2835, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 382–8663. The Final Impact Statement describing the options considered in developing this final rule and the impact of implementing each option is available on request from the above-named individual.

SUPPLEMENTARY INFORMATION: REA regulations are issued pursuant to the Rural Electrification Act as amended (7 U.S.C. 901 et seq.). This final action has been reviewed in accordance with Executive Order 12291, Federal Regulation. This action will not (1) have an annual effect on the economy of $100 million or more; (2) result in a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) result in significant adverse effects on competition, employment, investment or productivity and therefore has been determined to be "not major". This action does not fall within the scope of the Regulatory Flexibility Act and is not subject to OMB Circular A–95 review. This program is listed in the Catalog of Federal Domestic Assistance as 10.851—Rural Telephone Loans and Loan Guarantees.

Background

This product was used in REA systems both as a distribution wire and service drop. Because of attenuation problems with this wire in distribution systems using station carrier, we are deleting approval of this product which should resolve these problems. The removal of this specification affects manufacturers in a positive way by reducing their inventory costs associated with stocking of this wire. It affects REA borrowers in a way that our borrowers will be able to take full advantage of cost savings when using station carrier that otherwise would be negated by keeping this product.

A Notice of Proposed Rulemaking was published in the **Federal Register** on February 1, 1983, Volume 48, Number 22, page 4478. However, no public comments were received in response to the proposal.

In view of the above, Appendix A—REA Bulletins is amended by removing REA Bulletin 345–70, REA Specification for Filled Buried Wire, PE–54.

Indexing Terms: As required by 1 CFR 18.20, the following are the indexed terms and list of subjects:

List of Subjects in 7 CFR Part 1701

BILLING CODE 3410–15–M

Farmers Home Administration

7 CFR Part 1980

General, Business and Industrial Loan Program

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations pertaining to the Business and Industrial (B&I) Loan Program. The intended effect of this action is to change an Administrative procedure to more effectively administer the program. This action is taken in order to provide certain redelegation of program authority to the State Directors in their administration of the program.

EFFECTIVE DATE: May 27, 1983.

FOR FURTHER INFORMATION CONTACT: Thomas D. Campbell, Business and Industry Loan Division, South Agriculture Building, Washington, D.C. 20250 telephone (202) 475–4100.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA procedures established in Secretary's Memorandum 1512–1 which implements Executive Order 12291 and has been determined to be exempt from those requirements because it involves only internal agency management related to program authorities delegated to FmHA State Directors. It is the policy of the department that rules relating to public property, loans, grants, benefits or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. However, this amendment is not published for proposed rulemaking because it affects agency administrative procedures only and immediate implementation is necessary for effective administration of the B&I program, therefore publication for prior public comment is unecessary and inpractical. Sections 1980.469 and 1980.471 Administrative of Subpart E of Part 1980, Chapter XVIII, Title 7, Code of Federal Regulations is amended to reflect the redelegation of separate written program authorities for each state in this regulation. The following specific changes are being made:

Section 1980.469 Loan Servicing

Administrative: C.2. is amended to authorized State Directors to approve B&I Guaranteed loan servicing actions within their loan servicing authority.

Section 1980.471 Liquidation. (See § 1980.64)

Administrative: C. is amended to provide State Directors approval authority as delegated for guaranteed loan liquidation plans. E. is amended to authorized State Directors to approve as delegated final reports of loss from the lender. F. is amended to require that all reviews for final loss claims which are in excess of the approval for which the State Director has been delegated final loss settlement authority will be submitted to the National Office prior to the State Director's approval of the claim.

In addition, § 1980.500 is added to show the OMB control number.

This document has been reviewed in accordance with Subpart G of Part 1901, "Environmental Impact Statements." It is the determination of FmHA that the action does not constitute a major Federal action significantly affecting the quality of the human environment and, in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190 an Environmental Impact Statement is not required.

List of Subjects in 7 CFR Part 1980

Loan programs—business and industry, Rural development assistance, Rural areas.

PART 1980—[AMENDED]

Accordingly, Subpart E of Part 1980 is amended as follows:

1. In § 1980.469, under the heading "Administrative," paragraphs C. 2. (a) through (f) are removed and paragraph C. 2. is revised to read as follows:

§ 1980.469 Loan servicing.

* * * * *

Administrative

* * * * *

C. State Director Authorities:

* * * * *

2. The State Director may approve B&I guaranteed loan servicing actions as authorized in separate written approval authorities issued in accordance with Subpart A of Part 1901 of this chapter.

* * * * *

2. In § 1980.471, under the heading "Administrative," paragraphs C, E and F are revised to read as follows:

§ 1980.471 Liquidation. (see § 1980.64)

Administrative

* * * * *

C. State Directors are authorized to approve lender liquidation plans as authorized in separate written approval authorities issued in accordance with subpart A of part 1901 of this chapter.

* * * * *

E. *Paragraph XII E 2.* State Directors are authorized to approve final reports of Loss from the lender as authorized in separate written approval authorities issued in accordance with Subpart A of Part 1901 of this chapter. The State Director will submit to the Finance Office for payment any loss claims of the lender on Form FmHA 449–30, "Loan Note Guarantee Report of Loss." The Finance Office forwards loss payment checks to the State Director for delivery to Lender. When a loss claim is involved on a particular loan guarantee, ordinarily one Estimated Loss Report will be authorized. Only one final Report of Loss will be authorized. A final Form FmHA 449–30 must be filed with the Finance Office at the completion of all liquidations. Finance Office will use this form to close out the account.

F. *Paragraph XII E 3.* Final loss payments will be made within the 60 days required but only after a review by FmHA to assure that all collateral for the loan has been properly accounted for and liquidation expenses are reasonable and within approved limits. State Directors are responsible to see that such reviews are accomplished by the State within 30 days and final loss claims in excess of the State Director's approval authority are forwarded to be accepted or otherwise resolved by the Director, Business and Industry Division within the 60-day period. Community and Business Program Chiefs (C&BP), Business and Industry Chiefs or Loan Specialists will conduct such reviews. The State Director may request National Office assistance in the conduct of any review. All reviews for final loss claim in excess of the State Director's approval authority (See Subpart A Part 1901 of this chapter), will be submitted to the National Office, Business and Industry Division for concurrence prior to the State Director's approval of the claim. Close scrutiny of liquidation proceeds and their application in accordance with lien priorities is required. Before final loss payments are approved and to assist in the required review, the C&BP Chiefs, B&I Chief, or Loan Specialist will prepare a narrative history of the guarantee transaction which will serve as the summary of occurrence which led to failure of the borrower and actions taken to maximize loan recovery. The original of this report will be filed in the loan case file. A copy of this report together with the review of the final loss claim will be included in the material sent to the Director, B&I Division, for review prior to approval of final loss payments.

Correction

In FR Doc. 83–13804 beginning on page 22897 in the issue of Monday, May 23, 1983, make the following correction:

On page 22899, column one, amendment two, § 381.78(b), line one, "to" should read "of."

BILLING CODE 1505–01–M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Guidance for Implementation of the Standard Review Plan Rule

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Final Guidance for the Implementation of Standard Review Plan (SRP) Rule.

SUMMARY: The Nuclear Regulatory Commission staff's recommended "Guidance for Implementation of 10 CFR 50.34(g)" (NUREG–0906) was published in the **Federal Register** on October 22, 1982 (47 FR 47019). The **Federal Register** notice invited comments, suggestions, or recommendations on the content of the proposed guidance. The comment period expired on December 20, 1982. Ten comments were received. After consideration of these comments and other factors involved, the NRC staff has amended the guidance proposed for public comment to permit applicants more flexibility in determining where to locate their SRP evaluation within their Safety Analysis Reports (SAR).

EFFECTIVE DATE: June 27, 1983.

ADDRESS: Copies of the Final Guidance, related background material and comments received on the proposed rule are available for inspection at the Commission's Public Document Room at 1717 H Street, NW., Washington, D.C. Single copies may be obtained on request from the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Document Control.

FOR FURTHER INFORMATION CONTACT: Robert A. Purple, Deputy Director, Division of Licensing, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, (301) 492–7980.

SUPPLEMENTARY INFORMATION:

[NUREG–0906]

Guidance for Implementation of 10 CFR 50.34(g)

I. Background

On March 18, 1982, the NRC published a final rule in the **Federal Register** (47 FR 11651) entitled "Conformance with the Standard Review Plan (SRP)." This rule requires certain applicants to include in their application an evaluation of all design features, analytical techniques, and procedural methods proposed for a nuclear power facility that are different from those given in the acceptance criteria of the Standard Review Plan (NUREG–0800).

The facilities covered under this rule are those for which an application for an operating license, construction permit, manufacturing license, or preliminary or final design approval for standard plants is docketed after May 17, 1982. The affected applicants are required to provide an evaluation of the facility

against the acceptance criteria of the SRP in effect on May 17, 1982 (NUREG–0800) or the most recent revision of the SRP in effect six months prior to the docketing date, whichever is later. This rule and the staff's related guidance is not intended to apply to the FSAR updates that are required by 10 CFR 50.71(e).

In particular, the applicants are required to identify and describe all differences in design features, analytical techniques, and procedural methods proposed and those corresponding features, techniques, and methods identified in the SRP acceptance criteria. Where such differences exist, an evaluation is required that discusses how the proposed alternatives provide an acceptable method of complying with the NRC regulations which underlie the corresponding SRP acceptance criteria. The SRP is not a substitute for the regulations and compliance with it is not required. It defines methods that are acceptable to the staff for satisfying the relevant regulations and is used by the staff in its evaluation of whether an applicant meets the requirements of NRC regulations.

In the notice accompanying the rule, the Commission indicated that guidance documents being developed by the staff to implement the rule would be published for public comment. Ten comments were received. Five of the comments received stated the commenter's position that the Rule itself was inappropriate. These comments did not relate to the staff's guidance contained in NUREG–0906 but rather, are related to the already effective rule. Four comments were received that stated that the staff should allow flexibility in scheduling and location of the SRP comparisons within the SAR to prevent delay of applications that have been substantially completed. These comments were considered and the guidance document was modified to permit the applicant to determine where the SRP comparison should be located within the FSAR.

The Commission has amended the guidelines as published for public comment to permit some flexibility for applicants in the manner in which they comply with 10 CFR 50.34(g). These changes to the guidelines recognize the fact that for the near future most of the operating license applicants, to whom this rule applies, have already submitted or prepared their 10 CFR 50.34(g) compliance submittal, and would require a significant amount of rework to put their submittal in the format suggested in the version of NUREG–0906 published for comment.

Two comments related to the need for clarification of the applicability of the rule to the FSAR updates required by 10 CFR 50.71(e). The guidance was modified to clarify the staff's intent that the guidance does not apply to 50.71(3) updates. Two commenters stated that the proposed guidance is adequate and appropriate.

II. Guidance for Implementation of 10 CFR 50.34(g), NUREG–0906

This document provides guidance for describing the identified differences from the SRP and provides example evaluations of such differences. The staff considers these examples to be acceptable in technical content and level of detail if all other related technical issues have been resolved to the satisfaction of the staff. These particular examples were chosen to present a range of types of differences and acceptable evaluations. They are not intended to circumscribe an applicant in the type or scope of evaluation to be presented. Applicants are encouraged to meet with the staff during the preparation of their application to resolve any questions concerning the SRP acceptance criteria. It should be noted that while the particular examples given may be applicable and acceptable in a number of specific applications, they may not be applicable or acceptable for all applications because of specific design or site characteristics.

Applicants should include the evaluation required by the SRP Rule in Chapter 1 of their Safety Analysis Reports (SAR) at the time of tendering the SAR. An SAR is required to be included in applications by 10 CFR 50.34 (a) or (b) of the Commission regulations.

Guidance for the preparation of SARs is currently available in Regulatory Guide (RG) 1.70, "Standard Format and Content of Safety Analysis Reports for Nuclear Power Plants—LWR Edition," (Revision 3). A future revision of Regulatory Guide 1.70 will identify the specific section of the SAR in which the information required by the SRP rule is to be included. Section 1.8 of Chapter 1 of RG 1.70 currently calls for a description of the extent to which an applicant intends to comply with all applicable regulatory guides and any proposed exceptions to the regulatory positions in those guides. Until RG 1.70 is revised, applicants should retitle Section 1.8 "Conformance with the Standard Review Plan," and should include therein the information described below, rather than that which is presently called for in RG 1.70.

In Section 1.8 of the SAR, applicants should identify and describe, preferably in tabular format, all differences in design features, analytical techniques, and procedural measures proposed for a facility and those corresponding features, techniques, and measures given in the SRP acceptance criteria. The information should include: (1) Identification of the relevant section of the SRP; (2) a brief summary of the specific SRP criteria for which a difference exists; (3) a summary description of the nature of the difference; and (4) a page number, subsection, or tabular reference, that identifies where each proposed alternative providing an acceptable method of complying with the applicable regulation is located.

The specific acceptance criteria in the SRP are presented as Subsection II of each SRP section. Subsection II also identifies the underlying regulations for that feature of the facility. Applicants are not required to address the other subsections of each SRP section. These other subsections (Areas of Review, Review Procedures, Evaluation Findings, Implementation, and References) are intended for use by the staff in conducting its review, and provide a basis on which the staff concludes that the specific feature, technique, or measure meets the acceptance criteria. Applicants may find the material in these other subsections useful in identifying and evaluating differences from the specific acceptance criteria.

The "evaluation" required by § 50.34(g)(2) consists of (1) a review of the proposed design against the applicable specific SRP acceptance criteria, with the results of the review (i.e., any differences) being identified and described, preferably in tabular format, in Section 1.8 of the SAR as discussed above; and (2) a discussion of each difference in the applicable SAR section that presents the reasons for concluding that the proposed difference is an acceptable method of complying with the regulations. The specific SRP acceptance criteria are guidelines that define a method acceptable to the staff for satisfying the relevant regulations. They are not requirements per se, and other methods can be found acceptable by the staff as long as compliance with the underlying regulations is demonstrated. In some instances, however, the specific SRP acceptance criteria are identical to the requirements of the regulations. For these situations the applicant should include in the evaluation required by § 50.34(g)(2) a discussion that represents the reasons for concluding that the proposed difference is acceptable from a safety standpoint. In addition, an application

for an exemption from the regulations providing all the information needed to make the findings required under §50.12 of the Commission regulations should be separately submitted by the applicant.

The following examples show how the above information should be presented:

1.8 *Differences From SRP Acceptance Criteria*

(Applicant) has reviewed the (plant name) and concludes that it will meet all applicable specific acceptance criteria in the Standard Review Plan (NUREG–0800), except as noted below. The cited text references in the following table include discussions that describe the basis by which (applicant) concludes that the underlying regulatory requirements have been satisfied in those instances for which there are differences from the SRP.

TABLE 1.8.1.—SUMMARY OF DIFFERENCES FROM SRP

SRP section	Specific SRP acceptance criteria	Summary description of difference	SAR section where discussed
5.3.1 (Rev. 1)	II.6.c. (1)—Surveillance specimens	Surveillance specimens not taken from actual production plates.	5.3.1.6.2
6.2.4 (Rev. 2)	II. c. and d.—Containment isolation provisions for CRD withdraw lines.	Manually operated containment isolation valves.	6.2.4.3.2
15.4.6	II.5.b.—Operator action, in a boron dilution event during hot standby, minimum time 15 minutes.	Operator action within 13 minutes	15.4.6.2

Discussion in SAR Section [1]

5.3.1.6.2 *RPV Material Surveillance Test Specimens*

(*excerpt* [2]) * * * Acceptance criterion II.6.c.(1) of SRP Section 5.3.1 provides that the material for surveillance test specimens representing the reactor vessel beltline welds be prepared from actual production plates. This criterion is derived from Appendices G and H to 10 CFR part 50, which requires that surveillance specimens be taken from locations alongside fracture toughness test specimens and that fracture toughness specimens for the reactor vessel beltline region be taken directly from excess material and welds in the vessel shell courses.

The welding test specimens for (plant name) will be prepared from plates of the same "p" number and, same filler material, as those used in the corresponding actual shell material. The welding conditions will be the same for the test specimens and the production welds, and the qualification procedures conform to the requirements of NB 4330 of the ASME Code.

Based on these similarities between the belt line region test samples and production materials, the technical requirements of Appendix H are satisifed since this provides equivalent test specimens for the material surveillance program for the reactor pressure vessel.[3]

6.2.4.3.2 *Containment Isolation Design Basis for CRD Withdraw Lines*

(*excerpt*) * * * In SRP Section 6.2.4, acceptance criterion II.d. provides, in part, that the isolation provisions for lines used in systems needed for safe shutdown of the plant that penetrate primary containment and are part of the reactor coolant pressure boundary normally consist of one automatic isolation valve inside and one automatic isolation valve outside of containment. Acceptance criteria II.c. states the remote-manual valves may be used in lieu of automatic valves for such lines, provided that provisions are made to detect possible leakage from the lines outside containment. The underlying regulation for these criteria is GDC 55 which requires such containment isolation provisions unless it can be demonstrated that other provisions are acceptable on some other defined bases.

The Control Rod Drive (CRD) withdraw lines penetrate the primary containment and communicate with the reactor coolant pressure boundary (RCPB) through the CRD assemblies. However, as can be seen in Figure 4.6 the CRD assemblies are composed of a series of seals and mechanical restrictions, such that the CRD withdraw lines represent a unique kind of extension of the RCPB as defined in 10 CFR 50.2(v). Because of the unique function and features of these lines the usual automatic or remote-manual isolation valves are not provided.

Specifically, contrary to the SRP acceptance criteria described above, the CRD withdraw lines are provided with manually operated isolation valves as described in table 6.2.4–X in lieu of automatic or remote-manual isolation valves, and there are no specific provisions for detection of leakage from these lines outside the containment. Automatic or remote-manual isolation valves are not used since the CRD system performs an essential safety function and the addition of automatic isolation capability could compromise that safety function. Moreover, since leakage from any break in one of the CRD withdraw lines is within the capabilities of the reactor coolant makeup systems (Feedwater and RCIC), the risk associated with having an automatic or remote-manual isolation valve fail closed in these lines before achieving a successful reactor scram in emergency situations would exceed the risk associated with not isolating such a line should it rupture. In addition, the CRD withdraw lines are designed to high quality standards as described in Section 3.2.2. and the preservice inspection and surveillance inspections described in Section 4.6.X and the general leakage monitoring capabilities described in Section 5.2.5–X will assure that the likelihood and consequences of breaks in the CRD withdraw lines are small. The leakage monitoring capabilities referred to include: (a) CRD high temperature alarms; (b) CRD position indication; (c) level instruments in the secondary containment sump; and (d) area radiation monitors that indicate an alarm in the control room. Should primary system water begin flowing out a broken CRD withdraw line, these monitors will provide the operator with timely information that would permit effective corrective actions.

The design features described above constitute an "other defined basis" of acceptability of the containment isolation provisions for the CRD withdraw lines, as permitted by GDC 55.[4]

---

[1] For comparisons submitted within 90 days after the publication of this final guidance, the applicant may locate the evaluation of alternative methods of meeting the SRP in Chapter 1 of the SAR, or in an Appendix to the SAR, rather than rewriting the affected SAR section.

[2] In this and the other examples that follow, the material presented is an *excerpt* from a section of the SAR assumed to have been developed in accordance with Regulatory Guide 1.70. Thus, the examples have been prepared on the assumption that complete and adequate information on technically related features of the plant is available in the SAR provided by the applicant.

[3] Note that an exemption to the regulation (Appendix H to 10 CFR Part 50) would be required in this instance, and that a request for the exemption should be submitted separately by the applicant.

[4] Note that in this instance an exemption to the regulation is not required.

15.4.6.2 *Boron Dilution Events During Hot Standby*

(*excerpt*) * * * In Section 15.4.6, acceptance criterion II.5.b specifies that if operator action is required during hot standby to terminate a transient resulting from a boron dilution event, a minimum time period of 15 minutes must be available between the time the first alarm annunciates to alert the operator, and the time that all shutdown margin is lost and criticality occurs. The underlying regulatory requirements for this acceptance criterion are GDC 10, 15 and 26 which collectively require that the reactor core, reactor coolant and associated auxiliary systems, reactivity control systems and the reactor protection system be designed with appropriate margin to assure that specified acceptable fuel design limits and the design conditions of the reactor coolant pressure boundary are not exceeded during any condition of normal operation, including anticipated operational occurrences.

The technical specifications for the (plant name) will require that the reactor be shutdown by at least 2% k/k (i.e., K_{eff}=0.98) while in hot standby. Our analysis of the most limiting boron dilution event during this operational mode, described in Section 15.2.4, assumes an initial reactor shutdown condition of this amount. It was also assumed that all control rods are withdrawn in order to maximize the initial boron concentration and subsequent dilution effects. Approximately 13 minutes after the dilution begins, a high source range count alarm, which is set at twice the initial source level, would occur. Our analysis then shows that 13.4 minutes would be available for the operator to take appropriate action to terminate the boron dilution event between the time of annunciation of this alarm and the time of reaching criticality. The difference between the calculated minimum operator action time to terminate this event (13.4 min.) and the SRP acceptance criterion (15 min.) is small, and the reliability of the source range count alarms is high since they are redundant and of high quality, as described in Section 7.4.1.X.

We conclude, therefore, that for the most limiting boron dilution event during hot standby, the relevant portions of GDC 10, 15 and 25 are satisfied since fuel damage limits and the design conditions of the reactor coolant pressure boundary will not, with considerable margin, be exceeded during this event.

III. Submittals Made Before the NRC Guidance Document Becomes Effective

Several applicants have indicated that their 10 CFR 50.34(g) submittals have been prepared in a format other than that suggested by the NRC staff for comment on October 22, 1982. Some of these applicants had already submitted their comparison prior to the publication of NRC guidance, and others have completed their comparison during the comment period on NUREG–0906.

To assure that following the staff's guidance does not delay an applicant in providing the staff with the required comparison, the NRC staff has concluded that it is acceptable for applicants, whose 10 CFR 50.34(g) comparison is submitted within 90 days after the publication of this final guidance, to locate their evaluation of how alternative methods of meeting the SRP in Chapter 1 of the SAR, or in an Appendix to the SAR, rather than in each affected SAR section.

Paperwork Reduction Act Statement

This final Guidance Document does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3401 et seq.). Existing requirements were approved by the Office of Management and Budget approval number 3150–0011.

Dated at Washington, D.C., this 19th day of May 1983.

For the Nuclear Regulatory Commission.

William J. Dircks,

Executive Director for Operations.

BILLING CODE 7590–01–M

DEPARTMENT OF COMMERCE

Economic Development Administration

13 CFR Part 305

Public Works and Development Facilities Program

Correction

In FR Doc. 83–13954, beginning on page 23154 in the issue of Monday, May 23, 1983, make the following corrections.

On page 23155, third column, § 305.5(b)(3)(iv) should have read:

* * * * *

(b)* * *

(3) The maximum grant rate of funds granted under authority of title I of the Act for projects in designated areas, determined by relative needs, is a follows:

* * * * *

(iv) Projects located in redevelopment areas designated under section 401(a)(6) of the act but which cannot meet the requirement of paragraph (b)(3)(ii) of this section will be:

(A) The annual average unemployment rate for the preceding 12 months is 12 percent or higher	80
(B) The annual average unemployment rate for the preceding 12 months is 10.5 percent to 11.9 percent	70
(C) The annual average unemployment rate for the preceding 12 months is 9 percent to 10.4 percent	60
(D) The annual average unemployment rate for the preceding 12 months is less than 9 percent	50

This amendment will not affect projects authorized prior to May 23, 1983.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 282

[NGPA Docket No. RM79–14]

Incremental Pricing Regulations Implementing the Incremental Pricing Provision of the Natural Gas Policy Act of 1978

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order Prescribing Incremental Pricing Thresholds.

SUMMARY: The Director of the Office of Pipeline and Producer Regulation is issuing the incremental pricing acquisition cost thresholds prescribed by Title II of the Natural Gas Policy Act and 18 CFR 282.304. The Act requires the Commission to compute and publish the threshold prices before the beginning of each month for which the figures apply. Any cost of natural gas above the applicable threshold is considered to be an incremental gas cost subject to incremental pricing surcharging.

EFFECTIVE DATE: June 1, 1983.

FOR FURTHER INFORMATION CONTACT: Kenneth A. Williams, Federal Energy Regulatory Commission, 825 N. Capitol Street, NE., Washington, D.C. 20426, (202) 357–8500.

Issued May 24, 1983.

In the matter of Publication of Prescribed Incremental Pricing Acquisition Cost Threshold of the NGPA of 1978; Docket No. RM79–14; Order of the Director, OPPR.

Section 203 of the NGPA requires that the Commission compute and make available incremental pricing acquisition cost threshold prices

prescribed in Title II before the beginning of any month for which such figures apply.

Pursuant to that mandate and pursuant to §375.307(1) of the Commission's regulations, delegating the publication of such prices to the Director of the Office of Pipeline and Producer Regulation, the incremental pricing acquisition cost threshold prices for the month of June 1983 is issued by the publication of a price table for the applicable month.

Mozzarella Cheese and Low-Moisture Mozzarella Cheese; Amendment of Standards of Identity; Confirmation of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Final rule; confirmation of effective date.

SUMMARY: The Food and Drug Administration (FDA) is confirming the effective date for compliance with the amendments to the standards of identity for mozzarella cheese and low-moisture mozzarella cheese and, by cross-reference, part-skim mozzarella cheese and low-moisture part-skim mozzarella cheese, to permit the addition of safe and suitable artificial coloring during the manufacturing process.

DATES: Effective July 1, 1985, for all affected products initially introduced or initially delivered for introduction into interstate commerce on or after this date. Voluntary compliance may have begun March 28, 1983.

FOR FURTHER INFORMATION CONTACT: Eugene T. McGarrahan, Bureau of Foods (HFF-215), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-245-1155.

SUPPLEMENTARY INFORMATION: In the Federal Register of January 25, 1983 (48 FR 3363), FDA issued a final rule amending the standards of identity for mozzarella cheese (21 CFR 133.155) and low-moisture mozzarella cheese (21 CFR 133.156) and, by cross-reference, part-skim mozzarella cheese (21 CFR 133.157) and low-moisture part-skim mozzarella cheese (21 CFR 133.158). Any person adversely affected by the regulation could have, at any time on or before February 24, 1983, filed written objections to the final regulations and requested a hearing on the specific provisions to which there were objections. No objections or requests for a hearing were received.

Cheese, Food standards.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 401, 701(e), 52 Stat. 1046 as amended, 70 Stat. 919 as amended (21 U.S.C. 341, 371(e))) and under authority delegated to the

Commissioner of Food and Drugs (21 CFR 5.10), notice is given that the effective date for compliance with the standards of identity for mozzarella cheese (21 CFR 133.155) and low-moisture mozzarella (21 CFR 133.156) and, by cross-reference, part-skim mozzarella cheese (21 CFR 133.157) and low-moisture part-skim mozzarella cheese (21 CFR 133.158) as amended in the **Federal Register** of January 25, 1983 (48 FR 3363) is July 1, 1985. Voluntary compliance may have begun March 28, 1983.

Dated: May 19, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

---

21 CFR Part 133

[Docket No. 77N-0331]

Nine Natural Cheeses; Revision Based on International Standards of Identity; Confirmation of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Final rule; confirmation of effective date.

SUMMARY: The Food and Drug Administration (FDA) is confirming the effective date for compliance with the amended "Definitions" section and the new "Methods of Analysis" section for all standardized cheeses and related cheese products. FDA is also confirming the revision of the standards of identity for nine natural cheeses and appropriate cross-referenced standards. The revision brings the standards into closer conformance with the applicable recommended international Codex standards.

DATES: Effective July 1, 1985, for all affected products initially introduced or initially delivered for introduction into interstate commerce on or after this date. Voluntary compliance may have begun March 22, 1983.

FOR FURTHER INFORMATION CONTACT: Eugene T. McGarrahan, Bureau of Foods (HFF-215), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-245-1155.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of January 21, 1983 (48 FR 2736), FDA issued a final rule amending the "Definitions" section (21 CFR 133.3), establishing a new "Methods of Analysis" section (21 CFR 133.5), and revising the standards of identity for blue cheese (21 CFR 133.106); cheddar cheese (21 CFR 133.113); edam cheese (21 CFR 133.138); gouda cheese (21 CFR 133.142); gruyere cheese (21 CFR 133.149); limburger cheese (21 CFR 133.152); provolone cheese (21 CFR 133.181); samsoe cheese (21 CFR 133.185); swiss and emmentaler cheese (21 CFR 133.195); and by cross-reference, cheddar cheese for manufacturing (21 CFR 133.114) low sodium cheddar cheese (21 CFR 133.116), and swiss cheese for manufacturing (21 CFR 133.196). Any person who would be adversely affected by the regulations could have, at any time on or before February 22, 1983, filed written objections to the final regulations and requested a hearing on the specific provisions to which there were objections. No objections or requests for a hearing were received.

List of Subjects in 21 CFR Part 133

Cheese, Food standards.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 401, 701(e), 52 Stat. 1046 as amended, 70 Stat. 919 as amended (21 U.S.C. 341, 371(e))) and under authority delegated to the Commissioner of Food and drugs (21 CFR 5.10), notice is given that the effective date for compliance with §§ 133.3, 133.5, 133.106, 133.113, 133.114, 133.116, 133.138, 133.142, 133.149, 133.152, 133.181, 133.185, 133.195, and 133.196 as published in the **Federal Register** of January 21, 1983 (48 FR 2736) and as editorially corrected in the **Federal Register** of March 18, 1983 (48 FR 11426) is July 1, 1985. Voluntary compliance with these regulations may have begun on March 22, 1983.

Dated: May 19, 1983.

21 CFR Part 178

[Docket No. 82F-0347]

Indirect Food Additives: Adjuvants, Production Aids, and Sanitizers; Calcium Bis[Monoethyl(3,5-Di-Tert-Butyl-4-Hydroxybenzyl)Phosphonate]

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of calcium bis[monoethyl(3,5-di-*tert*-butyl-4-hydroxybenzyl)phosphonate] as an antioxidant and/or stabilizer without temperature limitation in certain olefin polymers intended to contact food. This action responds to a petition filed by Ciba-Geigy Corp.

DATES: Effective May 27, 1983; objections by June 27, 1983.

ADDRESS: Written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Julia L. Ho, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a notice in the **Federal Register** of December 17, 1982 (47 FR 56556), FDA announced that a food additive petition (FAP 2B3668) had been filed by the Ciba-Geigy Corp., Hawthorne, NY 10532, proposing that Part 178 (21 CFR Part 178) of the food additive regulations be amended to provide for the expanded use of calcium bis[monoethyl(3,5-di-*tert*-butyl-4-hydroxybenzyl)phosphonate] as an antioxidant and/or stabilizer for polypropylene, high-density polyethylene complying with § 177.1520(c), items 2.1, 2.2, and 2.3; and olefin copolymers complying with § 177.1520(c), items 3.1 and 3.2 intended for food-contact applications without use temperature limitations.

FDA has evaluated the data in the petition and concludes that the proposed food additive use is safe and that the regulations should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Bureau of Foods (address above) by appointment with the information contact person listed above. As provided in § 171.1(h)(2) (21 CFR 171.1(h)(2)), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has previously considered the potential environmental effects of this rule as announced in the notice of filing in the **Federal Register**. No new information or comments have been received that would alter the agency's previous determination that there is no significant impact on the human environment and that an environmental impact statement is not required.

List of Subjects in 21 CFR Part 178

Food additives; Food packaging; Sanitizing solutions.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Foods (21 CFR 5.61 as revised February 4, 1983; 48 FR 5251), Part 178 is amended in § 178.2010(b) by revising the entry for calcium bis[monoethyl(3,5-di-*tert*-butyl-4-hydroxybenzyl)phosphonate] as follows:

PART 178—INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS

§ 178.2010 Antioxidants and/or stabilizers for polymers.

* * * * *

(b) * * *

Substances	Limitations
* * *	* * *
Calcium bis[monoethyl(3,5-di-*tert*-butyl-4-hydroxybenzyl)phosphonate] (CAS Reg. No. 65140–91–2).	For use only: 1. At levels not to exceed 0.25 percent by weight of polypropylene that complies with § 177.1520(c) of this chapter, items 1.1, 1.2, and 1.3. 2. At levels not to exceed 0.2 percent by weight of polyethylene and olefin copolymers that comply with § 177.1520(c) of this chapter, items 2.1, 2.2, 2.3, 3.1, and 3.2 that have a density greater than 0.94 gram per cubic centimeter.
* * *	* * *

Any person who will be adversely affected by the foregoing regulation may at any time on or before June 27, 1983 submit to the Dockets Management Branch (address above) written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this regulation. Received objections may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. May 27, 1983.

(Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C 321(s), 348))

Dated: May 17, 1983.

BILLING CODE 4160-01-M

21 CFR Part 446

[Docket No. 83N–0149]

Antibiotic Drugs; Doxycycline Hyclate Tablets

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the antibiotic drug regulations to provide for the inclusion of accepted standards for a new strength of doxycycline hyclate tablet. The manufacturer has supplied sufficient data and information to establish its safety and efficacy.

DATES: Effective May 27, 1983; comments, notice of participation, and request for hearing by June 27, 1983; data, information, and analyses to justify a hearing by July 26, 1983.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Joan M. Eckert, National Center for Drugs and Biologics (HFN–140), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4290.

SUPPLEMENTARY INFORMATION: FDA has evaluated data submitted in accordance with regulations promulgated under section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357), as amended, with respect to a request for approval of a new strength (50 milligrams) of doxycycline hyclate tablet. The agency has concluded that the data supplied by the manufacturer concerning this antibiotic drug are adequate to establish its safety and efficacy when the drug is used as directed in the labeling and that the regulations should be amended in Part 446 (21 CFR Part 446) to provide for the inclusion of accepted standards for the product.

The agency has determined pursuant to 21 CFR 25.24(b)(22) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 446

Antibiotics, Tetracycline.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 507, 701 (f) and (g), 52 Stat. 1055–1058 as amended, 59 Stat. 463 as amended (21 U.S.C. 357, 371 (f) and (g))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), § 446.120c is amended by revising the second sentence in paragraph (a)(1) to read as follows:

PART 446—TETRACYCLINE ANTIBIOTIC DRUGS

§ 446.120c Doxycycline hyclate tablets.

(a) * * *

(1) * * * Each tablet contains doxycycline hyclate equivalent to 50 or 100 milligrams of doxycycline. * * *

* * * * *

This regulation announces standards that FDA has accepted in a request for approval of an antibiotic drug. Because this regulation is not controversial and because when effective it provides notice of accepted standards, notice and comment procedure and delayed effective date are found to be unnecessary and not in the public interest. The amendment, therefore, is effective May 27, 1983. However, interested persons may, on or before June 27, 1983, submit written comments on this regulation to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number in brackets in the heading of this document. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may file objections to it and request a hearing. Reasonable grounds for the hearing must be shown. Any person who decides to seek a hearing must file (1) on or before June 27, 1983, a written notice of participation and request for hearing, and (2) on or before July 26, 1983, the data, information, and analyses on which the person relies to justify a hearing, as specified in § 430.20 (21 CFR 430.20). A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing

that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for hearing that no genuine and substantial issue of fact precludes the action taken by this order, or if a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgment against the person(s) who request(s) the hearing, making findings and conclusions and denying a hearing. All submissions must be filed in three copies, identified with the docket number appearing in the heading of this order and filed with the Dockets Management Branch.

The procedures and requirements governing this order, a notice of participation and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and grant or denial of a hearing are contained in § 430.20.

All submissions under this order, except for data and information prohibited from public disclosure under 221 U.S.C. 331(j) or 18 U.S.C 1905, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall be effective May 27, 1983.

(Secs. 507, 701 (f) and (g), 52 Stat. 1055–1056 as amended, 59 Stat. 463 as amended (21 U.S.C. 357, 371 (f) and (g)))

Dated: May 19, 1983.

James C. Morrison,

Assistant Director for Regulatory Affairs.

[FR Doc. 83–14164 Filed 5–26–83; 8:45 am]

BILLING CODE 4160–01–M

---

21 CFR Part 1220

[Docket No. 80N–0185]

Regulations Under the Tea Importation Act; Tea Standards

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is announcing the establishment of tea standards for the year beginning May 1, 1983, and ending April 30, 1984. The tea standards are provided for under the Tea Importation Act.

DATES: Effective May 1, 1983; comments by June 27, 1983.

ADDRESS: Written comments may be sent to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: John C. Taylor, Bureau of Foods (HFF–310), Food and Drug Administration, 200 C St. SW., Washington, D.C. 20204; 202–245–1186.

SUPPLEMENTARY INFORMATION: This amendment is based on the recommendation of the Board of Tea Experts (the Board), which is comprised of tea experts drawn from the tea trade, who are representative of the trade as a whole, and FDA. The standards are selected each year, under the provisions of the Tea Importation Act (21 U.S.C. 41), from tea samples submitted by members of the tea trade to the Board. The Board selects one tea to represent the standard for each major type of tea imported into the United States. In picking a standard, the Board tries to select one at least equal in quality to that of the previous year.

The agency has determined pursuant to 21 CFR 25.24(b)(13) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required. Because this provision is issued as a final rule without being preceded by general notice of proposed rulemaking, a final regulatory analysis under section 604 of the Regulatory Flexibility Act (94 Stat. 1167) is not required. In any event, the rule will not have a significant economic impact on a substantial number of small entities. Only teas that meet or exceed the standards will be permitted entry into the United States. Accordingly, the agency certifies that a regulatory flexibility analysis is not required. In accordance with Executive Order 12291, FDA has carefully analyzed the economic effects of this rule, and the agency has determined that it is not a major rule as defined by that Order.

List of Subjects in 21 CFR Part 1220

Tea Importation Act, Tea standards.

Therefore, under the authority vested in the Secretary of Health and Human Services by the Tea Importation Act (secs. 3, 10, 29 Stat. 605, 607, 41 Stat. 712, 54 Stat. 1237, 67 Stat. 631 (21 U.S.C. 43, 50)) and under the authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) Part 1220 is amended by revising § 1220.40(a) to read as follows:

PART 1220—REGULATIONS UNDER THE TEA IMPORTATION ACT

§ 1220.40 Tea standards.

(a) Samples for standards of the following teas, prepared, identified, and submitted by the Board of Tea Experts on March 1, 1983, are hereby fixed and established as the standards of purity, quality, and fitness for consumption under the Tea Importation Act for the year beginning May 1, 1983, and ending April 30, 1984:

(1) Formosa Oolong.

(2) Black Tea (for Argentina teas).

(3) Black Tea (for all teas except those from China, Formosa (Taiwan), Iran, Japan, Russia, Turkey, and Argentina).

(4) Black Tea (for teas from China, Formosa (Taiwan), Iran, Japan, Russia, and Turkey).

(5) Green Tea.

(6) Canton Oolong (for all Canton types from China to Formosa (Taiwan)).

(7) Scented Black Tea.

(8) Spiced Tea.

These standards apply to tea shipped from abroad on or after May 1, 1983. Tea shipped prior to May 1, 1983 will be governed by the standards that became effective May 1, 1982.

* * * * *

Because these standards are based on characteristics of taste aided by sight and smell as determined by experts, FDA believes that public comment would not be helpful and thus that notice and public procedure are unnecessary and may be dispensed with as authorized under 5 U.S.C. 553. However, pursuant to § 10.40(e) (21 CFR 10.40(e)), interested persons may on or before June 27, 1983, submit to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this regulation. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday. Any changes in this regulation justified by such comments will be the subject of a further amendment.

Effective date. May 1, 1983.

(Secs. 3, 10, 29 Stat. 605, 607, 41 Stat. 712, 54 Stat. 1237, 67 Stat. 631 (21 U.S.C. 43, 50))

Dated: April 20, 1983.

Mortgage and Loan Insurance Programs Under the National Housing Act; Multifamily Mortgage Insurance Program Amendments

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of announcement of effective date for final rule.

SUMMARY: This notice announces the effective date for the final rule published in the **Federal Register** on April 19, 1983 (48 FR 16667) that amended the multifamily mortgage insurance regulations. These regulations increased, from 90 percent to 140 percent, the maximum amount by which the Federal Housing Commissioner may, on a project-by-project basis, permit the mortgage amount limitations to be exceeded in high cost geographical areas, except for mortgages purchased or to be purchased by the Government National Mortgage Association under its special assistance functions. The effective date provision of the rule stated that the rule would become effective upon expiration of the first period of 30 calendar days of continuous session of Congress after publication, subject to waiver, and announced that future notice of the effectiveness of the rule would be published in the **Federal Register.**

Thirty calendar days of continuous session of Congress have expired since the rule was published.

DATE: The effective date for the final rule published April 19, 1983 (48 FR 16667), is May 20, 1983.

FOR FURTHER INFORMATION CONTACT: Frank D. Brown, Office of Multifamily Housing Development, Room 6128, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410. Telephone (202) 755-5720. (This is not a toll-free number.)

BILLING CODE 4210-27-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 7896]

Income Tax; Taxable Years Beginning After December 31, 1953; Income From Trade Shows

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to the treatment of income from qualified trade shows sponsored by certain exempt organizations. Changes to the applicable tax law were made by the Tax Reform Act of 1976. These regulations provide necessary guidance to the public for compliance with that Act and would affect certain exempt organizations that sponsor trade shows. The regulation also conforms the regulations to changes in the tax law concerning the time for filing an exempt organization's income tax return. In addition, this document makes clerical changes in the regulations to reflect a recent amendment to the Statement of Procedural Rules.

DATE: The amendments regarding qualified convention and trade show activities are effective for taxable years beginning after October 4, 1976. Changes concerning the time for filing income tax returns are effective for taxable years beginning after November 10, 1978.

FOR FURTHER INFORMATION CONTACT: Janet Painter of the Employee Plans and Exempt Organizations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3544) (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

On December 9, 1980, the **Federal Register** published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 513(d) of the Internal Revenue Code of 1954. These amendments were proposed to conform the regulations to section 1305 of the Tax Reform Act of 1976 (90 Stat. 1718) and section 6 of the Act of November 10, 1978 (Pub. L. 95-628, 92 Stat. 3630), and are issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805). A public hearing was requested and was held on April 22, 1981. After consideration of all comments regarding the proposed amendments, those amendments are adopted with modifications as set forth in this Treasury decision.

Discussion of Issues

1. Conflicting Example

It has been suggested that the conclusion of Example 3 of Treas. Reg. § 1.513-1(d)(4)(i), which was not discussed in the proposed regulations, might be misleading in light of results reached under the proposal. In that example, a trade association carries on a trade show where no selling is conducted. Income from the activity is not unrelated business taxable income. It was suggested that the example implies that the determination of unrelated business taxable income might be different if selling were allowed. Because the final regulations specifically provide that sales activities do not necessarily yield unrelated business income, and an unintended implication might have arisen from the facts presented in the example, a cross-reference to the proposed regulations has been added to Example 3 of Treas. Reg. § 1.513-1(d)(4)(i).

2. Qualified Activities Not Unrelated

Several public inquiries concerned the tax treatment of nonqualifying convention and trade show activities. The proposed regulations stated that activities which are not "qualified" activities, as defined in the regulations, are unrelated to the organization's exempt purpose. Criticism of that provision centered on the argument that nonqualified activities should be subject to the tests generally applicable to all activities of exempt organizations. The proposal did not establish a more stringent test for the tax treatment of these activities, but merely expanded the test otherwise applicable. The proposed language reaches the same result as would a general cross-reference to section 513 as any trade show activity which would be considered a related activity under the general test of section 513(a) would also be considered related under the final regulations specifically applicable to trade show activities. A cross-reference to the general test to determine whether a convention or trade show activity is unrelated would be redundant. A change to the text of the proposed regulations has been judged unnecessary.

3. Impact on Internal Revenue Code Section 501(c) (3) and (4) Organizations

Several commentators asked the Service to address the proposed regulations' impact on section 501(c) (3)

and (4) organizations and on a series of rulings, issued in 1975, which include Rev. Ruls. 75–516 through 75–520, 1975–2 C.B. 220–227. This series of rulings concerns the effect of sales activity on the taxability of rental income from conventions and trade shows, that is whether that income is taxable unrelated trade or business income.

Section 513(d)(3)(C) of the Internal Revenue Code provides a limited exception to the definition of the term "unrelated trade or business" for organizations described in sections 501(c)(5) and 501(c)(6) of the Code. The legislative history of this section indicates that it was intended to supersede the 1975 series of rulings. This regulation also addresses only those organizations described in sections 501(c)(5) and 501(c)(6). It is anticipated that the Service will issue revised rulings that will reflect positions consistent with the final regulations and will address the issues raised in Rev. Rul. 67–219, 1967–2 C.B. 210 and Rev. Ruls. 75–516 through 75–520, 1975–2 C.B. 220–227.

Organizations described in other sections of the Code, such as sections 501(c)(3) and 501(c)(4), are governed by the general principles set forth in section 513(a) of the Code in determining whether any trade show activity is or is not related to the purposes for which such organizations was granted exemption.

4. Products and Services

The proposed regulations define a qualified convention or trade show as one which has as one of its purposes the promotion of products and services of an industry. One commentator suggested that final regulations should refer to "products *or* services" rather than "products *and* services" so that a show at which products are exhibited to stimulate interest in the services of those who created the products would not find itself excluded from the definition of a "qualifying show."

The statute uses three combinations of the words "products" and "services": (1) "products *or* services" in the definition of "convention and trade show activity"; (2) "products *and* services" in the definition of qualified activities; and (3) "products" (only) in the definition of "qualifying organization". The final regulations will not maintain the technical distinctions among these terms because to do so would be inconsistent with the general thrust of the Code provision—that commercial displays of members' products, services, or a combination of the two, are consistent with trade association activities.

The final regulations will not disqualify an activity which is intended to stimulate an interest in services rather than in products of the sponsoring organization, whether through demonstration of the services or exhibition of products which are related to those services. The final regulations have been altered so that the term "products and services" and the term "products" as used in the above definitions will be interpreted to mean "products or services".

5. Qualified Convention or Trade Show

It was suggested that a show at which the only displays are educational suppliers' exhibits and at which selling and order taking are prohibited, might not be a qualified show under the proposed regulation because no interest or demand for members' products or services would be stimulated. Income from rental of exhibition space to such suppliers might then be considered unrelated business taxable income. The Service previously indicated, in Rev. Rul. 75–516, 1975–2 C.B. 220, that in such a situation the income would not be unrelated business taxable income. The final regulations do not alter that result. The final regulations include educational activities among those carried on at a qualified show. This change assures that rental income from exhibition space at a show, such as the one at which the only displays are educational suppliers' exhibits and at which selling and order taking are prohibited, would still not constitute unrelated business taxable income.

6. Examples

It was suggested that an example be added to discuss organizations which display products in order to increase interest in members' services. As indicated above, the regulation, as proposed, would include this type of show as a qualified trade show. It was therefore judged unnecessary to include the suggested example.

Another commentator recommended an example addressing the treatment of two or more organizations which jointly sponsor a show. Concern was expressed as to how to allocate the tax treatment of a show, one sponsor of which is a "qualifying organization" and one of which is not. Such an allocation would be made using the same partnership principles already articulated in the Code regarding allocation of income among partners. Therefore, such an allocation regarding trade show activities would result in an exempt trade association's otherwise qualifying activities remaining qualified while nonqualifying exempt organizations' activities would still be considered unrelated trade or business. The final regulation is unchanged from the proposal.

Several commentators objected to a proposed example's conclusion that a supplier show is not a qualified show, as defined in the regulations. In light of the language of the statute, which does not include supplier shows, and of the general legislative intent, it has been determined that only supplier shows which fit within the language of the statute should be qualified. Therefore, the final regulations retain this example concerning "nonqualified" supplier exhibits.

It was also suggested that the same supplier show example did not specify the purpose of the exhibits and that this factor could be significant. In Rev. Rul. 75–516, 1975–2 C.B. 220, an organization that sponsored a supplier show at which selling and soliciting were prohibited and that had as its only activity the display of supplier exhibits which were educational in nature, was not taxed on its income from rental of exhibit space. The final regulations contain additional facts to distinguish the show in this example, which functions as a sales vehicle for suppliers (income from which would be unrelated business income to the sponsoring organization), from the purely educational show of Rev. Rul. 75–516 (income from which would not be taxable to the sponsoring organization).

Non-Applicability of Executive Order 12291

The Treasury Department has determined that this regulation is not subject to review under Executive Order 12291 or the Treasury and OMB implementation of that Order dated April 28, 1982.

Regulatory Flexibility Act

No general notice of proposed rulemaking is required by 5 U.S.C. 553(b) for interpretative regulations. Accordingly, the Regulatory Flexibility Act (5 U.S.C. Chapter 6) does not apply and no Regulatory Flexibility analysis is required for this rule.

Drafting Information

The principal author of this regulation is Janet Painter of the Employee Plans and Exempt Organizations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

List of Subjects

26 CFR 1.401–1—1.425–1

Income taxes, Employee benefit plans.

26 CFR 1.501(a)–1—1.528–10

Income taxes, Exempt organizations, Unrelated trade or business.

Adoption of amendments to the regulations.

PART 1—[AMENDED]

Accordingly, 26 CFR Part 1 is amended as follows:

§ 1.401 (b)–1 [Amended]

Paragraph 1. Section 1.401(b)–1(d)(3) is amended by striking out "§ 601.201(o)" and inserting in lieu thereof "§ 601.201(s)".

Par. 2. Section 1.401(b)–1(e) is amended by striking out "§ 601.201(o)(3)(xii)" from the fifth sentence and inserting in lieu thereof "§ 601.201(s)(3)(xii)".

§ 1.503(c)–1 [Amended]

Par. 3. Section 1.503(c)–1(a) is amended by striking out "paragraph (o) of § 601.201" from the fourth sentence and inserting in lieu thereof "paragraph (s) of § 601.201".

Par. 4. Section 1.513–1(d)(4)(i) is amended by striking out Example (3) and inserting in lieu thereof the following:

§ 1.513–1 Definition of unrelated trade or business.

* * * * *

(d) *Substantially related.* * * *

(4) *Application of principles*—(i) * * *

Example (3). O is an industry trade association qualified for exemption under section 501(c)(6). It presents a trade-show in which members of its industry join in an exhibition of industry products. O derives income from charges made to exhibitors for exhibit space and admission fees charged patrons or viewers of the show. The show is not a sales facility for individual exhibitors; its purpose is the promotion and stimulation of interest in, and demand for, the industry's products in general, and it is conducted in a manner reasonably calculated to achieve that purpose. The stimulation of demand for the industry's products in general is one of the purposes for which exemption is granted O. Consequently, the activities productive of O's gross income from the show—that is, the promotion, organization and conduct of the exhibition—contribute importantly to the achievement of an exempt purpose, and the income does not constitute gross income from unrelated trade or business. See also section 513(d) and regulations thereunder regarding sales activity.

* * * * *

Par. 5. The following new section is added immediately after § 1.513–2:

§ 1.513–3 Qualified convention and trade show activity.

(a) *Introduction*—(1) *In general.* Section 513(d) and § 1.513–3(b) provide that convention and trade show activities carried on by a qualifying organization in connection with a qualified convention or trade show will not be treated as unrelated trade or business. Consequently, income from qualified convention and trade show activities, derived by a qualifying organization that sponsors the qualified convention or trade show, will not be subject to the tax imposed by section 511. Section 1.513–3(c) defines qualifying organizations and qualified conventions or trade shows. Section 1.513–3(d) concerns the treatment of income derived from certain activities, including rental of exhibition space at a qualified convention or trade show where sales activity is permitted, and the treatment of supplier exhibits at qualified conventions and trade shows.

(2) *Effective date.* This section is effective for taxable years beginning after October 4, 1976.

(b) *Qualified activities not unrelated.* A convention or trade show activity, as defined in section 513(d)(3)(A) and § 1.513–3(c)(4), will not be considered unrelated trade or business if it is conducted by a qualifying organization described in section 513(d)(3)(C) and § 1.513–3(c)(1), in conjunction with a qualified convention or trade show, as defined in section 513(d)(3)(B) and § 1.513–3(c)(2), sponsored by the qualifying organization. Such an activity is a qualified convention or trade show activity. A convention or trade show activity which is conducted by an organization described in section 501(c)(5) or (6), but which otherwise is not so qualified under this section, will be considered unrelated trade or business.

(c) *Definitions*—(1) *Qualifying organization.* Under section 513(d)(3)(C), a qualifying organization is one which—

(i) Is described in either section 501(c)(5) or (6), and

(ii) Regularly conducts as one of its substantial exempt purposes a qualified convention or trade show.

(2) *Qualified convention or trade show.* For purposes of this section, the term "qualified convention or trade show" means a show that meets the following requirements:

(i) It is conducted by a qualifying organization described in section 513(d)(3)(C);

(ii) At least one purpose of the sponsoring organization in conducting the show is the education of its members, or the promotion and stimulation of interest in, and demand for, the products or services of the industry (or segment thereof) of the members of the qualifying organization; and

(iii) The show is designed to achieve that purpose through the character of a significant portion of the exhibits or the character of conferences and seminars held at a convention or meeting.

(3) *Show.* For purposes of this section, the term "show" includes an international, national, state, regional, or local convention, annual meeting or show.

(4) *Convention and trade show activity.* For purposes of this section, convention and trade show activity means any activity of a kind traditionally carried on at shows. It includes, but is not limited to—

(i) Activities designed to attract to the show members of the sponsoring organization, members of an industry in general, and members of the public, to view industry products or services and to stimulate interest in, and demand for such products or services;

(ii) Activities designed to educate persons in the industry about new products or services or about new rules and regulations affecting the industry; and

(iii) Incidental activities, such as furnishing refreshments, of a kind traditionally carried on at such shows.

(d) *Certain activities*—(1) *Rental of exhibition space.* The rental of display space to exhibitors (including exhibitors who are suppliers) at a qualified trade show or at a qualified convention and trade show will not be considered unrelated trade or business even though the exhibitors who rent the space are permitted to sell or solicit orders.

(2) *Suppliers defined.* For purposes of subparagraph (1), a supplier's exhibit is one in which the exhibitor displays goods or services that are supplied to, rather than by, the members of the qualifying organization in the conduct of such members' own trades or businesses.

(e) *Example.* The provisions of this section may be illustrated by the following examples:

Example 1. X, an organization described in section 501(c)(6), was formed to promote the construction industry. Its membership is made up of manufacturers of heavy construction machinery many of whom own, rent, or lease one or more digital computers produced by various computer manufacturers. X is a qualifying organization under section 513(d)(3)(C) that regularly holds an annual meeting. At this meeting a national industry sales campaign and methods of consumer financing for heavy construction machinery are discussed. In addition, new construction machinery developed for use in the industry is on

display with representatives of the various manufacturers present to promote their machinery. Both members and nonmembers attend this portion of the conference. In addition, manufacturers of computers are present to educate X's members. While this aspect of the conference is a supplier exhibit (as defined in paragraph (d) of this section), income earned from such activity by X will not constitute unrelated business taxable income to X because the activity is conducted as part of a qualified trade show described in § 1.513–3(c).

Example 2. Assume the same facts as in Example 1, but the only goods or services displayed are those of suppliers, the computer manufacturers. Selling and order taking are permitted. No member exhibits are maintained. Standing alone, this supplier exhibit (as defined in paragraph (d)(2) of this section) would constitute a supplier show and not a qualified convention or trade show. In this situation, however, the rental of exhibition space to suppliers is not unrelated trade or business. It is conducted by a qualifying organization in conjunction with a qualified convention or trade show. The show (the annual meeting) is a qualified convention or trade show because one of its purposes is the promotion and stimulation of interest in, and demand for, the products or services of the industry through the character of the annual meeting.

Example 3. Y is an organization described in section 501(c)(6). The organization conducts an annual show at which its members exhibit their products and services in order to promote public interest in the line of business. Potential customers are invited to the show, and sales and order taking are permitted. The organization secures the exhibition facility, undertakes the planning and direction of the show, and maintains exhibits designed to promote the line of business in general. The show is a qualified convention or trade show described in paragraph (c)(2) of this section. The provision of exhibition space to individual members is a qualified trade show activity, and is not unrelated trade or business.

Example 4. Z is an organization described in section 501(c)(6) that sponsors an annual show. As the sole activity at the show, suppliers to the members of Z exhibit their products and services for the purpose of stimulating the sale of their products. Selling and order taking are permitted. The show is a supplier show and does not meet the definition of a qualified convention show as it does not satisfy any of the three alternative bases for qualification. First, the show does not stimulate interest in the members' products through the character of product exhibits as the only products exhibited are those of suppliers rather than members. Second, the show does not stimulate interest in members' products through conferences or seminars as no such conferences are held at the show. Third, the show does not meet the definition of a qualified show on the basis of educational activities as the exhibition of suppliers' products is designed primarily to stimulate interest in, and sale of, suppliers' products. Thus, the organization's provision of exhibition space is not a qualified convention or trade show activity. Income derived from rentals of exhibition space to suppliers will be unrelated business taxable income under section 512.

Par. 6. Section 1.6072–2 is amended by revising paragraph (c) to read as follows:

§ 1.6072–2 Time for filing returns of corporations.

* * * * *

(c) *Exempt organizations.* For taxable years beginning after November 10, 1978, the income tax return required under section 6012 and § 1.6012–2(e) of an organization exempt from taxation under section 501(a) (other than an employee's trust under section 401(a)) shall be filed on or before the fifteenth day of the fifth month following the close of the organization's taxable year.

Forest Service

36 CFR Part 223

Sale and Disposal of Timber, Suspension and Debarment

AGENCY: Forest Service, USDA.

ACTION: Interim rule.

SUMMARY: This rule governs debarment and suspension of purchasers of National Forest System timber. This rule essentially adopts the revised policies and procedures of the Federal Procurement Regulations on debarment and suspension with necessary modifications to accommodate the Forest Service timber sale program. In addition, it provides for the compilation, maintenance, and distribution of a list of National Forest System timber purchasers suspended or debarred by the Forest Service. These policies and procedures are adopted in order to remain consistent with govenment-wide suspension and debarment policies and procedures. The intended effect is to ensure that Forest Service timber sale contracts are awarded to responsible purchasers.

EFFECTIVE DATE: May 27, 1983.

FOR FURTHER INFORMATION CONTACT: Lloyd W. Olson, Timber Management Staff, Forest Service, U.S. Department of Agriculture, P.O. Box 2417, Washington, D.C. 20013, (202) 475–3758 or Rhea Daniels Moore, Attorney, Natural Resources Division, Office of General Counsel, U.S. Department of Agriculture, Room 2409 South Building, Washington, D.C. 20250, (202) 447–4801.

SUPPLEMENTARY INFORMATION:

Objective

This rulemaking action makes Forest Service timber sale contract suspension and debarment procedures consistent with the new government-wide policies and procedures applicable to procurement actions. Effective September 30, 1982, the policies and procedures of the Federal Procurement Regulations (41 CFR Subpart 1–1.6) were, after extensive debate and comment, revised by the General Services Administration to implement Office of Federal Procurement Policy Letter 82–1 and to make debarment of procurement contractors effective government-wide (FPR Temporary Regulation 65, 47 FR 43692, October 4, 1982). The Department of Agriculture, in turn, was required to implement the new government-wide debarment regulations on procurement contracts. On April 21, 1983, the Department of Agriculture regulations on debarment and suspension at 41 CFR Subpart 4–1.6 were revised to apply only to procurement transactions; they no longer include Forest Service timber sale contracts (48 FR 17079, April 21, 1983). Accordingly, this rule essentially adopts the policies and procedures of FPR Temporary Regulation 65 and consolidates, at 36 CFR 223.12, the codification of policies and procedures on suspension and debarment of National Forest System timber purchasers previously found at 36 CFR 223.9(c) and 41 CFR 4–1.6.

This rule delegates authority to the Deputy Chief, National Forest System (NFS), and the Associate Deputy Chief, Resource Divisions, National Forest System, to act as suspending and debarring officials for Forest Service timber sale contracts. The Deputy Chief, National Forest System, is also required to compile, maintain, and distribute a current list of suspended and debarred National Forest System timber purchasers.

Suspended and debarred National Forest System timber purchasers will no longer be included on the consolidated list of debarred, suspended and ineligible contractors maintained by the

General Services Administration concerning procurement actions. Examples of actions the Forest Service regards as so serious as to justify suspension or debarment are identical to those formerly codified at 36 CFR 223.9(c). This rule also continues the right to appeal a Debarring Official's decision to the Agriculture Board of Contract Appeals.

Public Comment

This rule relates to public contracts. In accordance with exceptions to rulemaking procedures in 5 U.S.C. 553 and Department of Agriculture policy (36 FR 13804; July 24, 1971), it is found and determined upon good cause that advance notice and request for comments are unnecessary, impracticable, and contrary to the public interest. It is determined that this interim rule is necessary to provide appropriate procedures for any suspension or debarment action deemed necessary to protect the public interest. Following publication of this interim rule, a proposed rule will be published in the **Federal Register** for public comment. Comments submitted will receive careful consideration in the promulgation of a final rule. In no event will this interim rule be in effect for more than one year from the date of its publication.

Regulatory Impact

This action has been reviewed pursuant to Executive Order 12291, and it has been determined that this regulation is not a major rule. This regulation will have little or no effect on the economy since it is procedural and is invoked only on a case-by-case basis when in the public interest and for the government's protection. For the same reasons, this regulation will not result in any major increase in costs to consumers, industry, or government agencies or have any significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete on the foreign market.

This action is not a rule as defined in Pub. L. 96-354, the Regulatory Flexibility Act, and thus it is exempt from the provisions of that Act. This rule does not significantly affect the environment. An environmental impact statement is not required under the National Environmental Policy Act of 1969.

Controlling Paperwork Burdens on the Public

Under this interim rule, individuals or firms who receive notice from the Forest Service of suspension or proposed debarment action may present facts and information pertaining to the basis of the action and/or to mitigation of any decision. The interim rule does not specify the nature or format of any information so provided to the Forest Service. Therefore, the rule does not impose an information collection requirement as that term is defined in Office of Management and Budget (OMB) regulations at 5 CFR 1320.7. Moreover, since 5 CFR 1320.3(c) exempts information collections involving administrative actions and investigations as well as the conduct of criminal proceedings or civil actions against specific individuals or entities by federal agencies, the rule in its entirety is exempt from OMB information collection clearance procedures.

List of Subjects in 36 CFR Part 223

Exports, Government contracts, National forests, Reporting and recordkeeping requirements, Timber.

PART 223—[AMENDED]

For the reasons set forth above, Part 223 of Chapter II, Title 36, Code of Federal Regulations is hereby revised as follows:

1. The authority citation for Part 223 reads as follows:

Authority: Sec. 14, Pub. L. 94-588, 90 Stat. 2958, 16 U.S.C. 472a, unless otherwise noted.

§ 223.9 [Amended]

2. The heading of § 223.9 is amended by removing "and debarment."

3. Section 223.9 is amended by removing paragraph (c).

4. A new § 223.12 is added to read as follows:

§ 223.12 Suspension and debarment.

(a) *Scope.* This section:

(1) Prescribes policies and procedures governing the debarment and suspension of purchasers of National Forest System timber for the causes stated in paragraphs (h) and (m) of this section.

(2) Provides for the listing of debarred and suspended purchasers; and

(3) Sets forth the treatment to be accorded to purchasers listed as debarred or suspended.

(b) *Policy.* (1) The Forest Service shall solicit bids and proposals only from, award contracts to, and approve or consent to subcontracts with, responsible business concerns and individuals. Debarment and suspension are discretionary actions which, taken in accordance with this section, are appropriate means to effectuate this policy.

(2) The serious nature of debarment and suspension requires that they be imposed only in the public interest, for the Government's protection and not for purposes of punishment. Debarment and suspension shall be imposed to protect the Government's interest, and only for the causes and in accordance with the procedures set forth in this section.

(c) *Definitions.* As used in this section,

(1) "Adequate evidence" means information sufficient to support the reasonable belief that a particular act or omission has occurred.

(2) "Affiliates." Business concerns or individuals are affiliates if, directly or indirectly, (i) either one controls or can control the other, or (ii) a third controls or can control both.

(3) "Conviction" means a judgment or conviction of a criminal offense by any court of competent jurisdiction, whether entered upon a verdict or plea, and includes a conviction entered upon a plea of *nolo contendere.*

(4) "Debarment" means action taken by a debarring official under paragraphs (g) through (k) to exclude a purchaser from Government contracting and Government approved subcontracting for a reasonable, specified period; a purchaser so excluded is "debarred."

(5) "Debarring Official" is the Duputy Chief, National Forest System, or the Associate Deputy Chief, Resources Divisions, National Forest System.

(6) "Indictment" means indictment for a criminal offense. An information or other filing by competent authority charging a criminal offense shall be given be the same effect as an indictment.

(7) "Legal proceedings" means any civil judicial proceeding to which a State or the Federal Government is a party or any criminal proceeding. The term also includes appeals from such proceedings.

(8) "Preponderance of the evidence" means proof by information that, compared with that opposing it, leads to the conclusion that the fact at issue is more probably true than not.

(9) "Purchaser" means any individual or other legal entity that (i) submits bids or proposals for or is awarded, or reasonably may be expected to submit bids or proposals for or be awarded, a Government timber sale contract or (ii) conducts business with the Government as an agent or representative of another purchaser.

(10) "Suspending Official" is the Deputy Chief, National Forest System, or the Associate Deputy Chief, Resources Divisions, National Forest System.

(11) "Suspension" means action taken by a suspending official under

paragraphs (l) through (p) to disqualify a purchaser temporarily from purchasing National Forest System timber; a purchaser so disqualified is "suspended."

(d) *List of debarred and suspended purchasers.* (1) The Deputy Chief, National Forest System, shall compile and maintain a current list of National Forest System timber purchasers debarred or suspended. This list shall be distributed to all Regional Foresters and Forest Supervisors, the General Services Administration, the General Accounting Office, and other federal agencies requesting said list.

(2) The list of debarred or suspended purchasers shall contain the following information:

(i) The names and addresses of all debarred or suspended purchasers.

(ii) The cause for the action (see paragraphs (h) and (m)).

(iii) Any limitations to or deviations from the normal effect of debarment or suspension.

(iv) The effective date of the action and, in the case of debarments, the termination date.

(v) The name and telephone number of the point of contact in the Forest Service regarding the action.

(e) *Treatment to be accorded listed purchasers.* (1) Purchasers debarred or suspended in accordance with this section shall be excluded from receiving Forest Service timber sale contracts and the Forest Service shall not knowingly solicit offers from, award contracts to, renew or otherwise extend the duration of an existing timber sale contract with, or consent to subcontracts with these purchasers, unless the Chief of the Forest Service or authorized representative determines, in writing, that there is a compelling reason for such action.

(2) Notwithstanding the listing of a purchaser for the cause(s) set forth in this section, the Forest Service may continue contracts or subcontracts in existence at the time the purchaser was debarred or suspended, unless the Chief of the Forest Service or authorized representative determines that termination of the contract is in the Government's best interest. Decisions regarding the termination of contracts, if any, should be made only after review by Forest Service contracting and technical personnel and by legal counsel to assure the propriety of the proposed action.

(f) *Restrictions on subcontracting.* When a debarred or suspended purchaser is proposed as a subcontractor for any subcontract subject to Government consent, approval shall not be given unless the Chief of the Forest Service or authorized representative determines in writing that there is a compelling reason for such action.

(g) *Debarment.* (1) The debarring official may, in the public interest, debar a purchaser for any of the causes contained in paragraph (h), using the procedures in paragraph (i). The existence of a cause for debarment under paragraph (h), however, does not necessarily require that the purchaser be debarred; the seriousness of the purchaser's acts or omissions and any mitigating factors should be considered in making any debarment decision.

(2) Debarment of a purchaser constitutes debarment of all divisions or other organizational elements of the purchaser, unless the debarment decision is limited by its terms to specific divisions, organizational elements, or commodities. The debarring official may extend the debarment decision to include any affilitates of the contractor, if they are (i) specifically named and (ii) given written notice of the proposed debarment and an opportunity to respond (see paragraph (i)(3)).

(3) When no suspension is in effect under paragraphs (l) through (p) at the time debarment is proposed, no contracts shall be awarded to, and no subcontracts shall be consented to or approved for, the purchaser pending a debarment decision.

(h) *Causes for debarment.* The debarring official may debar a purchaser for any of the following causes:

(1) Conviction of or civil judgment for—

(i) Commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public contract, or subcontract;

(ii) Violation of Federal or State antitrust statutes relating to the submission of bids or proposals; or

(iii) Commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property; or

(iv) Commission of any other offense indicating a lack of business integrity or business honesty which seriously and directly affects the present responsibility of a Government purchaser or subcontractor.

(2) Violation of the terms of a Government contract or subcontract so serious as to justify debarment, such as—

(i) Willful failure to perform in accordance with the terms of one or more contracts; or

(ii) A history of failure to perform, or of unsatisfactory performance of, one or more contracts.

(3) Any other cause of so serious or compelling a nature that it affects the present responsibility of a Government purchaser or subcontractor.

(4) Debarment for any of the above causes by another federal agency which sells timber.

(5) Among actions the Forest Service regards as so serious as to justify debarment are the willful violation or repeated failure to perform or satisfactorily perform timber sale contract provisions relating to the following:

(i) Fire suppression or prevention and the disposal of slash.

(ii) Protection of soil, water, and residual trees when such failure causes significant environmental or resource damage.

(iii) Removal of designated timber when such failure causes substantial product deterioration or conditions favorable to insect epidemics.

(iv) Restrictions on the exportation of timber included under the contract.

(v) Access by the Forest Service upon its request to purchaser's books and accounts; and

(vi) Restrictions on the disposal of timber on small business set-aside sales.

(i) *Procedures for debarment.*—(1) *Investigation and referral.* Whenever a Forest Supervisor becomes aware of possible irregularities or any information which may be sufficient cause for debarment under paragraph (h), the matter shall be immediately referred through the Regional Forester to the Forest Service Debarring Official. The referral shall be accompanied by a complete statement of the facts supported by appropriate exhibits along with a recommendation for action. Where the statement of facts indicates possible criminal offenses, the Debarring Official shall notify the Office of Inspector General, U.S.D.A.

(2) *Decisionmaking process.* (i) Purchaser (and any specifically named affiliates) shall be given an opportunity to submit, in person, in writing, or through a representative, information and arguments in opposition to proposed debarment.

(ii) In actions not based upon a conviction or judgment or on a debarment by another federal agency which sells timber, if it is found that the purchaser's submission in opposition raises a genuine dispute over facts material to the proposed debarment, fact-finding shall be conducted. The official conducting the fact-finding shall—

(A) Afford the purchaser an opportunity to appear with counsel, submit documentary evidence, present witnesses, and confront any person the Forest Service presents; and

(B) Ensure that a record of the fact-finding is transcribed and made available at cost to the purchaser upon request, unless the purchaser and the Forest Service, by mutual agreement, waive the requirement for a transcript.

(iii) A decision to debar by the Forest Service Debarring Official may be appealed within 30 days from receipt of the decision by the purchaser and any affiliates involved by mailing or otherwise furnishing a written notice to the U.S. Department of Agriculture Board of Contract Appeals, Washington, D.C. 20250. A copy of the appeal shall be furnished to the debarring official from whose decision the appeal is taken. Appeals shall be governed by the rules and procedures of the U.S. Department of Agriculture Board of Contract Appeals set forth in 7 CFR Part 24.

(3) *Notice of proposal to debar.* Debarments shall be initiated by informing purchasers and any specifically named affiliates by certified mail return receipt requested, as follows:

(i) A debarment is being considered.

(ii) The reasons for the proposed debarment in terms sufficient to put the purchaser on notice of the conduct or transaction(s) upon which it is based.

(iii) The cause(s) relied upon under paragraph (h) for the proposed debarment.

(iv) The purchaser, within 30 days after receipt of the notice, may submit, in person, in writing, or through a representative, information and argument in opposition to the proposed debarment, including any additional specific information that raises a genuine dispute over the material facts.

(v) If purchaser requests a hearing before the debarring official pursuant to subparagraph (iv), the hearing will be held within 20 calendar days.

(vi) The potential effect of the proposed debarment (see paragraph (e)); and

(vii) Pending a final debarment decision if no suspension is in effect under paragraphs (l) through (p), no contracts will be awarded to, and no subcontracts will be consented to or approved for the purchaser.

(4) *Debarring official's decision.* (i) In actions based upon a conviction or civil judgment, or a debarment by another federal agency which sells timber, or in which there is no dispute over material facts, the debarring official shall make a decision on the basis of all the information in the administrative record, including any submission made by the purchaser. If no suspension is in effect under paragraphs (l) through (p), the decision shall be made within 30 working days after receipt of any information and argument submitted by the purchaser, unless the debarring official extends this period for good cause.

(ii) In actions in which fact-finding is necessary as to disputed material facts, written findings of fact shall be prepared. The debarring official shall base the decision on the facts as found, together with any information and argument submitted by the purchaser and any other information in the administrative record.

(A) The debarring official may refer matters involving disputed material facts to another official for findings of fact. The debarring official may reject any such findings, in whole or in part, only after specifically determining them to be arbitrary and capricious or clearly erroneous.

(B) The debarring official's decision shall be made after the conclusion of the proceedings with respect to disputed facts.

(iii) In any action in which the proposed debarment is not based upon a conviction, civil judgment or debarment by another federal agency which sells timber, the cause for debarment must be established by a preponderance of the evidence.

(5) *Notice of debarring official's decision.* (i) If the debarring official decides to impose debarment, the purchaser and any affiliates involved shall be given prompt notice by certified mail return receipt requested, as follows:

(A) The notice of proposed debarment shall be referenced;

(B) The reasons for debarment shall be specified; and

(C) The period of debarment including effective dates (see paragraph (j)) shall be stated.

(ii) If a debarment is not imposed, the debarring official shall promptly notify the purchaser and any affiliates involved of the decision by certified mail return receipt requested.

(j) *Period of debarment.* (1) Debarments shall be for a period commensurate with the seriousness of the cause(s). Generally, a debarment should not exceed 3 years. If suspension precedes a debarment, the suspension period shall be considered in determining the debarment period. The debarring official's decision to debar becomes final and effective 30 days after receipt of the notice under paragraph (i) (5), unless the purchaser files a notice of appeal with the Agriculture Board of Contract Appeals pursuant to paragraph (i)(2)(iii).

(2) The debarring official may extend the debarment for an additional period if that official determines that an extension is necessary to protect the government's interest. However, a debarment may not be extended solely on the basis of the facts and circumstances upon which the initial debarment action was based. If debarment for an additional period is determined necessary, the procedures in paragraph (i) shall be followed to extend the debarment.

(3) The debarring official may consider terminating the debarment or reducing the period or extent of debarment, upon the purchaser's application, supported by documentation, for reasons deemed appropriate by the debarring official, such as:

(i) Newly discovered material evidence.

(ii) Reversal of the conviction or judgment upon which the debarment was based.

(iii) Bona fide change in ownership or management.

(iv) Elimination of other causes for which the debarment was imposed.

(k) *Imputed conduct for debarment.* (1) The fraudulent, criminal, or other seriously improper conduct of any officer, director, shareholder, partner, employee, or other individual associated with a purchaser may be imputed to the purchaser when the conduct occurred in connection with the individual's performance of duties for or on behalf of the purchaser, or with the purchaser's knowledge, approval, or acquiescence. The purchaser's acceptance of the benefits derived from the conduct shall be evidence of such knowledge, approval, or acquiescence.

(2) The fraudulent, criminal, or other seriously improper conduct of a purchaser may be imputed to any officer, director, shareholder, partner, employee, or other individual associated with the purchaser who participated in, knew of, or had reason to know of the purchaser's conduct.

(3) The fradulent, criminal, or other seriously improper conduct of one purchaser participating in a joint venture or similar arrangement may be imputed to other participating purchasers if the conduct occurred for, or on behalf of, the joint venture or similar arrangement or with the knowledge, approval, or acquiescence of those purchasers. Acceptance of the benefits derived from the conduct shall be evidence of such knowledge, approval, or acquiescence.

(l) *Suspension.* (1) The suspending official may, in the public interest,

suspend a purchaser for any of the causes in paragraph (m), using the procedures in paragraph (n).

(2) Suspension is a serious action to be imposed on the basis of adequate evidence of one or more of the causes set out in paragraph (m), pending the completion of investigation or legal proceedings, when it has been determined that immediate action is necessary to protect the Government's interest. In assessing the adequacy of the evidence, consideration should be given to how much information is available, how credible it is given the circumstances, whether or not important allegations are corroborated, and what inferences can reasonably be drawn as a result. This assessment should include an examination of basic documents such as contracts, inspection reports, and correspondence, as appropriate.

(3) Suspension constitutes suspension of all divisions or other organizational elements of the purchaser, unless the suspension decision is limited by its terms to specific divisions, organizational elements, or commodities. The suspending official may extend the suspension decision to include any affiliates of the purchaser if they are (i) specifically named and (ii) given written notice of the suspension and an opportunity to respond (see paragraph (n)(3)).

(m) *Causes for suspension.* (1) The suspending official may, upon adequate evidence, suspend a purchaser suspected of the following:

(i) Commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public contract or subcontract;

(ii) Violation of Federal or State antitrust statutes relating to the submission of bids or proposals;

(iii) Commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, or receiving stolen property; or

(iv) Commission of any other offense indicating a lack of business integrity or business honesty that seriously and directly affects the present responsibility of a Government purchaser or subcontractor.

(2) Indictment for any of the causes in paragraph (1) above constitutes adequate evidence for suspension.

(3) The suspending official may upon adequate evidence also suspend a purchaser for any other cause of so serious or compelling a nature that it affects the present responsibility of a Government purchaser or subcontractor.

(4) A purchaser may be suspended for any of the above causes based on a suspension by another federal agency which sells timber.

(5) Among actions the Forest Service regards as so serious as to justify suspension are the willful violation or repeated failure to perform or satisfactorily perform timber sale contract provisions relating to the following:

(i) Fire suppression or prevention and the disposal of slash.

(ii) Protection of soil, water, and residual trees when such failure causes significant environmental or resource damage.

(iii) Removal of designated timber when such failure causes substantial product deterioration or conditions favorable to insect epidemics.

(iv) Restrictions on the exportation of timber included under the contract.

(v) Access by the Forest Service upon its request to purchaser's books and accounts; and

(vi) Restrictions on the disposal of timber on small business set-aside sales.

(n) *Procedures for suspension.*—(1) *Investigation and referral.* Whenever a Forest Supervisor becomes aware of possible irregularities or any information which may be sufficient cause for suspension under paragraph (m), the matter shall be immediately referred through the Regional Forester to the Forest Service Suspending Official. The referral shall be accompanied by a complete statement of the facts supported by appropriate exhibits along with a recommendation for action. Where the statement of facts indicates possible criminal offenses, the Suspending Official shall notify the Office of Inspector General, U.S.D.A.

(2) *Decision-making process.* (i) Purchaser (and any specifically named affiliates) shall be given an opportunity, following the imposition of suspension, to submit, in person, in writing, or through a representative, information and arguments in opposition to the suspension.

(ii) In actions not based on an indictment or a suspension by another federal agency which sells timber, if it is found that the purchaser's submission in opposition raises a dispute over facts material to the suspension and if no determination has been made, on the basis of advice received from the Department of Justice or a state prosecuting official, that substantial interests of the Government in pending or contemplated legal proceeding based on the same facts as the suspension would be prejudiced, fact-finding shall be conducted. The official conducting fact-finding shall:

(A) Afford the purchaser an opportunity to appear with counsel, submit documentary evidence, present witnesses and confront any person the agency presents; and

(B) Ensure that a record of the fact-finding is transcribed and made available at cost to the purchaser upon request, unless the purchaser and the agency, by mutual agreement, waive the requirement for a transcript.

(3) *Notice of suspension.* When purchasers and any specifically named affiliates are suspended, they shall be informed immediately by certified mail return receipt requested, as follows:

(i) A decision to suspend has been made and that the suspension is based on an indictment or other adequate evidence that the purchaser has committed irregularities (A) of a serious nature in business dealings with the Government, or (B) seriously reflecting on the propriety of further Government dealings with the purchaser; any such irregularities shall be described in terms sufficient to place the purchaser on notice without disclosing Government evidence.

(ii) The suspension is for a temporary period pending the completion of an investigation and such legal proceedings as may ensue.

(iii) The cause(s) relied upon under paragraph (m) for imposing suspension.

(iv) The effect of the suspension (see paragraph (e)),

(v) The purchaser, within 30 days after receipt of the notice, may submit, in person, in writing, or through a representative, information and argument in opposition to the suspension, including any additional specific information that raises a genuine dispute over material facts.

(vi) Fact-finding to determine disputed material facts will be conducted unless (A) the action is based on an indictment or another federal timber selling agency's suspension or (B) a determination is made, on the basis of the advice of a Department of Justice or a state prosecuting official, that the substantial interests of the Government or the state in pending or contemplated legal proceedings based on the same facts as the suspension would be prejudiced.

(4) *Suspending official's decision.* (i) In actions (A) based on an indictment or a suspension by another federal agency which sells timber, (B) in which the purchaser's submission does not raise a dispute over material facts; or (C) in which fact-finding to determine disputed material facts has been denied on the basis of the advice of the Department of Justice or a state prosecuting official, the suspending official's decision shall be based on all the information in the

administrative record, including any submission made by the purchaser.

(ii) In actions in which fact-finding is necessary as to disputed material facts, written findings of fact shall be prepared. The suspending official shall base the decision on the facts as found, together with any information and argument submitted by the purchaser and any other information in the administrative record.

(A) The suspending official may refer matters involving disputed material facts to another official for findings of fact. The suspending official may reject any such findings, in whole or in part, only after specifically determining them to be arbitrary and capricious or clearly erroneous.

(B) The suspending official's decision shall be made after the conclusion of the proceedings with respect to disputed facts.

(iii) The suspending official may modify or terminate the suspension or leave it in force (see paragraph (j)(3)) for the reasons for terminating or reducing the period or extent of debarment.

(iv) A prompt written notice of the suspending official's decision shall be sent to the contractor by certified mail return receipt requested.

(o) *Period of suspension.* (1) Suspension shall be for a temporary period pending the completion of investigation and any ensuing legal proceedings unless sooner terminated by the suspending official or as provided in this paragraph (o).

(2) If legal proceedings are not initiated within 12 months after the date of the suspension notice, the suspension shall be terminated unless an Assistant Attorney General or a state prosecuting official requests its extension, in which case it may be extended for an additional 6 months. In no event may a suspension extend beyond 18 months, unless legal proceedings have been initiated within that period.

(3) The suspending official shall notify the Department of Justice or the state prosecuting official of the proposed termination of the suspension, at least 30 days before the 12-month period expires to give that agency an opportunity to request an extension.

(p) *Scope of suspension.* The scope of suspension shall be the same as that for debarment (see paragraph (k)), except that the procedures in paragraph (n) shall be used in imposing the suspension.

Dated: May 13, 1983.

Douglas W. MacCleery,

Deputy Assistant Secretary for Natural Resources and Environment.

BILLING CODE 3410-11-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6401]

National Flood Insurance Program; Final Flood Elevation Determination; Virginia

AGENCY: Federal Emergency Management Agency.

ACTION: Deletion of final rule.

SUMMARY: The Federal Emergency Management Agency has erroneously published the final flood elevation determination for Accomack County, Virginia. This notice will serve to delete that publication. Following an engineering analysis and review, a revised notice of proposed flood elevation determination will be issued.

EFFECTIVE DATE: May 27, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: As a result of a recent engineering anaylsis, the Federal Emergency Management Agency has determined that the notice of final flood elevation determination for Accomack County, Virginia, published at 47 FR 57941, on December 29, 1982, should be deleted. After a technical evaluation, a revised notice of proposed flood elevations will be issued, with a ninety-day period specified for comments and appeals.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Develpment Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; Executive Order 12127, 44 FR 19367; and delegation of authority to the Associate Director)

Issued: May 16, 1983.

Dave McLoughlin,

Deputy Associate Director, State and Local Programs and Support.

BILLING CODE 6718-03-M

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1003 and 1043

[Ex Parte No. MC-5 (Sub-No. 1)]

Motor Carriers of Property Minimum Amounts of Bodily Injury and Property Damage Liability Insurance

AGENCY: Interstate Commerce Commission.

ACTION: Stay of effective date of final rules.

SUMMARY: On January 26, 1983, by decision, served January 28, 1983, and published at 48 FR 5269 (February 4, 1983) the Commission stayed the effective date of Final Rules, which were to be effective on February 14, 1983, until June 3, 1983. The rules were adopted by the Commission in a decision served December 13, 1982, and published at 47 FR 55939 (December 14, 1982), to modify its insurance regulations pursuant to the requirements of 49 U.S.C. 10927. The effective date of the Commission's decision and final rules is further postponed.

DATE: The effective date of the final rules is postponed until October 3, 1983.

FOR FURTHER INFORMATION CONTACT: Alice K. Ramsay, (202) 275-0854, or Delores Patterson, (202) 275-0898.

SUPPLEMENTARY INFORMATION:

Background

Subsequent to the Commission's decision in the subject proceeding which adopted final rules which would have brought the Commisson's financial responsibility regulations into conformity with those of the Federal Highway Administration of D.O.T., the Surface Transportation Assistance Act of 1982 (STAA of 1982, Pub. L. 97-424, 96 Stat. 2097) became law, modifying the minimum levels of financial responsibility required for some of the affected motor carriers of property. The Commission, as a consequence, postponed the effective date of its decision and Final Rules due to the critical importance of insurance filings, the need for both the carriers and insurers to know with certainty the meaning of required filings and the desirability of avoiding repetitive filings.

During the intervening period the Commission has been examining the need for clarification or correction of some of the final rules and the problems

brought to its attention regarding the use of the forms adopted with the view to modifying them and/or providing alternative forms where possible.

The Federal Highway Administration, during the same period, has published a series of changes in its current rules to implement the provisions of STAA of 1982. The most recent of these is in *BMCS Docket No. MC–94–2 Minimum Levels of Financial Reponsibility for Motor Carriers of Property—Extension of Reduced Levels.* Published at 48 FR 15499 (April 11, 1983), the Notice of Proposed Rulemaking in that proceeding calls for comments on May 26, 1983. The proposed change would extend the effective date for reduced liability from July 1, 1983, to January 1, 1985, and a final rule is expected to be published by the Federal Highway Administration before July 1, 1983.

While the subject proceeding has been pending, motor carriers of property have been required to meet the financial responsibility requirements set forth in temporary rules at 49 CFR 1043.2(c) (46 FR 38486, July 27, 1981). These temporary rules will continue to be controlling until final rules become effective.

The Stay of the Effective Date

As soon as possible after the Federal Highway Administration publishes final rules in *BMCS Docket No. MC–94–2,* this Commission will publish modifications of its final rules to be effective October 3, 1983. An implementation period of 90 days before that date is contemplated to allow the carriers and insurers sufficient time for printing new forms, distributing them, negotiating necessary contracts, and making required filings.

This decision will not affect the quality of the human environment or the conservation of energy resources, nor will it have an adverse affect on small business.

Decided: May 23, 1983.

By the Commission: Reese H. Taylor, Jr., Chairman.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 83–14302 Filed 5–26–83; 8:45 am]

BILLING CODE 7035–01–M

49 CFR Part 1039

[Ex Parte No. 387 (Sub-No. 200)]

Railroads and Shippers; Contract Implementation Date

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: The Commission is adopting final rules (pursuant to 48 FR 2399, January 19, 1983) permitting rail contracts between railroads and shippers under 49 U.S.C. 10713 to be implemented prior to Commission approval pursuant to Section 10713(e). Because Section 10713(e) provides 30 days' public notice prior to Commission approval or rejection of a rail contract, these contracts will remain subject to Commission jurisdiction during the 30-day period. Parties using express mail or express service, as defined at 49 CFR 1104.6, may use the date following the postmark date of a mailed contract as the date of filing. Both shippers and railroads will benefit if contracts may become effective on the date of their filing and that the rights of interested third parties will be fully protected.

EFFECTIVE DATE: These rules will be effective on June 27, 1983.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275–7278, or Gerald E. Proger, (202) 275–7957.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission decision. To purchase a copy of the full decision, write to T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, D.C. 20423, or call 289–4357 (D.C. Metropolitan Area) or toll free (800) 424–5403.

Environmental and Energy Considerations

We adopt our preliminary finding that the rules will not have a significant impact on the quality of the human environment or the conservation of energy resources. No parties submitted comments to the contrary. The rules here merely implement the statutory contract provisions.

This action is taken under the authority of 49 U.S.C. 10321 and 10713(e) and 5 U.S.C. 553.

List of Subjects in 49 CFR Part 1039

Administrative practice and procedure, Agricultural commodities, Intermodal transportation, Railroads.

Decided: May 17, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

Appendix

PART 1039—[AMENDED]

Title 49 of the Code of Federal Regulations is amended by adding § 1039.2 to read as follows:

§ 1039.2 Contract implementation date.

Transportation or service performed under a contract or amendment may begin, without specific Commission authorization, on or after the date the contract and contract summary or contract amendment and supplement are filed and before Commission approval as defined at 49 CFR 1039.3(f), subject to the following conditions:

(a) The contract or contract amendment shall specifically state that the transportation or service may begin on the date of filing and that performance is subject to the conditions of 49 CFR 1039.2. The contract summary or supplement shall separately reflect the date of commencement of service under this provision under "duration of the contract," 49 CFR 1300.313(a)(4).

(b) If the rail equipment standards of 49 U.S.C. 10713(k) are exceeded, prior relief shall be obtained from the Commission and shall be specifically identified in the contract summary.

(c) If the Commission disapproves or rejects the contract or amendment, the appropriate non-contract tariffs or the contract provisions otherwise in effect under previously approved contracts and amendments will be applicable.

(d) Before Commission approval, the contract or amendment and transportation are subject to Commission jurisdiction, 49 U.S.C. 10713, and applicable regulations.

(e) Transportation or service may not begin under a contract or an amendment to a contract before the filing date of either the contract or the amendment, respectively.

BILLING CODE 7035–01–M

Proposed Rules

Federal Register
Vol. 48, No. 104
Friday, May 27, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 272 and 274

[Amdt. No. 253]

Food Stamp Program; Amendments to Requirements for State Agency Reporting

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rulemaking would amend the requirements for State agency reporting as issued in the Federal Register of January 9, 1981, at 46 FR 2332. The proposed changes would reduce the frequency of State agency reports on the form FNS–256, and revise the information requirements for the form FNS–388. These changes are intended to improve the utility of the information submitted on the reports. The changes are needed in order to allow more accurate reporting of program expenditures to Congress and to provide a better basis for assessing the need for benefit reductions in the event that expenditures would otherwise exceed appropriations.

DATE: Comments must be received by July 26, 1983 in order to be considered in final rulemaking.

ADDRESS: Comments should be addressed to: Thomas O'Connor, Chief, Program Design and Rulemaking Branch, Program Planning, Development and Support Division, Food and Nutrition Service, USDA, Alexandria, Virginia 22302. Written comments will be available for public inspection during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday) at this address, room 706.

FOR FURTHER INFORMATION CONTACT: Thomas O'Connor at the above address or by telephone at (703) 756–3425.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3507), the reporting or recordkeeping provisions that are included in this proposed rule will be submitted for approval to the Office of Management and Budget (OMB). They will not be effective until OMB approval has been obtained.

Classification

This proposed rule has been reviewed under Executive Order 12291 and Secretary's Memorandum No. 1512–1, and has been classified "not major." The proposed rule will not have an annual effect on the economy of $100 million or more, nor is it likely to result in a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions. Because this proposed rule would not affect the business community, it would not result in significant adverse effects on competition, employment, investment, productivity, innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

This proposed rule also has been reviewed in relation to the requirements of the Regulatory Flexibility Act of 1980 (Pub. L. 96–354, 94 Stat. 1164, September 19, 1980). Robert E. Leard, Administrator of the Food and Nutrition Service has certified that this action would not have a significant economic impact on a substantial number of small entities.

Background

Section 1 of Pub. L. 96–58 requires the Secretary to report to Congress each month regarding Program expenditure levels. In these reports, the Secretary is required to indicate whether there is reason to believe that a reduction in benefits will be necessary in order to avoid obligating more funds than have been appropriated. In addition, Pub. L. 96–58 establishes a timeframe for implementing any necessary benefit reduction.

To secure the data needed to fulfill these statutory requirements, the Department published a final rule (on January 9, 1981, 46 FR 2332) establishing the current reporting requirements for State agencies. Two of the reports required by the regulations are the FNS–388 and the FNS–256.

The FNS–388 is submitted by the 19th of each month and contains estimates of the dollar value of coupons issued and of the number of households and persons participating Statewide during the current and the preceding months. The figures reported for the preceding month normally are updates of the estimates provided in the previous report, although State agencies which have actual figures available for the preceding month may report them instead of estimates.

On the FNS–256 for each month, State agencies report the dollar value of coupons actually issued and the number of households and persons who actually participated in each project area. The basic rule requires that each month FNS–256 be submitted by the 45th day following the report month. However, any State agency which achieves and sustains a high degree of accuracy in its estimates on the FNS–388 is allowed to submit the FNS–256 for just the first month of each quarter of the fiscal year, rather than for all months. The standards for accuracy, which must be met for three consecutive months, are that all of the current month's estimates must be within + or −4 percent, and all of the revised estimates must be within + or −2 percent, of actual levels.

The Department intended that the FNS–388 and FNS–256 reporting requirements work together to secure accurate monthly figures (estimates) for Statewide issuance and participation levels, and at the same time offer a reduction in reporting burden regarding project area information. Since the implementation of the current reporting requirements, 29 out of 54 State agencies have been able to meet the standards and are required to submit project level FNS–256 reports once a quarter rather than on a monthly basis. The Department will continue to encourage State agencies to improve the accuracy of their monthly estimates on the FNS–388 reports. In addition, the Department is proposing modifications of the reporting procedures to further reduce the large number of project level reports now submitted to FNS and to improve the reporting of actual participation by the State agencies. The Department's proposal, described below, is one way to accomplish this objective.

Proposed Changes

FNS–388. The proposed rule would require that the FNS–388 also include the State agencies' actual participation figures for the second preceding month, in addition to the estimates of issuance and participation for the current and the preceding month. The proposal would require, for example, that the FNS–388 due to be mailed to the FNS Regional Office by July 19th include estimated figures of issuance and participation for July, revised estimates of issuance and participation (or actual figures if available) for June, and actual participation figures for May. The information required for the current and preceding month would continue to be the dollar value of coupons authorized to be issued and the number of households and persons who participated Statewide. The revised FNS–388 would not require State agencies to report issuance figures (as opposed to participation figures) for the second preceding month since these figures can be obtained from the FNS–250 reports.

The Department is concerned that the changes in the FNS–388 requirements not be the cause of nor the justification for failure to submit timely reports. Under current requirements, actual issuance and participation figures for each project area (on the FNS–256) are due to be mailed to FNS within 45 days of the end of the report month. The proposed rule would require actual *Statewide* participation figures for the second preceding month on the FNS–388. The timeframe for mailing the FNS–388 is somewhat more generous than that for the FNS–256, allowing between 47 and 50 days following the end of the actual report month. Therefore, the proposed reporting requirements should not be more difficult to fulfill than the current requirements.

The proposed requirement for the FNS–388 would provide a continuous train of updated information. This flow of information should allow the Department to make accurate projections of Program expenditures and, therefore, to determine supplemental funding needed or to tailor any necessary reductions in benefits as closely as possible to the amount of funds available. Monthly Statewide issuance and participation data are needed because of the required monthly report to Congress and the necessity of evaluating the need for benefit reductions on a reguar basis.

FNS–256. Under current regulations, less than half of all State agencies submit their FNS–256 reports on amonthly basis, and the other State agencies submit theirs on a quarterly basis, for the months of October, January, April, and July. As described above, those State agencies which submit the FNS–256 on a quarterly basis are allowed to do so because they have met high standards for accuracy of estimates on their FNS–388 reports. The proposed rule would change the schedule for submission of the FNS–256 by requiring that each State agency submit the report just twice each year, for the months of January and July. The proposed reduction in the frequency of submission of the FNS–256 is made feasible by the inclusion of actual Statewide participation data on the monthly FNS–388. The FNS–256 continues to be necessary, even if only for two months out of 12, because it is provided by project area, while the FNS–388 contains only Statewide information.

As part of the Department's effort to streamline the current reporting requirements where possible and to ensure that all information needed to administer this Program is collected, three content changes are being proposed for the FNS–256. First, information now reported on the FNS–366B regarding the number of applications received categorized by type of household, i.e., public assistance (PA) and non-public assistance (NPA), and action taken, i.e., approved or denied, would be reported on a revised FNS–256 rather than on the FNS–366B. In this way information about participation and case activity will be consistent.

A second change would require that State agencies report case activity pertaining to expedited service. The FNS–256 would require that the number of applications received and processed under the expedited service rules be reported. The collection of this information will give the Department, for the first time, an indication of the volume of cases being processed under expedited service procedures. This in turn will enable the Department to judge whether further changes in expedited service procedures may be warranted.

The final change in the FNS–256 report would require that the certification and participation data on the report be categorized as PA and NPA households. This information will help the Department to understand the types of households applying and participating in the Program. Such information is of particular value in projecting caseload during times such as recent months when increasing numbers of applicants and participants are thought to be non-public assistance households that become eligible due to loss of employment.

Standards for Accuracy. As described above, current regulations establish tolerance levels for the accuracy of estimates submitted on the FNS–388. State agencies which meet and sustain the established levels of accuracy have been allowed to reduce the frequency of submission of the FNS–256 from a monthly to a quarterly basis.

Under the proposed rule, meeting the tolerance levels would no longer affect the frequency of submission of the FNS–256. The proposed rule would require simply that all State agencies submit the FNS–256 twice each year. While the tolerance levels would not be used as they are under current regulations, they would continue to be used as standards for accuracy of estimates which State agencies must seek to achieve. The Department would continue to monitor FNS–388 estimates for accuracy against information available on the FNS–250 and FNS–256 reports, as well as the actual data that would be reported on the FNS–388.

Implementation

The proposed rule would require State agencies to implement the new requirements for FNS–388 and FNS–256 reports simultaneously. When State agencies begin to include actual data for the second preceding month on the FNS–388, they would cease submission of the monthly or quarterly (as the case may be) FNS–256. All State agencies would be required to submit the next semiannual FNS–256 in accordance with the proposed rule, regardless of the date on which they stop submitting a monthly or quarterly FNS–256. The proposed rule would require simultaneous implementation to occur no later than the first day of the first month which begins 120 days after publication of the final rule. When State agencies begin submitting the revised FNS–256, they will no longer be required to submit case activity data on the FNS–366 B.

List of Subjects

7 CFR Part 272

Alaska, Civil rights, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements.

7 CFR Part 274

Administrative practice and procedure, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements.

Accordingly, it is proposed that 7 CFR Part 272 and 7 CFR Part 274 be amended as follows:

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

1. In § 272.1, a new paragraph (g)(65) is added to read as follows:

§ 272.1 General terms and conditions.

* * * * *

(g) * * *

(65) Amendment 253. The provisions of § 274.8(a)(6) (i), (ii), and (iii) shall be implemented simultaneously, but no later than (the first day of the month following the 120th day after publication of the final rule).

* * * * *

PART 274—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

2. In § 274.8:

A. The third sentence of paragraph (a)(6)(i) is amended;

B. Paragraph (a)(6)(ii) is amended by removing all that follows the third sentence (which ends with the words "on the FNS–250 for the corresponding month") and adding four sentences in lieu thereof; and

C. Paragraph (a)(6)(iii) is revised.

The amendments and revisions read as follows:

§ 274.8 State agency reporting and destruction of unusable coupons.

(a) * * *

(6) * * *

(i) * * * The FNS–388 shall contain estimates of issuance and participation for the current month, revised estimates or actual numbers for issuance and participation for the preceding month, and actual issuance numbers for the second preceding month. * * *

(ii) * * * FNS shall monitor periodically the accuracy of the estimated number of households and persons participating as reported on the FNS–388 against the actual total participation for the State as reported on succeeding FNS–388 reports and as reported on the FNS–256 for the combination of all project areas. FNS standards for accuracy are that estimates for the current month be within + or −4 percent of the actual levels and revised estimates for the preceding month be within + or −2 percent of the actual levels. If the degree of accuracy falls outside of these tolerances, FNS shall notify the State agency and assist the State agency in revising its estimating procedures to improve the degree of accuracy. In no event shall the failure to meet these tolerances result in an administrative sanction against the State agency.

(iii) The State agency shall mail to the appropriate FNS Regional Office the Project Area Participation and Coupon Issuance Form, FNS–256, for each project area in the State, for the months of January and July. The State agency shall submit these FNS–256 reports along with the FNS–388 reports containing actual Statewide figures for January and July. With prior FNS approval, the State agency may substitute its own form or other reporting document provided that the alternative reporting format contains all the information required in the FNS–256.

BILLING CODE 3410–30–M

Rural Electrification Administration

7 CFR Part 1701

Public Information; Appendix A—REA Bulletins; REA Specification for Terminating (TIP) Cable, PE–87

AGENCY: Rural Electrification Administration, USDA.

ACTION: Proposed rule.

SUMMARY: REA proposes to amend Appendix A—REA Bulletins by issuing a new REA Bulletin 345–87, REA Specification for Terminating (TIP) Cable, PE–87. There presently exists no formal REA specification for TIP cables. As a result, REA borrowers may inadvertently purchase inferior products which could cause serious service effecting problems. By establishing minimum acceptable levels of performance for the product REA seeks to assure that cost-effective service will be provided.

DATE: Public comments must be received by REA no later than July 26, 1983.

ADDRESS: Submit written comments to Joseph M. Flanigan, Director, Telecommunications Engineering and Standards Division, Rural Electrification Administration, Room 2835, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Harry M. Hutson, Chief, Outside Plant Branch, Telecommunications Engineering and Standards Division, Rural Electrification Administration, Room 2840, South Building U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 382–8667. The Draft Impact Analysis describing the options considered in developing this proposed rule and the impact of implementing each option is available on request from the above office.

SUPPLEMENTARY INFORMATION: Pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA proposes to amend Appendix A—REA Bulletins by issuing a new Bulletin 345–87, REA specification for Terminating (TIP) Cable, PE–87. This proposed action has been reviewed in accordance with Executive Order 12291, Federal Regulation. The action will not (1) have an annual effect on the economy of $100 million or more; (2) result in a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) result in significant adverse effects on competition, employment, investment or productivity and therefore has been determined to be "not major". This action does not fall within the scope of the Regulatory Flexibility Act and is not subject to OMB Circular A–95 review. This program is listed in the Catalog of Federal Domestic Assistance as 10.851, Rural Telephone Loans and Loan Guarantees.

A copy of the proposed new specification is available upon request from the address indicated above. All written submissions made pursuant to this action will be made available for public inspection during regular business hours, above address.

Background

Presently terminating cables used on REA borrower telephone systems are not covered by an REA specification. Without a specification, REA borrowers could purchase terminating cables of low quality without their knowledge. These cables could produce numerous service problems which could lead to increased maintenance costs and also jeopardize government loan security. We are, therefore, proposing to issue an REA specification to establish minimum requirements for terminating cables, thus assuring the quality of the product and improving government loan security. This new specification would set minimum standards to insure mechanical integrity of the insulating material through such tests as tensile strength, ultimate elongation and others. It would also set specifications for electrical parameters which are important for satisfactory operation.

This proposed action establish minimum REA requirements for terminating cables without affecting the

current designs or manufacturing techniques of cable manufacturers. This action will also affect REA borrowers in that they will be able to identify and install good quality terminating cable without an increase in cable cost. These cables will provide better service performance which should result in reduced maintenance cost for our borrowers.

In view of the above, the Administrator is proposing to issue REA Bulletin 345–87, REA Specification for Terminating (TIP) Cable, PE–87.

Indexing Terms

As required by 1 CFR 18.20, the following are the indexed terms and list of subjects:

BILLING CODE 3410-15-M

Animal and Plant Health Inspection Service

9 CFR Parts 145 and 147

[Docket No. 83-004]

National Poultry Improvement Plan and Auxiliary Provisions on National Poultry Improvement Plan

AGENCY: Animal and Plant Healthe Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend portions of the provisions governing the National Poultry Improvement Plan and Auxiliary Provisions to incorporate changes pertaining to the control of certain poultry diseases.

Changes are being proposed in an effort to reduce the cost of certain blood testing programs, to provide for effective sanitizing procedures for hatching eggs and hatchery equipment, and to use more standardized laboratory techniques in screening infected or suspicious specimens. New programs are being proposed to provide qualified started poultry with certain Mycoplasma classifications. Additionally, poultry exhibited in U.S. Pullorum-Typhoid Clean States would be required to be banded. The intended effect of these proposals is to continue providing valid tests for the different diseases at lower cost to the owner, to provide more definitive techniques, and to offer new testing and classification programs which permit prospective buyers to know the health status of products before making a purchase.

DATE: Comments should be received on or before July 26, 1983.

ADDRESS: Written comments should be submitted to T. O. Gessel, Director, Regulatory Coordination Staff, APHIS, USDA, Room 728, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Written comments received may be inspected at Room 728 of the Federal Building, 8 a.m. to 4:30 p.m. Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Raymond D. Schar, USDA, APHIS-VS, Room 828, Federal Building, Hyattsville, MD 20782. (301) 436–5140.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This proposed action has been reviewed in conformance with Executive Order 12291, and has been classified as not a "major rule." The Department has determined that this action would have an annual effect on the economy of less than $100 million; would not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and would not have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility

Bert W. Hawkins, Administrator of the Animal and Plant Health Inspection Service, has determined that this action would not have a significant economic impact on a substantial number of small entities because the proposed amendments would only affect owners of hatcheries who are voluntarily participating in the National Poultry Improvement Plan (NPIP) programs. Presently there is a total of 1053 hatcheries in the NPIP, of which 42 commercial egg- and meat-type chicken hatcheries and 8 turkey hatcheries are considered to be small entities which could be affected. However, only seven of these small entities have ever blood tested for the particular diseases with which these proposed amendments are concerned. Furthermore, it is considered unlikely that the balance of these small entities which participate in the NPIP will blood test for *Mycoplasma gallisepticum* (MG) or *Mycoplasma synoviae* (MS) in the forseeable future. Additonally, it is not anticipated that this action would have a significant economic impact on small organizations or small governmental jurisdictions.

Background

The NPIP is a cooperative State-Federal program through which new technology can be effectively applied to the improvement of poultry breeding stock and hatchery products through the control of certain hatchery-disseminated diseases. The provisions of this voluntary program are changed from time to time to conform with the development of the industry and to utilize new information as it becomes available. These changes are based on recommendations initiated at the biennial National Plan Conference. On July 16, 1982, there was published in the **Federal Register** (47 FR 31028) a notice of the August 2–5, 1982, meeting of the General Conference Committee and the biennial National Plan Conference. The recommended amendments contained in this proposed rule were made by the delegates to that conference, while representing participating flockowners, breeders, and hatcherymen from all cooperating States. Since this is a voluntary program, these provisions apply only to those who wish to participate in the program.

One proposed amendment would reduce the size of the sample of breeding turkeys officially tested for MG if the flock is located in a State which has been classified as an "U.S. M. Gallisepticum Clean State, Turkeys" for two or more years. New provisions are proposed which would require turkey breeding flocks which are molted (or recycled) to be retested in order to retain their MG classification. In order to properly identify poultry which are shown at public exhibitions in U.S. Pullorum Typhoid Clean States, a proposal is being made which would require all exhibited birds to be individually identified with a band when they are blood tested. Amendments are being proposed which would provide for effective sanitizing procedures for hatching eggs and hatchery equipment and which would lessen the chance of spread of a mycoplasmal disease from a poultry house from which infected breeding poultry had been removed. Since the nature of the breeding and hatching industry involves the exchange of hatching eggs and baby poultry between establishments located in different States, but owned or managed by the same company, a proposal is made which would require all such flocks or hatcheries to participate in the program

if any are to participate. In addition, new programs are being proposed to blood test and classify flocks of started poultry which are found to be negative for MG and MS. Also, an extensive testing protocol would be provided to serve as a standardized guide for all laboratories to follow in using the various options for testing for any of the *Mycoplasma* organisms.

Affecting the Mycoplasma Provisions

Sections 145.23 and 145.33 are proposed to be amended by adding new paragraphs (g) to provide for the testing and subsequent classification of qualified egg- and meat-type flocks of started poultry as U.S. M. Synoviae Clean. Also, § 145.33 would be amended by adding a new paragraph (f) to provide for the testing and classification of qualified meat-type flocks of started poultry as U.S. M. Gallisepticum Clean. In order to qualify for these two classifications, a sample of the birds in each flock would be required to have a negative blood test for the disease indicated by the classification. The size of the sample would be 75 birds, if all of the birds in the flock are housed in one building or a minimum of 50 birds per building if the birds in the flock are housed in more than one building. These proposed sample sizes would give a 95 percent probability of finding reactors in a flock in which the rate of infection is at least two percent. According to information presented at the 1978 National Plan Conference by representatives of four State diagnostic laboratories, this rate of infection is the minimum normally found in flocks infected with either MG or MS. Those reports are included in the proceedings of that conference.[1] Tables to determine the sample size at the 95 percent probability level are found in Regulatory Statistics, 5th Edition, June 1975, published by Veterinary Services, APHIS, U.S. Department of Agriculture, hereinafter referred to as "Regulatory Statistics".[2]

Millions of laying hens originate as started poultry provided by other companies or by other divisions within an egg producing company. These testing and classification programs would provide a reliable indication of the *Mycoplasma* status of the flock prior to it being moved to laying quarters. Since flocks negative to these two diseases will produce from 8 to 10 more eggs per year per hen than infected flocks, the goal of the industry is to eventually rid all poultry of the MG and MS organisms.

Section 145.43, paragraph (c)(2) is proposed to be amended by requiring turkey breeding flocks which have been blood tested and classified as U.S. M. Gallisepticum Clean to be retested for MG if they are to retain this classification beyond their first normal egg-laying period. This retest procedure would be the same as for the original test, namely a random sample of at least 10 percent of the birds in the flock, or a minimum of 300 birds tested in flocks of more than 300 birds and each bird in flocks of 300 or less. The usual routine followed for turkey breeding flocks is to keep them in production as long as they are profitably producing hatching eggs. They would then be marketed for human consumption. However, there have been recent instances where breeding flocks can profitably be given a rest at the end of this first laying period and then brought back into egg production for a second time. The time period elapsed from the original blood test at approximately 4 months of age until a flock is brought back into egg production a second time can be from 11 to 12 months. This extended period of time increases the chance that a flock could be exposed to MG and thus contact the disease. This proposal would ascertain that the flock is still negative for MG when it starts into its second egg laying period.

Section 145.44(c) is proposed to be amended by adding a new paragraph (3) which would permit a smaller sample of breeding turkeys to be blood tested for an official MG classification if the flock is located in a State which has been deemed by the Department to be a "U.S. M. Gallisepticum Clean State, Turkeys" for a period of two or more years. The normal sample required to be tested in order to qualify for an official MG classification consists of a random sample of at least 10 percent of the birds in the flock, or a minimum of 300 birds tested in flocks of more than 300 birds and each bird in flocks of 300 or less. This proposal would permit flocks to be qualified on the basis of a negative test of 100 birds if they were located in States which were deemed to be a "U.S. M. Gallisepticum Clean State, Turkeys" for the past 2 years. The lowering of the sample size is justified for flocks located in qualified States because of the added mandatory safeguards which pertain to all turkeys within the State. Under these additional criteria, the chance of a breeding flock becoming infected with MG is greatly lessened. Although the size sample is lower, it is still sufficiently large to detect an infection with a probability of 95 percent, according to the tables found in "Regulatory Statistics."

Section 147.24(a)(2) is proposed to be amended by adding a voluntary management practice to lessen the chance of spread of a mycoplasmal disease. This recommendation urges the poultry farm manager not to remove floor litter from a poultry house which contained birds infected with a mycoplasmal disease for a period of 7 days after removal of the birds. Infected birds shed the mycoplasma organism quite readily at certain stages of the infection. Litter becomes contaminated with the organism and if it is removed too soon, it becomes a potential source of infection for birds in other flocks. This can take place through the moving of litter over roads which are in close proximity of other flocks and particles of litter are blown off the vehicle, or where the litter is spread on fields located near other flocks. By waiting 7 days before removal, most of the organisms will have died and the chance of spread is greatly lessened.

Affecting the Salmonella Provisions

Section 145.53(b) is proposed to be amended by adding the requirement that all poultry which are publicly exhibited in a U.S. Pullorum Typhoid Clean State be identified with a sealed and numbered band. At present this practice is optional and each State determines whether or not exhibited birds should be banded. Under this proposal, birds would be banded to identify them as having been tested for *Salmonella pullorum* and *S. gallinarum* (fowl typhoid). States which are deemed to be U.S. Pullorum-Typhoid Clean States by the Department (presently there are 28 such States) are required to have all exhibited birds blood tested for *S. pullorum* and *S. gallinarum* within 90 days of being exhibited or to have come from a U.S. Pullorum-Typhoid Clean flock. There are many poultry exhibitors who show their birds at numerous shows which are often located in different States. The task of identifying these birds to determine if they have been blood tested is quite great. By requiring them to be identified with a sealed band at testing time, the State inspector will be able to determine their status very quickly.

Affecting General and Auxiliary Provisions

Section 145.1 is proposed to be amended by adding a new paragraph (gg) to define the word "sanitize" in order to recognize procedures other than

[1] Copies may be obtained upon request from the NPIP Staff, USDA, APHIS, Room 828, Federal Building, Hyattsville, MD 20782.

[2] Copies may be obtained upon request from the NPIP Staff, USDA, APHIS, Room 828, Federal Building, Hyattsville, MD 20782.

fumigation with formaldehyde gas for use in reducing disease causing organisms on hatching eggs and on hatchery equipment. While formaldehyde gas has been used extensively for this purpose for many years, new products and procedures are being made available which may accomplish the same results while complementing a total management program. Products and procedures registered with the Environmental Protection Agency as germicidal, fungicidal, pseudomonocidal, or tuberculocidal, used in accordance with the specifications for use as shown on the label of each product, may be approved for use. In addition to the above section, other sections of Parts 145 and 147 which pertain to specific application of sanitation measures would be amended to recognize alternative sanitizing mentods. These sections are 145.6(a)(5); 145.22(d); 145.23(d)(1)(v); 145.32(c); 145.33(d)(1)(v); 145.42(c); 145.52(b); 147.22(c) and (e); 147.23(c), (d), and (e); 147.24(b)(3) and (c); and 147.25.

Section 145.6(e) is proposed to be amended to require all hatcheries which are operated under the ownership or management of the same person or persons or related corporations to participate in the pullorum-typhoid control portion of the program if any of them are to participate. The breeding and hatching industry is being controlled by fewer and fewer persons or corporations. This invariably results in the larger organization having hatcheries in more than one State. The nature of the business dictates that hatching eggs and baby poultry move between hatcheries of the same organization, as the need arises. Consequently, it is imperative that such products have the same pullorum-typhoid classification. At present, all hatcheries within a State which are owned or managed by the same person or organization must have a pullorum-typhoid classification. Changing industry patterns have necessitated this proposed amendment.

Part 147 is proposed to be amended by adding a new section (§ 147.7) outlining recommended procedures for conducting various tests for the mycoplasmas. Over one hundred State and university laboratories cooperate with Federal laboratories and the NPIP program by testing blood samples for the mycoplasmas. Presently there is no single reference where procedures to conduct and interpret all of the different official mycoplasma tests can be found. Testing procedures set forth in this proposed amendment are drawn from several sources, among which are the Proc. 77th Annual Meeting, U.S. Animal Health Association, 1973; Isolation and Identification of Avian Pathogens, 2nd Edition; and Methods of Examining Poultry Biologics and for Identifying and Quantifying Avian Pathogens, 1971. In addition, a well qualified group of research scientists, extension veterinarians, and diagnostic laboratory personnel was convened during the 1982 National Plan Conference to iron out any differences in published procedures and to incorporate newer techniques and materials proven effective in determining the accuracy of the tests. By consolidating and updating all of the official testing procedures, each cooperating laboratory will have uniform guidelines for determining the mycoplasma status of a flock.

Comments

As noted above, this proposal is based on recommendations initiated at the biennial National Plan Conference. A number of comments have already been submitted concerning these recommendations. These comments will be included in the administrative record and considered as comments for this rulemaking proceeding.

List of Subjects in 9 CFR Parts 145 and 147

Poultry diseases, Mycoplasma gallisepticum, Mycoplasma synoviae, Salmonella pullorum, Salmonella gallinarum, Hatcheries, National Poultry Improvement Plan.

Accordingly, it is proposed to amend Parts 145 and 147, Title 9, Code of Federal Regulations, as follows:

PART 145—NATIONAL POULTRY IMPROVEMENT PLAN

1. § 145.1, paragraph (gg) would be added to read as follows:

§ 145.1 Definitions.

* * * * *

(gg) *Sanitize.* To treat with a product which is registered by the Environmental Protection Agency as germicidal, fungicidal, pseudomonocidal, or tuberculocidal, in accordance with the specifications for use as shown on the label of each product. The Official State Agency, with the concurrence of the Service, shall approve each product or procedure according to its specified usage.

2. In § 145.6, paragraph (a)(5), the last sentence would be revised to read as follows:

§ 145.6 Specific provisions for participating hatcheries.

(a) * * *

(5) * * * While not mandatory for participation, all eggs set should be fumigated as described in § 147.25, or otherwise sanitized.

* * * * *

§ 145.6 [Amended]

3. In § 145.6, paragraph (e) would be amended by removing the phrase "within a State" following the words "All hatcheries."

4. In § 145.22, paragraph (d) would be revised to read as follows:

§ 145.22 Participation.

* * * * *

(d) Hatching eggs produced by primary breeding flocks shall be fumigated as described in § 147.25 or otherwise sanitized.

5. In § 145.23, paragraph (d)(1)(v) would be revised and new paragraph (g) added to read as follows:s

§ 145.23 Terminology and classification; flocks and products.

* * * * *

(d) * * *

(1) * * *

(v) Hatching eggs are collected at least four times a day and are handled as described in § 147.22 and are fumigated on the farm as described in § 147.25(a) or otherwise sanitized.

* * * * *

(g) *U.S. M. Synoviae Clean Started Poultry. (1) A flock which originated from U.S. M. Synoviae Clean breeding flocks and was hatched in a hatchery approved by the Official State Agency for production of U.S. M. Synoviae Clean chicks.*

(2) All other poultry on the premises of the candidate flock must originate from U.S. M. Synoviae Clean sources.

(3) The flock is maintained in compliance with the provisions of § 147.26.

(4) The flock's freedom from *M. synoviae* is demonstrated by a negative blood test, as provided in § 145.14(b), of a sample of 75 birds, with a minimum of 50 birds per poultry house, between 15–20 days prior to the flock being moved to laying quarters.

(5) Started poultry shall be delivered to and from the farm premises in crates and vehicles which have been cleaned and disinfected as described in § 147.24(a) of this chapter.

6. § 145.32, paragraph (c) would be revised to read as follows:

§ 145.32 Participation.

* * * * *

(c) Hatching eggs produced by primary breeding flocks shall be

fumigated as described in § 147.25 or otherwise sanitized.

(7) In § 145.33, paragraph (d)(1)(v) would be revised and new paragraph (f) and (g) added to read as follows:

§ 145.33 Terminology and classification; flocks and products.

* * * * *

(d) * * *

(1) * * *

(v) Hatching eggs are collected at least four times a day and are handled as described in § 147.22 and are fumigated on the farm as described in § 147.25(a) or otherwise sanitized; and

* * * * *

(f) *U.S. M. Gallisepticum Clean Started Poultry.* (1) A flock which originated from U.S. M. Gallisepticum Clean breeding flocks and was hatched in a hatchery approved by the Official State Agency for the production of U.S. M. Gallisepticum Clean chicks.

(2) All other poultry on the premises of the candidate flock must originate from U.S. M. Gallisepticum Clean sources.

(3) The flock is maintained in compliance with the provisions of § 147.26.

(4) The flock's freedom from *M. gallisepticum* is demonstrated by a negative blood test, as provided in § 145.14(b), of a sample of 75 birds, with a minimum of 50 birds per poultry house, between 15–20 days prior to the flock being moved to laying quarters.

(5) Started poultry shall be delivered to and from the farm premises in crates and vehicles which have been cleaned and disinfected as described in § 147.24(a) of this chapter.

(g) *U.S. M. Synoviae Clean Started Poultry.* (1) A flock which originated from U.S. M. Synoviae Clean breeding flocks and was hatched in a hatchery approved by the Official State Agency for the production of U.S. M. Synoviae Clean chicks.

(2) All other poultry on the premises of the candidate flock must originate from U.S. M. Synoviae Clean sources.

(3) The flock is maintained in compliance with the provisions of § 147.26.

(4) The flock's freedom from *M. synoviae* is demonstrated by a negative blood test, as provided in § 145.14(b), of a sample of 75 birds, with a minimum of 50 birds per poultry house, between 15–20 days prior to the flock being moved to laying quarters.

(5) Started poultry shall be delivered to and from the farm premises in crates and vehicles which have been cleaned and disinfected as described in § 147.24(a) of this chapter.

8. In § 145.42, paragraph (c) would be revised to read as follows:

§ 145.42 Participation.

* * * * *

(c) Hatching eggs shall be fumigated as described in § 147.25 or otherwise sanitized.

9. In § 145.43, paragraph (c)(2) would be revised to read as follows:

§ 145.43 Terminology and classification; flocks and products.

* * * * *

(c) * * *

(2) A flock qualified as U.S. M. Gallisepticum Clean may retain the classification though its first egg-laying cycle, provided it is maintained in isolation and no evidence of *M. gallisepticum* infection is revealed. A flock which is molted following completion of an egg-laying cycle and subsequently brought back into production, shall be retested within 2 weeks prior to production, as described in paragraph (c)(1) of this section. A State inspector shall visit with the owner or manager of each flock at least once during each laying cycle to discuss and ascertain whether the applicable conditions outlined in § 147.26 of this chapter are being met. If a flock proves to be infected with *M. gallisepticum*, it shall lose this classification.

* * * * *

10. In § 145.44, new paragraph (c)(3) would be added to read as follows:

§ 145.44 Terminology and classification; States.

* * * * *

(c) * * *

(3) If a State retains this status for 2 or more years, individual breeding flocks in the State may qualify for an *M. gallisepticum* classification based on a negative test of a sample of 100 birds.

11. In § 145.52, paragraph (b) would be revised to read as follow:

§ 145.52 Participation.

* * * * *

(b) Hatching eggs produced by primary breeding flocks shall be fumigated as described in § 147.25 or otherwise sanitized.

12. In § 145.53, paragraph (b) would be amended by adding a period at the end of the word "section" and inserting a second sentence before the parenthetical phrase to read as follows:

§ 145.53 Terminology and classification; flocks and products.

* * * * *

(b) * * * All poultry going to public exhibition shall be identified with a sealed and numbered band obtained through or approved by the Official State Agency and the band mumbers shall appear on all VS Form 9–2 or similar pullorum-typhoid testing reports.* * *

* * * * *

PART 147—AUXILIARY PROVISIONS ON NATIONAL POULTRY IMPROVEMENT PLAN

13. Part 147 would be amended by adding a new § 147.7 to read as follow:

§ 147.7 Standard test procedures for mycoplasma.[1]

The serum plate or the tube agglutination test should be considered basic screening tests for mycoplasma antibodies. The test selected will depend on preference, laboratory facilities, and availability of antigen. Both tests, though quite accurate, determine flock status rather than individual bird status, since occasional reactions are nonspecific. Under normal circumstances, the rate of such nonspecific reactions is low. Nonspecific reactions may occasionally be high, particularly after the use of erysipelas bacterin in turkeys and where mycoplasma antibodies are present for closely related mycoplasma other than for the species being tested. The hemagglutination-inhibition (HI) test is too cumbersome for routine screening use. Positive reactions are extremely accurate however, and are useful in evaluating serum samples that react with the plate and/or tube antigens. The test should be conducted with 4 HA units. Titers of 1:80 or greater for both chicken and turkey sera are considered positive, while a 1:40 or 1:20 titer would be strongly suspicious and additional tests should be required.

(a) *Serum plate test.* (1) The serum plate test for mycoplasma is conducted by contacting and mixing 0.02 ml of test serum with 0.03 ml of serum plate antigen on a glass at room temperature. The standard procedure is:

(i) Allow antigen and test serums to warm up to room temperature before use.

(ii) Dispense test serums in 0.02 ml amounts with a pipette (rinsed between samples) to 1½ inch squares on a ruled glass plate. Limit the number of samples (no more than 25) to be set up at one time according to the speed of the operator. Serum should not dry out before being mixed with antigen.

---

[1] For additional information on mycoplasma test procedures, refer to the following references: Proc. 77th Annual Meeting, U.S. Animal Health Association, 1973; Isolation and Identification of Avian Pathogens, 2nd. Edition; Methods for Examining Poultry Biologics and for Identifying and Quantifying Avian Pathogens, 1971.

(iii) Dispense 0.03 ml of antigen beside the test serum on each square.

(iv) Mix the serum and antigen, using a multimixing device if large numbers are to be run at one time.

(v) Rotate the plate for 5 seconds. At the end of the first minute, rotate the plate again for 5 seconds and read 55 seconds later.

(2) A positive reaction is characterized by the formation of definite clumps, usually starting at the periphery of the mixture. Most samples that are highly positive will react well within the 2-minute test period. Reactions thereafter should be considered negative, although partial agglutination at 3 and 5 minutes may warrant further retesting. High-quality antigen contacted with negative serum will usually dry up on the plate without visible clumping. Whenever samples are run, the antigen should be tested against known positive and negative control serums. Standard reference antigens and negative and positive titered sera are available from the National Veterinary Services Laboratories (NVSL), P.O. Box 884, Ames, Iowa 50010.

(3) Since it is difficult to measure uniform amounts of serum with a calibrated loop, this technique should not be used in conducting an official test.

(b) *Serum plate dilution test.* (1) The serum plate dilution (SPD) test may be used to evaluate possible nonspecific reactions, gain additional information to evaluate positive plate tests occurring in an unexpected manner, and/or to evaluate the level of mycoplasma antibodies present in the serum sample. If sufficient serum is available, the following method would provide the dilutions required to conduct the test.

(i) Rack three tubes and put 0.8 ml of phosphate-buffered saline (PBS) in tube 1 and 0.5 ml of PBS in tubes 2 and 3.

(ii) Pipette 0.2 ml of the test serum into tube 1 and discard the pipette.

(iii) With a pipette, mix the serum and PBS in tube 1 and withdraw 0.5 ml and add to tube 2.

(iv) Repeat the process in step (iii), mixing the contents of tube 2 and transferring 0.5 ml to tube 3.

(v) Conduct the test, as described for the serum plate test in paragraph (a), on the undiluted sample and on samples in tubes 1, 2, and 3 after proper mixing of each dilution.

(vi) To assist in the evaluation of the test, conduct concurrent SPD tests using both positive 1:80 and positive 1:160 HI sera for the mycoplasma being tested. The antigen should be pretested for reactivity with standard serum at the 1:5 and 1:10 dilution.

(vii) Interpretation of the SPD test results should be based on the criteria in § 147.6(b) of this part.

(2) Reserved

(c) *Tube agglutination test.* (1) The mycoplasma tube agglutination test is conducted by mixing 0.08 ml of test serum with 1.0 ml of diluted (1:20) antigen in a tube and allowing the mixture to react for 18–24 hours at 37°C. The diluent will be the standard phosphate-buffered saline with phenol. This solution is made up as follows:

	Grams
Sodium hydroxide (C.P.)	0.15
Sodium chloride (C.P.)	8.5
Potassium dihydrogen phosphate (KH_2PO_4) (C.P.)	0.68
Phenol (Crystal) (C.P.)	2.5
Distilled water to make 1,000 ml.	

The pH of the buffered phenolized saline will be 7.1–7.2 if all reagents are accurately measured. The stock tube antigen is diluted 1:20 with buffered phenolized saline. The procedures for the tube test are as follows:

(i) Rack 12×75 mm clean tubes and identify the tubes according to the sample to be tested.

(ii) Add 0.08 ml of the individual test serum to each tube. This will create approximately a 1:12.5 screening dilution of test serum when 1.0 ml of diluted antigen is added. The use of a pipetting device will insure proper mixing of serum and antigen.

(iii) To interpret positive reactions to the 1:12.5 dilution, two additional dilutions may be made by adding 0.04 ml of serum for 1:25 dilution and 0.02 of serum for 1:50 dilution, with the addition of 1.0 ml of diluted antigen as indicated in paragraph (c)(1)(ii) above.

(iv) Shake racks and incubate test systems for 18–24 hours at 37°C.

(2) Tests are read against a dark background under indirect fluorescent light. Regarded as a positive reaction is a clearing of the supernatant fluid, with visible sediment in the bottom of the tube. Incomplete reactions are suspect. Positive and negative control serums should be incorporated into each day's run of tests. Reactions at 1:25 or greater are considered positive. They should be confirmed by the HI test. Incubation for periods greater than 24 hours may be helpful in evaluating suspicious reactions and need for possible retesting or other diagnostic tests.

(d) *Hemagglutination-Inhibition (HI) test.* The mycoplasma HI test is conducted by the constant-antigen, decreasing-serum method. This method requires using a 4-hemagglutination (HA) unit of diluted antigen. Differences in the number of HA units used will change the titers of positive sera markedly. Standard HA antigens for *Mycoplasma gallisepticum, M. synoviae,* and *M. meleagridis* are available from NVSL. The antigen has been titrated and diluted to approximately 1:640. The HA titration of each sample should be checked as described in paragraph (d)(2) on initial use or after long storage. To maintain HA activitiy, the undiluted HA antigen should be stored at −60 to −70°C. The test procedures are illustrated in Tables 2 and 3 of this paragraph.

(1) *Preparation of materials.*

(i) Prepare phosphate-buffered saline (PBS) as follows:

	Grams
Sodium hydroxide (C.P.)	0.15
Sodium Chloride (C.P.)	8.5
Potassium dihydrogen phosphate (KH_2PO_4)	0.68
Distilled water to make 1,000 ml.	

The pH of the PBS will be 7.1–7.2 if all reagents are accurately measured.

(ii) Collect the turkey or chicken red blood cells (RBC's) in Alsever's solution which has been prepared as follows:

	Grams
Sodium citrate	12.0
Sodium chloride	4.2
Dextros	20.5

The sodium citrate and sodium choride are dissolved in 800 ml distilled water and sterilized at 15 lbs. pressure for 15 minutes. Dissolve the dextrose in 200 ml distilled water, sterilize by Seitz filtration and then add aseptically to the sterile citrate and sodium chloride solution.

(iii) From a turkey(s) or chicken(s) known to be free of the mycoplasma being tested, withdraw sufficient blood with a syringe containing Alsever's solution to given a ratio of 1 part blood to 5 parts Alsever's solution (e.g., 8 ml blood in 40 ml of Alsever's solution). Centrifuge the blood suspension at 1,000 rpm for 10 minutes and remove the Alsever's solution or supernatant with a pipette.

(iv) Wash the RBC's two times in 10 or more parts of Alsever's solution, centrifuging after each washing. Centrifugation is at 1,000 rpm for 10

minutes. The supernatant fluid is removed and the RBC deposit resuspended to give a 25 percent suspension of packed RBC's in Alsever's solution. (In testing either chicken or turkey sera, the homologous RBC system must be used; i.e., use chicken cells

(v) For the test, 1 ml of the 25 percent RBC's is added to 99 ml of buffered when testing chickens serum and turkey cells when testing turkey serum.) If this suspension it kept refrigerated, it should keep for 7 or 8 days after the blood has been collected.

saline to make a 0.25 percent RBC suspension.

(2) *Hemagglutination (HA) antigen titration.* The titer of HA antigen is determined as illustrated in Table 1 and described in subparagraphs (d)(2) (i) through (x) of this paragraph.

TABLE 1 Titration of Hemagglutination (HA) Antigen

	Tube No.						
Reagents (ml)	1	2	3	8	9	10	11[a]
PBS	0.8	0.5	0.5.....	0.5	0.5	0.5	0.5
Antigen	0.2						
Transfer	0.5→	0.5→	0.5—...→	0.5→	0.5→	0.5→	c
0.25% RBC	0.5	0.5	0.5	0.5	0.5	0.5	0.5
Ant. dilution	1:5	1:10	1:20	1:640	1:1280	1:2560	
Results[b]	+	+	+	+	-	-	

[a] Tube 11, PBS/RBC control.

[b] + = HA; - = no HA (sample titer 1:640).

[c] Discard 0.5 ml.

(i) Rack a series of 11 chemically clean 12 x 75 mm test tubes. Label the tubes 1–11, left to right.

(ii) Put 0.8ml of PBS in tube 1 and 0.5 ml of PBS in each of tubes 2–11.

(iii) Add 0.2 ml of antigen to tube 1. This will make a 1:5 dilution of antigen. Discard pipette.

(iv) Mix contents of tube 1 thorughly with a clean pipette, and transfer 0.5 ml to tube 2. This will make a 1:10 dilution of antigen in tube 2. Discard pipette.

(v) Continue making serial twofold dilutions of antigen, changing pipettes after each transfer, through tube 10. This will result in a series of twofold dilutions ranging from 1:5 to 1:2560. Discard 0.5 ml of antigen dilution from tube 10.

(vi) Add 0.5 ml of 0.25 percent RBC's to tubes 1–11. Tube 11 will serve as a PBS/RBC control.

(vii) Shake the rack and incubate at room temperature until the cells in the PBS/RBC control tube have settled into a compact button at the bottom of the tube.

(viii) If turkey sera is also to be tested for HI titer, repeat steps outlined in (d)(2) (i) thru (vii) of this paragraph, using 0.25 percent turkey RBC's.

(ix) The end point of the titration is the highest dilution of antigen that produces complete agglutination of the RBC's, as evidenced by the formation of a thin sheet of cells covering the concave bottom of the tube. For example, if complete agglutination is produced through tube 8 (a dilution of 1:640 of antigen), the antigen would be said to titer 640, the reciprocal of the dilution. After the potency of the antigen is established, it should be diluted with 75 percent PBS buffer and 25 percent glycerin to an appropriate titer concentration (1:320–1:640), dispensed in screwcap vials, and stored at −70° C. Under such conditions, potency will be retained for years. There will be a rapid loss of titer if improperly stored.

(x) Specificity of HA antigen should be determined by conducting HI tests with specific chicken sera of variable HI titers. Specific turkey sera of varying HI Titers should be used if turkey sera is also to be tested.

BILLING CODE 3410-34-M

TABLE 2 Hemagglutination-Inhibition (HI) Test:

	Tube No.						
Reagents (ml)	1[a]	2	3	8	9	10	11[b]
PBS	0.9	0	0		0	0	0.5
8-unit antigen	0	0.5	0		0	0	0
4-unit antigen	0	0	0.5	0.5	0.5	0.5	0
Test serum	0.1	0	0	0	0	0	0
Transfer	0.5→	0.5→	0.5—...→	0.5→	0.5→	0.5→	
0.25% RBC	0.5	0.5	0.5	0.5	0.5	0.5	0.5
Serum dilution	1:10	1:20	1:40 ...	1:1280	1:2560	1:5120	

[a] Tube 1. Serum control.

[b] Tube 11. PBS/RBC control.

TABLE 3 Antigen Control:

Transfer	0.5→	0.5→	0.5→	0.5→	0.5[b]
0.25% RBC	0.5	0.5	0.5	0.5	0.5
Unit Antigen/tube	4	2	1	1/2	1/4
Results[a]	+	+	+	-	-

[a] + = HA; - = no HA.

[b] Discard 0.5 ml.

BILLING CODE 3410-34-C

(3) *Reagents for mycoplasma HI test.*

(i) Eight-unit antigen (Dilution factor for stock antigen is established by dividing titer by 8; i.e., 640 antigen is diluted 1:80 PBS to make 8-unit antigen.)

(ii) Four-unit antigen (made by diluting surplus 8-unit antigen 1:2 with PBS).

(iii) PBS at pH 7.0.

(iv) Unknown test serums.

(v) Positive control serum of known titer (should be from the same species as the unknown).

(vi) Negative control serum (should be from the same species as the unknown).

(vii) Solution of 0.25 percent washed RBC's.

(4) *Test outline.*

(i) Rack 10 chemically clean 12×75 mm tubes for each serum, including controls, to be tested. Identify each row of tubes, and label tubes in each row 1–10, left to right. In row 1, add tube 11 for a PBS/RBC control.

(ii) Put 0.9 ml of PBS in tube 1 of each test row; put 0.4 ml of 8-unit antigen in tube 2 of each test row; put 0.5 ml of 4-unit antigen in each of tubes 3–10 in each test row; and put 0.5 ml of PBS in tube 11.

(iii) Add 0.1 ml of test serum to tube 1. This tube will be the serum control in the test system.

(iv) Mix and make 0.5-ml transfers from tube 1 through tube 10. This will result in serial twofold dilutions of serum starting with 1:10 and ending with 1:5120. Discard 0.5 ml from tube 10.

(v) Rack five tubes in which to set up an antigen control.

(vi) In tube 1, put 1.0 ml of 4-unit antegen; put 0.5 ml of PBS in tubes 2–5.

(vii) Make 0.5–ml serial transfers from tube 1 through tube 5, changing pipettes after each transfer. Discard 0.5 ml from tube 5. This will result in a series of tubs respectively containing 4, 2, 1, ½, and ¼ units of antigen.

(viii) After 20–30 minutes at room temperature to submit antibody-antigen reaction, add 0.25 percent washed RBC's to each tube. Shake racks and incubate as for HA titration.

(ix) In this test system, positive serum should inhibit the HA activity of the antigen, while negative serum should have no effect. Inhibition will be evidenced by the formation of a free-flowing button of cells in the bottom of the tube. The titer of the serum can be calculated as the reciprocal of the highest dilution of serum that produces complete HI. Controls should read as follows:

(*a*) Serum control (tube 1). Cells should settle out.

(*b*) PBS control. Cells should settle out.

(*c*) Antigen control. HA in tubes 1–3. Cells should settle out in tubes 4–5.

(*d*) Positive and negative serum control. Positive control should inhibit to its known titer; negative control should have no inhibitory effect.

(x) With this test system and 4 units of antigen HI titers of 80 or above are considered positive and titers of 40 are strongly suspicious. However, titers of 10 or 20 are usually negative. Sample test results are illustrated in Table 4 in this paragraph.

TABLE 4.—SAMPLE RESULTS OF HI TESTS

(Tube and Serum Dilution)

	1 1:5	2 1:10	3 1:20	4 1:40	5 1:80	6 1:160	7 1:320	8 1:640	9 1:1280	10 1:2560
Serum A (HI neg.)	–	+	+	+	+	+	+	+	+	+
Serum B (HI 1:40)	–	–	–	–	+	+	+	+	+	+
Serum C (HI 1:160)	–	–	–	–	–	–	+	+	+	+
Serum D (HI 1:20)	–	–	–	+	+	+	+	+	+	+

+, HA.
–, no HA or HI.

(xi) If serological results from agglutination tests complemented by the HI test are inconclusive, cultural examination, bio-assay, or retesting of samples after an interval of at least 21 days may be indicated.

(e) *Procedure for mycoplasma hemagglutination-inhibition test using microtiter technique.* The microtiter mycoplasma HI test was develop from the tube HI test described in § 147.7(c). Refer to these procedures for preparation of materials not listed below.

(1) *Materials needed.*

(i) Microtiter equipment (minimal); i.e., microplates microdiluters, micropipettes, go-no-go Diluter Delivery Tester, (0.05 ml).

(ii) Phosphate-buffered saline (PBS).

(iii) Reagents from NVSL; i.e., HA antigen and negative and positive titered sera for the mycoplasma to be tested.

(iv) Homologous red blood cells (RBC's) suspension 0.5 percent (2 ml of 25 percent RBC's to 98 ml of PBS) obtained from birds free of the mycoplasma to be tested. (See paragraph (d)(1)(iv) of this section for preparation of RBC's.)

(2) *Microtiter hemagglutination (HA) antigen titration.*

(i) Mark off two rows of 10 wells each for antigen titer (HA is done in duplicate).

(ii) Mark last well in each row for cell controls.

(iii) Prepare in small test tube (12×75 mm) a starting dilution of antigen by combining 0.1 ml antigen with 0.9 ml PBS. This is a 1:10 dilution.

(iv) Add 0.05 ml PBS to all wells, including cell controls.

(v) Add 0.05 ml antigen (1:10 dilution) with diluters to the first well in both rows, mix thoroughly, transfer diluter to second well of each row and mix, continuing through the 10th well of each row. With mixture in diluter from last well, check diluter on go-no-go card, then place diluter in distilled water. If diluter checks out, antigen dilution will be 1:20, 1:40, 1:80, 1:160 1:320, 1:640, 1:1280, 1:2560, 1:5120.

(iv) Add 0.05 ml of 0.5 percent RBC suspension to all wells using a 0.05 dropper.

(vii) Seal plate, shake and allow to stand at room temperature until cells in cell control gather in compact button. The titer is the highest dilution in which agglutination is complete. The dilution contains 1 HA unit in 0.05 ml.

(viii) Prepare a dilution of antigen which contains 8 HA units in 0.05 ml. Example: If the antigen titer is 1:640, then that dilution contains 1 HA unit per 0.05 ml. Then 640 ÷ 8 = 80, or a dilution of 1:80 containing 8 HA units. Or 640 ÷ 4 = 160, a dilution of 1:160 containing 4 HA units per 0.05 ml.

(3) *Microtiter HI test.*

(i) Prepare two dilutions of antigen, one containing 8 HA units per 0.05 ml and one containing 4 HA units per 0.05 ml. The 4-unit antigen can be prepared from the 8-unit antigen by mixing with equal parts of PBS.

(ii) Mark off one row of 8 wells for each test.

(iii) Prepare a 1:15 dilution of each sera to be tested in a small test tube (12 × 75mm): 0.1 ml serum plus 0.4 ml PBS or 0.05 ml serum plus 0.20 ml PBS.

(iv) Add 0.05 ml PBS with the 0.05 ml dropper to the first well in each row.

(v) Add 0.05 ml of 8-unit antigen to well 2 in each row.

(vi) Add 0.05 ml of 4-unit antigen to well 3 through 8 for each row.

(vii) For each serum to be tested, load 0.05 ml diluter with 1:5 dilution as

prepared in paragraph (iii) above and place in first well of row.

(viii) Mix well and transfer loaded diluter to well 2. Continue serial twofold dilutions through well number 8.

(ix) Well 1 (serum dilution of 1:10) is serum control. Well 2=1:20 dilution; well 3=1:40 dilution; well 4=1:80 dilution; well 5=1:160 dilution; well 6=1:320 dilution; well 7=1:640 dilution; and well 8=1:1280 dilution.

(x) *Antigen control*

(*a*) Mark of 6 wells for antigen controls.

(*b*) Add 0.05 ml PBS to wells 2, 3, 4, 5, and 6.

(*c*) Add 0.05 ml 8-unit antigen to wells 1 and 2.

(*d*) With empty diluter, mix contents of well 2. Continue serial twofold dilutions through well 6.

(*e*) Well 1 contains 8 units; well 2 contains 4 units; well 3 contains 2 units; well 4 contains 1 unit; well 5 contains ½ unit; and well 6 contains ¼ unit.

(*f*) Mark off two wells for cell controls and add 0.05 ml PBS to each.

(*g*) After 20–30 minutes at average room temperature (20°–23°) to permit antibody-antigen reaction, add 0.05 ml of a 0.05 percent suspension of RBC's to all wells.

(*h*) Seal all wells and shake thoroughly.

(*i*) Incubate at room temperature for 30–45 minutes.

(xi) *Interpretation:* The HI titer is the highest serum dilution exhibiting complete inhibition of hemmagglutination as indicated by flowing of cells when the plate is tilted. Serum having a titer of 1:80 or greater is considered positive. A titer of 1:40 or 1:20 is suspicious.

§ 147.22 [Amended]

14. In § 147.22, paragraph (c) would be amended by removing the period from the end of the first sentence and adding the phrase "or otherwise sanitized." and, in the second sentence, by replacing the word 'fumigated' with the word "sanitized".

15. In § 147.22, paragraph (e) would also be amended by adding the phrase "or otherwise sanitized" between the words 'clean, fumigated,' and 'used cases.'

§ 147.23 [Amended]

16. In § 147.23, paragraph (c) would be amended by adding the pharse "or otherwise sanitized" between the words 'and fumigated' and 'after each'.

17. In § 147.23, paragraph (d) would also be amended by adding, in the first sentence, the phrase "or otherwise sanitized" between the words 'be fumigated' and 'prior to' and by adding, in the second sentence, the phrase "or otherwise sanitized" between the words 'be fumigated' and 'after transfer.'

18. In § 147.23, paragraph (e) would also be amended by adding the phrase "or otherwise sanitized" between the words 'clean, fumigated' and 'egg cases'.

19. In § 147.24, paragraph (a)(2) would be amended by adding a final sentence to read as follows:

§ 147.24 Cleaning and disinfecting.

(a) * * *

(2) * * * Housing where poultry infected with a mycoplasmal disease were kept should remain closed for 7 days, before removal of the litter.

* * * * *

20. In § 147.24, paragraph (b)(3) would be amended by adding the phrase "or otherwise sanitized" between the words 'in § 147.25 (e)' and 'prior to.'

21. In § 147.24, paragraph (c) would also be amended by deleting the period at the end of the paragraph and adding the phrase "or otherwise sanitized."

§ 147.25 [Amended]

22. In § 147.25, the introductory paragraph would be amended by replacing the phrase 'is recommended' with the phrase "may be used".

(Sec. 101 (b), Pub. L. 425, 78th Cong. 58 Stat. 734, as amended, 7 U.S.C. 429)

Done at Washington, D.C. this 23rd day of May, 1983.

K. R. Hook,

Acting Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 123

[Revision 10]

Disaster Loans

AGENCY: Small Business Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: Part 123 of the Agency's regulations relating to disaster loans has been rewritten to improve the format and to incorporate legislative changes contained in the Omnibus Budget and Reconciliation Act of 1981 (Pub. L. 97–35).

In addition, this revision includes new criteria for disaster declarations and agricultural loans, definitions of "substantial change of ownership" and "substantial economic injury," refinancing criteria for business machinery and equipment, procedures for reconsideration, and a provision making a disaster declaration applicable to physical loss arising from such disaster after the date contained in the declaration.

All interest rates applicable to loans made before August 13, 1981, have been deleted from the body of the regulations and placed in Appendix A thereto.

The revised agreement between Small Business Administration and Farmers Home Administration is contained in Appendix B.

DATE: Comments must be received on or before June 27, 1983.

ADDRESS: Written comments are to be submitted in duplicate to the Deputy Associate Administrator for Disaster Assistance, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Bernard Kulik, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416; 202–653–6879.

SUPPLEMENTARY INFORMATION: This proposed rule is a complete revision of Part 123, necessitated by legislative changes and by the need to provide a format facilitating reference to grouped subject matter. In the instances of changes in the regulation mandated by changes in legislation, SBA had no choice but to make those changes as directed. No other interpretation but that which appears was permissible.

Although most of the changes are legislative in origin, the Agency is also incorporating matters of policy to be followed in the Administration of the disaster loan program. They are:

1. Step-by-step procedures for applicants seeking reconsideration of their loan requests (§ 123.11). Such reconsideration has always been available to applicants, and applicants have been so advised, but step-by-step procedures have not been set forth in the regulations previously.

2. New criteria for disaster declarations (§ 123.23). The minimum amount of damage warranting a disaster declaration by Small Business Administration has been amended to change the amount of individual damage to homes or businesses from "40 percent or more of their estimated fair replacement value" to "40 percent or more of their estimated fair replacement value" to "40 percent or more of their estimated fair replacement value or predisaster fair market value, whichever is lower."

3. New loss formula for agricultural loans (§ 123.28). Loss eligibility would be based on "cash outlays production costs" rather than the prior year's market prices. A "minimum loss"

criteria, similar to Farmers Home Administration criteria, is included, to avoid disparity between the two agricultural assistance programs.

4. A definition of "substantial change of ownership" (§ 123.22). This definition would exclude minor changes in ownership from the prohibition against assisting persons who purchase the property subsequent to the disaster.

5. A provision making eligible any damage occurring after the disaster date but resulting from the disaster (§ 123.23). This will eliminate administrative problems in flood disasters.

6. Amendment of geographic area (from state to county) for damage criteria relating to a disaster certified by the Governor of a State and requiring publication thereof in the **Federal Register** (§ 123.24). This change will affect economic injury criteria only.

7. A provision permitting physical disaster loan proceeds to be used for refinancing existing loans for substantially damaged business machinery and equipment, under certain conditions (§ 123.25). The regulations presently allow such refinancing for real estate only.

8. A definition of "substantial economic injury" (§ 123.41). This definition will inform and assist businesses in preparing applications for Economic Injury Disaster Loans.

9. Substitution of the revision of the agreement between Small Business Administration and Farmers Home Administration (Appendix B) for the form of agreement presently contained in Appendix A of the regulations.

Regulatory Impact: SBA has determined that this proposal taken as a whole does not constitute a major rule for the purposes of Executive Order 12291. In this regard we are certain that the annual effect of this rule on the economy will be less than $100 million. In addition, this proposed rule, if promulgated as final, will not result in a major increase in costs or price for consumers, individual industries, Federal, State or local government agencies or geographic regions, and will not have significant adverse effects on competition, employment, investment, productivity, or innovation.

For the purpose of compliance with the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., certain provisions of this proposal, if promulgated in final form, may have significant economic impact on a substantial number of small entities. The following analysis of those provisions is provided within the context of the review prescribed by the Regulatory Flexibility Act (5 U.S.C. 603).

1. Proposed § 123.24(c) provides that the governor of a state may certify to SBA that at least 5 small business concerns located in the same county or political subdivision have suffered substantial economic injury due to a disaster and that SBA may thereafter publish an appropriate disaster designation. This is a departure from present procedure which permits publication of such a designation upon substantial economic injury to 5 small businesses located within a given state. This will make declaration of an economic injury diaster more difficult, and will restrict such a declaration to the political subdivision of a state in which the injury actually occurred. In this way SBA's assistance will be more accurately focused than heretofore. This provisions will be of general applicability in all economic injury disaster situations.

The legal basis for this provision 15 is U.S.C. 636(b). The provision itself will involve no bookkeeping or recordkeeping requirements other than filing normal applications for assistance. There are no other Federal rules which overlap or otherwise duplicate this proposal. An exemption from coverage of this rule for small entities would not be feasible or consistent with the applicable statutory provisions.

2. Proposed § 123.28 provides a formula by which compensable loss to farm disaster sufferers must be computed. This is a new addition to SBA's regulations. The purpose of the formual is to restrict compensation to a properly measurable amount of loss. SBA contemplates that this formula will not often be used, since under present law farm losses are to be compensated by SBA only if not compensable by FmHA.

The legal basis of this proposal is 15 U.S.C 636(b). It imposes no recordkeeping or bookkeeping requirements by itself. There are no other Federal rules which overlap or otherwise duplicate this proposal. An exemption from coverage of this rule for small entities would not be feasible or consistent with the applicable statutory provisions.

3. Proposed § 123.41 provides a new definition of the statutory term "substantial economic injury" for the purpose of qualification for disaster benefits. This proposal represents a codification of the meaning SBA has previously attached to the term in its Standard Operating Procedure. The effect of the definition is to qualify entities which have suffered such injury for disaster benefits. The legal basis for the proposal is 15 U.S.C. 636(b)(2). It is not feasible to estimate the number of entities to which the proposal would apply, nor is it possible, within the applicable statutory framework, to provide an exemption from its coverage for small entities. There are no Federal rules which duplicate, overlap or conflict with this proposal.

Collection of information and recordkeeping requirements have been submitted to OMB for approval under the Paperwork Reduction Act.

List of Subjects in 13 CFR Part 123

Disaster loans, Federal action loans.

Accordingly, pursuant to the authority contained in section 5(b)(6) of the Small Business Act (15 U.S.C. 631 et seq.), Part 123, Title 13 of the Code of Federal Regulations is proposed to be revised as follows:

PART 123—DISASTER—PHYSICAL DISASTER AND ECONOMIC INJURY LOANS

Sec.

123.1 Explanation of regulations.

Subpart A—Conditions Applicable to All Loans Under This Part

123.2 Authority.
123.3 Types of loans.
123.4 Financial institutions.
123.5 Fees and charges.
123.6 Where to apply.
123.7 Obtaining loan funds.
123.8 Terms and amounts of loans.
123.9 Interest rates.
123.10 Collateral.
123.11 Reconsideration.
123.12 Loan administration and liquidation.
123.13 Requirements applicable to flood-prone areas.
123.14 Civil rights requirements and economic protection.
123.15 Lead based paint prohibition.
123.16 Loans to agricultural enterprises.
123.17 Books and records; SBA access.

Subpart B—Physical Disaster Loans

123.20 Introduction.
123.21 Physical disaster loans.
123.22 Definitions.
123.23 Damage criteria.
123.24 Declaration procedures (physical disaster).
123.25 Conditions affecting all physical disaster loans.
123.26 Special conditions—Home loans.
123.27 Special conditions—Business loans.
123.28 Additional conditions—Farm loans.
123.29 Loans to major sources of employment.
123.30 Loans to privately owned colleges and non-profit organizations.
123.31 Step-by-step procedure for physical disaster loan applicants.

Subpart C—Economic Injury Disaster Loans, and Economic Injury Federal Action Loans

123.40 Introduction.
123.41 General provisions applicable to all loans.
123.42 Special provisions—Economic injury disaster loans.

Sec.
123.43 Special provisions—Federal action economic injury loans.
Appendix A—Interest rates in effect prior to August 13, 1981.
Appendix B—Memo of Understanding with Farmers Home Administration.

Authority: Sec. 5(b)(6) of the Small Business Act, 15 U.S.C. 631 et seq.

§ 123.1 Explanation of regulations.

(a) *Programs covered.* This part covers the disaster programs authorized under subsections 7 (b), (c) and (f) of the Small Business Act, 15 U.S.C 636 (b) and (c), and is published pursuant to Sec. 5(b)(6) of that Act, 15 U.S.C. 634(b)(6).

(1) Subpart A includes regulations common to all disaster programs.

(2) Subpart B includes regulations governing physical disaster loans, including loans to Major Sources of Employment.

(3) Subpart C includes regulations for loan programs designed to alleviate economic injury casued by physical disasters and by action of the Federal government.

(b) *Emergency Changes.* Because of the emergency nature of the programs covered by this Part, particularly the physical disaster loan program in Subpart B, the regulation cannot anticipate all the contingencies, problems and needs which may arise in any given situation. SBA therefore advises that the regulations under this part must be and are subject to change without advance notice and publication in the **Federal Register**. SBA will, however, make every effort to publicize changes of substance and procedure by whatever means practicable under the circumstances, including, but not limited to press releases to newspapers, radio and television stations, posting notices in public places, and by direct mailings (when possible) to affected concerns or persons. Publication in the **Federal Register** of appropriate regulatory changes will follow as soon as possible.

(c) *Captions* are inserted for convenience only, and are not a part of these regulations.

Subpart A—Conditions Applicable to All Loans Under This Part

§ 123.2 Introduction.

SBA is authorized to make or to guarantee loans as necessary or appropriate to victims of physical disaster or of economic injury caused by such disaster, or by Federal action. No economic injury disaster loans or Federal action economic injury loans are authorized for applicants able to obtain Credit Elsewhere (see definition in § 123.22). No person who has been convicted of a felony during and in connection with a riot or civil disorder shall be permitted, for a period of one year after the date of the conviction, to receive any benefit under any law of the United States providing relief for disaster victims (Pub. L. 90–448, Sec. 1106(e); 5 U.S.C. 7313 note).

§ 123.3 Types of loans.

All financial assistance programs implemented in this part may be made as direct loans or in participation with a financial institution on an immediate or guaranteed basis as defined in §§ 122.7, .8 and .10 of this chapter, and SBA's share in an immediate participation or guaranteed loan may not exceed 90 percent of the balance of such loan outstanding at the time of disbursement.

§ 123.4 Financial institutions.

"Financial institutions" under this part are those which meet the criteria set forth in § 120.4 of this chapter.

§ 123.5 Fees and charges.

(a) *Closing fees.* No closing fee will be charged to a borrower with respect to any loan authorized in this part.

(b) *Service fees.* A financial institution, while it services an immediate participation loan, or a deferred participation loan (guaranty) where SBA has purchased its portion, may not charge the borrower a fee for such service. However, for loans made under section 7(b)(3) of the Small Business Act, participating institutions may deduct, only out of interest collected for the account of SBA, and only so long as such participating institution is servicing the loan, a service fee of three-eights of one percent per annum where SBA's share is 75 percent or less, or of one-fourth of one percent where SBA's share is more than 75 percent, computed on the unpaid principal balance of SBA's share of the loan. Such fee shall not be added to any amount which the borrower is obligated to pay under the loan.

(c) *Guaranty fee.* A guaranty fee will be charged by SBA to the lender with respect to all physical disaster and economic injury loans, as set forth for business loans in Part 120.

§ 123.6 Where and how to apply.

A single copy of an application on a form provided by SBA (OMB Approval No. 32450017 or 32450018) may be filed with the District office, Branch office, Disaster Branch office or Disaster Area Office, as appropriate. If a financial institution is participating, two copies of the application should be filed with such institution, and it will forward one copy to SBA. An applicant must complete a disaster loan application and submit such additional information as SBA may require. This information should be submitted to the nearest SBA disaster or other field office, preferably in person, within the time limit established in the applicable disaster declaration for the filing of applications. SBA will accept applications after such time limit only when SBA determines that an extreme hardship existed and the late filing was the result of causes substantially beyond the control of the applicant.

§ 123.7 Obtaining loan funds.

(a) *Loan authorization.* When a loan has been approved, a loan authorization is issued, which will specify the conditions the borrower must meet.

(b) *Loan Closing.* If the loan is a direct loan, the applicant will be notified by SBA of the conditions and loan closing procedure. Otherwise, the participating lender will arrange the closing.

§ 123.8 Terms and amounts of loans.

(a) *Loan terms.* No loans made under this part, including renewals and extensions thereof, may be authorized for a term in excess of 30 years (see also § 123.12(b)), and no physical disaster loan made to a business able to obtain Credit Elsewhere (as defined in § 123.22) may be authorized for a term exceeding three years. Maturity will be established on each loan on the basis of the need of the borrower and the borrower's ability to repay. Repayment ability according to the loan terms must be determined by SBA. Generally, equal monthly payments of principal and interest are required, except that borrowers with seasonal or fluctuating income may be accorded other payment terms. Payments will normally begin no later than 5 months from the date of the note. There is no penalty for prepayment of a direct loan.

(b) *Loan amounts.* Subject to the limitations and conditions imposed by §§ 123.13, 123.25 through 123.28 and 123.41 through 123.43, loans under this part may be in amounts equal to 100 percent of the Eligible Physical Loss, as defined in § 123.22, if the applicant is a Homeowner, and 85 percent if the applicant is a business or otherwise.

§ 123.9 Interest rates.

Specific interest rates for physical disaster home loans are set forth in § 123.26, and the rate for physical disaster and economic injury business loans in § 123.27 and § 123.41, respectively. The applicable rate of interest shall appear in the Disaster Declaration and shall be that rate which is in effect on the Commencement Date, as defined in § 123.22.

§ 123.10 Collateral.

The Small Business Act contains no specific requirements with respect to collateral as security for disaster or economic injury loans, nor has SBA established any rigid rule in regard to collateral. However, SBA may require applicants to pledge whatever collateral is available.

§ 123.11 Reconsideration.

(a) *Where to apply.* Any applicant whose request for a loan is declined has the right to present information to overcome the reason(s) for decline and to request reconsideration. However, any decline due to size can only be appealed in accordance with the procedures set forth in Part 121 of the Regulations.

(b) *How to apply.* A request for reconsideration must be in writing and received by the office that declined the original request, within 6 months of the initial decline. After 6 months a new application is required.

(c) *Contest of request.* The written request for reconsideration must contain all significant new information that the applicant relies on to overcome the reason(s) for decline. The request for reconsideration of a business loan must also be accompanied by current business financial statements.

(d) *Alternate reasons for decline.* The specification by SBA of any reason for denial of a loan request shall not constitute a waiver of SBA's right to deny such request for any other reason.

(e) *Further reconsideration.* An applicant whose request is declined on reconsideration has the right to request further reconsideration at the next higher office. The "next higher office" in the case of a branch office is the Area Processing Center. In the case of the Area Processing Center it is the Area Director's office.

(f) *Contents of request for further reconsideration.* All requests for reconsideration at the next higher office must be in writing and received by the office that processed and declined the prior reconsideration within 30 days of the decline action. The request must state that the applicant is seeking action at the next higher office and must contain the applicant's written justification for believing that the decline action should be reversed.

(g) *Final decision.* The decision of the Area Director is final unless: (1) The Area Director does not have authority to approve the requested loan, or (2) the Area Director refers the matter to the Deputy Associate Administrator for Disaster Assistance, or (3) the Deputy Associate Administrator for Disaster Assistance, upon a showing of special circumstances, requests the Area Director's office to forward the matter to the Central Office for final consideration. "Special Circumstances" as used herein may include, but are not limited to, policy reconsideration or reevaluation by elements of the Agency, alleged improper acts by SBA personnel or others, conflicting policy interpretation between two area offices or other such considerations.

§ 123.12 Loan administration, extension and liquidation.

(a) *Loan administration.* Immediate participation and guaranteed loans closed by participating lenders will be administered by such lenders. All direct and immediate participation loans closed by SBA will be administered by SBA. Loans are administered and, if necessary, liquidated by sale of collateral and other legal recourse against borrower and guarantors according to the procedures and policies of §§ 122.20 through 122.25 of this chapter, as applicable.

(b) *Extensions* of maturity or renewals of loans are limited to such periods of time as appear necessary to avoid the forced liquidation of loans. Generally, several short extensions will be granted rather than one lengthy one. Subject to § 123.8(a), extensions are granted only when it appears that no other course of action will result in a greater or earlier recovery. The maturity of SBA's share of physical disaster repair and replacement loans to Homeowners and small concerns may be extended and payments of principal and interest may be suspended for periods not to exceed five years, if the related disaster declaration was made by the President or the Secretary of Agriculture, and SBA finds such action necessary to avoid severe financial hardship. Physical disaster and economic injury loans may also be extended or renewed for additional periods not to exceed ten years beyond the original maturity on request of the loan participant, to avoid a default, and upon agreement by the borrower to repay SBA for funds expended in connection therewith, if such extension or renewal will aid in the orderly liquidation of such loan, and if the original maturity of such loan did not exceed twenty years. For additional moratorium provisions, see Part 131 of this chapter.

(c) *Split interest rates.* On loans made under prior legislation at split interest rates, all repayments of principal of SBA's share shall be applied first to portions of loans carrying the lowest interest rate.

§ 123.13 Requirements applicable to flood-prone areas.

(a) *Community participation in flood insurance.* SBA has no authority to make loans in special hazard areas (flood, mudslide and flood-related erosion areas) defined by the Federal Insurance Administration unless the local community participates in the Federal flood insurance program, or less than a year has elapsed since the community was formally notified of the identification of a special hazard area within its boundaries. (See 44 CFR Part 64.)

(b) *Maintenance of flood insurance.* Eligible Applicants in such special hazard areas must purchase flood insurance in accordance with the requirements of Part 116, Subpart B of this chapter. Failure to maintain or obtain flood insurance as required by SBA will result in ineligibility for future SBA financial assistance. This requirement is in addition to other insurance requirements specified in the loan authorization.

(c) *Floodplains and Wetlands.* For special requirements in such areas, see Subpart D, Part 116 of this chapter.

§ 123.14 Civil rights requirements and economic protection.

(a) *Civil rights regulations.* Loan recipients (other than Homeowners) are subject to the civil rights requirements of Parts 112 and 113 of this chapter, and of Part 117, when adopted. The age of an applicant will not be considered in determining whether a loan should be made, or the amount of the loan, provided the applicant has the legal capacity to contract. The requirements of the Equal Credit Opportunity Act, 15 U.S.C. 1691 apply to all SBA loan recipients. See 12 CFR Part 220 and the Equal Credit Opportunity provision of SBA Form 1261.

(b) *Construction loans.* If loan proceeds in excess of $10,000 are to be used for the alteration, rehabilitation, construction, conversion, extension or repair of buildings or real property, applicants must sign and comply with "Applicant's Agreement of Compliance," SBA Form 601.

§ 123.15 Lead based paint prohibition.

Loan recipients are subject to the prohibition against the use of lead based paint set forth in Part 116, Subpart C of this chapter.

§ 123.16 Loans to agricultural enterprises.

"Agricultural enterprises" means those businesses engaged in the production of food and fiber, ranching and raising of livestock, aquaculture,

and all other farming and agriculture-related industries. An agricultural enterprise is eligible for loan assistance under Subpart B (physical disaster) to repair or replace property other than residences and personal property only if it is not eligible for emergency loan assistance from the Farmers Home Administration (for example, because of: (a) Alien status; (b) being a corporation, partnership or cooperative not primarily engaged in farming; or (c) owned by an individual who does not operate the farm). Applicants declined by FmHA for any other reason including unfavorable credit determination or lack of repayment ability are not eligible for SBA disaster loan assistance. All agricultural enterprise applicants to SBA must present a letter or referral from FmHA which specifies the particular reason for ineligibility. See §§ 123.28 and 123.42 for economic injury disaster loans.

§ 123.17 Books and records; SBA access.

(a) *Conditions applicable to all loans.* As a condition of the receipt of a loan under this part, the borrower shall maintain complete records of all transactions financed by the loan proceeds, including copies of all contracts and receipts, for a period of three years after the final loan disbursement, and during the same period, shall make those records available upon request for inspection, audit and reproduction by SBA or other authorized Government personnel during normal business hours.

(b) *Conditions applicable to loans to businesses and agricultural enterprises.* As a condition of the receipt of a loan under this part, the borrower shall maintain current and proper books of account for the most recent five years in a manner satisfactory to SBA and any financial institution participating in the loan until three years after the date of maturity, including any extensions made pursuant to § 123.12(b), or the date of the loan is paid in full, whichever occurs first. This shall include borrower's financial and operating statements, insurance policies, tax returns and related filings, records of earnings distributed and dividends paid, and records of compensation to officers, directors, holders of 10% or more of borrower's capital stock, partners and proprietors. The borrower shall make available to SBA or other authorized Government personnel upon request all such books and records for inspection, audit and reproduction during normal business hours. The borrower shall also permit SBA and any participating financial institution to inspect and appraise borrower's assets.

Subpart B—Physical Disaster Loans

§ 123.20 Introduction.

This Subpart contains the regulations specifically dealing with loans made to repair or replace property damaged by a physical disaster. (For regulations applicable to all loans under this part, see Subpart A.) This Subpart sets forth the procedures by which a Disaster Area is declared, and assistance made available by SBA to disaster victims. Conditions affecting all loans are set forth first, then special conditions for home, business, agricultural loans, loans to Major Sources of Employment, and loans to privately owned colleges and universities.

§ 123.21 Physical disaster loans.

(a) *Loans to victims.* SBA is authorized to make, or to participate (on an immediate or guaranty basis) in, loans to victims of floods, riots, civil disorders or other catastrophes, to repair, rehabilitate or to replace physically damaged or lost property when a physical disaster declaration has been issued.

(b) *Major employer.* For loans to any Major Source of Employment, see § 123.29.

(c) *Flood-prone areas.* For limitations on the foregoing authority, see § 123.13 above and Subpart B, Part 116 of this chapter.

§ 123.22 Definitions.

Defined terms are capitalized throughout this subpart.

Adjusted Treasury Rate: The rate of interest determined by the Secretary of the Treasury taking into consideration the current average market yield on outstanding marketable obligations of the United States with remaining period to maturity comparable to the average maturities of such loans made under Section 7(b) of the Act, plus an additional charge of not to exceed one percent per annum as determined by the Administrator, and adjusted to the nearest one-eighth of one percent.

Commencement Date: The beginning of events of a catastrophic nature culminating in a Disaster. Such Commencement Date will be stated in the relevant Disaster declaration (see also § 123.24(a)).

Credit Elsewhere: The availability, in the judgment of SBA, of sufficient credit from non-Federal sources on reasonable terms and conditions, taking into consideration prevailing rates and terms in the community in or near where the concern transacts business or the Homeowner resides, for similar purposes and periods of time.

Disaster: This term means, generally, a single sudden physical event of catastrophic nature (such as floods, riots or civil disorders) which causes severe damage.

Disaster Area: An area which has been declared or designated as such because of damage suffered as a result of a physical disaster;

Eligible Applicants: A homeowner, business of any size, nonprofit corporation, religious or eleemosynary institution, or other private organization (including a privately owned college or university) which has suffered physical damage as a result of its location in a Disaster Area is eligible to apply for assistance.

Eligible Physical Loss: (a) A physical loss is necessary to loan eligibility under this Subpart B. It must be verified by SBA. Loss may be claimed only by the owner(s) (or the lessee(s) of the property if the lease requires the lessee to repair or rebuild) at the time of the disaster. Beneficial ownership as well as legal title (real or personal) may be considered in determining who suffered the loss, except that an equitable interest resulting from a mortgage or deed of trust will not make the holder of such interest eligible.

(b) Losses shall not be eligible:

(1) When a substantial (more then 50%) voluntary change of ownership occurred after the disaster, and no contract of sale existed at the time of the disaster;

(2) When the replacement value is extraordinarily high, and is not easily verified, such as in the case of the value of antiques or hobby collections;

(3) To the extent that such loss is covered by insurance, grants, gifts to replace personal property (such as from the American Red Cross), or other compensation, if all or part of such compensation is available for repair or replacement. Such compensation must either be deducted from the claim, or assigned (paid) to SBA to reduce the outstanding balance of the loans, since Federal law prohibits duplication of benefits. (Borrowers must notify SBA of any amounts so received and must apply them to the outstanding loan balance in inverse order of maturity.) However, any financial assistance supplied by an Individual and Family Grant Program (Federal Emergency Management Agency) solely to meet an emergency need pending processing of an SBA loan may be repaid out of SBA loan proceeds, provided the funds were used for eligible SBA loan purposes. Condemnation awards shall be taken into consideration in determining the amount of the loss to the extent that

such awards are available for replacement purposes.

(4) When the victim is deemed to have assumed the risk, (for example, when property is located within a flowage easement, or in an area between a river and a levee without a business need therefor), or where flood insurance was previously required but not purchased, or was purchased and not maintained.

(5) If the property damaged constitutes a secondary home. The loss may be considered a business loss if the property is rented and if the property would not constitute a "residence" under the provisions of § 280A of the Internal Revenue Code.

(6) If the property is a vehicle of the type normally used for recreational purposes, such as motor homes, aircraft, boats, etc. The loss may be included in a business applicant's loan if the applicant submits evidence of its use in the business.

(7) If the property consists of cash or securities.

Homeowner: This term includes owner-occupants and lessees (renters) of residential property and also includes owners of personal property damaged by the Disaster.

Loan Purposes: The purpose of these loans and the only permissible use therefor is to restore or replace a victim's primary home (including a mobile home used as the primary residence of the applicant) or business property as nearly as possible to predisaster condition. A loan to a Homeowner may be used to repair or replace damaged or lost furniture and other belongings, or to repay interim financing obtained for that purpose, subject to the definition of Eligible Physical Loss of this section. Funds may be used by a business concern to repair or replace destroyed or damaged business facilities, inventory, machinery or equipment, or to repay interim financing obtained for such purpose. If the disaster victim elects to construct a new home or new business facilities on a different site, the loan may be used for such purpose. Any such loan shall not exceed the estimated cost of restoring or replacing the damaged or destroyed property. SBA's lien position shall be at least as strong as it would have been if the victim had restored at the original location, and loans to relocate a 1 to 4 family residential structure will be subject to the Real Estate Settlement Procedures Act of 1974.

Major Disaster: A disaster declared by the President which includes individual assistance. (See § 123.24(a).)

Major Source of Employment: (a) A concern which employed 10 percent or more of the entire work force of a geographically identifiable community, no larger than a county; or (b) a concern which employed 10 percent or more of the work force in an industry within the Disaster Area; or (c) any business within the Disaster Area which employed 1,000 or more employees.

"Old Formula Rate": An interest rate not to exceed the average annual interest rate on all interest-bearing obligations of the United States then forming a part of the public debt as computed at the end of the fiscal year next preceding the date of the loan and adjusted to the nearest one-eighth of one percent plus one-quarter of one percent.

§ 123.23 Damage criteria.

(a) *Minimum damage requirements.* A physical disaster declaration by the Administrator of SBA is based solely on physical damage to buildings, machinery, equipment, inventory, homes and other property, of an extent that warrants a declaration. The Administrator of SBA has no legal authority to make any physical disaster declaration based solely on economic injury. The minimum amount of damage that SBA usually requires before making a physical disaster declaration is:

(1) In any county or other political subdivision of a State, at least 25 homes or 25 businesses, or a combination of at least 25 homes, businesses, or other eligible institutions have each sustained uninsured losses of forty (40) percent or more of their estimated fair replacement value or predisaster fair market value, whichever is lower; or

(2) At least three businesses have sustained uninsured losses of forty (40) percent or more of their estimated fair replacement value or predisaster fair market value, whichever is lower, and, as a direct result of the physical damage, 25 percent or more of the work force in the community would be unemployed for at least 90 days.

(b) *Continuing damage.* All damage suffered in the Disaster Area subsequent to the Commencement Date as a result of the event for which the declaration was made (for example, continued flooding or snowfall) will be considered eligible damage, deemed to have occurred on the Commencement Date.

§ 123.24 Declaration procedures (physical disaster).

(a) *Major Disaster.* When, pursuant to the Disaster Relief Act of 1974, 42 U.S.C. 5141(b), the President declares a Major Disaster which includes the provision of individual assistance, SBA shall issue its disaster declaration in accordance therewith except that if SBA has previously issued a disaster declaration with an earlier Commencement Date, SBA will continue to use its established Commencement Date.

(b) *Small Business Administration Disaster Declaration.* A physical disaster declaration by SBA must be requested by the Governor of the State in which the Disaster occurred. Such request must be made to SBA's Regional Office wherein the Disaster occurred and must be within sixty (60) days of the incident period of a Disaster. The Administrator may, in case of undue hardship extend the filing time for request. The appropriate SBA Regional Office will forward the request to the appropriate Disaster Area Office where the request will be evaluated and forwarded, with a recommendation, to SBA's Central Office. The Administrator will take final action, and if the request is approved, publish a notice of Disaster declaration in the **Federal Register**. An Economic Injury Declaration always accompanies a Major Disaster Declaration and an SBA Disaster Declaration.

(c) *Certification by Governor.* When Disaster damage is insufficient for a Major Disaster Declaration, an SBA Disaster Declaration or a Designation by the Secretary of Agriculture, The Governor of the State wherein the disaster occurred may certify to SBA that at least five (5) small business concerns have suffered Substantial Economic Injury and are in need of financial assistance not otherwise available on reasonable terms in the Disaster Area. The minimum five (5) small business concerns must be located in the county or other political subdivision of a state in which the Disaster occurred. Such certification with supporting documentation shall be sent to the Regional Office wherein the Disaster occurred within 120 days of the incident period of the physical Disaster. The Regional Office will forward the request to the appropriate Disaster Area Office where the request will be evaluated and forwarded with a recommendation to SBA's Central Office. The Administrator will take final action and if the request is approved, publish a notice for Disaster designation in the **Federal Register**. The Administrator may in the case of undue hardship accept such request after 120 days have expired.

(d) *Designations by the Secretary of Agriculture.* SBA May provide economic injury assistance for a natural disaster, determined by the Secretary of Agriculture pursuant to the Consolidated Farmers Home Administration Act of 1961 (7 U.S.C. 1961). Under these designations SBA makes Economic Injury assistance

available to eligible nonfarm small businesses.

§ 123.25 Conditions affecting all physical disaster loans.

(a) *Amount.* The amount of a loan is limited to the Eligible Physical Loss sustained and funds permitted under subsections (f), (g), (h) and (i) of this section. (Also see limitation on Business Loans in § 123.8(b).) In no event may the total amount of SBA's share outstanding and committed to a borrower, resulting from a single Disaster, exceed $500,000, except as permitted in § 123.29 and limited by § 123.26. SBA's share of an immediate participation in or guaranty of a loan under this Part may not exceed 90 percent of the sum of the unpaid principal and accrued interest.

(b) *Repayment ability.* Loans are further limited by SBA's determination of the applicant's ability to repay. If this amount is not sufficient to restore the damaged property, the applicant must show that sufficient funds are available from other sources to complete restoration.

(c) *Receipts.* Each borrower must retain evidence as to the use of loan proceeds for a period of three years from the date of last disbursement, and make such evidence available to SBA or other authorized Government personnel upon demand.

(d) *Use of proceeds.* Each borrower must use the loan proceeds for the Loan Purposes set forth in the authorization. Any loan recipient who wrongfully applies loan proceeds shall be civilly liable to SBA in an amount equal to one and one-half times the original amount of the loan.

(e) *Personal funds.* SBA may authorize funds for the repayment of personal funds used solely to alleviate the Eligible Physical Loss.

(f) *Refinancing.* A part or all of existing loans secured by recorded liens on real property or on business machinery and equipment damaged by the disaster may be refinanced with a portion of disaster loan proceeds, subject to § 123.26(a)(iv): *Provided,* That: (1) The property suffered uninsured damage of 40 percent or more of the market value at the time of the disaster; (2) the amount refinanced may not exceed the Eligible Physical Loss; (3) the victim is unable to obtain Credit Elsewhere; and (4) the damaged property is to be rehabilitated or replaced (including relocation) except where a community is under sanction or suspension pursuant to the Flood Disaster Protection Act of 1973, see § 123.13. See also § 123.27(a).

(g) *Relocation.* If the disaster victim elects to construct or buy another home or business facility in a new location, the loan may be used for such purpose, subject to § 23.26(a). However, any such loan shall not exceed the estimated cost of restoring or replacing the damaged or destroyed property, plus amounts eligible for refinancing of existing liens or mortgages on the damaged property. SBA's security interest in the new property shall at least equal such interest SBA would have had at the original location.

(h) *Building restrictions.* Where building restrictions prevent rehabilitation of real property, damage to such property shall be deemed to amount to total loss. In these cases the loan shall be in such greater or lesser amount as SBA deems sufficient to replace the borrower's real property at the new location, and include funds to cover losses of personal property, and eligible refinancing, subject to § 123.26(a).

(i) *Building codes.* Repair to and replacement of property must conform to local building codes.

(j) *Minimum standards of safety and decency.* Upgrading with loan proceeds is not allowed except as necessary to meet minimum standards of safety and decency or to meet building codes.

§ 123.26 Special conditions—home loans.

(a) *Limits.* SBA's share of loans to a Homeowner (including all dependents) are limited administratively for any one disaster to the following:

(1) $10,000 for repair or replacement of household and personal effects;

(2) $50,000 for repair or replacement of realty, including repair or replacement of landscaping and/or recreational facilities not to exceed $2,500.

(3) The total under paragraphs (1) and (2) shall not exceed $55,000; plus

(4) Eligible refinancing pursuant to § 123.25(f) not to exceed the lesser of the physical damage to the real property which is to be repaired or $50,000;

(5) The total loan may not exceed $105,000 within the limitations specified in (1) through (4) of this section.

(b) *Additional limits.* Persons living in a damaged home who are not dependents of the occupant may apply for loans to repair or replace personal property to the extent of their loss, but such loans may not exceed $10,000.

(c) *Interest.* Loans made to Homeowners able to secure Credit Elsewhere to repair or replace a home and personal property as a result of a disaster occurring on or after August 13, 1981, will bear interest at the Adjusted Treasury Rate. Loans made to Homeowners unable to obtain Credit Elsewhere will be made at the rate prescribed by the Administration but shall not exceed the lesser of one-half of the Adjusted Treasure Rate or 8% per annum. (For rates applicable to Disasters occurring prior to August 13, 1981, see Appendix A.)

(d) *Supplements.* SBA loans may be supplemented (but not duplicated) with assistance from private relief organizations such as the American Red Cross, the Salvation Army, the Mennonite Disaster Service and other relief disaster assistance organizations.

(e) *State grants.* Where a State has instituted a grant program under the Disaster Relief Act of 1974 for victims of Major Disasters, those victims who have suffered only personal property damage and who lack repayment ability shall be immediately referred to appropriate State representatives, in order to expedite assistance to victims. SBA shall presume that such victims who rely for over half of their support on unemployment, social security, welfare, survivor or other similar program, lack repayment ability. Disaster victims, who desire to do so, however, may file an application (OMB Approval No. 32450017 or 32450018) with SBA in order to obtain a decision on their eligibility for financial assistance from SBA.

(f) *Liens.* Homeowners may not refinance liens on personal property nor may they use any loan proceeds to pay indebtedness on personal property. Disaster loan liens may be transferred from condemned properties to other properties which have been acquired with the proceeds of condemnation.

(g) *RESPA.* Owner occupied 1–to–4 family residences are subject to the provisions of the Real Estate Settlement Procedures Act of 1974, as amended.

(h) *Rescission.* Any recipient of an approved disaster home loan for which security is required shall be entitled to rescind said loan pursuant to the Consumer Credit Protection Act, 15 U.S.C. 1601, and Regulation Z of the Federal Reserve Board, 12 CFR Part 226. Any note and mortgage, lien or security agreement which has been executed will be canceled upon return of all funds which have been disbursed.

§ 123.27 Special conditions—Business loans.

(a) *Limits.* Disaster business loans (for the aggregate of physical disaster and economic injury loans) are limited by statute to a ceiling of $500,000 per applicant for SBA's share in any one disaster for direct, immediate participation, or the guaranteed portion of guaranteed loans, unless the Administration finds that an applicant is a Major Source of Employment (as defined in § 123.22) in the Disaster Area,

and the Administration waives the $500,000 limitation; *Provided, however,* That in no case shall the total amount of the loan exceed 85% of the Eligible Phisical Loss (as defined in § 123.22) excluding allowable refinancing (see § 123.25(f)). These limitations apply to a concern together with its affiliates as that term is defined in § 121.3–2 of this chapter. Refinancing of liens on personal property employed in the business, such as machinery and equipment, is permissible if such property was substantially damaged (see limitations in § 123.25(f)). Funds allocated for repair or replacement of landscaping (including recreational facilities) may not exceed $2,500 unless such landscaping fulfilled a functional need or contributed to the generation of business.

(b) *Interest.* Loans made as a result of a disaster occurring on or after August 13, 1981 to business concerns which, in the judgment of SBA, are unable to obtain sufficient Credit Elsewhere, to repair or replace property damaged or destroyed will bear interest at a rate not to exceed 8 percent. Physical disaster business loans to concerns which, in the judgment of SBA, are able to obtain Credit Elsewhere, will bear interest at a rate prescribed by the Administration not exceeding the rate prevailing in the private market for similar loans and not exceeding the maximum interest rate for loans guaranteed under § 7(a) of the Small Business Act.

(c) *Maximum Terms of Loans.* See § 123.8(a).

§ 123.28 Additional conditions—Farm loans.

(a) *Computation of Loss.* To determine the eligible loan amount for full or partial physical crop losses for applicants determined by SBA to be eligible for assistance under this part, the Eligible Physical Loss is 85% of an amount which is determined by multiplying the number of acres planted, times the percentage of loss, time per acre cash outlay (production cost) and deducting therefrom recoveries such as crop insurance, USDA grants or other recoveries. Normal yield is defined as the yield determined by the Agricultural Stabilization and Conservation Service (ASCS) for program crops, and by the Statistical Reporting Service (SRS) county or state averages for those non-program crops for which such averages are available. County Emergency Board (CEB) averages (as appropriate) may be used for those non-program crops for which SRS does not maintain averages. Alternate data sources may be approved by SBA if a normal yield is not available from either ASCS, SRS or an appropriate CEB. Cash outlay (production costs) is defined as the actual out-of-pocket cash investment required to plant and/or harvest a particular crop, and such costs as are required to properly maintain such crop.

(b) *Livestock loss* is limited to 85% of the amount of the replacement cost remaining after deduction of any insurance proceeds.

(c) *Partial crop loss.* Applications based on partial crop losses will not be approved until after the normal harvest season for that crop or crops in order that the actual loss may be ascertained.

(d) *Minimum loss.* Applicants must meet minimum loss criteria substantially similar to criteria applied by Farmers Home Administration (see Appendix B).

(e) *Duplication.* Applicants will not be eligible for ecomonic injury assistance for any loss which qualifies as an eligible loss (regardless of percentage reductions) at Farmers Home Administration.

§ 123.29 Loans of major sources of employment.

Loans to Major Sources of Employment shall be made under the authority of the Small Business Act and the provisions of this part. In such cases, the Administration, in its discretion, may waive the $500,000 limitation of § 123.27(a), if the applicant has used all funds from its own resources and all available Credit Elsewhere (see § 123.22) to alleviate the physical damage and/or economic injury sustained plus eligible refinancing.

§ 123.30 Loans to privately owned colleges and non-profit organizations.

(a) SBA is authorized to make physical disaster loans in the case of loss or damage as a result of a declared disaster (see § 123.24), to the extent that such loss or damage is not compensated for by insurance or otherwise, to a privately owned college or university without regard to the availability of Credit Elsewhere, at the Old Formula Rate, and may, in the case of a Major Disaster, waive interest payments and defer principal payments on such loans for the first three years of the term of such loans. See also § 123.12.

(b) SBA is also authorized to make physical disaster loans to eleemosynary and other non-profit organizations in the case of loss or damage as a result of a declared disaster, to the extent that such loss or damage is not compensated for by insurance or otherwise without regard to the availability of Credit Elsewhere, at the Old Formula Rate.

Subpart C—Economic Injury Disaster Loans and Economic Injury Federal Action Loans

§ 123.40 Introduction.

Loans to which this subpart applies are available only for shall concerns situated in a Disaster Area which have suffered or are likely to suffer Substantial Economic Injury as a result of that specific Disaster, or have suffered adverse effects caused by Federal Government action, see § 123.43. For definition of capitalized terms, see § 123.22.

§ 123.41 General provisions applicable to all loans.

(a) *Substantial Economic Injury* means a change in the financial condition of a small business concern attributable from the effect of a specific declared disaster, as defined, resulting in the inability of such small concern to meet its obligations as they mature, and to pay its ordinary and necessary operating expenses. If a small concern was established or has undergone a substantial change of ownership after an impending economic injury became apparent (e.g., where the acquisition was made at a "distressed" price), the owner shall be deemed to have assumed that risk, and not to have incurred economic injury. Loss of anticipated profits or a drop in sales which is not disaster-related, is not considered an economic injury. Evidence of loss or injury and of the cause thereof, satisfactory to SBA, must be provided by the applicant (OMB Approval No. 32450017). Economic injury may be evidenced by a showing of:

(1) A generally impaired financial condition attributable to a physical disaster or the alleged Federal Government action; and

(2) The need for funds created by a physical disaster or Federal Government action alleged to have caused the economic injury.

(b) *Eligible Applicants:* An applicant must be a small concern as defined in Part 121 of this Chapter. Small concerns regardless of their business activity are eligible to apply for these loans, except for multilevel sales distribution plans of the "pyramid" type, gambling (see § 120.2(d)(5)), financing (see § 120.2(d)(6)), speculative (e.g., mineral exploration), rental property (see § 120.2(d)(7)), and illegal activities (see § 120.2(d)(9)). Cooperatives, other than consumer or marketing cooperatives, are eligible if owned only by eligible small concerns. All other non-profit groups are ineligible. Applicants determined by SBA as able to obtain Credit Elsewhere

(as defined in § 123.22) are not eligible for such loans.

(c) *Term of Loan:* See § 123.8(a).

(d) *Amount of loan:* Economic injury loans of both types, together with physical disaster loans, are limited to a maximum of $500,000 for SBA's share for each applicant together with its affiliates as defiend in § 121.3–2 of this Chapter. *Provided, however,* That this maximum may be waived by SBA for an economic injury disaster loan if the small concern is a Major Source of Employment, as defined in § 123.22. Applicants must use personal and business assets to the greatest extent without incurring personal hardship.

(e) *Use of Proceeds:* Loan proceeds may be used for:

(1) Alleviation of the economic injury pursuant to § 123.43 (federal action);

(2) Working capital necessary to carry the concern until resumption of normal operations, including debt service and operating costs, but not to exceed that which the business could provide had the disaster not occurred.

(f) *Prohibited use of loan funds.* No funds may be provided for the payment of dividends or other disbursements to owners, partners, officers or stockholders unless they constitute reasonable salary and are directly related to their performance of services.

(g) *Interest.* Economic injury disaster loans made as a result of a disaster occurring on or after August 13, 1981, and Federal action loans, will bear interest at a rate not to exceed 8 percent. No such loans shall be made to applicants able to obtain Credit Elsewhere.

§ 123.42 Special provisions—Economic injury disaster loans.

(a) *Availability.* These loans are available for eligible small concerns located in an area which has been:

(1) Declared a Major Disaster Area by the President,

(2) Designated a natural Disaster Area, by the Secretary of Agriculture,

(3) Declared a physical Disaster Area by SBA, or

(4) Designated an area of economic injury by SBA pursuant to a Governor's certification, see § 123.24(c).

(b) *Loan Amount.* Economic injury disaster loans may be approved in addition to any physical disaster loan for which the business may be eligible: *Provided, however,* That the aggregate amount of a physical disaster and an economic injury disaster loan to a single applicant (other than a Major Source of Employment) in a single disaster shall not exceed $500,000 (SBA's share). See also definition of Eligible Physical Loss in § 123.22.

(c) *Use of Proceeds.* Working capital necessary to carry the concern until resumption of normal operations, including debt service and operating costs, but not to exceed that which the business could provide had the disaster not occurred.

(d) *Timely application.* Applicants must apply for a loan within the time established by the disaster declaration or designation (see § 123.24).

(e) *Receipts.* Each borrower shall retain evidence as to the use of proceeds for a period of three years from the date of last disbursement, and make such evidence available to SBA or other authorized governmental personnel upon demand.

§ 123.43 Special provisions—Federal action economic injury loans.

(a) *Availability.* Federal action loans are available to eligible small business concerns when:

(1) The injury results:

(i) From action of the Federal government, or

(ii) As a consequence of Federal action, or

(iii) From requirements or restrictions imposed on such concern under any Federal law, any State law enacted in conformity with such law, or any regulation or order of a duly authorized Federal, State, regional or local agency issued in conformity with such Federal law; and

(2) As a result of the Federal, State or local action listed in paragraph (a)(1) of this section, the small business concern must:

(i) Effect additions to, alterations in or reestablish its plant or facilities in a new or the same location, or

(ii) Alter its method of operation; and

(3) Without assistance under the Federal Action loan program the small business concern is likely to be unable to market a product, or to suffer substantial economic injury, and

(4) The small business concern is unable to obtain Credit Elsewhere as defined in § 123.22.

(b) *Loan Amount.* No loan under this section shall exceed $500,000, and the amount of such loan shall be based solely on a determination made on each application.

(c) *Use of Proceeds.* (1) Alleviation of the problem caused by the Federal action (e.g., change in location or method of operation).

(2) Working capital necessary to carry the concern until resumption of normal operations, including debt service and operating costs, but not to exceed that which the business could provide had the federal action not occurred.

(3) Upgrading, when deemed necessary by SBA. Such upgrading is limited to one-third of building size and one-half of land space, and to meet building code requirements.

(4) The refunding of bank or prior SBA loans when SBA deems the debt service too burdensome or otherwise inappropriate, subject to § 120.2(d)(1) of this Chapter. No refunding shall be permitted on loans provided, guaranteed or insured by another Federal agency or a small business investment company licensed under the Small Business Investment Act.

(d) *Types of Loans.* See § 123.3.

(e) *Terms of Loans.* See § 123.8(a).

(f) *Service Fees.* See § 123.5.

Appendix A—Interest Rates in Effect Prior to August 13, 1981

Since these regulations are based on currently applicable interest rates (i.e., since August 13, 1981), rates applicable to earlier disaster loans, on SBA's share of a loan, are summarized here for convenience only. For details, see Rev. 9 of Part 123, 1981 edition of Title 13, Code of Federal Regulations, Ch. 1.

(1) *Disasters on or After January 1, 1971, and before January 1, 1972.* For physical disaster loss assistance, and for economic injury assistance in areas declared to be major disaster areas by the President or natural disaster areas declared by the Secretary of Agriculture, in an area accepted by SBA as a natural disaster-caused economic injury area upon it Governor's certification the interest rate on SBA's share of the loan is three percent (3%).

(2) *Disasters on or after January 1, 1972, and before April 20, 1973.* For losses described under (1) above one percent (1%), except natural disasters declared only by the Secretary of Agriculture, three percent (3%).

(3) *Disasters on and after April 20, 1973, and before August 5, 1975.* A rate not to exceed five percent (5%).

(4) *Disasters on and after August 5, 1975, and before July 1, 1976.* The five percent (5%) rate is continued for physical disaster, economic injury caused by physical disaster and product disaster assistance, but displaced business, regulatory compliance, strategic arms limitation, base closing, energy shortage and water pollution control assistance loans carry interest at a rate determined by the Secretary of the Treasury taking into consideration the average interest rate on all interest-bearing U.S. public debt obligations as computed at the end of the fiscal year next preceding the date of the loan, adjusted to the nearest one-eighth percent (0.125%) plus one-quarter percent (0.25%) (hereinafter called Old Formula Rate), such rate not to exceed the rate of interest in effect at the time of the occurrence of the disaster.

(5) *Disasters on and after July 1, 1976, and before October 1, 1978.* (a) *Physical Disaster Home Loans:* One percent (1%) on the first $10,000 to repair or replace primary residence or personal property, three percent (3%) from $10,000 up to $40,000, and the Old Formula

Rate on any repair on replacement costs exceeding $40,000, and on any amounts used for refinancing.

(b) *Other Physical Disaster Loans:* Three percent (3%) up to $250,000 and the Old Formula Rate thereafter;

(c) *Loans for Economic Injury Resulting From a Physical Disaster:* Three percent (3%) for the first $25,000 of such loan, Old Formula Rate thereafter;

(d) *All Other Economic Injury Loans:* Old Formula Rate;

(6) *Disasters on or after October 1, 1978, and before July 2, 1980.* (a) *Physical Disaster Home Loans:* Three percent (3%) for loans to repair or replace a primary residence or personal property, up to $50,000 and $10,000, respectively, but not to exceed $55,000 combined. The Old Formula Rate applies to amounts in excess thereof and also applies to homes other than primary and owner-occupied 1–4 residences;

(b) *Physical Disaster Business Loans:* Where SBA determines that the small concern is unable to obtain Credit Elsewhere (see § 123.22 for definition), five percent (5%), but the Old Formula Rate for the refinancing part thereof. Absent such determination, the Old Formula Rate applies.

(7) *Disasters on or after July 2, 1980 and before 13, 1981.* Same as in (6) above, except that loans to businesses able to obtain Credit Elsewhere were made at the Adjusted Treasury Rate, as defined in § 123.22.

Appendix B—Memorandum of Understanding Between the Small Business Administration (SBA) and the United States Department of Agriculture (USDA)—Farmers Home Administration (FmHA) Pertaining to Disaster Loan Assistance Programs

1. Preamble

Pub. L. 96–302, which amended the Small Business Act and the Consolidated Farm and Rural Development Act, amends Section 18 of the Small Business Act by—"(1) striking the comma after the phrase 'agricultural related industries' and inserting the following: ': Provided, That prior to October 1, 1983, and agricultural enterprise shall not be eligible for loan assistance under paragraph (1) of section 7(b) to repair or replace property other than residences and/or personal property unless it is declined for, or would be declined for, emergency loan assistance at substantially similar rates from the Farmers Home Administration under Subchapter III of the Consolidated Farm and Rural Development Act,' and * * *."

This legislation makes it clear that farmers are to be directed to the FmHA for disaster loan assistance once a disaster declaration has been made as a result of disasters commencing on or after July 3, 1980.

This joint Memorandum reaffirms the mutual desire of SBA and FmHA to cooperate in the use of their respective disaster loan-making authorities to complement the disaster program activities of each other, consistent with the basic purpose of the legislation.

It is *not* intended that this Memorandum alter the relationship that currently exists between FmHA and SBA regarding the handling of each Agencies' regular lending programs.

With respect to their regular programs, FmHA and SBA will continue, to the extent possible, to improve and expand the delivery of financial assistance to the agricultural community.

II. Definitions

1. *Farming* is the business of producing crops, livestock, livestock products, and aquatic organisms through the management of land, water, labor, capital and basic raw materials, e.g., seed, feed, fertilizer and fuel.

2. *Natural Disaster* (As authorized by FmHA State Directors) is a disaster caused by such natural phenomena as hurricanes, tornadoes, cyclones, excessive rainfall, floods, earthquakes, blizzards, freezes, electrical storms, snowstorms, drought, excessively high temperatures, and hail; insects where abnormal weather contributed substantially to the spreading and flourishing of such insects; fire resulting from lightning, and fires of other origins which could not be controlled because of abnormal weather; and plant and animal diseases where abnormal weather contributed substantially to such diseases spreading into epidemic stages.

3. *Physical Disaster* (As declared by the Administrator of SBA) is a disaster caused by a flood, riot, civil disorder, hurricane, tornado, storm, high water, wind-driven water, tidal wave, snowstorm, drought, fire, explosion or other catastrophic event.

4. *Major Disaster* (As declared by the President) is a disaster caused by any catastrophic event of sufficient magnitude to warrant major disaster assistance by the Federal Government, under the Disaster Relief Act of 1974.

5. *Housing Losses* are losses sustained to the farmowner's personal dwelling, tenant housing or farm labor housing and their contents, and other personal property contained therein.

6. *Agricultural Enterprises* are those businesses engaged in the production of food and fiber, ranching and raising of livestock, aquaculture, and all other farming and agricultural related industries.

7. *Credit Elsewhere:*

(a) For SBA purposes, is the availability of sufficient credit from non-Federal sources at reasonable rates and terms, taking into consideration prevailing private rates and terms in the community in or near where the disaster loan applicant transacts business for similar purposes and periods of time.

(b) For FmHA purposes, is the availability of sufficient credit elsewhere taking into consideration prevailing private and cooperative rates and terms in the community in or near which the applicant resides for loans for similar purposes and periods of time.

8. *Federal Individual Assistance* is the Federal disaster assistance made available to private individuals and privately owned and operated agricultural enterprises as compared to public assistance disaster programs which are available to governing bodies and quasi-governing bodies of political subdivisions.

9. *Presidential Emergency* is any disaster in any part of the United States which is of such magnitude that the President makes a declaration and which requires certain Federal emergency programs to supplement State and local efforts in the preservation of lives and protection of property, public health and safety, or to avert or lessen the threat of a more severe disaster.

III. General Guidelines

1. The FmHA administers its financial assistance programs through its State, District and County offices.

The SBA administers its financial assistance programs through its Regional, District and Branch offices.

2. All farm disaster loss loan applications heretofore and hereafter approved by SBA will be serviced by SBA.

3. The SBA and FmHA will have substantially similar interest rates for their respective loss loans. It is agreed, therefore, that such interest rates will not differ any more than one percent per annum at any given time, and will be applied in accordance with section 114 of Pub. L. 94–305; and that the FmHA Deputy Administrator for Farm and Family Programs and the SBA Associate Administrator for Financial Assistance will consult before either Agency changes its loss loan rate of interest.

4. FmHA State Directors and SBA District Directors will consult with each other when either is contemplating authorizing or recommending that an area(s) be named where farm disaster financial assistance is to be made available. Each Agency, at the National level, will notify the other in writing when such declaration or authorization is officially made.

5. FmHA State Directors and SBA District Directors will exchange addresses of their respective offices and identify the geographical area(s) served by each. This specific information will be available in all field offices of both Agencies so applicants can be referred to the appropriate offices with a minimum of delay. The FmHA uses its local county offices to administer disaster emergency programs. SBA will either establish special local offices for administering its disaster assistance programs, or utilize permanent SBA offices, as appropriate.

6. SBA Disaster Branch Offices and FmHA County Offices will cooperate to avoid overlapping and duplication of disaster benefits by exchanging loan application and loan approval information while ensuring that farmers and rural resident disaster victims receive the assistance to which they are entitled.

7. FmHA State Directors and SBA District Directors will meet on a frequency of not less than annually to review this Memorandum of Understanding, clarify and agree on each Agency's disaster program responsibilities, and plan appropriate training meetings for their respective employees to assure familiarity with and common understanding of the contents of this Memorandum of Understanding.

IV. How Loans Are Made Available

1. *FmHA Emergency (EM) Loans.* EM Loans will be made available in counties named by the Federal Emergency Management Agency (FEMA) as eligible for Federal Individual Assistance under a major

disaster or emergency declaration by the President, or in counties where EM Loans are authorized by the FmHA State Director because of a natural disaster.

2. *SBA Disaster Loans.* SBA Physical Loss and Economic Injury Disaster Loans will, as determined to be necessary and appropriate, be made available in counties named by FEMA, as well as in counties declared by the Administrator of SBA. Economic Injury Disaster Loans, as a separate program, will be made available to nonfarm small business concerns in counties where FmHA State Directors have authorized EM Loans, and furthermore, SBA Physical Disaster Loans will be made available to those agricultural enterprises referred to SBA by FmHA pursuant to paragraph IV 4 (e) of this Memorandum of Understanding.

3. FmHA and SBA will establish a liaison at both the State Director/District Director level and the National level and periodically coordinate their activities to: (a) Exchange detailed information concerning the disaster loan programs, (b) define areas of cooperation between the two Agencies, (c) assure that their programs are serving the intended recipients, (d) establish new methods to serve the public more expeditiously, and (e) achieve maximum utilization of their respective resources.

4. The SBA and FmHA agree that the interests of agricultural enterprises will be best served, and that each Agency will achieve better utilization of available resources, through the operating guidelines discussed in this section relative to areas where these Agencies offer disaster assistance. Furthermore, National FmHA and Central SBA office representatives agree to meet on a frequency of not less than annually to review this Memorandum of Understanding, discuss matters of mutual concern relating to each Agency's disaster loan programs and to revise this document, if appropriate.

(a) When an applicant has sustained only housing and personal property losses in areas where SBA's Physical Loss Loans are available, *only* SBA will make loans for the restoration or replacement of disaster caused housing losses as defined in paragraph II 5 of this Memorandum of Understanding. When an agricultural enterprise has suffered farm production and/or physical farm losses, as well as housing losses, and SBA has not approved a physical disaster declaration for the affected area, FmHA wll make the loan(s) for the production and physical farm losses as well as the housing losses.

In the event both Agencies have made their disaster assistance programs available for the area, applicants will have the option of going to FmHA *or* SBA for disaster loan assistance to restore or replace their housing losses; however, *in all cases,* farm production and farm physical loss loans will be made by FmHA, providing the applicant is otherwise eligible.

In those instances where an FmHA farm production and/or physical farm loss loan(s) is to be made, following approval of an SBA Housing Loss Loan, the SBA will, upon request from FmHA, subordinate its lien to FmHA, as may be required for approval of the FmHA loss loan(s).

(b) When an applicant makes an initial inquiry for disaster assistance from SBA and farm losses are evident, the applicant will be advised of the provisions of (a) above and referred to FmHA for the needed financing based on farm losses. When an applicant makes an initial inquiry with SBA seeking disaster assistance for housing losses *only,* the applicant will be referred to FmHA for consideration whenever the losses suffered were not in an SBA authorized area. Should such an applicant be in an SBA authorized area and be denied SBA assistance because of a lack of repayment ability due to low income, the applicant may be referred to FmHA for its consideration under FmHA's 502 Rural Housing Interest Credit Loan Program, provided the applicant resides in a rural community or in a community under 20,000 population. FmHA may be able to extend interest credit assistance to such borrowers at rates as low as 1 percent under that Loan Program.

(c) In any event, potential farm loan applicants should contact FmHA for an interview to determine whether they are eligible for disaster loan assistance from the FmHA. [Those not eligible will be referred to the SBA for consideration, except those discussed in paragraph (e) below.] Where a referral or denial action is taken by the FmHA, the referral or denial letter to the applicant will specify the reason(s) why the disaster type assistance requested by the applicant was not made available by FmHA.

(d) Potential applicants are not to be referred back and forth between FmHA and SBA. Representatives of each Agency must be reasonably certain the disaster victim is eligible for assistance from the other agency before a referral is made.

(e) FmHA personnel will refer, by letter, those applicants ineligible for FmHA EM Loan assistance for reasons such as alien status; corporations, partnerships and coperatives not being primarily engaged in farming; and farm owners who do not operate their farm(s). Referral letters will state the specific reason(s) for ineligibility and will include the following statement, "Applicant has been informed that applicants for SBA Physical Disaster Loan assistance must meet minimum loss criteria substantially similar to that employed by FmHA." Referrals will not be made by FmHA when the reason(s) for loan denial is based on unfavorable credit determinations (includes inadequate security), lack of repayment ability, or when it is known to FmHA that sustained disaster losses are insufficient to meet its minimum loss criteria.

(f) Disaster victims filing for financial assistance from either Agency will give written permission for FmHA and SBA to exchange all prior and current loan application and loan experience information, including appraisals. The format for this permission must be developed in compliance with the Privacy Act.

(g) Applicants filing for financial assistance from either Agency must use the forms and procedures of the Agency being requested to provide such assistance. An applicant who is denied assistance by either Agency must file a new application with the other in accordance with that Agency's forms and procedures. However, the earliest filing date of an application for losses with either Agency will constitute the filing date with regard to termination dates for receiving applications by either Agency; provided *not more than six months* has elapsed since the termination date of the second Agency contacted, at the time that Agency is requested to process an application.

V. Description of Lending Policies

The FmHA guarantees EM Loans and also makes insured EM Loans. Guaranteed EM Loans are loans where an eligible lender advances the entire loan from its own resources and services the loan. The FmHA guarantees repayment to the lander of a certain percentage of any loss of principal and interest. Insured EM Loans are those made from the Agricultural Credit Insurance Fund (ACIF) by FmHA employees and serviced by FmHA employees.

The SBA makes direct, immediate participation, and guaranteed loans. Direct loans are made with SBA funds only. Immediate participation loans are those in which SBA agrees to pruchase a specified percentage of a loan from a lender immediately after disbursement of such loan. Guaranteed loans are made by a conventional lender from its own funds and SBA guarantees a percentage of the unpaid balance.

VI. Loan Programs

The Emergancy and Disaster Loan Programs of FmHA and SBA are outlined in Table I which sets forth the comparative similarities and differences of each program.

VII. Administrative Guidelines

1. The services of FmHA and SBA, which are available to lenders and applicants are, by mutual agreement, services that each Agency would provide any eligible applicant in the normal course of business; and normally there will be no reimbursement by either Agency to the other for such services.

2. The National Office of FmHA and the Central Office of SBA will cooperate in counseling their field offices and in resolving problems in specific cases.

3. This Memorandum of Understanding in no way alters or supersedes the existing Memoranda between the two Agencies covering FmHA's regular farmer loan authorities and its Business and Industrial Loan authorities, and all of SBA's regular loan programs. However, this Memorandum replaces the previous Memorandum of Understanding on disaster type loan assistance, signed by SBA on July 21, 1977, and by FmHA on August 25, 1977.

4. This agreement may be amended at any time by written agreement of both parties.

5. This agreement shall take effect upon the later date shown below.

Dated: August 23, 1980.
Gordon Cavanaugh,
Administrator, Farmers Home Administration.

Dated: September 26, 1980.
A. Vernon Weaver,
Administrator, Small Business Administration.

Dated: April 6, 1983.
James C. Sanders,
Administrator.

SBA/FmHA Memorandum of Understanding Disaster Loan Assistance Programs

TABLE I.—COMPARATIVE SIMILARITIES AND DIFFERENCES

FmHA	SBA
ELIGIBILITY	
1. An individual applicant must be a citizen of the United States. For applicants which are organized as a partnership, a cooperative, or a corporation, the principal owners must be U.S. citizens; over 50 percent of the ownership of such entities must be held by U.S. citizens; and the manager of any such entity must have an ownership interest in the entity and be a U.S. citizen. Such entity must be recognized and authorized to farm in the State(s) in which it will operate a farm(s), and such entity will be in good standing in that State(s).	1. Citizenship is not required. However, use of disaster loan proceeds outside the United States or its possessions is not permitted.
2. EM loan applicants *able* to obtain their needed credit elsewhere may be considered for an *Actual Loss Loan only at a current market rate of interest.* EM Loan applicants *unable* to obtain their needed credit elsewhere, exclusive of an SBA Physical Disaster Loss Loan, may qualify for an *Actual Loss Loan(s) at 5 percent interest, and EM Annual Production and/or EM Major Adjustment Loan(s) at the current market rate of interest.*	2. Physical Disaster Loans are made to non-business loan applicants, without regard to the availability of other financing or resources, and business loan eligibility is similar. However, the SBA's judgment of the business' capacity to obtain credit elsewhere will determine the applicable interest rate. Applicants for Economic Injury Disaster Loan (EIDL) assistance *must* seek and fully utilize all alternate financing resources prior to obtaining an EIDL loan from SBA. EIDL applicants must be eligible *small* businesses according to SBA size standards.
3. The applicant must be an established farmer, rancher or aquaculture operator, either tenant-operator or owner-operator. If the applicant is a partnership, corporation, or cooperative, it must be primarily engaged in farming; i.e., it must derive over 50 percent of its gross income from all sources from the farming operation(s), and the farming operation(s) must be managed by one or more of the principal partners, principal stockholders, or principal members.	3. Most homeowners, businesses and nonprofit institutions are eligible for Physical Disaster Loan assistance.
4. The applicant must have been conducting a farming operation(s) at the time of the disaster in a county or counties where EM Loans have been authorized.	4. The applicant must be within the disaster area as defined by the SBA disaster declaration.
5. The applicant must have suffered qualifying property damage or production losses as a direct result of the declared or authorized disaster.	5. The applicant must have suffered real or personal property damage as a direct result of the declared disaster.
6. The applicant must be of good character, have the necessary experience and/or training, industry, and ability to carry out the proposed operation.	6. Applicants must be of good character and must be able to provide reasonable assurance of loan repayment ability.
7. Will take all farm disaster applications and approve EM Loans based on disasters commencing *after July 2, 1980,* regardless of whether or not an applicant can obtain the credit needed elsewhere.	7. Will take any farm disaster applications and approve disaster loans based on disasters commencing *on or before July 2, 1980.* Applicants applying for farm disaster loans based on disasters commencing *on or after July 3, 1980,* will be referred to FmHA.
LOAN PURPOSES	
1. For those unable to obtain credit, to cover actual losses for damaged or destroyed farm property and production; provide essential annual farm production and family living expenses; and provide the financing necessary to make adjustments in the farming operation, which will assure the return of the operation to a financially sound pre-disaster base.	1. The purpose of Physical Disaster Loans is to restore the disaster victim's home or business property, real or personal, as nearly as possible to its pre-disaster condition. No upgrading is permitted except as required for code compliance.
2. Housing losses—available under FmHA's Rural Housing Disaster Loan Program only when SBA's Physical Disaster Loan assistance is *not* available. When housing and farm losses are involved, the applicant may choose between SBA or FmHA for loan assistance on the housing loss, but all farm loss assistance will be provided by FmHA.	2. Housing losses—When only housing losses are sustained, SBA will make all Housing Loss Loans caused by the declared disaster. In those areas where both FmHA and SBA disaster programs are available, applicants may select the Agency from which they wish to obtain their Housing Loss Loan, but all applications for farm loss loans will be referred to FmHA.
3. Initial EM Annual Production Loans may be applied for up to 12 months from the disaster authorization date. Subsequent EM Annual Production Loans may be applied for up to three full calendar years after the disaster authorization date. However, EM Annual Production Loans, initial or subsequent, are *not* available to applicants who are initially *able* to obtain their needed credit elsewhere.	3. Economic Injury Disaster Loans are somewhat similar; however, the need for these loans must be specifically related to the physical disaster as declared by SBA.
4. EM Major Adjustment Loans may be applied for up to 12 months after the disaster authorization date, but are *not* available to applicants who are initially *able* to obtain their needed credit elsewhere.	4. No comparable disaster loan program; however, SBA's Regular Business Loan Program is somewhat similar.
RATES AND TERMS	
1. Actual Loss Loans: (a) For applicants who are *able* to obtain their credit elsewhere, the interest rate for EM Actual Loss Loans is established by the Secretary of Agriculture, based on the cost of money to the Government using the statutory formula.	1. Interest rate on Physical Disaster Business Loans where credit elsewhere is available is determined by a statutory formula which is based upon the cost of money to the Government, and which will remain in effect for all disasters occurring on or after October 1, 1978, and prior to October 1, 1983.
(b) For applicants who are *unable* to obtain their credit elsewhere, the interest rates for EM Actual Loss Loans are as follows:	During the same period, October 1, 1978, through September 30, 1983, there is a 3 percent interest rate for losses to primary homes and personal property; and a 5 percent rate for loans to businesses, which in SBA's judgment are unable to obtain credit elsewhere. Interest rates on loans for all other purposes are based upon a statutory formula.
(1) For disasters occurring through September 30, 1978, for which loans were approved on or after October 1, 1978, the rate is 3.00 percent.	

TABLE I.—COMPARATIVE SIMILARITIES AND DIFFERENCES—Continued

FmHA	SBA
(2) For disasters occurring on or after October 1, 1978, the rate is 5.00 percent. Actual Production Loss Loans are normally made for up to 7 years. Under certain circumstances loss loans for production and chattel losses may extend up to 20 years with special conditions, depending on the life expectancy of the collateral securing the loan(s). Actual Loss Loans for real estate purposes will normally be for 30 years, but may extend up to 40 years.	SBA Home, Personal Property, Business, and Economic Injury Disaster Loans may have maturities of up to 30 years. However, the repayment ability of the applicant will determine the actual maturity of the loan.
2. Annual Production Loans—at the current prevailing market rate established periodically by the Secretary and repayable when principal income from the year's operation is normally [illegible].	2. Interest rate for Economic Injury Disaster Loans which are similar is based upon a statutory formula.
3. Major Adjustment Loans—at prevailing current market rate as established periodically by the Secretary. Such loans for chattels are normally made for up to 7 years, and for real estate, normally up to 30 years. Under certain circumstances loans for chattels may extend up to 20 years and loans for real estate may extend up to 40 years.	3. No comparable disaster loan program.
LOAN LIMITS	
1. In addition to the ceiling limitations listed herein, the extent of loan assistance is also limited by the amount of actual loss, potential repayment ability, collateral available, the applicant's needs and other credit factors.	1. Home Loans—No statutory limit; however, the following administrative limits have been established: (a) $50,000 for real estate, (b) $10,000 for personal property, or (c) $55,000 for combined purposes and up to $50,000 for eligible refinancing.
(a) There is a statutory limit of $500,000 per disaster per applicant for Actual Loss Loan assistance for both those who *can obtain* and those who *cannot obtain* their credit elsewhere.	2. Business Loans, Physical Disasters—No statutory limit for disasters commencing prior to enactment of Public Law 96-302, i.e., July 2, 1980; however, a $500,000 administrative limit was in effect; exceptions permitted by SBA Regional Administrator to avoid undue financial hardship.
(b) Administrative ceilings for those who cannot obtain credit elsewhere have been [illegible] as follows:	
(1) Actual Loss Loan—$500,000 per applicant per disaster designation for disasters occurring on or after October 1, 1978.	For disasters commencing on or after July 3, 1980, the *statutory* limit is $500,000 per disaster per borrower.
(2) $250,000 per applicant per disaster designation for disasters occurring through September 30, 1978.	
(3) Annual Production and/or Major Adjustment Loans—$1,500,000 outstanding principal balance authorized per EM borrower, regardless of the number of disasters. A further sub-limitation setting a $300,000 maximum outstanding principal balance on Major Adjustment Loans for refinancing debts, which are secured by real estate, is established within the above $1,500,000 ceiling. However, borrowers indebted for an EM Loan(s) on or before December 15, 1979, who cannot obtain credit elsewhere, may receive subsequent Annual Production Loans in amounts necessary to continue their normal operation(s) without regard to this indebtedness ceiling.	Limit may be waived by Administrator if applicant is a major source of employment in an area suffering a major disaster declared by the President. 3. Business Loans, Economic Injury—No statutory limit, the amount of economic injury determines the size of the loan.
GRADUATION POLICY	
1. Reviewed to determine ability to obtain credit from other credit sources after a three (3) year period following receipt of the initial EM loan, and every two (2) years thereafter, until graduation is achieved or the loan(s) is paid in full. Refinancing, when available, is mandatory for borrowers who, when they received their initial loans, were unable to obtain [illegible] from other sources.	1. Business loan applicants, who can obtain credit elsewhere (loans approved at formula rate), will be reviewed for graduation three years after a Physical Disaster Business Loan is fully disbursed, and every two years thereafter for the term of the loan. Refinancing, when available, is mandatory.
ECONOMIC INJURY LOANS	
1. EM loans for annual production purposes are similar.	1. SBA is authorized to make Economic Injury Disaster Loans to small business concerns that have suffered cash flow problems related to the disaster. These loans are for working capital only and do not allow for any expansion.

[Docket No. 21222-257]

Foreign-Trade Zones in the United States; Time Extension for Comments

AGENCY: Foreign-Trade Zones Board, Commerce.

ACTION: Proposed rule; Further extension of comment period.

SUMMARY: A proposed revision of the Foreign-Trade Zones Board's regulations (15 CFR Part 400) was published in the **Federal Register** on February 18, 1983 (48 FR 7188-7200), with corrections published on February 28, 1983 (48 FR 8291) An extension of the period for comment to May 31, was published on April 18, 1983 (48 FR 16502).

This notice further extends the period for comments.

In response to requests received for a further extension of the period for comments because additional time is needed to fully review and comment on the revised regulations, the period for public comment is further extended to June 24, 1983. This extension is granted in the interest of full public participation in the rulemaking, recognizing the extent and complexity of the proposed revision.

DATE: Comments must be received by June 24, 1983.

ADDRESS: Comments (original and 6 copies) are to be addressed to the Executive Secretary, Foreign-Trade Zones Board, International Trade Administration, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, NW., Room 1872, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT:

John J. Da Ponte, Jr., Executive Secretary, Foreign-Trade Zones Board, 202/377-2862.

(Sec. 8, Foreign Trade Zones Act of June 13, 1934, 48 Stat. 1000; 19 U.S.C. 81h)

Dated: May 24, 1983.

John J. Da Ponte, Jr.,

Executive Secretary, Foreign-Trade Zones Board.

POSTAL RATE COMMISSION

39 CFR Part 3001

[Docket No. RM83-6]

Rules of Practice and Procedure

May 20, 1983.

AGENCY: Postal Rate Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Postal Rate Commission proposes, pursuant to 39 U.S.C. 404(b) and 3603, to make a number of changes in its rules of practice and procedure governing appeals from Postal Service decisions to close or consolidate post offices. In general, these amendments are designed to streamline and clarify various portions of the appeal process. The Commission is proposing five changes: the adoption of an optional form for participants' use in framing their arguments; the deletion of the requirement for petitions to include a copy of the Postal Service's Final Determination; a clarification that the Commission does not expect to hold oral argument except in unusual circumstances; a clarification that petitions of appeal are to be received by the Commission within the 30 days statutorily allowed for appeals; and the extension by 5 days of the amount of time for intervention (and also extending by 5 days other affected dates in the procedural schedule).

DATE: Comments in response to this Notice should be filed on or before July 18, 1983.

ADDRESSES: Comments and other correspondence relating to this Notice should be sent to the Secretary of the Commission, Postal Rate Commission, 2000 L Street, NW., Suite 500, Washington, D.C. 20268 (telephone: 202/254-3880).

FOR FURTHER INFORMATION CONTACT: David F. Stover, General Counsel, 2000 L Street, NW., Suite 500, Washington, D.C. 20268 (telephone: 202/254-3824.

SUPPLEMENTARY INFORMATION: The rules of procedure [1] for these cases were based, with appropriate simplifications, on the rules which govern Courts of Appeals' review of administrative agency decisions. The Commission's experience with the operation of these rules has led it to conclude that they can be improved by certain amendments. In general, these amendments are designed to streamline and clarify various portions of the appeal process. The Commission is proposing five changes: the adoption of an optional form for participants' use in framing their arguments; the deletion of the requirement for petitions to include a copy of the Postal Service's Final Determination; a clarification that the Commission does not anticipate holding oral argument except in unusual circumstances; a clarification that petitions of appeal are to be received by the Commission within the 30 days allowed by the statute; and extending by 5 days the amount of time for intervention (and also extending by 5 days other affected dates in the procedural schedule).

Optional form instead of brief. The Commission believes that providing the petitioners with a form they can use in presenting their views, instead of requiring the more traditional format for legal briefs, will help to streamline the appeal proceedings by assisting to narrow and define the issues the petitioners wish to present. It is apparent to the Commission that most petitioners in these cases represent themselves and are not familiar with the traditional format for briefs in legal proceedings. The Commission also believes that providing an explanation of the Commission's role in such cases as well as instructions for the optional form should prove helpful. (A copy of the form and instructions is appended to this notice.)

The Commission believes an optional form is well suited to these cases because, as is the situation with appeals to the Tax Court, the Commission is quite familiar with the proceedings leading to the appeal. In many other situations, the petitioners rely on their brief to familiarize the appellate court with the applicable law as well as to present a general idea of the action about which they are complaining. Owing to the Commission's familiarity with these cases, briefs to the Commission may appropriately dispense with this background material, just as the Tax Court has done in considering the appeals of taxpayers representing themselves.

To illustrate a situation in which the form could prove helpful, in a recent case, Docket No. A82-6, *Stonewall, Arkansas*, the Commission received a petition consisting of two paragraphs stating a generalized complaint about the Postal Service's decision to convert the post office into a contractor-operated facility; the petition included two pages of signatures from the patrons of the office. In response, the Postal Service filed a 21-page motion to address the petitioners' undefined complaints about the Postal Service's decision, which in turn had been based on a 92-page record. In the motion, the Postal Service noted that it had difficulty in trying to determine the specifics of the issues the petitioners were raising. The Commission believes that, in similar situations, the form and instructions may enable petitioners to describe with a reasonable degree of precision their objections to the Postal Service's administative action.

Other agencies with appellate authority, such as the Tax Court, have found it helpful to provide forms and explanations to citizens representing themselves in their proceedings. The Postal Service provides forms and explanations to patrons at each stage of the post office closing or consolidation administrative procedings in which they are invited to present their views. *See, e.g.*, Domestic Mail Manual § 113.242. Additionally, persons seeking to appeal a Postal Service determination have asked the Commission to send them the appropriate forms. *E.g.*, Docket No. A82-7.

The Commission believes that providing petitioners with an optional form to use in presenting their arguments will assist in obtaining expeditious and reasonably specific statements of why the petitioners believe the Postal Service's decision should be reversed. Having been given an appropriate format, the petitioners will be able in their pleadings to focus on their reasons for objecting to the Postal Service's decision. They will not have to be concerned that their pleadings may not meet the Commission's standards and perhaps be rejected for reasons of form.

Inclusion of Final Determination. The Commission's current rules require that a copy of the Postal Service's written Final Determination be attached to

[1] Adopted at 42 FR 10989-94 (February 18, 1977).

petitions of appeal. The purpose of this requirement is to assure the Commission that the postal Service has indeed made a final, appealable decision in its proceeding, and the Postal Service is not at some intermediate stage in its decisionmaking.

Few petitioners have complied with this condition. The Commission has found that it is able to decide the appeal proceedings without undue delay in the many cases in which the petitioners did not supply a copy of the Final Determination. The Commission developed a notification procedure to advise the Postal Service of the filing of an appeal. In the unusual situation where a petitioner has filed an appeal before the Postal Service reached its decision, the Postal Service has officially notified the Commission of that fact and the Commission dismissed the appeal as not ripe for review. Docket No. A81–4.

The amendment encourages, but does not require, petitioners to provide a copy of the Final Determination with their appeals. The inclusion of a copy of the Final Determination can help the Commission expedite its consideration of cases. On the other hand, obtaining a copy could delay the filing of an appeal,[2] and the Commission must receive the appeal within 30 days of the posting of the Final Determination, or the petitioners lose their right to appeal.

Oral argument. The Commission's general rule governing oral argument states that it will decide whether oral arguments should be held after considering the applicable time constraints, the complexity and importance of the issues, and the public interest. After determining a considerable number of these cases, the Commission has come to the conclusion that oral argument is not warranted except under extraordinary circumstances. The Commission believes that most records in these cases are adequate without the additional procedure of oral argument. One of the primary reasons for this is the time constraint of the 120-day limit for the Commission to issue a decision in these cases. 39 U.S.C. 404(b)(5). Additionally, the Commission's experience with these cases has shown that only in unusual circumstances would oral argument provide parties an opportunity to explain their views more completely than is possible in written filings.

Filing of petition. The applicable statute, 39 U.S.C. 404(b)(5), states that a patron may appeal a Postal Service decision to close or consolidate a post office within 30 days. The current rules instruct persons wishing to appeal to file a petition with the Commission within the 30-day limit.

From the Commission's experience with these cases, it appears that a clarification of what is meant by the term "filing" should prove beneficial. In appellate proceedings, the general rule is that the petition of appeal must be received by the reviewing body within the applicable time limit, rather than simply put in the mailstream—as evidenced by the postmark—within the time limit. The Commission's proposed change states explicitly that an appeal is to be received within the 30-day time limit. This clarification is particularly important because the statute limits the partons' right to appeal to 30 days after the Postal Service has given written notice of its decision to close or consolidate a post office. *Compare.* Docket No. A83–4; Docket No. A82–3.

Time for intervention. The current rule states that an interested party may file a petition for leave to intervene within 20 days of the filing of an appeal. Many persons who wish to present their views in these cases have not been able to meet the current deadline. In over one-third of these cases, the Commission has received additional appeal letters after the time given for intervention.

The Commission proposes to alleviate this problem by extending the time for filing petitions to intervene by 5 days. The time for filing briefs will also be extended by 5 days. The Commission believes that allowing interested persons an additional 5 days to intervene will not have an adverse effect on its ability to issue decisions within the 120-day deadline.

Impact of proposed changes. Pursuant to Executive Order 12291, the Commission finds that the proposed rule changes do not constitute a "major rule." The changes deal with procedural matters and it is not anticipated that they could result in an appreciable change in the costs of participating in these cases. Nor will the changes have any adverse effects on competition, employment or the other factors listed in E.O. 12291.

The above analysis that the proposed rule changes do not constitute a major rule for purposes of E.O. 12291, applies with equal force to the Regulatory Flexibility Act. However, we would welcome comments as to whether the rule could have a significant economic impact on a substantial number of small entities, as well as suggestions as to how minimize any such impact.

List of Subjects in 39 CFR Part 3001

Adminstrative practice and procedure.

PART 3001—RULES OF PRACTICE AND PROCEDURE

Subpart H—Administrative Practice and Procedure

For the reasons set out above, the Commission proposes to amend its rules of procedure applicable to appeals from Postal Service decisions to close or consolidate post offices (39 CFR 3001.110–3001.116) as set forth below:

1. Section 3001.111 is revised as follows:

§ 3001.111 Initiation of review proceedings.

(a) *Petition for review.* Review of a determination of the Postal Service to close or consolidate a post office shall be obtained by filing a petition for review with the Secretary of this Commission. Such petition must be received by the Commission within 30 days after the Service has made available to persons served by that post office the written determination to close or consolidate required by 39 U.S.C. 404(b) (3) through (4). The petition shall specify the parties seeking review, all of whom must be persons served by the post office proposed to be closed or consolidated and shall identify the Postal Service as respondent. The Commission encourages parties seeking review to attach a copy of the Postal Service written determination, as the appeal process is thereby expedited. If two or more persons are entitled to petition for review of the same determination and their interests are such as to make joinder practicable, they may file a joint petition for review and may thereafter proceed as a single petitioner.

(b) *Intervention.*

A person served by the post office to be closed or consolidated pursuant to the Postal Service written determination under review who desires to intervene in the proceeding, or any other interested person, or any counsel, agent or other person authorized or recognized by the Postal Service as such interested person's representative or the representation of such interested person's recognized group, such as

[2] To obtain a copy of the Final Determination, the Commission assumes a patron would first speak to a Postal Service employee at the post office. It might be necessary then to contact the office of the sectional center manager (the Postal Service employee with management reponsibility for the area in which the post office is located). *See* Domestic Mail Manual section 113.27. The Commission has no information on the length of time needed to obtain a copy of the Final Determination.

Postmasters, shall file with the Secretary of the Commission and serve upon all parties a petition for leave to intervene in a form prescribed by § 3001.20. The petition shall contain concise statement of the interest of the moving party and the grounds upon which intervention is sought. A petition for leave to intervene shall be filed within 25 days of the date on which the petition for review is filed. The provisions of § 3001.20 (c) through (f) of Subpart A of this part shall apply to petitions for leave to intervene in review proceedings.

2. Redesignate present § 3001.115 (a), (b), (c) and (d) to become § 3001.115 (b), (c), (d) and (e) respectively. Add a new paragraph (a) and revise the redesignated § 3001.115 (b), (d) and (e) to read as follows:

§ 3001.115 Participant statement or brief.

(a) *Participant statement.* Upon the filing of the petition for review of a decision to close or consolidate a post office, the Secretary shall furnish the petitioner with a copy of PRC Form 61, a form designed to permit the appellant to make a concise statement of his or her arguments in support of the petition and the instructions regarding its use. In addition to eliciting this information, the instructions for Form 61 shall provide: (1) notification that, if the appellant prefers, he or she may file a brief as described in paragraph (b) of this section presenting the arguments, in lieu of completing PRC Form 61; (2) a concise explanation of the purpose of the form; and (3) notification that the completed form, or a brief as described in paragraph (b) of this section, in lieu thereof, must be filed with the Commission not more than 35 days following the date of filing of the petition (which date shall be set forth, as it appears in the Commission's records).

(b) *Appellant's initial brief.* The initial brief of the appellant shall be filed with the Secretary of the Commission and served on all parties 35 days after the filing of the petition for review of a decision to close or consolidate a post office.

* * * * *

(d) *Reply by appellant.* The appellant may file a written response to the brief of the Postal Service 15 days after the date designated for the filing of the brief, which shall be strictly limited in content to reply to arguments made by the Postal Service. If presented as a brief, such reply brief shall conform to the format detailed in paragraph (b) of this section.

(e) *Intervenor statements or briefs.* An intervenor shall file its brief within the time allowed for initial and reply, or answering, briefs, as appropriate. The Secretary shall furnish to each intervenor a copy of PRC Form 61 as soon as intervenor status is granted. If the intervenor chooses to file a brief, the brief shall follow the format detailed in paragraph (b) of this section.

3. Redesignate § 3001.116 to become § 3001.117 and add a new § 3001.116 to read as follows:

§ 3001.116 Oral argument.

Oral argument will be held in these appeal cases only when a party has made a showing that, owing to unusual circumstances, oral argument is a necessary addition to the written filings. Any request for oral argument shall be filed within 7 days of the date on which reply briefs are due. If a request for oral argument is granted, it will be held at the Postal Rate Commission's offices at 2000 L Street, N.W., Suite 500, Washington, D.C. 20268.

After the rule change, the Commission intends to send the material set out in Appendix A to persons participating in these appeals.

By the Commission.

Cyril J. Pittack,

Acting Secretary.

Note.—Appendix A will not appear in the Code of Federal Regulations.

Appendix A

PLEASE READ THIS ENTIRELY BEFORE FILLING OUT THE ENCLOSED "PARTICIPANT STATEMENT"

Appeals From Postal Service Determinations To Close or Consolidate Post Offices

Introduction

Congress has provided, by law, that the Postal Service follow a specific procedure and consider certain factors before making a final determination to close or consolidate a post office. The law gives any patron the right to appeal the Postal Service's final determination to the Postal Rate Commission (PRC)—an independent agency not associated with the Postal Service. It is the job of the PRC, when a patron appeals a Postal Service final determination, to decide whether the Postal Service's actions were consistent with the law.

The purpose of this paper is to help explain the Postal Rate Commission's process in dealing with appeals of Postal Service determinations to close or consolidate post offices.

To assist the Postal Rate Commission in its consideration of the appeal from the Postal Service's decision to close or consolidate your post office, you may also want to send a written argument explaining why you believe the Postal Rate Commission should reverse the Postal Service's determination and return the entire matter to it for further consideration. We have enclosed a "Participant Statement" form that you may choose to use to present your written argument. The section, "PARTICIPANT STATEMENT," beginning on page 8, is of particular interest.

Postal Rate Commission Authority

In cases of appeals from Postal Service determinations to close or consolidate post offices, the PRC has only "appellate jurisdiction"—a very limited authority.

One limitation on the PRC's authority is that we cannot conduct our own fact-finding investigation. The PRC must consider appeals based upon the "record" (the Proposal, Final Determination and other documents involved in the decisionmaking) that the Postal Service collected during the time it was making its decision whether or not to close or consolidate the post office. The Postal Service's regulations require that a copy of the record be available at the affected post office for 30 days after the final determination is posted. After that time, if you want to look at the record you may have to ask the person in charge of your post office where you can look at a copy or how to obtain one.

Due to the limits the law has placed on our authority, the PRC may not return a final determination to the Postal Service merely because the PRC believes a different result might be just as good or better. Rather, the PRC may only examine the Postal Service's decision and record, and decide whether the Postal Service has stayed within the guidelines the law has set up.

Specifically, the law requires that the PRC affirm the Posal Service's final determination unles the determination is:

(A) Arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with the law;

(B) Without observance of procedure required by law; or

(C) Unsupported by substantial evidence on the record.

Furthermore, the PRC may not change the Postal Service's final determination. It may only: (1) Affirm (with the result that the Postal Service's decision will stand), or (2) return the entire matter to the Postal Service for further consideration.

Postal Service's Authority

In keeping with its responsibility to operate the nation's mail system, the Postal Service has been given much authority over post offices, including the power to decide whether an office should be closed or consolidated. However, before reaching a decision to close or consolidate a post office, the Postal Service must follow a procedure set up by law, and also consider specific factors involved in such an action.

Procedure

The law sets out the steps the Postal Service must take before it closes or consolidates a post office. Specifically:

The Postal Service, prior to making a determination * * * as to the necessity for the closing or consolidation of any post office, shall provide adequate notice of its intention to close or consolidate such post office *at least 60 days prior to the proposed date of such closing or consolidation* to

persons served by such post office to insure that such persons will have an opportunity to present their views.

The Postal Service calls its "notice of its intention to close or consolidate" the "Proposal." As noted above, the proposal must be posted for 60 days. During the 60 days patrons are invited to give the Postal Service their comments on the proposed closing or consolidation. The Postal Service calls its determination to close or consolidate the "Final Determination."

Any determination of the Postal Service to close or consolidate a post office shall be in writing and shall include the findings of the Postal Service with respect to the considerations required to be made * * *. Such determination and findings shall be made vailable to persons served by such post office.

The Postal Service shall take no action to close or consolidate a post office *until 60 days after its written determination is made available to persons served* by such post office.

Factors To Be Considered

In addition to following the required procedure, the Postal Service must also consider certain factors. The law states:

The Postal Service, in making a determination whether or not to close or consolidate a post office, shall consider—

(A) The effect of such closing or consolidation on the community served by such post office;

(B) The effect of such closing or consolidation on employees of the Postal Service employed at such office;

(C) Whether such closing or consolidation is consistent with the policy of the Government * * * that the Postal Service shall provide a maximum degree of effective and regular postal services to rural areas, communities, and small towns where post offices are not self-sustaining;

(D) The economic savings to the Postal Service resulting from such closing or consolidation; and

(E) Such other factors as the Postal Service determines are necessary.

Participant Statement

We have included a form that you may use, if you choose, for your written argument. The purpose of the Participant Statement is the same as a formal brief—to point out issues that you believe the PRC should consider in its review of the Postal Service's actions. You may choose to file either a Participant Statement or a formal brief. General examples of some issues that would be proper to include would be:

(1) That the Postal Service did not consider certain issues it is required to consider.

(2) The facts the Postal Service is relying on have not been established.

(3) The Postal Service did not follow the procedure required by law.

(4) The facts in the Postal Service's final determination are true, but they do not prove what the Postal Service says they prove.

It is best to be as specific as possible.

In reviewing Postal Service determinations to close or consolidate post offices, the PRC proceedings can be much less formal than is customary in courts. That is, the PRC does not require patrons appealing Postal Service decisions to meet the usual requirements for the form of papers filed—such as typing the documents. No technical formalities are required. However, it is important that papers sent to the PRC be legible. It is also important for statements to be clear and as specific as possible.

Time for Filing Participant Statement

The date a Participant Statement (or brief if you choose to file one instead of a Participant Statement) is due is found in the schedule which is attached as an Appendix to the "Notice and Order of Filing of Appeal." You should have a copy of the Notice and Order. If you do not, you should be able to find a copy posted at the post office. Under its rules, the Postal Rate Commission expects to *receive* briefs on the day specified in the schedule (rather than receiving briefs that are simply postmarked by that day).

Filing the Brief or Participant Statement

Address the brief or Participant Statement to: Office of the Secretary, Postal Rate Commission, 2000 L St., N.W., Suite 500, Washington, D.C. 20268.

Please include the Docket Number the PRC has given your case on your brief and on any other papers you send to the PRC concerning the case.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[AH-FRL 2282-5]

Approval and Promulgation of Implementation Plans; Indiana

AGENCY: U.S. Environmental Protection Agency (EPA).

ACTION: Proposed rulemaking.

SUMMARY: Indiana requested that EPA approve as a revision to the Indiana State Implementation Plan (SIP) a variance from the State opacity regulations for the Indiana-Michigan Electric Company's Breed Power Plant (Breed) during startup/shutdown. EPA is proposing to disapprove this variance because the State has not demonstrated that the National Ambient Air Quality Standards (NAAQS) will be protected during such periods of excess emissions.

DATE: Comments on this revision and on EPA's proposed action must be received by July 26, 1983.

ADDRESSES: Copies of the SIP revisions and the supporting data are available at the following addresses for review. (It is recommended that you telephone Robert B. Miller at (312) 886-6031 before visiting the Region V office.)

Air Programs Branch, Region V, Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604

Indiana Air Pollution Control Division, 1330 W. Michigan Street, Indianapolis, Indiana 46206

Comments on this action should be addressed to: Gary Gulezian, Chief, Regulatory Analysis Section (5AP-11), Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Robert B. Miller, Air Programs Branch, Region V (5AP-26), Environmental Protection Agency, Chicago, Illinois 60604, (312) 886-6031.

SUPPLEMENTARY INFORMATION: In order to attain and maintain the total suspended particulate (TSP) NAAQS, the Indiana SIP requires all sources to meet a TSP mass emission limit and an opacity (visible emissions) limit.[1]

[1] The Indiana SIP opacity regulation is APC 3, as approved in part as a revision to Indiana's opacity SIP on October 28, 1975 (40 FR 50033; January 23, 1978, 41 FR 4375). The State has subsequently adopted several revised opacity regulations, each of which supercedes for State purposes the State's previous regulation, and has submitted them to EPA as revisions to the SIP. The most recent of these submittals was on October 6, 1980 when Indiana submitted to EPA as a revision to Indiana's SIP the

However, Indiana's operating permit regulation, 325 IAC Article 2, provides that Indiana may adopt operating permits which contain site-specific emission limits less stringent than those contained within Indiana's general regulations, as long as the NAAQS are protected with the less stringent limits. These relaxed limits supercede those in the general regulations and must be submitted to EPA as revisions to the SIP.

Pursuant to this provision, Indiana adopted an operating permit for Breed which contains a site specific variance to Indiana's opacity regulation, 325 IAC 5–1.[2] The State submitted this operating permit to EPA on February 26, 1981. EPA returned the revision to the State on August 21, 1981, because the SO_2 emission limit relaxation contained in the permit was inadequately supported. On June 22, 1982, Indiana resubmitted to EPA as a revision to the SIP the Breed operating permit with the additional needed SO_2 support material.

The operating permit opacity variance allows Breed to exceed Indiana's 40% opocity limit [3] during boiler startup and shutdown for a period of up to ten hours or until the flue gas temperature entering the electrostatic precipitator reaches 250°F, whichever comes first. The average opatity during these times of excess emissions may not exceed 70%.

EPA has determined that Sullivan County, the County in which Breed is located, is currently attaining the TSP NAAQS (43 FR 8962, March 3, 1978). However, Indiana did not submit any data which demonstrate that the TSP NAAQS would be maintained during these excess emission startup/shutdown periods. EPA is, therefore, proposing to disapprove the opacity variance contained in the Breed operating permit, because Indiana did not demonstrate that the NAAQS are protected during such periods of excess emissions.

EPA's excess emissions policy [4] does permit the exercise of enforcement discretion for unavoidable excess emissions. In determining an appropriate enforcement action, EPA will consider the criteria articulated in this policy.[5]

All interested persons are invited to submit written comment on EPA's proposed disapproval of this variance. Written comments will be considered in determining EPA final action on the variance. After review of all comments submitted, EPA will publish in the Federal Register the Agency's final action.

Under 5 U.S.C. 605(b), the EPA must determine if its action will have a significant economic impact on a substantial number of small entities. EPA's proposed disapproval of the opacity variance will not affect a significant number of small entities, because it deals with only one source, the Breed Powerplant.

Under Executive Order 12291, today's action is not "Major." It has been submitted to the Office of Management and Budget (OMB) for review. Any comments from OMB to EPA, and any EPA response, are available for public inspection at the EPA Region V office listed above.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons.

(Sec. 110, and 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410, and 7601(a))

Dated: December 29, 1982.

Valdas V. Adamkus,

Regional Administrator.

[FR Doc. 83–14274 Filed 5–26–83; 8:45 am]

BILLING CODE 6560–50–M

State's revised opacity regulation, 325 IAC Article 5–1. Indiana had adopted this regulation for State purposes on September 15, 1980.

EPA proposed to disapprove 325 IAC Article 5–1 as a revision to the SIP on March 3, 1982, because it would relax opacity limits in nonattainment areas (42 FR 9019). EPA will take final action on this regulation in a future Federal Register notice. Until such time as EPA ultimately approves a revised Indiana opacity regulation as a revision to the SIP, the SIP opacity regulation remains APC 3, as approved on October 28, 1975.

[2] This same operating permit also established a revised sulfur dioxide (SO_2) emission limit, for Breed of 9.57 pounds of SO_2 per million British Thermal Units. EPA is proposing to approve this revised emission limit in a separate Federal Register notice.

[3] The opacity SIP limit for this facility is also 40%. The SIP provides for a limited, narrow exception from compliance during "fire starting". This exception permits emissions up to 60% opacity for a period not to exceed 10 minutes on one occasion during a 24-hour period.

[4] EPA's excess emission policy is found at: 42 FR 21472, April 27, 1977; 42 FR 58171, November 8, 1977, *Workshop on Requirements for Nonattainment Area Plans* (Revised Edition, April 1978), P. 229; and a September 28, 1982 memorandum from Kathleen Bennett, Assistant Administrator for Air, Noise, and Radiation, to Regional Administrators, Regions I–X, concerning [EPA's] Policy on Excess Emissions During Startup, Shutdown, Maintenance, and Malfunction).

[5] In determining an appropriate enforcement response, EPA will consider any demonstration that the source makes as to whether the excess emissions were due to a sudden and unforeseeable breakdown in the equipment, could have been avoided through better scheduling for maintenance, or could have been avoided through better operation and maintenance practices. EPA will also consider if repairs, if any, were made in an expeditious manner, whether the amount and duration of the excess emissions were minimized, and whether the excess emissions are part of a recurring pattern indicative of inadequate design, operation, or maintenance.

40 CFR Part 271

[SW–6–FRL 2372–4]

Hazardous Waste Management Program; Texas Application for Interim Authorization, Phase II Component C

AGENCY: Environmental Protection Agency.

ACTION: Notice of public comment period and of a public hearing.

SUMMARY: Today EPA is announcing the availability for public review of the Texas application for Phase II, Component C, Interim Authorization, Hazardous Waste Management Program, inviting public comment, and giving notice that if significant public interest is expressed, EPA will hold a public hearing on the application.

DATE: If significant public interest is expressed in holding a hearing, a public hearing is scheduled for July 14, 1983 at 7:00 p.m. EPA reserves the right to cancel the public hearing if significant public interest in holding a hearing is not communicated to EPA by telephone or in writing by July 7, 1983. EPA will determine by July 11, 1983, whether there is significant interest to hold the public hearing. All written comments on the Texas Interim Authorization application must be received by the close of business on July 7, 1983.

ADDRESSES: If significant public interest is expressed, EPA will hold a public hearing on Texas' application for Interim Authorization on July 14, 1983, at 7:00 p.m., at the Stephen F. Austin State Office Building, Room 118, 1700 N. Congress Avenue, Austin, Texas

Written comments on the application and written or telephoned communication of interest in EPA's holding a public hearing on the Texas appication must be sent to: U.S. Environmental Protection Agency, Region VI, Air and Waste Management Division, Attn: H. J. Parr, Hazardous Materials Branch, 1201 Elm Street, Dallas, Texas 75270, (214) 767–2645.

If you wish to find out whether or not EPA will hold a public hearing on the Texas application based upon EPA's decision that there was significant public interest in such a hearing, write or telephone after July 11, 1983, the EPA contact person listed below or telephone: Dan Eden, Texas Department of Water Resources, P.O. Box 13087, Capitol Station, Austin, Texas, Telephone (512) 475–2041.

Copies of the Texas Interim Authorization application for Phase II Component C, are available during normal business hours at the following addresses for inspection and copying:

Texas Department of Health, Bureau of Solid Waste Management, Room 602, 1100 West 49th Street, Austin, Texas 78756, (512 458–7271
Texas Department of Water Resources, Stephen F. Austin State Office Building, Library—Room 511, 1700 N. Congress Avenue, Austin, Texas 78711, (512) 475–3781
Texas Department of Water Resources District Office, 4301 Center Street, Deer Park, Texas 77536, (713) 479–5981
Texas Department of Water Resources District Office, Klee Square Building, Suite 515, 505 South Water Street, Corpus Christi, Texas 78401, (512) 882–2548
Texas Department of Water Resources District Office, 2321 A 50th Street, Lubbock, Texas 79412, (806) 799–1164
Environmental Protection Agency, Region VI, Library, 28th Floor, 1201 Elm Street, Dallas, Texas 75270, (214) 767–7341
EPA Headquarters Library, 401 M St., SW., Washington, D.C. 20460

FOR FURTHER INFORMATION CONTACT: H. J. Parr, Hazardous Materials Branch, U.S. Environmental Protection Agency, Region VI, Dallas, Texas 75270, (214) 767–2645.

SUPPLEMENTARY INFORMATION: In the May 19, 1980, **Federal Register** (45 FR 33066), the Environmental Protection Agency promulgated regulations, pusuant to the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976, as amended, to protect human health and the environment from the improper management of hazardous waste. These regulations included provisions under which EPA can authorize qualified State hazardous waste management programs to operate in lieu of the Federal program. The regulations provide for a transitional stage in which qualified State program can be granted Interim Authorization. The Interim Authorization program is being implemented in two phases corresponding to the two stages in which the underlying Federal program will take effect.

The State of Texas received Interim Authorization for Phase I on December 24, 1980.

In the January 26, 1981 **Federal Register** (46 FR 7965), the Environmental Protection Agency announced the availability of portions or components of Phase Ii of Interim Authorization. Component A, published in the **Federal Register** January 12, 1981 (46 FR 2802), contains standards for permitting containers, tanks, surface impoundments and waste piles. Component B, published in the **Federal Register** January 23, 1981 (46 FR 7666), contains standards for permitting hazardous waste incinerators.

The State of Texas received Interim Authorization for Phase II, Components A and B, on March 23, 1982.

In the July 26, 1982 **Federal Register** (47 FR 32378), the Environmental Protection Agency announced that states with qualified programs can be authorized for Phase II interim Authorization, Component C. Component C published in the **Federal Register** includes standards for permitting of land disposal facilities.

A full description of the requirements and procedures for State Interim Authorization is included in 40 CFR Part 271, Subpart F (45 FR 33479; May 19, 1980).

As noted in the May 19, 1980 **Federal Register**, copies of complete state submittals for Phase II Interim Authorization are to be made available for public inspection and comment. In addition, if significant public interest is expressed a public hearing is to be held on the submittal.

List of Subjects in 40 CFR Part 271

Hazardous materials, Indians—land, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control, Water supply, Intergovernmental relations, Penalties, Confidential business formation.

(Solid Waste Disposal Act, amended by Resource Conservation and Recovery Act of 1976 and Solid Waste Disposal Act Amendments of 1980, 42 U.S.C. 6901 et seq.)

BILLING CODE 6560–50–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

42 CFR Part 36

Indian Health; Redesignation of Contract Health Service Delivery Area

AGENCY: Public Health Service, HHS.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: This document withdraws a notice of proposed rulemaking on redesignation of the geographical boundaries of the Contract Health Service Delivery Area (CHSDA) for the Penobscot Reservation in Maine that appeared at page 1318 in the **Federal Register** dated Tuesday, January 6, 1981 (46 FR 1318). On September 30, 1982, by Resolution Number 9–30–82–7, the Penobscot Indian Nation rescinded its request for a redesignation of the CHSDA applicable to the Tribe. We are, therefore, withdrawing the notice of proposed rulemaking.

DATE: The withdrawal notice is effective May 27, 1983.

FOR FURTHER INFORMATION CONTACT: Richard J. McCloskey, Parklawn Building, Room 6A20; Telephone 301–443–3116.

SUPPLEMENTARY INFORMATION: In accordance with the final regulations for IHS Contract Health Services (CHS) published in the **Federal Register** on August 4, 1978 (43 FR 34650) and codified at 42 CFR 36.21 et. seq.), the Penobscot Tribe by Resolution Number 3–19–79 requested a redesignation of their CHSDA. The redesignation would have expanded the CHSDA to include twelve additional counties. The NPRM which was published on January 6, 1981 (46 FR 1318–1319) received no comments during the comment period. On September 30, 1982 the Governing Body of the Tribal Council of the Penobscot Nation issued Resolution Number 9–30–82–7 rescinding their March 19, 1979 resolution. Accordingly, after considering the Tribe's request to rescind in light of budgetary constraints and other criteria, the Secretary has decided to withdraw the notice of proposed rulemaking.

Dated: April 7, 1983.

Edward N. Brandt, Jr.,

Assistant Secretary for Health.

Approved: May 18, 1983.

Margaret M. Heckler,

Secretary.

BILLING CODE 4160–16–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

[CC Docket No. 79–245; FCC 83–240]

American Telephone and Telegraph Co.; Manual and Procedures for Allocation of Costs

AGENCY: Federal Communications Commission.

ACTION: Proposed rule related notice.

SUMMARY: This Notice proposes changes in the *Interim Cost Allocation Manual (ICAM)* use by AT&T to allocate costs among its interstate services. The changes to the *ICAM* are needed to make it consistent with changes in the

Jurisdictional Separations Manual, our Access Charge Rules (Part 69) and to eliminate references to classes of equipment or services which will no longer be part of AT&T after the divestiture of its Operating Companies. This action will simplify and update the *ICAM*.

DATES: Comments are due by June 8, 1983, and replies by June 22, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Leonard S. Sawicki, Common Carrier Bureau, (202) 632-6363.

Notice of Proposed Rulemaking

In the matter of American Telephone and Telegraph Co.; manual and procedures for the allocation of costs; CC Docket No. 78-245.

Adopted: May 13, 1983.

Released: May 18, 1983.

By the Commission. Commissioner Jones concurring in the result.

1. The *Third Report and Order* in CC Docket No. 78-72 [*Access Charge Order*] [1] adopted rules for the calculation of access charges. The *Access Charge Order* represents a significant departure in the traditional methods of charging for interstate telephone service. Of course, this also signals equally important changes in the method of determining those charges. In order to bring the *Interim Cost Allocation Manual (ICAM)* for AT&T's interstate services in line with the access charge scheme, we are proposing several changes to that *Manual*. Further, AT&T's divestiture of the Bell Operating Companies under the Modification of Final Judgment (MFJ) [2] necessitates changes in the treatment of various items in the *ICAM*.

2. The current *ICAM* was adopted in 1981.[3] A number of minor revisions were approved in April 1982 and April 1983 by the Chief of the Common Carrier Bureau. These changes were made consistent with the authority delegated to the Bureau Chief in the Manual (*ICAM*, p. 1). The actions proposed in this *Notice* are directed at the very narrow issues of making the *ICAM* consistent with the *Access Charge Order* and the MFJ. These changes are necessary so that AT&T may file new interstate tariffs by October 1983, to be effective at divestiture on January 1, 1984. We contemplate an expeditious review of the *Manual* in order to enable AT&T to meet this deadline.

3. We recognize that other issues are pending in this docket. Our actions here in no way will prejudge those questions. We hope to act on those soon. In addition, we have no desire to rehear the arguments made for or against specific actions taken in the *Access Charge Order*. For the purposes of these technical adjustments to the *ICAM*, we will accept the *Access Charge Order* as given. Our primary purpose here is to identify parts of the *ICAM* which need changes and conform the *ICAM* to the access rules. In the analysis below, we proceed through the *ICAM* and make adjustments that appear to be appropriate. The proposed *ICAM* is included as an appendix to this *Notice*.

4. If the access charges are revised in response to petitions for reconsideration or the Emergency Petition for Waiver relating to transport charges of divested Bell Operating Companies is granted, it will probably be necessary to revise some of the tentative *ICAM* revisions described in this Notice. We expect to incorporate any such revisions in the final order. The tariff filing schedule that we have adopted to accommodate the MFJ schedule will not permit an opportunity for further comment before such revisions are adopted. Interested persons are accordingly encouraged to suggest revisions in the proposed *ICAM* that would be appropriate if we adopt changes in access charges that have been proposed in petitions for reconsideration or waiver.

I. Investments and Reserves

A. *Company Instructions.*

5. The first section of the *ICAM* includes instructions for the Bell Operating Companies (BOCs). After divestiture the need to differentiate between BOC and Long Lines interstate investment will disappear. The BOC section is deleted, leaving Section I.B. as a general instruction to AT&T and any interexchange carrier subsidiaries it may choose to create.

B. *Reporting Categories.*

6. The new reporting categories are Exchange Contract Services to Divested Companies, Private Line, MTS and WATS. Because ENFIA will no longer be an AT&T offering after January 1, 1984, it has been dropped. To account for shared facilities and services offered to the divested operating companies after January 1, 1984, we have added a new reporting category. All investments, reserves and expenses associated with the shared facilities will be allocated to this category. Because this is a new category to the *ICAM* (and a new area for the industry), we expect the rules for the allocations to this category to evolve and gain greater sophistication and precision over time. In the first year, we expect that the supporting information will come from AT&T's contract records. As our accounting and auditing surveillance yields specific information, we will require greater detailed supporting information in the annual filings. All of the exchange contract investments, reserves and expenses will be subtracted from the appropriate accounts before those accounts are allocated to the other service categories.

7. All references to exchange in the other categories are deleted. The obvious reason for this is the divestiture. However, some of the principles for allocation are retained in a later section concerning the allocation of access charge expenses incurred by AT&T in the rendition of its interstate services. The investment, reserve and expense amounts are allocated by the local telephone companies under our Part 69 Access Rules to categories which are not uniquely related to AT&T's interstate services. Therefore, these expenses (to AT&T) must be apportioned among the interstate services. We have tried to retain the essential methods of allocation in the changes which we are proposing. They appear under the next major heading in the revised *ICAM*.

8. The major items removed from this section are the references to exchange (as we noted above), and the references in the MTS and WATS category to Local Dial Switching. Footnote 2 is deleted from this section but reappears with changes in the exchange access expense allocation section. References to BOC switchboard investment are also deleted. Finally, while the divested operating companies will perform billing for AT&T in the near term (and others on a nondiscriminatory basis if others request such services), it is possible that AT&T may someday do its own billing. We have retained the section under "MTS and WATS" to handle the allocation of billing equipment if the need arises.

II. Allocation of Exchange Access Expenses

9. AT&T will pay for the nine elements listed in § 69.4(b) of our Rules, Billing and Collection [§ 69.4(c)], and Premium Access (§ 60.207) and certain transitional surcharges (§ 96.206). These new classes of expenses dictate changes in the format of the *ICAM*. Most of these elements will have to be allocated to the MTS, WATS or private line service

---

[1] MTS/WATS Market Structure Inquiry, 48 FR 10319 (March 11, 1983).

[2] Modification of Final Judgment (MFJ), United States v. American Telephone and Telephone Co., 552 F. Supp. 131 (D.D.C. 1982) *aff'd sub nom.* Maryland v. United States, 51 U.S.L.W. 3628 (U.S. March 1, 1983).

[3] American Telephone and Telegraph Company, 84 FCC 2d 385, recon. denied, 86 FCC 2d 667 (1981), *affirmed sub nom.* MCI Telecommunications Corp. v. FCC ("ICAM"), 679 F. 2d 408 (D.C. Cir. 1982)

categories. This section contains the instructions for these allocations. While the instructions are fairly self-explanatory, we should point out that we have attempted to make the instructions and methods of allocation consistent with the *Access Charge Order*. The measure of WATS minutes in the current *ICAM* will be changed to include only open minutes to be consistent with separations changes which will be recommended by the Joint Board.

III. Expenses Not Related to Access and Income

10. Most of the changes to this section of the ICAM are editorial. They are proposed to make this section consistent with changes proposed in the "Investment and Reserves" section, above or to eliminate expense categories which will no longer apply to AT&T after divestiture. Only the changed categories are discussed here:

603–01 Subscriber Line Testing is deleted. This function will be performed by the local companies and will be subsumed in the access charges.

605 Station Equipment Maintenance is deleted due to the deregulation of this equipment.

608 Depreciation is revised to delete obsolete references to Associated Companies.

632 Public Telephone Expenses. This function will be performed by local companies and will be subsumed in access charges.

644 Connecting Company Relations. The allocation relationship has been revised to reflect the changed relationships among the companies.

645 Local Commercial Operations is changed to Commercial Operations and all references to the associated companies have been deleted. AT&T presumably will have no further "local" commercial operations.

648 Public Telephone Commission is deleted. This expense is accounted for in the Pay Phone end user access charge.

649 Directory is deleted. This local expense is accounted for under the "Information" access element.

LL Settlements except Division of Revenue. This is deleted because there is no need for this distinction after divestiture. Any settlements will be included in "Independent Company Settlements."

General Services and Licenses. This has been revised to substitute a general instruction to apportion payments for affiliate company services in the same manner as directly incurred expenses.

Regulatory Flexibility Act and Paperwork Reduction Act

11. We certify that the Regulatory Flexibility Act is not applicable to the revisions of the *Manual* set forth in this proceeding. The ICAM only applies to AT&T which does not fall within the Regulatory Flexibility Act's definition of a "small entity." AT&T is a large firm, dominant in its field of operation and therefore cannot be considered a "small entity." The Paperwork Reduction Act of 1980 does not apply to this Notice. See 44 U.S.C. 3506(c)(5).

Conclusion and Ordering Clauses

12. We have proposed these changes to bring the *ICAM* in line with our Access Rules and the Modification of Final Judgment. The changes are detailed in the attached revised *ICAM*. We seek comments on whether our changes actually are consistent with Part 69 and the MFJ, and whether the changes are complete.

13. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantial disposition of the matter is to be considered in a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever occurs earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation, and that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy of the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. *See generally*, § 1.1231 of the Commission's Rules, 47 CFR 1.1231.

14. Accordingly, it is hereby ordered, that comments may be filed on the issues and proposals discussed herein no later than June 8, 1983 and that replies may be filed no later than June 22, 1983. In accordance with the provisions of Section 1.419 of the Commission's Rules, 47 CFR 1.1419, an original and five copies of all statements, briefs or comments, or replies, shall be filed with the Federal Communications Commission, Washington, D.C., 20554, and all such filings will be available for public inspection in the Docket Reference Room at the Commission's Washington, D.C., offices. In reaching its decision, the Commission may consider information and ideas not contained in filings, provided that such information is reduced to writing and placed in the public file, and provided that the fact of the Commission's reliance thereon is noted in the Order.

15. It is further ordered, that, pursuant to 47 U.S.C. 154(i), 154(j), 201–205, and 5 U.S.C. 553, notice is hereby given of the proposed adoption of new or modified rules, in accordance with the discussion and delineation of issues in this *Notice* and on the basis of previous notices and filings in this proceeding.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Cost Allocation Manual

This manual contains general instructions for allocating the annual investment and expense costs to the following reporting categories for AT&T: Exchange Contract Services, Private Line, Message Telecommunications Service (MTS), Outward WATS and 800 Service (collectively, WATS).

For each of the reporting categories, an earnings ratio will be developed according to this formula:

$$\text{Earnings Ratio} = \frac{\text{Revenues minus (expenses and taxes)}}{\text{Gross investment minus reserves}}$$

These earnings ratios, plus supporting documents, will be filed with the Commission during June following the reporting year ("central submission"). These earnings ratios will be subject to final interpretation by the Commission.

The process for making changes to this manual shall be determined by the Chief, Common Carrier Bureau. Minor changes (such as changes in account names) may be made providing these changes are approved by the Chief, Common Carrier Bureau prior to filing of the central submission. Substantive changes, which may be requested by any party, will require appropriate procedures.

I. Investments and Reserves

Instructions in this section are to be used to allocate interstate investments and reserves to the reporting categories.

A. *General Instructions*

Using Jurisdictional Separations Process (JSP) principles and AT&T accounting records, investment and reserves for the company and any wholly owned carrier subsidiaries will be divided between exchange contract services, private line and message categories. Message investments will be grouped into interexchange and "other" categories to be used in further allocation to MTS and WATS. Those portions of investment associated with the switching function will be allocated separately as described below.

B. *Reporting Categories*

Exchange Contract Services to Divested Companies

This category will include investments and reserves for those services and facilities offered to the divested companies under contract as contemplated by the Modified Final Judgment. Investments and reserves are developed from contract and separations-related data. All related costs will be subtracted from the appropriate accounts before allocation to the other reporting categories listed below.

Private Line

This category contains investments and reserves associated with private line services less any related exchange contract service investment.

MTS and WATS

Investment and reserve amounts for the message category, as developed above, will be allocated to MTS and WATS. Message telephone plant (defined here as Account 100.1 less exchange contract services and private line investment, land, buildings, furniture and office equipment, and vehicles an other work equipment) will be identified. Toll Dial Switching and Switchboard investment will also be separately identified. Interexchange outside plant amounts will be allocated between MTS and WATS based on network message minute miles. Toll Dial Switching investment will be allocated on the basis of switched message minutes. The determination of investment in the various switchboard types will be based on JSP data. Interexchange COE circuit equipment will be allocated on the basis of the allocation of interexchange circuits. Investment in message switchboards will be directly assigned to the MTS reporting category. Investment in switchboards used to provide 800 Service Information will be assigned to the WATS category. In the event that AT&T performs its own billing, investment serving billed messages will be allocated between MTS and WATS based on the relative number of MTS and WATS messages served by such investment. Investment serving non-billed messages will be allocated based on the relative number of total MTS and Outward WATS messages. International satellite associated earth station investment (Account 100.5) and its associated depreciation and amortization account (Account 175) will be allocated on the basis of international satellite rents.

Interexchange, international satellite and switching telephone plant developed separately for MTS and WATS will be added together to form total message telephone plant amounts for MTS and WATS. The percentage which MTS and WATS telephone plant each makes of total message plant (as defined above) will be used as a distributive ratio to allocate all remaining investment ("other") and reserve accounts between MTS and WATS.[1]

II. Allocation of Access Expenses

Procedures in this section are used to allocate the expenses associated with payments to local exchange carriers for access to their local facilities. The allocation of all other expense accounts is contained in Section III, below. "Private line" use referred to in categories allocated directly or indirectly among MTS, WATS and private line on a message minute basis means FX, CCSA and CCSA equivalent Open End traffic.[2]

[1] Included in these remaining investment and reserves portions are the following accounts: Land and Buildings; Furniture and Office Equipment; Vehicles and Other Work Equipment; Telephone Plant Under Construction; Property Held For Future Telephone Use; Materials and Supplies; Customer Deposits; Organization, Franchise and Patent Rights; Depreciation Reserve and Accumulated Deferred Income Tax Reserve; Amortization Reserve; and Cash Working Capital.

[2] In developing the count of minutes of use, only "open end" WATS minutes of use will be counted. The usage measures specified herein are based on total daily volumes.

Access expense	Allocation procedures
Transitional surcharges billed on a per minute basis	Apportion among MTS, WATS and Private Line on the basis of the relative conversation minutes attributed to each category for purposes of such access charge billings.
	FX, CCSA and CCSA equivalent Open End usage is Private Line usage for purposes of this Manual
Transitional surcharges billed on a per call basis	Apportion among MTS, WATS and Private Line on the basis of the relative calls attributed to each category for purposes of such access charge billings.
Carrier Common Line Usage	Apportion among MTS, WATS and Private Line on the basis of the relative conversation minutes attributed to each category for purposes of such access charge billings.
Premium Access	Apportion between MTS and WATS in the relative proportions as Carrier Common Line Usage charges apportioned to such categories.
Line Termination	Apportion among MTS, WATS and Private Line on the basis of the relative conversation minutes attributed to each category for purposes of such access charge billings.
Local Switching 1	Assign to the Private Line category.
Local Switching 2	Apportion between MTS and WATS in the same proportions as Line Termination charges apportioned to such categories.
Intercept	Apportion between MTS, WATS and Private Line in the same proportions as Line Termination charges apportioned to such categories.
Information	Assign to MTS and WATS on the basis of the relative proportion of total MTS and WATS calls.
Operator Assistance	Assign to MTS.
Common Transport	Apportion among MTS, WATS and Private Line on the basis of the relative conversation minutes attributed to each such category for purposes of such access charge billings.
Dedicated Transport	Apportion between MTS and WATS in the same proportions as Line Termination charges apportioned to such categories.
Special Access	Apportion between WATS and Private Line in the same proportions as such access charge billings attributed to each category.

Access expense	Allocation procedures
Billing and Collection	Apportion among MTS, WATS and Private Line in the same proportions as such access charge billings attributed to each category..

III. Expenses Not Related to Access and Income—Description of FDC Methodologies

Procedures in this section are to be used to distribute all interstate expenses not related to access expenses (600 series accounts) and income to the reporting categories. All expenses related to "contract services" are deducted before allocation to other categories. Expenses are directly assigned where aplicable or allocated on the basis of the of the procedures described below. Certain accounts are allocated on the basis of "total attributable expenses." This factor represents each reporting category's precentage share of expenses derved through direct assignment and allocation procedures (except local, state and federal income taxes).

EXPENSES AND REVENUES—FDC METHODS

Operating expense accounts	Allocation procedures
602.1–602.8—Repairs of outside Plant (OSP)	Allocate to reporting categories based on associated OSP in service (Accounts 241 through 244).
603–02—Service Order Testing	Allocate maintenance of overseas facilities to reporting categories based on the number of associated circuits in service.
603–04—Trunk Testing	Directly assign the portion identified in JSP data as Private Line to the Private Line reporting category. Allocate amounts identified in the JSP as Message interexchange to the MTS and WATS categories based on the distribution of outside plant and interexchange central office plant in service.
604—COE Repairs	Allocate circuit testing to reporting categories using an analysis of reported testing hours. Overseas testing allocated to reporting categories based on number of circuits in service. Allocate facilities testing to reporting categories based on associated interexchange (IX) OSP and COE plant in service, excluding overseas. Directly assign the Service Engineering portions of Account 604 to the private line reporting category. Directly assign #4ESS international generic program costs to MTS. Allocate the circuit rearrangements and change portions of Account 604–07 and Account 604–08 (less Service Engineering) to reporting categories based on number of IX circuit sections. Allocate overseas facility terminal equipment maintenance to reporting categories based on associated number of circuits. Allocate the remainder of Account 604 to reporting categories based on associated COE plant in service.
606—Buildings and Grounds	Allocate to reporting categories based on investment in buildings.
610—Maintaining Transmission Power	Allocate to reporting categories based on COE plant (Account 221) separately for domestic and oversees.
612—Other Maintenance	Allocate to reporting categories based on combined Accounts 602 through 606 and 610.
608—Depreciation	Allocate to reporting categories based on the depreciable classes of plant in service using applicable depreciation rates. (Ocean cable depreciation is allocated separately based on the ocean plant in service in each category.)
609—Extraordinary Requirements	Allocate to reporting categories based on special analysis of accounting records.
613—Amortization of Intangible Property	Allocate to reporting categories based on total attributable expenses.
614—Amortization of Plant Acquisition Adjustments	Directly assign to reporting categories based on special analysis of accounting records.
621–01—General Traffic Supervision (Except Accounts 621–311 and 316).	Allocate to reporting categories based on Account 624 less 624–22 and 634–25.
621–311/316/05, 622–02/03, 624–25/629–08, 631–38 and 631–48—Business Services	Allocate to reporting categories using data from a Business Service time reporting system.
621–03, 624–22, 629–07, 631–37/47—Network Administration	Allocate Accounts 621–431, 624–222, 624–422 and 624–622 (switching and line and number administration) to reporting categories based on toll dial switching equipment plant in service. Allocate Accounts 621–331 and 624–322 (traffic load data administration) to reporting categories based on toll dial switching and switched services IX central office equipment and OSP plant in service, excluding dedicated oversees IX central office equipment and outside plant. Allocate Accounts 624–722 (Trunk Administration) to reporting categories based on switched services IX central office equipment plant and OSP plant in service, excluding dedicated oversees IX central office equipment and outside plant. Allocate Accounts 621–231 (network administration staff) to reporting categories based on the combined attribution of Accounts 624–222, –622 and –722. Allocate the remainder (training and other staff) of Account 621–03 based on the combined attribution of Accounts 621–231, –331 and –431. Allocate the remainder (supervision, training and other) of Accounts 624–22, 629–07, 631–37 and 631–47 based on the combinad attribution of Accounts 624–222, –322, –422, –622 and –722.
622–01—Service Observing	Allocate to reporting categories based on Account 624 less 624–22 and 624–25.
624 (Except Accounts 624–22 and 624–25)—Operators Wages less Network Administration and Business Services.	Directly assign expenses to Private Line and MTS. Directly assign expenses incurred at 800 Service Switchboards to WATS. Allocate expenses incurred at network service switchboards (rate and route, information, intercept and miscellaneous) to MTS and OUTWATS based on the relative number of MTS and outward WATS messages. Determine expenses incurred at other switchboards associated with billed messages on the basis of traffic units. Allocate expenses associated with billed messages based on the relative number of MTS and WATS messages served by such switchboards. Allocate expenses associated with non-billed messages based on the relative number of total MTS and OUTWATS messages.
626—Rest and Lunch Rooms	Allocate to reporting categories based on Account 624 less 624–22, and 634–25. (Network Administration and Business Service portions of these accounts are treated above).
627—Operator's Employment and Training	Same as Account 626.
629 less –07 and –08—Co Stationery and Printing	Same as Account 626.
630—Co House Service	Same as Account 626.
631 less –37, –38, –47 and –48—Miscellaneous Co Expenses	Same as Account 626.
633—Other	Same as Account 626.
634—Joint Traffic—Debit	Same as Account 626.
635—Joint Traffic—Credit	Same as Account 626.
640—General Commercial Administration	Directly assign Service Management expense to reporting categories. Allocate remainder of Account 640 to service categories based on Account 643.
642—Advertising	Directly assign Long Distance Residence Sales, Long Distance Business Sales, Long Distance International, Long Distance Public, and Long Distance DIAL-IT to MTS. Allocate remainder based on total attributable expenses.
643—Sales	Allocate to reporting categories using the results from a sales time reporting system.
644—Connecting Company Relations	Allocate to reporting categories based on allocation of Independent Company settlements for interexchange facilities.
645—Commercial Operations	Allocate expenses to reporting categories using results from a sales time reporting system.
650—Other Commercial Expenses	Allocate expenses based on Account 643.
661—Executive Department	Allocate based on total attributable expenses.
662—Accounting Department	Allocate Revenue Accounting to reporting categories based on analysis of Revenue Accounting Offices. Allocate remainder to reporting categories based on total attributable expenses.
663—Treasury Department	Allocate to reporting categories based on plant in service.
664—Law Department	Directly assign oversees legal expenses to oversees services based on analysis of records. Directly assign outside legal consultant fees and associated costs based on analysis of applicability to a category.

EXPENSES AND REVENUES—FDC METHODS—Continued

Operating expense accounts	Allocation procedures
	Allocate remainder to reporting categories based on total attributable expenses.
665—Other General Office Salaries and Expenses	Allocate Personnel, Account 665–03, to reporting categories based on Maintenance, Traffic, Commercial and Revenue Accounting salaries.
	Directly assign service Engineering expenses (Portion of 665–09) to the private line category.
	Allocate Account 665–29, Customer Services, to categories based on reported hours.
	Allocate Account 665–149, Central Office Planning and Engineering, based on toll dial switching equipment plant in service.
	Allocate remainder based on total attributable expenses.
668–669—Insurance and Accidents and Damages	Allocate to reporting categories based on plant in service.
670—Earth Station Expenses	Allocate to reporting categories based on Account 100.5.
671—Operating Rents	Allocate circuit and miscellaneous rents to reporting categories based on interexchange OSP and Circuit equipment and toll switching equipment plant in service.
	Directly assign international satellite rents incurred for services that can only be provided on satellite facilities directly to reporting categories. Allocate remaining international satellite rents to reporting categories based on total international voice-grade circuits in use.
	Allocate domestic satellite rents to reporting categories based on domestic satellite circuits in use.
	Allocate building space rents to reporting categories based on the combined Account 643 and Revenue Accounting portion of 662.
672—Relief and Pensions	Allocate to reporting categories based on Maintenance, Traffic, Commercial, and Revenue Accounting Salaries.
673—Telephone Franchise Requirement (dr)	Allocate based on the total investment in Account 100.1.
675—Other Expenses	Allocate to reporting categories based on plant in service.
676—Telephone Franchise Requirements (cr)	Allocate based on the total investment in Account 100.1.
677—Expenses Charged Construction (cr)	Same as Account 675.

INCOME ACCOUNTS—FDC METHODS SUBSECTION

Income Accounts	Allocation procedures
Gross Service Revenues (Accounts 510–516)	Directly assign to reporting categories based on accounting records.
Earth Station Revenue (Account 522)	Allocate to reporting categories based on the allocation of international satellite rent expense.
Rent Revenues (Account 524)	Directly assign to reporting categories based on accounting records.
Other Operating Revenues (Account 526)	Allocate to reporting categories based on gross revenues (Accounts 510–526) less Account 526.
Uncollectibles (Account 530)	Allocate to reporting categories based on an analyses of accounting records.
Independent Company Settlements	Allocate based on revenue account charged.
Miscellaneous Income Charges (Account 323)	Allocated based on plant in service (Account 100.1).
Interest on Customer Deposits	Allocate based on total investment in Account 100.1.

Taxes—FDC Methods

Type of tax	Allocation procedures
Gross Receipts Taxes	Allocate based on the allocation of reporting category revenues.
Social Security Taxes (Account 307–05)	Allocate based on the apportionment of Maintenance, Traffic, Commercial, and Revenue Accounting salaries.
Ad Valorem Taxes (Account 307–01)	Allocate based on the allocation of plant in service.
Income Adjustments for Income Tax Determinations	Allocate depreciation of capitalized items, Relief and Pensions, and Social Security Taxes capitalized based on plant in service.
	Allocate Operating Fixed Charges based on the allocation of net investment.
State and Local Income Taxes (Account 307–02)	Allocate the actual tax incurred based on the state and local taxable income for each reporting category (net revenue less expenses, income charges, taxes excluding Federal Income Taxes, and income adjustments).
Amortization of Investment Credits	Allocate based on the allocation of plant in service.
Federal Income Tax	Allocate to reporting categories by multiplying the statutory rate times the Federal taxable income for each reporting category (net revenue less expenses, income charges, other taxes, and income adjustments).
General Services and Licenses	Payment for services rendered by an affiliated company shall be assigned to expense categories in the same manner as expenses that are incurred directly by AT&T or a carrier subsidiary and shall be apportioned in the same manner as such directly incurred expenses.

[General Docket 79–337; RM–3241; RM–3678; FCC 83–166]

Operation of Low Power, Limited Coverage Systems in the 22.0–23.6 GHz Band, and Creation of New Class of Low Power Unlicensed Microwave Device in the 24 GHz Band

AGENCY: Federal Communications Commission.

ACTION: Second Report and Order (Dismissal of Petition and withdrawal of proposed rule).

SUMMARY: The Federal Communications Commission determines that permitting non-frequency coordinated operations in the 21.2–23.6 GHz band is not in the public interest, thus it does not amend Part 94 as previously proposed. In addition, FCC finds that permitting the operation of uncoordinated, unlicensed low power radio systems in the 24.05–24.25 GHz band is also not in the public interest, thus it does not amend Part 15. Finally, the Commission dismisses the General Electric Company's Petition for Limited Further Reconsideration of the *First Report and Order.*

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Donald Draper Campbell, Office of Science and Technology, Spectrum Management Division, Telephone (202) 653–8177.

Second Report and Order (Proceeding Terminated)

In the matter of amendment of Part 94 of the Commission's Rules and Regulations to facilitate operation of low power, limited coverage systems in the 22.0–23.6 GHz band, and amendment of Part 15 of the Commission's Rules to create a new class of low power unlicensed microwave device in the 24 GHz band. Gen. Docket No. 79–337 RM–3241, RM–3678.

Adopted: April 27, 1983.

Released: May 5, 1983.

By the Commission. Commissioner Jones absent.

Summary of Action

1. In the *First Report and Order* in this docket,[1] the Commission created a low power microwave communications service in the 23 GHz band. Here we have concluded that the technical standards, licensing and frequency coordination requirements applied to this new service should be retained. In addition we conclude that low power point-to-point microwave service should not be extended to the 24 GHz band.

Background

2. *First Report and Order* amended Part 94 of the Commission's Rules to provide for the operation of short haul, low cost, low power microwave communications systems in four channel pairs within the band segments 21.8–22.0 GHz and 23.0–23.2 GHz with somewhat relaxed technical standards.[2,3] During the course of the proceeding, two commenters, General Electric Company (GE) and M/A–COM, Incorporated (M/A–COM), questioned the necessity for frequency coordination for these low power devices. M/A–COM stated that the cost of frequency coordination might be greater than any savings realized in relaxing the technical standards and GE agreed that uncoordinated operations would meet the needs of some users. Further, both GE and M/A–CO suggested that Part 15 of the Rules could be amended to allow operation of these devices without a license. GE also suggested that the Commission adopt a temporary licensing program for these systems. Additionally, on 15 May 1980, M/A–COM petitioned the Commission (RM–3678) to amend Rule Part 15 to accommodate the operation of low power fixed service microwave radio systems in the 24.05–24.25 GHz band. The issues raised by GE and M/A–COM were not resolved in the *First Report and Order*. Instead, the Commission issued a *Further Notice of Proposed Rule Making* (*FNPRM*) to seek comment on these matters.[4]

Further Notice of Proposed Rule Making

3. The applications for the low power systems foreseen by GE and M/A–COM, and the issues raised by the companies, were sufficiently similar to warrant consolidation of the M/A–COM petition into this proceeding. The Commission did not want to delay introduction of the low power devices while the issues of frequency coordination and unlicensed operations were being solved. In the *FNPRM*, the Commission asked for public comment on questions concerning the need for frequency coordination and licensing for the low service and on the appropriate technical standards. We stated that we saw merit in providing spectrum for non-frequency coordinated operations in the 22 to 24 GHz band because these low power devices were envisioned to be highly directional and to have limited (short range) interference potential. Thus, we proposed to eliminate the coordination requirement for the channel pair 21.825/23.025 GHz,[5] except within 25 kilometers of the Canadian and Mexican borders. We also proposed to apply the same technical standards set forth for the other low power devices to this channel pair. Furthermore, we stated that some form of licensing seems appropriate because these low power microwave operations do not fall within Part 15 of the Rules. However, we posed questions on these points. We specifically asked commenters to address the following questions:

(a) Is one 50 MHz channel pair sufficient for non-frequency coordinated operations?

(b) Should unlicensed operations of these devices be permitted? If so, under what conditions?

(c) Is there a need for temporary or point of sales licensing?

(d) Should these devices be subject to different technical standards than proposed?

(e) Is there a need to permit mobile operation and if so, what would be the implication for fixed operations?

Discussion

4. Comments were filed by M/A–COM, GE, Datapoint Corporation (Datapoint) and the Central Committee on Telecommunications of the American Petroleum Institute (API). Reply comments were filed by M/A–COM, GE and API.

5. All agreed that there is merit in providing spectrum for non-frequency coordinated operations for those users who are willing to forego guarantees of protection from interference in order to implement operations more quickly. There was disagreement, however, over how many channels should be designated for non-frequency coordination and whether they should be taken from the four channel pairs or from other spectrum. API felt that spectrum for non-frequency coordinated operations should be limited to one channel pair, while M/A–COM and Datapoint felt the several, or all, of the channels in these band segments should be so designated. GE felt that several pairs should be allocated for non-frequency coordinated operations but that they should be taken from other band segments in this region of spectrum.

6. Since the time of the *Report and Order* and *FNPRM*, these low power channels have experienced significant development ans several manufacturers now provide equipment for voice, data and video transmissions. There are now a substantial number of licensees and applicants, which could be affected by non-frequency coordinated operations. At present, usage of the low power channels is evenly distributed over the four channel pairs available at 21.8–22.0 GHz and 23.0–23.2 GHz. Additionally, the receivers currently available are highly susceptible to interference from adjacent channel signals.[6] Thus, the introduction of uncoordinated operations on the 21.825/23.025 GHz channel pair would also have an adverse impact on adjacent channel operations which would remain subject to prior frequency coordination. In the absence of prior frequency coordination, the Commission and its licensees would have to rely on after-the-fact investigation to detect and eliminate adjacent channel interference. Such investigations could be more expensive and time consuming than prior frequency coordination. While it might be possible to require coordination for adjacent channel operations without requiring coordination for co-channel operations, we doubt that this approach would speed up the licensing process.

7. As M/A–COM noted in its comments, it is difficult to allow uncoordinated operations if there are

---

[1] *First Report and Order*, FCC 80–485, released August 19, 1980, 45 FR 55731 August 21, 1980, 81 FCC 2nd 140 (1980).

[2] In response to a Petition for Clarification of the *First Report and Order* filed by M/A–COM, Incorporated, and a Petition for Limited Reconsideration and Clarification filed by the General Electric Company, the Commission adopted a *Memorandum, Opinion and Order* (FCC 81–414, released September 29, 1981, 87 FCC 2nd 1090 (1981)). GE subsequently filed a Petition for Limited Further Reconsideration on October 29, 1981.

[3] The term 'low power' is dervied from the fact that operations in the 23 GHz band pursuant to § 94.73 are limited to transmitter output power of 10.0 watts or less, whereas operations on the four subject channel pairs using reduced technical standards pursuant to § 94.91 are limited to transmitter output power of 0.1 watts or less.

[4] *FNPRM*, FCC 80–486, released August 19, 1980, 45 FR 55775, August 21, 1980.

[5] The four available channels are: 21.825/23.025, 21.875/23.075, 21.925/23.125 and 21.975/23.175 GHz.

[6] Most receivers at 23 GHz employ simple Schottky diode detectors which have front-end responses of nearly 200 MHz. Even superheterodyne receivers have IF's of a full 30 MHz and a frequency stability of ±11.5 MHz.

already users who have done frequency coordination and expect to operate with guranteed freedom from interference. For this reason we are not changing the rules of Part 94 to provide for uncoordinated operations in the band segments 21.8–22.0 GHz and 23.0–23.2 GHz.

8. We do not find that it is appropriate to introduce a non-frequency coordinated, unlicensed communications service into the 24 GHz band. The band is allocated on a primary basis for Federal Government radiolocation use and on a secondary basis for non-Government radiolocation and amateur use, as well as for Industrial, Scientific and Medical Service (ISM) equipment. The frequencies are already being used by radar devices, and NTIA has recommended that the operations proposed by M/A–COM not be permitted in the 24 GHz band because they would be inconsistent with the current allocated use of the band.[7] We are, therefore, not adopting rules authorizing low power microwave operations in the 24 GHz band.

9. The possibilities for providing spectrum for non-frequency coordinated operations in other band segments are being considered in Docket 82–334, which is dealing with the development of utilization policy for fixed and mobile services' use of certain bands between 947 MHz and 40 GHz . The *Notice of Inquiry* [8] in that Docket solicited comments on the need for coordination in bands between 17.7 and 40.0 GHz , and the *Notice of Proposed Rule Making* [9] in that Docket proposed to allocate all of the spectrum at 31.0–31.2 GHz for low power, non-frequency coordinated operations. That band is already allocated to the fixed and mobile services.

10. The commenters agreed that some form of licensing is necessary to provide records to locate sources of interference in bands where protection is afforded. M/A–COM noted that temporary licensing is not compatible with frequency coordination since the value of temporary licensing is to provide more immediate access to the spectrum while the purpose of frequency coordination is to make the review necessary to insure that operations will be interference free. GE, on the other hand, suggested a temporary licensing approach wherein applicants who had completed frequency coordination could immediately implement their systems, subject to final review by the Commission.

11. The issue of applying temporary licensing procedures to channels where frequency coordination is required has been treated in the *First Report and Order* in this proceeding and in a *Memorandum Opinion and Order* responding to a Petition for Limited Reconsideration filed by GE. We found that to preserve an interference protected environment we should continue the review of all applications prior to grant of license. The need to provide operational safeguards against the possibility of temporarily licensed users causing interference to other licensees is now even more important given the growth and use discussed above. Therefore, we will continue the existing licensing procedure for these channels.

12. The commenters generally agreed with the technical standards in § 94.91 and felt that there should not be different standards for noncoordinated equipments if channels were set aside for these operations. M/A–COM, however, said that the beamwidth standard should be relaxed to permit 6° beamwidth antennas; this would allow 8 inch rather than 12 inch antennas. On the other hand, GE argued that narrow beams resulting from the 4° beamwidth antenna standard provide more efficient spectrum utilization and lessen chances for interference. The commenters also agreed that certain operating standards, specifically those dealing with user transmitter measurements (§ 94.85), notification to the local Engineer-In-Charge (§ 94.55) and maintenance of station records (§ 94.113) are excessive regulation and unneeded for the low power operations. The suggestion to delete these regulations is beyond the scope of this proceeding and are more appropriately addressed in the context of Docket 82–334 where more general regulatory issues are being considered, and they will be taken into account in that proceeding.

13. With regard to mobile operations, commenters indicated that the need for mobile operations at this frequency range is unknown but likely to be small. Further, the possibilities of interference arising from mobile operations are likely to be small at this frequency range and short-lived due to movement of the mobiles. Until further experience is gained, we will not make particular provisions for mobile operations. We will handle applications on a case-by-case basis.

Other Matters

14. The Commission still has before it for consideration the matters raised in GE's Petition for Limited Further Reconsideration of the *First Report and Order*, filed October 29, 1981, in this docket. GE objected to the channel assignment policy set out in the *First Report and Order* and the *Memorandum Opinion and Order* adopted on September 22, 1981 and released on September 29, 1981. GE contended that the Commission's Rules, by mandating the use of designated channel pairs in the 21.8–22.0 GHz and 23.0–23.2 GHz band segments, would reult in highly inefficent spectrum utilization. GE was concerned that the technical limitations of state-of-the-art receiver design would preclude users from establishing parallel 23 GHz systems on adjacent channels. Thus, GE sought a channel assignment scheme which would provide licensees with the flexibility to establish 50 MHz guardbands between the transmit frequencies used by parallel systems. GE argued, therefore, that the Commission should not designate any particular channels for use in simplex or duplex systems.

15. GE stated, further, that if the Commission felt it necessary to maintain a formal channel assignment plan, it would be necessary to rearrange the channelization plan set forth in the *First Report and Order*. To provide for a 50 MHz guardband between parallel systems, GE urged the Commission to designate the 21.825/23.025 GHz channel pair, which was allocated in the *First Report and Order* for simplex operations, for duplex operations. Similarly, GE urged that the 21.975/23.175 GHz pair, previously designated for duplex operation, be made available for simplex systems.

16. Racon, Inc. (Racon) and M/A–COM filed comments in response to GE's Petition for Limited Further Reconsideration and, in turn, GE submitted a Reply and Request for Expedited Action. Racon pointed out that its products utilized receiver technology similar to that employed by GE. Racon therefore supported GE's arguments in favor of a more flexible channel assignment scheme. M/A–COM expressed the belief that it would be unwise for the Commission to adopt any policies "intended to protect nonselective receivers from interference." M/A–COM noted that the guardbands needed to protect GE's receivers from adjacent channel interference were spectrally inefficient

---

[7] Letter dated February 1981 from Mr. Leo A. Buss, Director, Spectrum Plans & Policies, NTIA to Mr. Robert L. Cutts, Chief, International and Operations Division, FCC. A copy of this letter has been placed in the docket file of this proceeding.

[8] Paragraphs 52 and 53 of the *NOI* (FCC 82–286, released July 9, 1982, 47 FR 31959, July 23, 1982).

[9] Paragraphs 29–30 of the *NPRM* (FCC 83–2, released January 13, 1983, 48 FR 6730, February 25, 1983).

and would be contrary to the public interest. M/A-COM concluded that the Commission should not adopt a channelization plan merely for the purpose of protecting adjacent channel receivers from interference when the same purpose could be accomplished with higher-stability oscillators and more selective receivers.

17. On October 15, 1982, the Commission issued a *Public Notice* which summarized and further clarified the licensing policies adopted for low power microwave systems in the 23 GHz band. The *Public Notice* reaffirmed that, in accordance with existing Commission rules, the channels designated for single or adjacent channel operations could be assigned for duplex operations and vice versa in certain situations when necessary to avoid intra-system or inter-system interference. The *Public Notice* also made it clear that adjacent channel operations could be authorized on frequencies other than those so designated upon a technical showing justifying the need for a exception to the established channel assignment plan. In response to the *Public Notice*, GE, on November 12, 1982, filed a Motion to Dismiss its Petition for Limited Further Reconsideration. In view of the fact that the matters raised in GE's Petition and in the corresponding comments filed by Racon and M/A-COM now appear to be moot, we think it appropriate to dismiss GE's Petition for Limited Further Reconsideration.

Conclusion

18. Accordingly, it is ordered, that pursuant to Section 4(i) and 303(r) of the Communications Act of 1934, as amended, the General Electric Company's Petition for Limited Further Reconsideration, filed October 29, 1981, is dismissed as moot.

19. It is further ordered that this proceeding is terminated.

47 CFR Part 73

[MM Docket No. 83-424; RM-4332]

TV Broadcast Stations in Mobile, Alabama; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign UHF Television Channel 61 to Mobile, Alabama, as its seventh television assignment in response to a petition filed by David Allen Crabtree.

DATES: Comments must be filed on or before June 20, 1983, and reply comments on or before July 5, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Mass Media Bureau, (202) 634-6530.

Television broadcasting.

Notice of Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (Mobile, Alabama); MM Docket No. 83-424, RM-4332.

Adopted: April 21, 1983.

Released: May 6, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making, filed January 6, 1983, by David Allen Crabtree ("petitioner"), seeking the assignment of UHF Television Channel 61 to Mobile, Alabama, as its seventh television assignment. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements and other technical criteria.

2. Mobile (population 200,452),[1] seat of Mobile County (population 364,379), is located on the Gulf Coast of Alabama.

3. In view of the fact that Mobile could receive its seventh television service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the following city:

City	Channel No.	
	Present	Proposed
[illegible]	5+, 10+, 15+, 21+, *31, *42.	5+, 10+, 15+, 21+, *31, *42, 61.

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

[1] Population figures taken from the 1980 U.S. Census Advance Rep

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 20, 1983, and reply comments on or before July 5, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1068, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to

which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice,* they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other document shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

Notice of Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (Raleigh, North Carolina); MM Docket No. 83-419 RM-4334.

Adopted: April 21, 1983.

Released: May 5, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed January 6, 1983, by Dennis H. Owen ("petitioner") seeking the assignment of UHF Television Channel 50 to Raleigh, North Carolina, as its fourth television assignment. The petitioner filed information in support of the proposal and expressed his interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements and other technical criteria.

2. Raleigh (population 149,771) [1], the seat of Wake County (population 300,833), and the capital of the State of North Carolina, is located in the central part of North Carolina.

3. In view of the fact that Raleigh could receive its fourth television assignment, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the following city:

City	Channel No.	Present / Proposed
Raleigh, N.C.	5, 22, *34-	5, 32, *34-, and 50+

4. The Commissions's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 20, 1983, and reply comments on or before July 5, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignements, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules,* 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is not longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

which the reply is directed, consititutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C 154, 303).

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponents(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channnel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Conterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in the *Notice*, they will be considered as comments in the proceeding and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

47 CFR Part 73

[MM Docket No. 83-416; RM-4309]

TV Broadcast Stations in Livingston, Tennessee: Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign UHF television Channel 60 to Livingston, Tennessee, in response to a petition filed by Peggy Rothchild Sparks. The assignment could provide Livingston with its first television allocation.

DATES: Comments must be filed on or before June 20, 1983, and reply comments on or before July 5, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C., 20554.

FOR FURTHER INFORMATION CONTACT: Nancy V. Joyner, Mass Media Bureau, (202) 634-6530.

List of Subjects in 47 CFR Part 73

Television broadcasting.

Notice of Proposed Rule Making

In the matter of amendment of § 73.606(d), Table of Assignments, Television Broadcast Stations. (Livingston, Tennessee) MM Docket No. 83-416, RM-4309

Adopted: April 21, 1983.

Released: May 5, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed by Peggy Rothchild Sparks ("petitioner"), seeking the assignment of UHF television Channel 60 [1] to Livingston, Tennessee, as that community's first television assignment. Petitioner indicates that she, or an entity of which she is a part, will apply for the channel, if assigned.

2. Livingston (population 3,372),[2] the seat of Overton County (population 17,575), is located in north central Tennessee, approximately 130 kilometers (80 miles) northwest of Knoxville. At the present time, Livingston is devoid of any local television assignment.

3. UHF Television Channel 60 can be assigned to Livingston consistent with the minimum distance separation requirements of § 73.610 of the Commission's Rules provided a site restriction of 107 miles north of the community is imposed to avoid short spacing to a construction permit on the co-channel in Gadsen, Alabama.

4. In view of the above, we believe the petitioner's proposal warrants consideration since the proposed television assignment could provide Livingston with a first local television broadcast service. Accordingly, the Commission proposes to amend the Television Table of Assignments, § 73.606(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Livingston, Tennessee		60 –

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: a showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

[1] The petition, as initially submitted requested the assignment of UFH television Channel 58 to Livingston. However, that proposal was found to conflict with an earlier petition filed by David Allen Crabtree requesting assignment of Channel 58 to Nashville, Tennessee (RM-4299). Therefore petitioner amended the proposal to specify a non-conflicting assignment.

[2] Population figures were extracted from the 1980 U.S. Census, Advance Reports.

6. Interested parties may file comments on or before June 20, 1983, and reply comments on or before July 5, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules.* 46 FR 11549, published February 9,1981.

8. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4.303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

Notice of Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (Kingsport, Tennessee); MM Docket No. 83–417, RM–4310.

Adopted: April 21, 1983.

Released: May 5, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed January 7, 1983, by Peggy Ann Rothchild ("petitioner"), seeking the assignment of UHF television Channel 44 to Kingsport, Tennessee, as its second television assignment. A site restriction of one mile northwest of Kingsport is required.

2. Kingsport (population 32,027)[1], in Sullivan County (population 143,968), is located in eastern Tennessee, approximately 140 kilometers (88 miles) northeast of Knoxville, Tennessee.

3. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned.

4. In view of the fact that Kingsport could receive its second television service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

Commission's Rules) with respect to the following city:

City	Channel No.	
	Present	Proposed
Kingsport, Tennessee	10	19, 44 –

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before June 20, 1983, and reply comments on or before July 5, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See, § 1.420 (a), (b), and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

Notice of Proposed Rule Making

In the matter of amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (San Antonio, Texas); MM Docket No. 83–421, RM–4313.

Adopted: April 21, 1983.

Released: May 6, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed January 7, 1983, by Stanley C. Emert ("petitioner"), seeking the assignment of UHF Television Channel 59 to San Antonio, Texas, as its eighth television assignment.

2. San Antonio (population 785,410),[1] seat of Bexar County (population 988,800), is located in south Texas, approximately 120 kilometers (75 miles) southwest of Austin, Texas.

3. Petitioner has submitted information in support of his proposal and expressed an interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements and other technical criteria.

4. In view of the fact that San Antonio could receive its eighth local television service, the Commission finds that it would be in the public interest to seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) for the following community:

City	Channel No.	
	Present	Proposed
San Antonio, Texas	4, 5, *9–, 12+, *23–, 29+, 41+	4, 5, *9–, 12+, *23–, 29+, 41+, 59+

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before June 20, 1983, and reply comments on or before July 5, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Notice of Proposed Rulemaking

In the matter of Amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (Bowling Green, Kentucky); MM Docket No. 83-420 RM-4340.

Adopted: April 21, 1983.
Released: May 6, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed January 11, 1983, by Standley G. Emert ("petitioner"), seeking the assignment of UHF Television Channel 59 to Bowling Green, Kentucky, as its fourth television assignment. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements and other technical criteria.

2. Bowling Green (population 40,450) [1], seat of Warren County (population 71,828), is located in southwestern Kentucky, approximately 157 kilometers (98 miles) southwest of Louisville, Kentucky.

3. In view of the fact that Bowling Green could receive its fourth television service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the following city:

City	Channel No.	
	Present	Proposed
Bowling Green, Kentucky	13, 40+, *53-	13, 40+, *53-, 59+

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 20, 1983, and reply comments on or before July 5, 1983 and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. for further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, IT IS PROPOSED TO AMEND the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

---

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments amd reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

[MM Docket No. 83-422; RM-4314]

TV Broadcast Stations in Odessa, Texas; Proposed Changes in Table of Assignments

AGENCY: Federal Communication Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign UHF Television Channel 42 to Odessa, Texas, as its fifth television assignment, in response to a petition filed by Stanley G. Emert.

DATES: Comments must be filed on or before June 20, 1983, and reply comments on or before July 5, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Notice of Proposed Rulemaking

In the matter of Amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations. (Odessa, Texas), MM Docket No. 83-422 RM-4314.

Adopted: April 21, 1983.
Released: May 6, 1983.

By the Chief, Policy and Rules Division.

1. The Commission has under consideration a petition for rule making filed January 7, 1983, by Stanley G. Emert ("petitioner"), which seeks to assign UHF Television Channel 42 to Odessa, Texas, as its fifth television assignment.

2. Odessa (population 90,027)[1], seat of Ector County (population 115,374), is located in west Texas, approximately 200 kilometers (125 miles) southwest of Lubbock, Texas. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned.

3. In view of the fact that Odessa could receive a fifth local television broadccast service, the Commission believes it would be in the public interest to seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) for the following community:

City	Channel No.	
	Present	Proposed
Odessa, Tex.	7-, 24-, 30, and *36+.	7-, 24-, 30, *36+, and 42

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 20, 1983, and reply comments on or before July 5, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend Sections 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission considerations, or court review, all *ex parte* contacts are prohibited in Commission proceedings such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, IT IS PROPOSED TO AMEND the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in Sections 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Proposed Rule Making

In the matter of amendment of § 73.606(b), table of assignments, TV broadcast stations, (Rogers, Arkansas); MM Docket No. 83-423, RM-4339.

Adopted: April 21, 1983.
Released: May 6, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making, filed January 11, 1983, by Stanley G. Emert ("petitioner"), seeking the assignment of UHF Television Channel 51 to Rogers, Arkansas, as its first television assignment. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements and other technical criteria.

2. Rogers (population 17,429),[1] in Benton County (population 78,115), is located in northwestern Arkansas, approximately 240 kilometers (150 miles) northwest of Little Rock, Arkansas.

3. In view of the fact that Rogers could receive its first television service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the following city:

City	Channel No.	
	[illegible]	Proposed
Rogers, Arkansas		51 -

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 20, 1983, and reply comments on or before July 5, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606(B) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule making to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counter proposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later then that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

BILLING CODE 6712-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Ch. X

[Ex Parte No. 394[1]; No. 38679]

Cost Ratio for Recyclables—1980 Determination; Restructured Rates on Recyclables, O/T Iron or Steel Scrap; Conrail

AGENCY: Interstate Commerce Commission.

ACTION: Advanced notice of proposed rulemaking (notice for submission of additional supplemental statements).

SUMMARY: A Commission decision was served May 20, 1983. In Ex Parte No. 394, supplemental statements to evidence compliance with previous orders are evaluated. Specified rate reductions, and additional statements are ordered. A notice of proposed rulemaking will be issued in the near future. In No. 38679, the U.S. Court of Appeals, D.C. Circuit, has vacated and remanded the case. On remand, we must examine the rates for connecting carriers of Conrail to determine if they exceed 146 percent of variable costs and, if so, order reductions and refunds. We must also reconsider issues with regard to certain Class III railroads.

[1] Also embraces No. 38805, *Railroad Cost Recovery Increase on Recyclables (other than Iron or Steel Scrap).*

DATES: Rate reductions as specified in Appendix A must be published by July 19, 1983. Supplemental statements, as required or permitted in Appendix B, must be submitted by June 9, 1983. Reply statements are due June 20, 1983.

ADDRESS: Send original and 10 copies of statements to: Rail Section, Room 5344, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Louis E. Gitomer, (202) 275-7245.

SUPPLEMENTARY INFORMATION: In Ex Parte No. 394, the Commission has established a revenue to variable cost ratio of 146 percent for nonferrous recyclables pursuant to 49 U.S.C. 10731. Our decision served December 6, 1982, found that the carriers had complied in varying degrees with our prior orders, but that supplemental statements were necessary to clarify the carriers' compliance. The supplemental statements have been submitted and are evaluated in our decision served simultaneously with this notice. We found that the carriers have, for the most part, complied with the previous orders. Some have not complied entirely, but have specified the rate categories where reductions are necessary. These reductions, which have been ordered, are contained in Appendix A of this notice; additionally required carrier statements are set out in Appendix B.

In addition, we are allowing carriers to comment on their need for redress due to rate reductions which turned out to exceed those which are required under our current "segmented" approach to administration of section 10731.

Refunds are deferred until consideration is given to a May 17, 1983, petition by the nation's rail carriers. The carriers seek an order declaring and/or clarifying their obligations to make certain rate reductions and refunds under Ex Parte No. 394.

In No. 38679, the U.S. Court of Appeals, D.C. Circuit, vacated and remanded our decision of March 26, 1982, which allowed Conrail to cancel its joint rates on recyclables and impose single-line rates for all its recyclables shipments. The court order requires the Commission to: (1) Determine by July 5, 1983, the proper rates for all carriers, including Conrail, which will bring rates to which Conrail is a party (single-factor, combination, or other type), to a level not exceeding the 146-percent ratio; (2) allow Conrail's rates currently on file to remain effective until a new order issues; (3) include in our final order a provision requiring the carriers

to refund any excess amounts collected over the appropriate new rates since August 1, 1981, the effective date of Conrail's new rates; and (4) reconsider the issues presented by New York Dock Railway and Brooklyn Eastern District Terminal. Because of the overlapping issues in the two proceedings, we have adopted the Court's suggestion and consolidated the cases.

We have ordered the carriers to submit statements evidencing their compliance with the 146-percent ratio for joint-line movements with Conrail, including the necessary rate adjustments and when the adjustments were made. Moreover, similar evidence must be submitted by Chessie's connecting carriers for joint-line movements with that carrier. Certain data also are required for Union Pacific single-line traffic. The railroads filed a petition for reopening. We will address that petition, and seek public comments, in a notice of proposed rulemaking which will be issued in the near future. The evidence of these three categories is more fully described in Appendix B.

Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write T.S. InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, DC 20423, or call 289–4357 (D.C. Metropolitan area) or toll free (800) 424–5403.

Decided: May 18, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

Appendix B—Supplemental Statements

I. Required

A. All Carriers (Except Conrail)

Where applicable, evidentiary statements conclusively showing that rates for joint-line traffic with Conrail and/or Chessie (for Chessie's 11 commodities set out in footnote 5 of this decision) do not exceed the 146-percent benchmark. The statements shall also identify which rates exceeded the 146-percent ratio because of the Conrail cancellation in No. 38679 and/or the Chessie cancellation, the tariffs in which the needed reductions were made, and the effective dates of the tariff changes.

B. Chessie

Evidentiary statement conclusively showing that rates for joint-line traffic with Conrail (other than the 11 commodities set out in footnote 5 of this decision) do not exceed the 146-percent benchmark.

C. UP Single-line Western Rates

Evidentiary statement conclusively showing whether evidentiary data have accounted for any rate increases in X375C; if the data have not, then the statement must show: (1) what additional adjustments are needed and (2) what steps are being taken to make the appropriate adjustments.

II. Permissive

D. Class III Carriers

These parties may submit such information as they deem relevant. In the absence of further statements, the issues will be resolved on the present record.

E. Nari

This party may submit detailed data as to its allegations of non-compliance. If it does so, it must also establish that it is authorized by the firms on whose behalf it complains.

F. Carriers Party to Tea 2008–L, Item 5750

These carriers may submit statements showing why corrective action is not necessary.

G. Carrier Redress for Excessive Reductions Under the National Approach

Carriers may submit comments on redress for rate reductions under the national approach in excess of those required under the segmented approach.

Friday, May 27, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Committee on Adjudication; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Committee on Adjudication of the Administrative Conference of the United States, to be held at 10:00 a.m., Thursday, June 9, 1983, at 1730 K Street, NW., Federal Mine Safety and Health Review Commission, Washington, D.C. The meeting will be held in the Sixth Floor Hearing Room.

The committee will meet to hear a status report from Professor David Welborn on his study of agency experience under theGovernment in the Sunshine Act. The status of other committee projects will also be discussed.

Attendance is open to the interested public, but limited to the space available. Persons wishing to attend should notify the Office of the Chairman of the Administrative Conference at least two days prior to the meeting. The committee chairman, if he deems it appropriate, may permit members of the public to present oral statements at the meeting; any member of the public may file a written statement with the Committee before, during or after the meeting.

For further information concerning this meeting, contact Richard K. Berg, Office of the Chairman, Administrative Conference of the United States, 2120 L Street, NW., Suite 500, Washington, D.C. 20037. Telephone: (202–254–7020.) Minutes of the meeting will be available on request.

Dated: May 23, 1983.

Richard K. Berg,

General Counsel.

BILLING CODE 6110–01–M

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

Delta-Montrose Electric Association, Inc.; Finding of No Significant Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Notice of Finding of No Significant Impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA), pursuant to the National Environmental Policy Act of 1969, the Council on Environmental Quality Regulations (40 CFR Part 1500) and REA's Bulletin 20–21:320–21, Environmental Policies and Procedures, has made a Finding of No Significant Impact (FONSI) with respect to proposed financing assistance to Delta-Montrose Electric Association, Inc. (Delta-Montrose), of Delta, Colorado. The financing assistance is necessary for the construction of 115 kV transmission facilities in Delta County, Colorado.

FOR FURTHER INFORMATION CONTACT: REA's Finding of No Significant Impact and Environmental Assessment (EA) and Delta-Montrose's Borrower's Environmental Report (BER) may be reviewed at or obtained from Mr. William E. Davis, Director, Western Area—Electric, Rural Electrification Administration, Room 3304, South Argiculture Building, Washington, D.C. 20250, telephone (202) 382–8848, or Mr. C. Ward Armstrong, Manager, Delta-Montrose Electric Association, Inc., 423 Main Street, Montrose, Colorado 81401 or 121 E. 12th Street, Delta, Colorado 81416, telephone (303) 874–8081, during regular business hours.

SUPPLEMENTARY INFORMATION: REA has reviewed the BER submitted by Delta-Montrose and has determined that it represents an accurate assessment of the environmental impact of the proposed project. The proposed project would consist of approximately 43 km (27 miles) of 115 kV transmission line which is to extend from North Delta Substation to Hotchkiss Substation. A distribution substation (Read Substation) is also to be constructed south of Austin, Colorado.

The BER and EA adequately consider potential impacts of the proposed project to resources including threatened and endangered species, important farmlands, cultural resources, floodplains and wetlands.

Alternatives examined included no action, energy conservation and loan management, underground construction, and alternative routes. The proposed route would extend north out of the Hotchkiss Substation, then west along State Route 92 to the proposed Read Substation site, and then west to the 115 kV line. Alternative routes 2, 3, 4 and 5 would extend south from the Hotchkiss Substation and follow the North Fork of the Gunnison River. The routes would cross the river in the vicinity of its confluence with the Gunnison River, then would proceed west to the 115 kV line. Alternative 2 would bypass the proposed Read Substation and alternatives 3 and 4 would pass through North Delta. After reviewing these alternatives, REA determined that the proposed project is an acceptable alternative because it meets Delta-Montrose's needs with a minimum of adverse impact.

Based upon the BER and other related data, REA prepared an EA and Finding of No Significant Impact concerning the proposed construction. It is REA's view that the proposed financing assistance will not be a major Federal action that will affect significantly the quality of the human environment.

In accordance with REA's Bulletin 20–21:320–21, dated January 21, 1980, Delta-Montrose advertised the availability of the BER in the local newspapers. Comments were solicited and the public was given thirty (30) days to reply. No comments were received.

This program is listed in the Catalog of Federal Domestic Assistance as 10.850-Rural Electrification Loans and Loan Guarantees.

Dated: May 20, 1983.

Harold V. Hunter,

Administrator.

BILLING CODE 3410–15–M

Soil Conservation Service

Cabell County Board of Education Critical Area Treatment and Land Drainage RC&D Measure, West Virginia; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Cabell County Board of Education Critical Area Treatment and Land Drainage RC&D Measure, Cabell County, West Virginia.

FOR FURTHER INFORMATION CONTACT: Rollin N. Swank, State Conservationist, Soil Conservation Service, 75 High Street, Morgantown, West Virginia 26505, telephone 304–291–4151.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional or national impacts on the environment. As a result of these findings, Mr. Rollin N. Swank, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure purpose is to provide Critical Area Treatment and Land Drainage at three school sites in Cabell County, West Virginia. The conservation practices included in the measure plan are approximately 280 feet of diversion, 2,200 feet of subsurface drains, and revegetation of 3.5 acres.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Rollin N. Swank, State Conservationist.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A–95 regarding State and Local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Dated: May 13, 1983.

Rollin N. Swank,

State Conservationist.

BILLING CODE 3410–16–M

Kimberling Creek Pastures Critical Area Treatment RC&D Measure, Virginia; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Kimberling Creek Pastures Critical Area Treatment RC&D Measure, Bland and Giles Counties, Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. Manly S. Wilder, State Conservationist, Soil Conservation Service, 400 North Eighth Street, P.O. Box 10026, Richmond, Virginia 23240, telephone 804–771–2455.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Manly S. Wilder, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment on severely eroding pastureland within the Kimberling Creek Watershed, Bland and Giles County, Virginia. The planned work will include critical area planting, grassed waterway or outlet, grade stabilization structure, diversion, lined waterway or outlet, tree planting, sediment basin and fencing.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Manly S. Wilder.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

BILLING CODE 3410–16–M

Slate River Watershed Roadbank Critical Area Planting, Virginia; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Slate River Watershed Roadbank Critical Area Planting, Buckingham County, Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. Manly S. Wilder, State Conservationist, Soil Conservation Service, 400 North Eight Street, P.O. Box 10026, Richmond, Virginia 23240, telephone 804–771–2455.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Manly S. Wilder, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area stabilization on the roadbanks and ditches within the County of Buckingham. The planned work will include grading and shaping, hydroseeding, and mulching. All disturbed areas will be seeded with adapted permanent vegetation.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr Manly S. Wilder.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**

BILLING CODE 3410-16-M

Grindstone-Lost-Muddy Creek Watershed, Missouri; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council in Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Supplement No. 2 of the Grindstone-Lost-Muddy Creek Watershed Work Plan—Clinton, Daviess, De Kalb and Gentry Counties, Missouri.

FOR FURTHER INFORMATION CONTACT: Paul F. Larson, State Conservationist, Soil Conservation Service, 555 Vandiver Drive, Columbia, Missouri 65202, telephone 314/875-5214.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Paul F. Larson, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this supplement.

The supplement concerns watershed protection and providing recreational opportunities. The planned works of improvement include a fish and wildlife development; 290 grade stabilization and gully control structures and accelerated technical assistance for land treatment.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Paul F. Larson.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

CIVIL AERONAUTICS BOARD

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q of the Board's Procedural Regulations; Week Ended May 20, 1983

Subpart Q Applications

The due date for answers, conforming application, or motions to modify scope are set forth below for each application. Following the answer period the Board may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases, a final order without further proceedings. (See 14 CFR 302.1701 et seq.)

Date filed	Docket No.	Description
May 16, 1983	[illegible]	Trans-Mediterranean Airways, S.A.L., c/o Richard A. Popkin, Surrey & Morse, 1250 Eye Street, N.W., Suite 1100, Washington, D.C. 20005. Application of Trans-Mediterranean Airways, S.A.L., pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations requests renewal and modification of its Foreign Air Carrier Permit, for a period of three years, in accordance with the Diplomatic Notes exchanged between the Governments of the United States and Lebanon on April 29, 1983. These Notes authorize TMA to engage in foreign air transportation of property and mail (four round-trip flights per week with narrow-bodied aircraft or equivalent capacity) between a point or points in Lebanon, the intermediate points Basel, Amsterdam, Copenhagen, Stockholm, Frankfurt, Paris, and London and the terminal point New York, New York, without traffic rights between New York and the intermediate points Paris, London and Frankfurt. TMA further requests authorization to engage in charter trips in foreign air transportation, subject to the terms, conditions, and limitations prescribed by the Board's Regulations governing charters. Answers may be filed by June 14, 1983.
May 18, 1983	[illegible]	United Air Lines, Inc., P.O. Box 66100, Chicago, Illinois 60666. Conforming Application of United Air Lines, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests an amendment of its Certificate of Public Convenience and Necessity for Route 57 so as to authorize it to perform scheduled foreign air transportation (of mail, passengers and property) between Spokane, Washington, in the United States, and Calgary, Alberta in [illegible]. Answer may be filed by June 1, 1983.
May 18, 1983	41494	Pacific Express, Inc., c/o Marvin S. Cohen, Stroock & Stroock & Lavan, 1150 Seventeenth Street, N.W., Suite 600, Washington, D.C. 20036. Application of Pacific Express, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests a certificate of public convenience and necessity authorizing it to serve between Spokane and Calgary and Edmonton, Route F.5 of the United States-Canada bilateral. Conforming Applications, Motions to Modify Scope and Answers may be filed by June 15, 1983.
May 20, 1983	[illegible]	Transbrasil S.A. Linhas Aereas, c/o Joanne W. Young, Barrett, Smith, Schapiro, Simon & Armstrong, 1201 Pennsylvania Avenue, N.W., Washington, D.C. [illegible]. Application of Transbrasil S.A. Linhas Aereas pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations applies for a foreign air carrier permit to engage in charter foreign air transportation of persons and property between the United States and the Federative Republic of Brazil. Answer may be filed by June 17, 1983.

Date filed	Docket No.	Description
May 19, 1983.....	41401	Aviation Associates Limited, c/o Martin P. Mittet, 589 D Division Street, Port Orchard, Washington 98366. Supplemental information to the Application of Aviation Associates Limited, for a certificate of public convenience and necessity under Section 401(d)(1) and Subpart Q of the Board's Procedural Regulations. Answer may be filed by June 16, 1983.

Phillis T. Kaylor,
Secretary.

Applications for Duty-Free Entry of Scientific Instruments

The following are notices of the receipt of applications for duty-free entry of scientific instruments published pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the instrument is intended to be used is being manufactured in the United States. Comments must be filed in accordance with § 301.5(a) (3) and (4) of the regulations. They are to be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the **Federal Register.**

A copy of each application is on file in the Department of Commerce, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, Room 1523, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 83-197. Applicant: Purdue University, West Lafayette, IN 47907. Instrument: Free Flow Electrophoresis Apparatus, Model VAP5, complete with Peristaltic Pump, Tubings and Necessary Accessories. Manufacturer: Bender and Hobein GMBH, West Germany. Intended Use of Instrument: The instrument is intended to be used to subfractionate Golgi apparatus of rat liver into their component cisternae. The Golgi apparatus is a complex cell component consisting of stacks of dissimilar cisternae with a marked functional polarity from one face of the stack to the other. In order to characterize this cellular component and to better understand its dynamic character, it is necessary to (1) isolate the complete stack from the cell, (2) neutralize the forces that hold the stack together, and (3) prepare purified fractions of cisternae or plates from each level in the stack. Application received by Commissioner of Customs: May 11, 1983.

Docket No. 83-201. Applicant: University of Wyoming, University Station, Laramie, WY 82071. Instrument: Spectropolarimeter, Model J-500A and Accessories. Manufacturer: Japan

Spectroscopic Co., Ltd., Japan. Intended use of instrument: The instrument is intended to be used to obtain circular dischroism spectra of proteins and nucleic acids under a variety of experimental conditions. The objectives of these experiments are: (i) To develop quantitative methods of assessing the structure of proteins and nucleic acids. (ii) To study subtle changes of the environment of protein and nucleic acid chromaphores. (iii) To study the interaction of proteins and nucleic acids with a variety of other substances. (iv) To compare predicted and experimental structures. Application received by Commissioner of Customs: May 16, 1983.

BILLING CODE 3510-25-M

National Bureau of Standards; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C. 20230.

Docket No. 83-40. Applicant: National Bureau of Standards, Washington, D.C. 20234. Instrument: Neutron Dose-Rate Equivalent Monitor, Type 0949-4 with Accessories. Manufacturer: Atomic Research Establishment, United Kingdom. Intended use of instrument: See notice on page 55987 in the **Federal Register** of December 14, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides a prompt (1.7 to 17 seconds) and stable response. The Department of Health and Human Services advises in its memorandum dated April 29, 1983 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

University of Arizona; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 83-41. Applicant: University of Arizona, College of Medicine, Department of Physiology, Arizona Health Sciences Center, Tucson, AZ 85724. Instrument: Puller, Glass Micro-Electrode, Model PD-5 and Micro Forge with Stereo Microscope, Model MF-79. Manufacturer: Narishige Scientific Products, Japan. Intended use of instrument: See notice on page 56533 in the **Federal Register** of December 17, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument is a two-stage device with separate controls of heater and puller magnet. The Department of Health and Human Services advises in its memorandum dated April 29, 1983 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

University of Rochester; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517). A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 83-46. Applicant: University of Rochester, Department of Dental Research; 601 Elmwood Avenue, Rochester, New York 14642. Instrument: Program Controlled Automatic Feed Unit, FAG-KT (72 Cages) and Accessories. Manufacturer: Andreas Hofer, Switzerland. Intended use of instrument: See notice on page 55987 in the **Federal Register** of December 14, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument can feed 72 experimental animals

simultaneously at 17 programmed times per day. The Department of Health and Human Services advises in its memorandum dated April 29, 1983 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which is being manufactured in the United States.

BILLING CODE 3510-25-M

University of Washington; Decision on Application for Duty-Free Entry of Scientific Instrument

The following is a decision on an application for duty-free entry of a scientific instrument pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

A copy of the record pertaining to this decision is available for public review between 8:30 AM and 5:00 PM in Room 1523, Statutory Import Programs Staff, U.S. Department of Commerce, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Docket No. 82-00087. Applicant: University of Washington, Department of Chemistry, BG-10, Seattle, WA 98195. Instrument: NMR Spectrometer, Model WM-500 and Accessories. Manufacturer: Bruker Analytishe, Messtechnik, West Germany. Intended use of instrument: See notice on page 41409 in the **Federal Register** of September 20, 1982.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, was being manufactured in the United States at the time the foreign instrument was ordered (December 2, 1980).

Reasons: The foreign instrument is a 11.75 tesla, 52 mm bore, nuclear magnetic resonance spectrometer capable of providing a signal-to-noise ratio of 130:1 for a sample of 60 percent C_6D_6 in dioxane in a 10 mm sample tube. The National Bureau of Standards advises in its memorandum dated April 28, 1983 that (1) the capability of the foreign instrument described above is pertinent to the applicant's intended purpose and (2) it knows of no instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use which was being manufactured in the United States at the time the foreign instrument was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, which was being manufactured in the United States at the time the foreign instrument was ordered.

BILLING CODE 3510-25-M

Initiation of Antidumping Investigations; Color Television Receivers From the Republic of Korea and Taiwan

AGENCY: International Trade Administration, Commerce.

ACTION: Initiation of antidumping investigations.

SUMMARY: On the basis of petitions filed with the United States Department of Commerce, we are initiating antidumping investigations to determine whether color television receivers from the Republic of Korea (Korea) and Taiwan are being, or are likely to be, sold in the United States at less than fair value. We are notifying the United States International Trade Commission (ITC) of these actions so that it may determine whether imports of this merchandise are materially injuring, or threatening to materially injure, a United States industry. If the investigations proceed normally, the ITC will make its preliminary determinations on or before June 16, 1983 and we will make ours on or before October 11, 1983.

EFFECTIVE DATE: May 27, 1983.

FOR FURTHER INFORMATION CONTACT: Richard Rimlinger, Steven Lim or Paul Thran, Office of Investigations, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, D.C. 20230 telephone: (202) 377-3962 or 377-1776.

SUPPLEMENTARY INFORMATION: On May 2, 1983, we received petitions from counsel for the Independent Radionic Workers of America; the International Brotherhood of Electrical Workers; the International Union of Electrical, Radio & Machine Workers; and the Industrial Union Department, AFL-CIO. In compliance with the filing requirements of § 353.36 of the Commerce Regulations (19 CFR 353.36), the petitions allege that imports of the subject merchandise from Korea and Taiwan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (19 U.S.C. 1673) (the Act), and that these imports are materially injuring, or are threatening to materially injure, a United States industry. The allegations of sales at less than fair value of the merchandise under investigation from Korea and Taiwan are supported by comparisons of actual United States prices with the foreign market value based on actual home market prices for comparable models.

Initiation of Investigations

Under section 732(c) of the Act, we must determine, within 20 days after a petition is filed, whether it sets forth the allegations necessary for the initiation of an antidumping investigation and whether it contains information reasonably available to the petitioners supporting the allegations. We have examined the petitions filed by the representatives of the domestic manufacturers of color television receivers, and we have found that they meet the requirements of section 732(b) of the Act. Therefore, we are initiating antidumping investigations to determine whether color television receivers from Korea and Taiwan are being, or are likely to be, sold at less than fair value in the United States. If our investigations proceed normally, we will make our preliminary determinations by October 11, 1983.

Scope of the Investigations

The merchandise covered by these investigations are color television receivers, complete or incomplete, currently classified under items 685.11 and 685.14 of the *Tariff Schedules of the United States* (1983).

Notification to the ITC

Section 732(d) of the Act requires us to notify the United States International

Trade Commission of these actions and to provide it with the information we used to arrive at these determinations. We will notify the ITC and make available to it all nonprivileged and nonconfidential information. We will also allow the ITC access to all privileged and confidential information in our files, provided it confirms that it will not disclose such information either publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

Preliminary Determinations by ITC

The ITC will determine within 45 days of the date the petitions were received whether there is a reasonable indication that imports of color television receivers from Korea and Taiwan are materially injuring, or are threatening to materially injure, a United States industry. If its determinations are negative, these investigations will terminate; otherwise they will proceed according to the statutory procedures.

David Diebold,

Acting Deputy (for Policy), to the Deputy Assistant Secretary for Import Administration.

May 23, 1983.

BILLING CODE 3510-25-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1983; Additions

AGENCY: Committee for Purchase From the Blind and Other Severely Handicapped.

ACTION: Additions to Procurement List.

SUMMARY: This action adds to Procurement List 1983 commodities to be produced by workshops for the blind and other severely handicapped.

EFFECTIVE DATE: May 27, 1983.

ADDRESS: Committee for Purchase From the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On December 23, 1982 and April 1, 1983, the Committee for Purchase From the Blind and Other Severely Handicapped published notices (47 FR 57324 and 48 FR 14021) of proposed additions to Procurement List 1983, November 18, 1982 (47 FR 52101):

After consideration of the relevant matter presented, the Committee has determined that the commodities listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for the commodities listed.

c. The actions will result in authorizing small entities to produce commodities procured by the Government.

Accordingly, the following commodities are hereby added to Procurement List 1983:

Class 7530

Folder, File (Pressboard), 7530-00-926-8981, 7530-00-926-8983, 7530-00-739-7723

Paper, Carbon, Typewriter, 7530-00-244-4035 (Requirements for GSA Regions 1, 2, 3, 6, 7 and 8)

C. W. Fletcher,

Executive Director.

[FR Doc. 83-14323 Filed 5-26-83; 8:45 am]

BILLING CODE 6820-33-M

Procurement List 1983; Proposed Additions

AGENCY: Committee for Purchase From the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to Procurement List 1983 a commodity to be produced by and services to be provided by workshops for the blind and other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: June 29, 1983.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodity and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodity and services to Procurement List 1983, November 18, 1982 (47 FR 52101):

Class 6530

Bag, Urine collection, 6530-00-057-0953

SIC 7349

Custodial Service, U.S. Army Reserve Center, Dublin Lane, Owensboro, Kentucky

SIC 7399

Assembly, Living Kit, Basic and Supplemental (Requirements of GSA Region 4 only)

C. W. Fletcher,

Executive Director.

BILLING CODE 6820-33-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on the Defense Data Network; Advisory Committee Meeting

The Defense Science Board Task Force on the Defense Data Network will meet in closed session on 21-22 June 1983 in Washington, D.C.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting on 21-22 June 1983 the Task Force will review the progress in implementing the Defense Network Program.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. 92-463, as amended (5 U.S.C. App. I (1976)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly these meetings will be closed to the public.

Dated: May 23, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Service, Department of Defense.

[FR Doc. 83-14310 Filed 5-26-83; 8:45 am]

BILLING CODE 3810-01-M

Defense Science Board Task Force on the Supercomputer Applications; Advisory Committee Meeting

The Defense Science Board Task Force on the Supercomputer Applications will meet in closed session on 13–14 July 1983 in Washington, D.C. and 16–17 August 1983 in San Diego, California.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meetings on 13–14 July and 16–17 August 1983 the Task Force will conduct a review of the Defense Department's programs to apply the emerging capacity of computers to contribute to military programs and issues. It will attempt to identify areas where improvement in computing power by many orders of magnitude is expected to be of aid to the Defense establishment.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. app. I (1976)), it has been determined that this DSB Task Force meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly these meetings will be closed to the public.

Dated: May 23, 1983.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Service, Department of Defense.

BILLING CODE 3810–01–M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Availability of the Draft Environmental Impact Statement for the New England/Hydro-Quebec Electric Transmission Line

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Availability of the Draft Environmental Impact Statement, DOE/DEIS–0103, for the New England/Hydro-Quebec ±450-kv d.c. Electric Transmission Line.

SUMMARY: The Department of Energy (DOE) has published a Draft Environmental Impact Statement, DOE/DEIS–0103, for a proposed ±450 kv d.c. electric transmission line to be built between Sherbrooke, Quebec, and Comerford, New Hampshire. Written comments are invited and a public hearing may be held if DOE decides one is in the public interest.

DATE: Written comments should be received by DOE no later than July 11, 1983.

ADDRESSES: Copies of the DEIS may be obtained from and written comments on the DEIS should be addressed to: Mr. Garet Bornstein, Office of Fuels Programs, Economic Regulatory Administration, Room GA–017, 1000 Independence Ave., SW., Washington, D.C. 20585, (202) 252–5935.

FOR FURTHER INFORMATION CONTACT:

Mr. Garet Bornstein, or
Ms. Linda Desell, Office of Environmental Compliance, Department of Energy, Room 4G–057, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252–6374
Ms. Lise Courtney M. Howe, Office of International Trade and Emergency Preparedness, Office of General Counsel, Department of Energy, Room 6A–099, 1000 Independence Ave., SW., Washington, D.C. 20585, (202) 252–2900

SUPPLEMENTARY INFORMATION: Pursuant to Executive Order 10485, as amended, a Presidential Permit must be obtained from DOE before an electric utility or other entity can construct, operate and maintain an electric transmission line crossing U.S. international borders. On December 11, 1981, DOE received two Permit applications each proposing to construct the U.S. portion of an electric transmission line connecting Sherbrooke, Quebec, and Comerford, New Hampshire, using alternative routes. The stated purpose of these proposed projects was to connect the Hydro-Quebec and New England Power Pool systems to achieve economic exchange of power, increased reliability of electrical supply, and decreased reliance on imported oil as fuel for electric power generation. The application filed by the New England Electric Transmission Company (NEET) proposed a route entering the U.S. in Coos County, New Hampshire, and terminating at Comerford, New Hampshire. NEET officially withdrew this application from further DOE consideration on January 3, 1983. The second application filed by the Vermont Electric Power Company (VELCO) proposed to install a ±450 kv direct current overhead transmission line entering the U.S. near Norton, Vermont, and crossing into New Hampshire near Comerford station.

The total length of the U.S. portion of the line is 60 miles (54 miles in Vermont and 6 miles in New Hampshire). The initial capacity is planned to be 690 megawatts (MW); ultimate capacity could potentially reach 2000 MW.

The DOE considers the issuance of the subject Presidential Permit to be a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act (NEPA) of 1969. Therefore, the preparation of an Environmental Impact Statement (EIS) is required in accordance with 40 CFR 1502.3 *et seq.* Accordingly, DOE published a notice of intent to prepare an EIS on the proposed international interconnection in the March 1, 1982 **Federal Register** (47 FR 8619).

Public hearings were held on March 10 and March 11, 1982 to obtain information from all interested parties regarding the scope of the environmental impacts.

The DEIS concludes that the principal environmental impact of the proposed project will be the clearing of about 480 ha (1200 acres) of forestland during construction. A secondary impact from clearing will be accelerated erosion which would be small relative to that cuased by the ongoing timber harvesting in the area. During the lifetime of the transmission facility, this cleared forestland will be maintaind as low-growing shrubland or grassland. The clearing will amount to less than 0.1% of the available forest land in the study area and will not remove any areas of unique or important habitat. Because the area to be cleared represents a minute amount of the forestland in the region, no serious impacts to timber harvesting or wildlife populations are expected.

It is also anticipated that the transmission line will have visual impacts at several points along its route: at the U.S.-Canadian border crossing, several areas in the central stretches of the route, and in the vicinity of Moore Reservoir, near the southern terminus.

The DEIS considers four principal alternative corridors for routing the interconnection: three in northeastern Vermont and one in northwestern New Hampshire.

Copies of the DEIS have been distributed to Federal, State and local agencies, organizations and to individuals known to be interested in the proposed transmission facility. Additional copies may be obtained from the Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Ave., SW., (Room GA–017), Washington, D.C. 20585, Phone (202) 252–5935. Copies of the DEIS are available for public inspection at the following locations:

Littleton Public Library, Main Street, Littleton, New Hampshire 03561
Monroe Free Public Library, P.O. Box 67, Monroe, New Hampshire 03771
Colebrook Public Library, Main Street, Colebrook, New Hampshire 03576
William D. Weeks Memorial Library, 128 Main Street, Lancaster, New Hampshire 03584
Northeast Regional Library, Danville Road, St. Johnsbury, Vermont 05819
Barnet Public Library, Main Street, Barnet, Vermont 05821
St. Johnsbury Athenaeum, 30 Main Street, St. Johnsbury, Vermont 05819
Guildhall Library, Guildhall, Vermont 05905
Alden Balch Memorial Library, Main Street, Lunenburg, Vermont 05906
Greensborough Free Library, Greensborough, Vermont 05841
Cobleigh Public Library, 70 Depot Street, Lyndonville, Vermont 05851
Goodrich Memorial Library, Newport, Vermont 05855

Written Comments

Interested parties are invited to provide written comments on the DEIS to Mr. Garet Bornstein, Office of Fuels Programs, Economic Regulatory Administration, Room GA–017, 1000 Independence Ave., SW., Washington, D.C. 20585. Comments should be identified on the outside of the envelope with the designation: "Draft EIS for the New England/Hydro-Quebec Electric Transmission Line." To insure consideration in preparing the final environmental impact statement, all comments and related information should be received by the DOE by July 11, 1983.

Any information or data considered to be confidential must be so identified and accompanied by a written Statement of Confidentiality. Any material not accompanied by a Statement of Confidentiality will be considered to be nonconfidential. DOE reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

Issued in Washington, D.C., May 20, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 83–14177 Filed 5–26–83; 8:45 am]

BILLING CODE 6450–01–M

Application for Presidential Permit PP–80 by Citizens Utilities Company

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Application from the Citizens Utilities Company for a Presidential Permit for two 25 kilovolt (kv) transmission lines.

SUMMARY: The Department of Energy (DOE) has received an application from Citizens Utilities Company (Citizens) to construct two 25 kv transmission lines from the State of Vermont to Canada. The first will connect a 25/34.5 kv substation, located near Route 141 in Canaan, Vermont, with a 25 kv tie point to be established with Hydro Quebec at the U.S./Canada border. The second will connect a 25/12.5 kv substation, located near Route 114 in Norton, Vermont, with a 25 kv tie point to be established with Hydro Quebec at the U.S./Canada border.

FOR FURTHER INFORMATION CONTACT:

Garet Bornstein, Division of Petroleum and Electricity (RG–44), Office of Fuels Programs, Economic Regulatory Administration, Department of Energy, Forrestal Building, Room GA–017, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252–5935

Lise Courtney M. Howe, Office of Assistant General Counsel, International Trade and Emergency Preparedness (GC–11), Department of Energy, Forrestal Building, Mail Stop 6F–094, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252–2900

SUPPLEMENTARY INFORMATION: On May 3, 1983, Citizens filed with DOE an application for a Presidential Permit to construct, connect, operate and maintain two 25 kv transmission lines. The first line, 300 feet in length, would cross the U.S./Canada border near Canaan, Vermont; the second line, 1150 feet in length, would cross the U.S./Canada border near Norton, Vermont. Both lines will connect Citizens' substations with 25 kv tie points established with Hydro Quebec on the U.S./Canada border.

According to the applicant, no environmental impacts are expected, since the Canaan and Norton substation sites are in areas with existing electric distribution facilities.

Any person desiring to be heard or to protest this application should file a petition to intervene or protest with the Division of Petroleum and Electricity (RG–44), Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA–017, 1000 Independence Avenue, SW., Washington, D.C. 20585, in accordance with § 1.8 or 1.10 of the Rules of Practice and Procedure (18 CFR 1.8 or 1.10).

Any such petitions or protests should be filed by July 1, 1983. Protests will be considered by DOE in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene.

Copies of this application are on file with DOE and will, upon request, be made available for public inspection and copying at the Division of Petroleum and Electricity (RG–44), Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA–017, 1000 Independence Avenue, SW., Washington, D.C.

Issued in Washington, D.C., May 20, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

[ERA Docket No. 83-CERT-023]

Al Tech Specialty Steel Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Al Tech Specialty Steel Corporation (AL TECH), P.O. Box 152, Dunkirk, New York 14048, filed an application on April 13, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its steel manufacturing facility in Dunkirk, New York, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, AL TECH indicates that the volume of natural gas for which it requests certification is approximately 800 Mcf per day during an initial 90-day delivery period and 1,120 Mcf per day thereafter. This volume is estimated to displace the use of approximately 7,777 gallons of No. 3 fuel oil (0.5–1.0 percent sulfur) per day.

The eligible seller is J&L Oil and Gas Corporation, Newell Road, Dunkirk, New York 14048. The gas will be transported by National Fuel Gas Supply Corporation, 308 Seneca Street, Oil City, Pennsylvania 16301; and by National Fuel Gas Distribution Corporation, 10 Lafayette Square, Buffalo, New York 14203, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the

circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary.

If ERA determines that an oral presentation is necessary, further notice will be given to Al Tech and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on May 23, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

Authorization To Import Natural Gas at Reduced Border Price

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of Letters Sent to Certain Importers Stating that Reduced Border Price for Natural Gas Is Authorized.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) has sent letters to two importers of natural gas, in response to applications for new import authority, informing them that natural gas may be imported at the reduced (Canadian) border price of U.S. $4.40 per MMBtu under the provisions of their existing import authorizations. ERA advised the Northwest Pipeline Corporation (Northwest) that its existing authorization to import natural gas at a price "not to exceed U.S. $4.94 per MMBtu" permits Northwest to import authorized volumes at a border price of U.S. $4.94 per MMBtu, or at any border price lower than U.S. $4.94 per MMBtu, including U.S. $4.40 per MMBtu. ERA advised Border Gas Inc. (Border), that its existing authorization to import previously authorized volumes of natural gas from Mexico at the higher of U.S. $4.94 per MMBtu or the price authorized in Clause Sixteen of the gas purchase contract with Petroleos Mexicanos (Pemex), the Mexican state oil company, was intended to establish a maximum authorized border price for natural gas imported from Mexico and to permit any lower border price to be paid by Border.

FOR FURTHER INFORMATION CONTACT:

Stanley C. Vass (Natural Gas Division, Office of Fuels Programs), Economic Regulatory Administration, Department of Energy, Forrestal Building, Room GA–007, RG–43, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252–9182

Merrill F. Hathaway, Jr., Office of General Counsel, Natural Gas and Mineral Leasing, Department of Energy, Forrestal Building, Room 6A–141, 1000 Independence Avenue, S.W., Washington, D.C. 20585, (202) 252–4407

PROCEDURAL MATTERS: A copy of the letters sent to Northwest and Border respectively are available for inspection and copying in the Natural Gas Division Docket Room, located in Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., Between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, D. C. on May 23, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450–01–M

[ERA Docket No. 83–CERT–035 etc]

Geo. W. Bollman & Co., et al., Application for Certification of the Use of Natural Gas To Displace Fuel Oil

In the matter of Geo. W. Bollman & Company, Incorporated, [ERA Docket No. 83–CERT–035;] Howmet Aluminum Corporation, [ERA Docket No. 83–CERT–036;] Alton Fabrics, Incorporated, [ERA Docket No. 83–CERT–037;] General Battery Corporation, [ERA Docket No. 83–CERT–038;] Dart Container Corporation, [ERA Docket No. 83–CERT–039;] Pfizer, Incorporated, [ERA Docket No. 83–CERT–040;] Kutztown State College, [ERA Docket No. 83–CERT–041;] Victor F. Weaver, Incorporated, [ERA Docket No. 83–CERT–042;] Dana Corporation, [ERA Docket No. 83–CERT–043.]

On April 26, 1983, Geo. W. Bollman & Co., Inc. (BOLLMAN), P.O. Box 517, Adamstown, Pennsylvania 19501; Howmet Aluminum Corporation, Mill Products Division (HOWMET), Box 3167, Lancaster, Pennsylvania 17604; Alton Fabrics, Inc. (ALTON), 1801 Union Boulevard, Allentown, Pennsylvania 18103; General Battery Corporation (GENERAL), P.O. Box 1262, Reading, Pennsylvania 19603; Dart Container Corporation, a division of Dart Container Corporation of Michigan (DART), 60 East Main Street, Leola, Pennsylvania 17540; Pfizer, Inc., MPM Division (PFIZER), 640 N. 13th Street, Easton, Pennsylvania 18042; Kutztown State College (KSC), Kutztown, Pennsylvania 19530; Victor F. Weaver, Inc. (WEAVER), 403 S. Custer Avenue, New Holland, Pennsylvania 17557; and Parish Division of Dana Corporation (DANA), P.O. Box 1422, Reading, Pennsylvania 19603, filed with the Administrator of the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at one college and eight manufacturing facilities in Pennsylvania, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the applications on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In their applications, the Applicants indicate the total volume of natural gas for the nine Pennsylvania facilities for which they request certification is approximately 109,659,700 Mcf per year. This volume is estimated to displace the use of approximately 6,525,190 gallons of No. 6 fuel oil (1.0–2.3 percent sulfur) per year and approximately 12,958,650 gallons of No. 2 fuel oil (0.036–0.35 percent sulfur) per year.

The quantities at each location are subject to variation with changes in demand, but estimated gas usage and resulting oil displacement volumes are listed below:

ERA Docket No. 83-CERT-	Location	Estimated volume (Mcf) per year	Estimated oil displacement (gallons) per year)			
			No. 6	Percent sulfur content	No. 2	Percent sulfur content
-035 (BOLLMAN)	Adamstown Plant, Adamstown, PA	109,500	730,000	2.3		
-036 (HOWMET)	Lancaster Plant, Lancaster, PA	108,000,000			7,847,500	0.035

For each application noted above, the eligible seller is Exxon USA, P.O. Box 2180, Houston, Texas 77001. The gas will be transported by Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314; and UGI Corporation (Gas Utility Division), 225 Morgantown Road, Reading, Pennsylvania 19611, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning any of these applications to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of any of these applications may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to the Applicant and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C. on May 13, 1983

Kaufman's Bakery, Inc., Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Kaufman's Bakery, Inc. (Kaufman's Bakery), 2381 Fillmore Avenue, Buffalo, New York 14214, filed an application on May 10, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its facility in Buffalo, New York pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, S.W. Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Kaufman's Bakery indicates that the volume of natural gas for which it requests certification is approximately 280 Mcf per day. This volume is estimated to displace the use of approximately 1,850 gallons of No. 6 fuel oil (1.0 percent sulfur) per day.

The eligible seller is U.S. Energy Development Corporation, Statler Building, Buffalo, New York 14202. The gas will be transported by National Fuel Gas Supply Corporation, 308 Seneca Street, Oil City, Pennsylvania 16301; and by National Fuel Gas Distribution Corporation, 10 Lafayette Square, Buffalo, New York 14203, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG-43, Room GA-007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paula A. Daigneault, withing ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to Kaufman's Bakery and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on May 23, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[ERA Docket No. 83-CERT-028 et al.]

Milliken & Co., et al.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

In the matter of Milliken & Company [ERA Docket No. 83-CERT-028]; Fiber Industries, Incorporated [ERA Docket No. 83-CERT-029]; Celanese Fibers Company [ERA Docket No. 83-CERT-030]; Hoechst Fibers Industries [ERA Docket No. 83-CERT-031]; W. R. Grace & Company [ERA Docket No. 83-CERT-032]; North Carolina Baptist Hospitals, Incorporated [ERA Docket No. 83-CERT-033].

On April 25, 1983, and as amended on May 3, 1983, Milliken & Company (Milliken), P.O. Box 1926, Spartanburg, South Carolina 29304; Fiber Industries, Incorporated (Fiber), P.O. Box 32414, Charlotte, North Carolina 28232; Celanese Fibers Company, Division of Celanese Corporation (Celanese), P.O.

Box 32414, Charlotte, North Carolina 28232; Hoechst Fibers Industries, Division of American Hoechst Corporation (Hoechst), P.O. Box 5887, Spartanburg, South Carolina 29304; Cryovac Division of W. R. Grace & Company (Cryovac), P.O. Box 338, Simpsonville, South Carolina 29681; and North Carolina Baptist Hospitals, Incorporated (NCBH), 300 South Hawthorne Road, Winston-Salem, North Carolina 27103, filed with the Administrator of the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at one hospital, one technical center, and nine manufacturing facilities in North Carolina and South Carolina, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the applications on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In their applications, the applicants indicate the total volume of natural gas for the eleven North Carolina and South Carolina facilities for which they request certification is approximately 6,254,640 Mcf per year. This volume is estimated to displace the use of approximately 42,738,510 gallons of No. 6 fuel oil (1.5–2.8 percent sulfur) per year.

The quantities at each location are subject to variation with changes in demand, but estimated gas usage and resulting oil displacement volumes are listed below:

ERA Docket No. 83–CERT	Location	Estimated volume (Mcf) per year	Estimated oil (No. 6) displacement (gallons) per year	Percent sulfur content
–028 (milliken)	1. Gayley Mill, Marietta, SC	155,855	1,070,204	2.5
	2. Enterprise Plant, Marietta, SC	129,210	887,242	2.8
	3. Crestex Plant, Spartanburg, SC	50,940	350,956	2.8
	4. Dewey Plant, Inman, SC	78,475	538,851	2.8
–029 (Fiber)	1. Greenville Facility, Greenville, SC	377,775	2,594,053	2.8
	2. Salisbury Facility, Salisbury, NC	2,232,705	15,121,224	2.1
	3. Shelby Facility, Shelby, NC	425,225	2,919,678	2.1

–031 (Hoechst)	1.Spartanburg Facility, Spartanburg, SC	2,372,500	16,291,167	2.8
–032 (Cryovac)	1. Cryovac-Simpsonville Plant, Simpsonville, SC	106,215	729,343	1.5
–033 (NCBH)	1. N.C. Baptist Hospital, Winston-Salem, NC	243,090	1,669,216	2.1
Total		6,254,640	42,738,510	

For each application noted above, the eligible seller is Oklahoma Natural Gas Company, P.O. Box 871, Tulsa, Oklahoma 74102. The gas will be transported by Transcontinental Gas Pipeline Corporation, P.O. Box 1396, Houston, Texas 77251; Northern Natural Gas Company, 2223 Dodge Street, Omaha, Nebraska 68102; and Piedmont Natural Gas Company, Inc., P.O. Box 33068, Charlotte, North Carolina 28233, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning any of these applications to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue., SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register**.

An opportunity to make an oral presentation of data, views, and arguments either against or in support of any of these applications may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to the Applicant and any person filing comments and will be published in the **Federal Register**.

[ERA Docket No. 83–CERT–048]

Nevamar Corp.; Application for Certification of the Use of Natural Gas to Displace Fuel Oil

Nevamar Corporation (NEVAMAR), 8339 Telegraph Road, Odenton, Maryland 21113, filed an application on May 2, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its facility in Odenton, Maryland, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). The application was amended on May 12, 1983, to add a second eligible seller; the volumes remain the same. More detailed information is contained in the application of file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, NEVAMAR indicates that the volume of natural gas for which it requests certification is approximately 375,000 Mcf per year. This volume is estimated to displace the use of approximately 64,000 barrels of No. 2 fuel oil (0.3 percent sulfur) per year.

The eligible sellers are Exxon Company, USA, P.O. Box 2180, Houston, Texas 77001; and Victory Development, 114 Wilmar Drive, Pittsburgh, Pennsylvania 15238. The gas will be transported by Columbia Gas Transmission Corporation, P.O. Box 1273, Charleston, West Virginia 25325; and by Baltimore Gas and Electric Company, P.O. Box 1475, Baltimore, Maryland 21203, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any

person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that any oral presentation is necessary, further notice will be given to NEVAMAR and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C. on May 23, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

TAM Ceramics Inc.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

TAM Ceramics Incorporated (TAM), P.O. Box C, Bridge Station, Niagara Falls, New York 14305, filed an application on May 3, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its facility in Niagara Falls, New York, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). The application was amended on May 11, 1983, to request expedited handling. More detailed information is contained in the application on file and available for public inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, TAM indicates that the volume of natural gas for which it requests certification is approximately 567 Mcf per day. This volume is estimated to displace the use of approximately 4,079 gallons of No. 2 fuel oil (1.0 percent sulfur) per day.

The eligible seller is Trison Petroleum Corporation, Douglas Energy Ltd., 717 Seventeenth Street (2650), Denver, Colorado 80802. The gas will be transported by National Fuel Gas Supply Corporation, 308 Seneca Street, Oil City, Pennsylvania 16301; and by National Fuel Gas Distribution Corporation, 10 Lafayette Square, Buffalo, New York 14203, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest. The request should include a summary of the proposed oral presentation and a statement as to why an oral presentation is necessary. If ERA determines that an oral presentation is necessary, further notice will be given to TAM and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C. on May 23, 1983.

[ERA Docket No. 83–CERT–046]

Witco Chemical Corp.; Application for Certification of the Use of Natural Gas To Displace Fuel Oil

Witco Chemical Corporation, Kendall/Amalie Division (Witco), 77 N. Kendall Avenue, Bradford, Pennsylvania 16701, filed an application on May 2, 1983, with the Economic Regulatory Administration (ERA) for certification of an eligible use of natural gas to displace fuel oil at its plant in Bradford, Pennsylvania, pursuant to 10 CFR Part 595 (44 FR 47920, August 16, 1979). More detailed information is contained in the application on file and available for pubic inspection at the ERA Natural Gas Division Docket Room, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, from 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

In its application, Witco indicates that the volume of natural gas for which it requests certification is approximately 1,000 Mcf per day during an initial 90-day period, and 1,500 Mcf per day during the nine-month period immediately thereafter. This volume is estimated to displace the use of approximately 9,900 gallons of low pour No. 6 fuel oil (1.0 percent sulfur) per day.

The eligible seller is Witco Chemical Corporation, Oil & Gas Division, 77 N. Kendall Avenue, Bradford, Pennsylvania 16701. The gas will be transported by National Fuel Gas Supply Corporation, 308 Seneca St., Oil City, Pennsylvania 16301; and by National Fuel Gas Distribution Corporation, 10 Lafayette Square, Buffalo, New York 14203, a local distribution company.

In order to provide the public with as much opportunity to participate in this proceeding as is practicable under the circumstances, we are inviting any person wishing to comment concerning this application to submit comments in writing to the Economic Regulatory Administration, Office of Fuels Programs, Natural Gas Division, RG–43, Room GA–007, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Attention: Paula A. Daigneault, within ten (10) calendar days of the date of publication of this notice in the **Federal Register.**

An opportunity to make an oral presentation of data, views, and arguments either against or in support of this application may be requested by any interested person in writing within the ten (10) day comment period. The request should state the person's interest and, if appropriate, why the person is a proper representative of a group or class of persons that has such an interest.

If ERA determines that an oral presentation is necessary, further notice will be given to Witco and any person filing comments and will be published in the **Federal Register.**

Issued in Washington, D.C., on May 23, 1983.

James W. Workman,

Director, Office of Fuels Programs, Economic Regulatory Administration.

Federal Energy Regulatory Commission

[Docket No. ES82-69-001]

Interstate Power Co.; Amended Application

May 18, 1983.

Take notice that on May 9, 1983, Interstate Power Company (Applicant) filed an amendment to its application in Docket No. ES82-69-000 with the Federal Energy Regulatory Commission. Applicant seeks authority to increase its short-term borrowings from $40 million to $50 million outstanding consisting of promissory notes and/or commercial paper to be issued on or before December 31, 1983, and to mature not later than December 31, 1984.

Any person desiring to be heard or to make any protest with reference to such application, as amended, should, on or before May 31, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). The application, as amended, is on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

[Project Nos. 7126-000, et al.]

Hydroelectric Applications (HY-TECH Company, et al.; Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1a. Type of Application: Preliminary Permit.

b. Project No.: 7126-000.

c. Date Filed: March 7, 1983.

d. Applicant: HY-TECH Company.

e. Name of Project: South Piney Creek.

f. Location: South Piney Creek, Johnson and Sheridan Counties, Wyoming.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Carl W. Haywood, 2109 Broadview Drive, Lewiston, Idaho 83501.

i. Comment Date: July 11, 1983.

j. Description of Project: The proposed project would consist of: (1) a proposed concrete diversion structure, 10 feet high and 60 feet long; (2) a proposed penstock, approximately 12,000 feet long; (3) a proposed powerhouse containing 3 generating units with a total installed capacity of 9,600 kW; (4) and (5) appurtenant facilities. Applicant estimates the annual power production to be 19.2 GWh.

k. Purpose of Project: Applicant states that the project power will be sold to Montana—Dakota Utility Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

2a. Type of Application: Preliminary Permit.

b. Project No.: 7183-000.

c. Date Filed: March 30, 1983.

d. Applicant: HY-TECH Company.

e. Name of Project: South Tongue River.

f. Location: South Tongue River, Sheridan County, Wyoming.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Carl W. Haywood, 2109 Broadview Drive, Lewiston, Idaho 83501.

i. Comment Date: July 11, 1983.

j. Description of Project: The proposed project would consist of: (1) a proposed reinforced concrete diversion structure, approximately 6 feet high and 100 feet long; (2) a proposed 60-inch diameter, 8,000 feet long penstock; (3) a proposed powerhouse with a 4.3 MW generating unit; (4) a proposed 6 miles long transmission line to connect with the existing power grid; and (5) appurtenant facilities. Applicant estimates the total annual power production to be 10.5 GWh.

k. Purpose of Project: Applicant proposes to sell the project power to Montana—Dakota Utility Company or to Pacific Power and Light Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

3a. Type of Application: License (Over 5 MW).

b. Project No.: 2924-002

c. Date Filed: February 27, 1982.

d. Applicant: The Electric Plant Board of the City of Glasgow.

e. Name of Project: Rough River Reservoir Dam Project.

f. Location: On the Rought River in Breckinridge and Grayson Counties, Kentucky.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. William M. Lewis, Jr., W. M. Lewis and Associates, Inc., P.O. Box 1383, Portsmouth, Ohio 45667.

i. Comment Date: July 11, 1983.

j. Description of Project: The proposed project would utilize the U.S. Army Corps of Engineers' Rough River Reservoir Dam. Project No. 2924 would consist of: (1) a proposed intake structure; (2) a proposed tunnel and penstock, approximately 750 feet long; (3) a proposed turbine house located to the left and downstream of the existing dam, with 4 generating units for a total capacity of 5.5 MW; (4) a discharge channel leading from the turbine house to the Rough River; (5) a proposed 5-mile long transmission line; and (6) appurtenant facilities.

k. The notice also consists of the following standard paragraphs: A2, B, C, and D1.

4a. Type of Application: Preliminary Permit.

b. Project No.: 7127-000.

c. Date Filed: March 8, 1983.

d. Applicant: STS Consultants, Ltd.

e. Name of Project: Trowbridge Dam.

f. Location: Kalamazoo River, Allegan County, Michigan.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(A)-825(r).

h. Contact Person: Mr. Mark J. Sundquist, STS Consultants, Ltd., 3001 S. State Street, Ann Arbor, Michigan 48104.

i. Comment Date: July 11, 1983.

j. Description of Project: The proposed project would consist of: (1) the existing Trowbridge Dam, and earthfill structure about 180 feet long and 35 feet high, and owned by the Michigan Department of Natural Resources; (2) and existing powerhouse structure to be refurbished and fitted with new electrical and hydro-turbine equipment, with a total

installed capacity of 2,100 kW; (3) a proposed one mile long transmission line to connect with the existing power grid; and (4) appurtenant facilities. Applicant estimates the average annual energy production to be 11.0 GWh.

k. Purpose of Project: Applicant proposes to sell the power generated to Consumers Power Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

5a. Type of Application: Case—specific exemption from licensing for hydroelectric power projects of 5 MW or less capacity.

b. Project No: 6638–001.

c. Date Filed: February 1, 1983.

d. Applicant: Elba Hydroelectric Company, Inc.

e. Name of Project: Elba Hydroelectric Project.

f. Location: Pea River in Coffee County, Alabama.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 2705, and 2708 *as amended.*

h. Contact Person: Mr. William M. Towns, Route #3, Box 10, Oneonta, Alabama 35121.

i. Comment Date: June 20, 1983.

j. Description of Project: The project will consist of: (1) the existing 400-foot-long Elba Dam, which has an overall height of 29 feet including the four-foot-high flashboards; (2) a six-foot-high, 200-foot-long auxiliary spillway; (3) a 95-acre reservoir at normal surface elevation of 168 feet msl; (4) an existing powerhouse which will contain three generating units with a combined installed capacity of 1.8 MW; (5) a proposed 100-foot-long transmission line; and (6) appurtenant facilities. The Applicant estimates the average annual energy generation to be 7,779 MWh.

k. This notice also consists of the following standard paragraphs: A1, B, C, and D3a.

6a. Type of Application: Minor License.

b. Project No.: 6614–000.

c. Date Filed: August 18, 1982.

d. Applicant: El Dorado Irrigation District.

e. Name of Project: Pleasant Oak Main Reservoir B Hydroelectric Project.

f. Location: On Pleasant Oak Main, near Placerville, in El Dorado County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. A. A. Lind, District Engineer, El Dorado Irrigation District, P.O. Box 1608, Placerville, California 95667.

i. Comment Date: July 11, 1983.

j. Description of Project: The proposed project would be located on Bureau of Reclamation's (BOR) Pleasant Oak Main pipeline which gets its water from the BOR's Sly Park Dam and would consist of: (1) a 30-inch-diameter, 500-foot-long steel penstock; (2) a powerhouse containing one generating unit with a rated capacity of 250 kW; (3) a 40-inch-diameter tailrace conduit; and (4) a 1-mile-long, 12.5-kV transmission line to connect to an existing Pacific Gas and Electric Company (PG&E) line. The Applicant estimates that the project would produce about 1 million kWh average annual energy. The project energy would be offered for sale to the PG&E or other entities. The total cost of project is $920,000.

k. This notice also consists of the following standard paragraphs: A2, B, C, D1.

7a. Type of Application: Preliminary Permit.

b. Project No.: 7177–000.

c. Date Filed: March 28, 1983.

d. Applicant: Southern Hydro Systems.

e. Name of Project: Henrietta Hydroelectric Project.

f. Location: Rutherford County, North Carolina.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. George W. Cooper, III, Route 1, Box 303, Piedmont, South Carolina 29673.

i. Comment Date: July 11, 1983.

j. Description of Project: The proposed project would consist of: (1) an existing reservoir with a surface area of 6 acres and a storage capacity of 30 acre-feet at power pool elevation of 782 feet m.s.l.; (2) an existing stone masonry gravity dam which is 22-feet high and 363-feet long; (3) existing flume and penstocks; (4) an existing powerhouse which would contain two generating units rated at 200 MW and 300 MW, respectively, for a total installed capacity of 500 kW; and (5) appurtenant facilities. The Applicant estimates the average annual energy output to be 3,801,160 kWh.

k. Purpose of Project: The Applicant proposes to sell the power generated at the project to Duke Power Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

8a. Type of Application: 5 MW Exemption.

b. Project No.: 3180–001.

c. Date Filed: April 1, 1983.

d. Applicant: The New Hampshire Water Resources Board and Gregg's Falls Hydroelectric Associates.

e. Name of Project: Gregg's Falls Project.

f. Location: On the Piscataquog River in Hillsborough County, New Hampshire.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Raymond A. Wingert, c/o National Hydro Corporation, 77 Franklin Street, Boston, Massachusetts 02110 and Delbert F. Downing, New Hampshire Water Resources Board, 37 Pleasant Street, Concord, New Hampshire 03301.

i. Comment Date: July 24, 1983.

j. Description of Project: The proposed project would consist of: (1) an existing earthfill and concrete gravity dam 1,360 feet long and 60 feet high; (2) a reservoir (Glenn Lake) with a storage capacity of 3,600 acre-feet; (3) existing intake structures; (4) new fish passage facilities; (5) an existing concrete penstock 31.75 feet long and 10 feet by 17.5 feet oblong shape, transitioning to 7.5 feet diameter circular shape; (6) an existing powerhouse containing 2 turbines and 2 new generators with a total installed capacity of 3,820 kW; (7) a new switchyard; and (8) a new 100-foot-long transmission line. The Applicants propose to raise the concrete spillway crest by one foot with provisions for six-inch flashboards which would raise the normal maximum surface elevation from 272.5 to 273.0 feet NGVD and increase the reservoir's storage capacity to 3,650 acre-feet. Applicants estimate an average annual generation of 8,733,000 kWh.

k. Purpose of Project: Project energy would be sold to the Public Service Company of New Hampshire.

l. This notice also consists of the following standard paragraphs: A1, B, C, D1 and D3a.

m. Purpose of Exemption: An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

9a. Type of Application: Application for License (under 5MW).

b. Project No: 2994–002.

c. Date Filed: March 29, 1983.

d. Applicant: The Borough of Lehighton.

e. Name of Project: Beltzville Project.

f. Location: On the Pohopoco Creek in Carbon County, Pennsylvania.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mortimer L. Smedley, Borough Manager, Borough of Lehighton, P.O. Box 29, Lehighton, Pennsylvania 18235.

i. Comment Date: July 11, 1983.

j. Description of Project: The proposed project would utilize the U.S. Army Corps of Engineers' Beltzville Dam and

Reservoir and would consist of: (1) modification of the outlet works for project purposes; (2) a new 6.5-foot-diameter and 230-foot-long steel penstock; (3) a new powerhouse with two turbine-generator units with a total capacity of 2,150 kw; (4) a switchyard; (5) a 1.7-mile transmission line; and (6) other appurtenances. Applicant estimates an average annual generation of 8,400,000 kWh. This application was filed during the term of Applicant's preliminary permit for Project No. 2994.

k. Purpose of Project: Project energy would be sold to the Pennsylvania Power and Light Company.

l. This notice also consists of the following standard paragraphs: A2, B, C, and D1.

10a. Type of Application: Preliminary Permit.

b. Project No: 7033–000.

c. Date Filed: January 28, 1983, and revised on April 5, 1983.

d. Applicant: Beaver Power Group I, Ltd.

e. Name of Project: Rock Hill Dam Water Power Project.

f. Location: On the Conestoga River, in Lancaster County, near Rockhill, Pennsylvania.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: B. Ryland Wiggs, Esq., 2285 Schoenersville Road, Suite 207, Bethlehem, Pennsylvania 18018.

i. Comment Date: July 11, 1983.

j. Description of Project: The proposed project would consist of: (1) an existing concrete encased, stone filled, timber crib dam, 13 feet high, 315 feet long; (2) a reservoir with an estimated storage capacity of 1.5 acre-feet; (3) a proposed rehabilitation of an existing forebay structure; (4) a proposed re-building of a demolished powerhouse to accommodate the housing of one tubular turbine/generator rated at 400 kW; (5) a proposed tailrace approximately 400 feet long by 40 feet wide; (6) a proposed 7000-volt transmission line approximately 200 feet in length; and (7) appurtenant facilities. Applicant estimates that the average annual energy generation would be 2,102,000 kWh.

k. Purpose of Project: The Applicant anticipates that power will be sold to the Pennsylvania Power and Light Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 36 months, during which time the Applicant would perform studies to determine the technical, economic and environmental feasibility of the project, and, if feasible would prepare an application for FERC license. Applicant estimates the cost of studies under the permit would be $150,000.

11a. Type of Application: License (Over 5 MW).

b. Project No: 3348–002.

c. Date Filed: January 21, 1983.

d. Applicant: The City of Covington, Virginia.

e. Name of Project: Gathright Dam Project.

f. Location: On the Jackson River in Alleghany County, Virginia.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. James L. Jamison, city of Covington, 158 North Court Avenue, Covington 24426.

i. Comment Date: July 11, 1983.

j. Description of Project: The proposed project would utilize the U.S. Army Corps of Engineers' Gathright Dam and would consist of: (1) a 1,500-foot-long penstock; (2) a powerhouse containing a generating unit having a total rated capacity of 6 MW; (3) 2.75-mile-long transmission line; and (4) appurtenant facilities. The Applicant estimates the average annual energy generation to be approximately 32.4 GWh.

k. This notice also consists of the following standard paragraphs: A2, B, C, and D1.

12a. Type of Application: License (5 MW or Less).

b. Project No: 3307–002.

c. Date Filed: March 30, 1983.

d. Applicant: Hydro Corporation of Pennsylvania.

e. Name of Project: Tionesta Lake Project.

f. Location: Tionesta Creek in Forest County, Pennsylvania.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Bruce Bennett, P.E., National Hydro Corporation, 77 Franklin Street, 9th Floor, Boston, Massachusetts 02110.

i. Comment Date: July 8, 1983.

j. Description of Project: The proposed project would utilize the existing U.S. Army Corps of Engineers Tionesta Lake Dam and Reservoir, and would consist of: (1) an existing 143-foot-high intake tower; (2) modifying an existing 1,875-foot-long, 19-foot-diameter, concrete outlet tunnel by grouting a 1,700-foot-long section and installing a 125-foot-long steel liner in the downsteam end; (3) a proposed 40-foot-long, 12-foot-diameter steel penstock; (4) a proposed 74-foot by 38-foot concrete powerhouse containing one generator unit with an installed capacity of 5.0 MW; (5) a proposed 90-foot-long, 24-foot-wide tailrace channel; (6) an existing stilling basin; (7) a proposed 1-mile-long, 34.5-kV transmission line; and (8) appurtenant facilities. The estimated average annual generation would be 16,300 MWh. This license application was filed during the term of the Applicant's Preliminary Permit for Project No. 3307.

k. Purpose of Project: Project energy would be sold to Pennsylvania Electric Company.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1.

13a. Type of Application: Major License (5 MW or Less).

b. Project No: 3359–003.

c. Dated Filed: January 28, 1983.

d. Applicant: Continental Hydro Corporation.

e. Name of Project: Berlin Lake.

f. Location: Mahoning River in Portage and Mahoning Counties, Ohio.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Bruce A. Bennett, National Hydro Corporation, 77 Franklin Street, 9th Floor, Boston, Massachusetts 02110.

i. Comment Date: July 18, 1983.

j. Description of Project: The proposed project would utilize the existing U.S. Army Corps of Engineers' Berlin Dam and Reservoir, and would consist of: (1) modifications to the existing sluice opening; (2) a proposed 78-foot-high reinforced concrete intake tower; (3) a proposed 300-foot-long, 54 to 78-inch diameter steel penstock; (4) a proposed 28-foot by 51-foot powerhouse containing one generator unit with an installed capacity of 1.5 MW; (5) a proposed 25-foot-long tailrace; (6) a proposed 4.16/69-kV transformer; (7) a proposed 450-foot-long, 69-kV transmission line; and (8) appurtenant facilities. The estimated average annual generation would be 5,850 MWh. This license application was filed during the term of the Applicant's Preliminary Permit for Project 3359.

k. Purpose of Project: Project energy would be sold to Ohio Edison Company or America Municipal Power—Ohio.

l. This notice also consists of the following standard paragraphs: A2, B, C and D1.

14a. Type of Application: Minor License.

b. Project No: 6157–003

c. Date Filed: April 7, 1983.

d. Applicant: Hydro-Ventures & Glen Thomason.

e. Name of Project: Hagerman Hatchery.

f. Location: Gooding County, Idaho; Riley Creek.

g. Filed Pursuant to: Federal Power Act, U.S.C 791(a)–825(r).

h. Contact Person: Glenn Thomas, 2141 Quince #25, Forest Grove, Oregon 97116.

i. Comment Date: July 18, 1983.

j. Description of Project: The proposed project would consist of: (1) a 36-inch-diameter, 50-foot-long bypass to be installed in an existing 36-inch-diameter water supply pipe in the Hagerman National Fish Hatchery of the U.S. Fish and Wildlife Service, conveying water to the powerhouse; (2) a powerhouse with a total installed capacity of 118-kW; (3) a 36-inch-diameter, 50-foot-long outlet pipe carrying water back into the existing water supply pipe of the Hagerman Hatchery; (4) a 0.5-mile long transmission line connecting with an existing Idaho Power Company transmission line.

k. Purpose of Project: The estimated annual output of 0.982 million kWh generated by the proposed project would be sold to the Idaho Power Company.

l. This notice also consists of the following standard paragraphs: A2, B, C, D1.

15a. Type of Application: License (5 MW or Less).

b. Project No.: 6368–000.

c. Date Filed: May 25, 1982.

d. Applicant: Climax Manufacturing Company.

e. Name of Project: Carthage Paper Makers Mill

f. Location: Black River in Jefferson County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)—825(r).

h. Contact Person: Mr. Lee Hirschey, President, Climax Manufacturing Company, Carthage, New York 13619.

i. Comment Date: June 27, 1983.

j. Competing Application:

Project No.:	*Date Filed:*
4906–001	12–16–81
5000–000	12–21–81
4636–001	1–04–82
5023–000	1–28–82
6094–000	9–21–82
6095–000	9–21–82

k. Description of Project: The proposed run-of-river project would increase the capacity of the existing, operating project and would consist of: (1) the existing 829-foot-long, 2 to 8-foot-high, Carthage State Dam, owned by the State of New York; (2) an existing 690-acre reservoir at an elevation of 726 feet M.S.L.; (3) an existing 500-foot-long intake channel; (4) an existing 20-foot by 30-foot powerhouse; (5) a proposed 30-foot by 80-foot powerhouse to be constructed adjacent to the existing powerhouse; (6) the addition of a single 1,800-kW generating unit to the existing 800 kW unit, providing a total installed capacity of 2,600 kW; (7) an existing 700-foot-long, 23-kV transmission line; (8) a proposed 600-foot-long transmission line; (9) a proposed step-up transformer; and (10) appurtenant facilities. The existing project facilities are owned by Carthage Paper Makers, Inc., a division of Climax Manufacturing Co.

l. Purpose of Project: Project energy would be generated for use by the Carthage Paper Makers Mill and any excess power would be sold to Niagara Mohawk Power Corporation.

m. This notice also consists of the following standard paragraphs: A3, B, C, and D1.

16a. Type of Application: Major License (Under 5 MW).

b. Project No.: 6780–000.

c. Date Filed: October 19, 1982.

d. Applicant: Enviro Hydro Incorporated.

e. Name of Project: Deadwood Creek Project.

f. Location: On Deadwood Creek, tributary of the North Yuba River, near Marysville, in Yuba County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. H. L. Childers, Enviro Hydro Incorporated, 9200 Shanley Lane, Auburn, California 95603.

i. Comment Date: July 18, 1983.

j. Description of Project: The proposed run-of-river project would consist of: (1) a 3-foot-high, 60-foot-wide diversion structure located on Deadwood Creek one mile upstream from its confluence with the North Yuba River; (2) a 42-inch diameter, 4,700-foot-long steel pipeline; (3) a 42-inch-diameter, 1,500-foot-long steel penstock; (4) a powerhouse containing a single turbine-generator unit with an installed capacity of 3.0 MW and an average annual generation of 10.5 GWh; (5) a 10-foot-wide, 50-foot-long open channel tailrace; (6) 2.5 miles of primary transmission line; and (7) appurtenant facilities. Project power would be sold to Pacific Gas and Electric Company. The project would affect 9.0 acres of Plumas National Forest lands.

k. This notice also consists of the following standard paragraphs: A2, B, C, D1

17a. Type of Application: Preliminary Permit.

b. Project No: 7071–000.

c. Date Filed: February 10, 1983, revised on April 5, 1983.

d. Applicant: Beaver Power Group III, Ltd.

e. Name of Project: Pocono Lake Dam.

f. Location: On Tobyhanna Creek, in Monroe County, near Blakeslee, Pennsylvania.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: B. Ryland Wiggs, Esquire, Suite 207, 2285 Schoenersville Road, Bethlehem, Pennsylvania 18018.

i. Comment Date: July 15, 1983.

j. Description of Project: The proposed project would consist of: (1) an existing ogee concrete and zoned earth dam, 580 feet long and having a maximum height of 47 feet; (2) a reservoir with an estimated storage capacity of 5,400 acre-feet, and normal water surface elevation of 1633.5 M.S.L.; (3) a proposed siphon intake structure; (4) a proposed 5-foot diameter steel penstock, approximately 200 feet long; (5) a proposed powerhouse housing one tubular turbine/generator rated at 375 kW; (6) a proposed tailrace channel approximately 100 feet long by 20 feet wide; (7) a proposed switchyard and 13,000-volt transmission line approximately 300 feet in length; and (8) appurtenant facilities. Applicant estimates that the average annual energy generation would be 1,971,000 kWh.

k. Purpose of Project: The Applicant anticipates that power will be sold to Metropolitan Edison Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a perliminary permit for a period of 36 months during which time it would prepare studies of the hydraulic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of the studies, Applicant would prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be $150,000.

18a. Type of Application: Preliminary Permit.

b. Project No: 7078–000.

c. Date Filed: February 14, 1983.

d. Applicant: Fluid Energy System, Inc.

e. Name of Project: West Walker River Hydroelectric Power.

f. Location: On the West Walker River in Mono County, California, within the Toiyabe National Forest Due Date: June 6, 1983.

g. Filed Pursuant to: Federal Power Act, (16 U.S.C. 791(a)–825(r)).

h. Contact Person: Mr. K. Thomas Miller, Fluid Energy Systems, Inc., 2210 Wilshire Blvd., #699, Santa Monica, California 90403.

i. Comment Date: June 27, 1983.

j. Competing Application: Project No. 7081–000. Date Filed: 2/14/83. Public Notice issued: April 5, 1983. Due Date: June 6, 1983.

k. Description of Project: The proposed West Walker River Hydroelectric Project (WWR) would consist of three developments.

WWR–I would consist of: (1) a 40-foot-high diversion structure with crest elevation 7120 feet; (2) a 5-foot-diameter, 5,000-foot-long pipeline/penstock; (3) a powerhouse at elevation 6,760 feet containing a turbine generator with a rated capacity of 6,480 kW and an average annual output of 39.4 GWh; and (4) a 7,000-foot-long transmission line.

WWR–II would consist of: (1) a 40-foot-high diversion structure with crest elevation 6740 feet; (2) a 5-foot-diameter, 10,000-foot-long pipeline/penstock; (3) a powerhouse at elevation 6,650 feet containing two identical turbine generators with a total rated capacity of 1,940 kW and an average annual output of 11.89 GWh; and (4) a 9,000-foot-long transmission line.

WWR–III would consist of: (1) a 80-foot-high diversion structure with crest elevation 6,640 feet; (2) a 6 to 8-foot-diameter, 26,000-foot-long pipeline/penstock; (3) a powerhouse at elevation 6,020 feet containing four turbine generators with a total rated capacity of 14,300 kW and an average annual output of 87.69 GWh; and (4) a 100-foot-long transmission line.

The earth fill and concrete diversion structures would impound forebays with surface areas of 3.5, 83 and 69 acres, respectively. Transmission lines would connect to Southern California Edison Company lines.

A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a 36-month preliminary permit to conduct engineering, economic and environmental studies to ascertain project feasibility and to support an application for a license to construct and operate the project. Those studies would include core borings and test pits at the dam sites, penstock routes and powerhouse sites. The Applicant has stated that new access roads are not necessary and that all disturbed lands would be restored. The estimated cost of the above activities is $350,000.

l. This notice also consists of the following standard paragraphs: A3, B, C and D2.

19a. Type of Application: Preliminary Permit.

b. Project No.: 7122–000.

c. Date Filed: March 4, 1983.

d. Applicant: City of Las Cruces.

e. Name of Project: Caballo Project.

f. Location: On Rio Grande in Truth or Consequences Township, Sierra County, New Mexico.

g. Filed Pursuant to: 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Dana Miller, P.O. Drawer CLC, Las Cruces, New Mexico 88004.

i. Comment Date: July 15, 1983.

j. Description of Project: The proposed project would utilize the existing Bureau of Reclamation's Caballo Dam and would consist of: (1) the outlet works gate chamber; (2) a new 200-foot-long 12-foot-diameter steel liner within the existing 400-foot-long 14-foot-diameter outlet tunnel; (3) a new bifurcation, gates, and gate control house at the existing tunnel outlet portal; (4) a new 50-foot-long 11.5-foot-diameter buried penstock; (5) a new powerhouse containing two generating units having a total rated capacity of 5,596-kW; (6) a new tailrace; (7) a new switchyard; (8) two, one-mile-long 115-kV transmission lines; and (9) appurtenances.

k. Purpose of Project: Applicant intends to consume the energy produced. Applicant estimates that the average energy output would be 18.4 GWh.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

m. Proposed Scope and Cost of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 18 months, during which time it would perform studies and would prepare an application for an FERC license. Applicant estimates the cost of the work under the permit would be $60,000.

20a. Type of Application: Exemption from licensing (5 MW or less).

c. Date Filed: April 1, 1983.

d. Applicant: City of Santa Monica, California.

e. Name of Project: Santa Monica Municipal Hydroelectric Facility Project.

f. Location: On an existing feeder line within the Santa Monica Arcadia Water Softening Plant, in Los Angeles County, California.

g. Filed Pursuant to: Section 30 of the Federal Power Act [16 U.S.C. 823(a)].

h. Contact Person: Mr. Stanley E. Scholl, Director of General Services, 1685 Main Street, Santa Monica, California 90401.

i. Comment Date: June 27, 1983.

j. Description of Project: The proposed project, to be located on the existing 24-inch Sepulveda Feeder Line, would consist of a powerhouse to contain two generating units with a total rated capacity of 150 kW producing approximately 800,000 kWh annually under a head of 203 feet; and appurtenant facilities.

k. This notice also consists of the following standard paragraphs: B, C, and D3b.

23a. Type of Application: Preliminary Permit.

b. Project No: P–7198–000.

c. Date Filed: April 7, 1983.

d. Applicant: Balance One Incorporated.

e. Name of Project: Cordingly Dam.

f. Location: The Charles River in Middlesex and Norfolk County, Massachusetts.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Allen Benjamin, 99 Concord Road, Wayland, Massachusetts 01778.

i. Comment Date: July 14, 1983.

j. Description of Project: The proposed project would consist of: (1) the existing 16-foot-high, 120-foot-long, Metropolitan District Commission's Cordingly Dam; (2) a proposed 200-foot-long concrete penstock; (3) a proposed powerhouse containing one or more generating units having a total rated capacity of 400 kW; (4) an existing transmission line with a proposed interconnecting line 200 feet long; and (5) appurtenant facilities. The Applicant estimates that the average annual energy output would be 1,540 MWh.

k. Purpose of Project: The most likely market for the energy derived at the proposed project would be the Metropolitan District Commission, The Boston Edison Company, or nearby industrial establishments.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 18 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $51,500.

24a. Type of Application: Preliminary Permit.

b. Project No: 7204–000.

c. Date Filed: April 7, 1983.

d. Applicant: Cascade Area Council, Inc.

e. Name of Project: Neal Creek.

f. Location: On Neal Creek, near Jordan, in Linn County, Oregon.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. William J. Claussen, Cascade Area Council, Inc., Boy Scouts of America, 4392 Liberty Road South, Salem, Oregon 97302.

i. Comment Date: July 18, 1983.

k. Description of Project: The proposed run-of-river project would consist of: (1) a 4-foot-high, 40-foot-wide concrete diversion structure at elevation 1420 feet; (2) a 3,900-foot-long, 24-inch-diameter pipeline; (3) a 450-foot-long, 12-inch-diameter penstock; (4) a powerhouse containing a single turbine-generator with an installed capacity of 300 kW and an average annual generation of 1,568 MWh; and (5) appurtenant facilities. Project power would be sold to a private or public utility. A preliminary permit, if issued, does not authorize construction. The Applicant seeks a 36-month permit to study the feasibility of constructing and operating the project and estimates the cost of the studies at $15,000–25,000.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

25a. Type of Application: Preliminary Permit.

b. Project No: 7206–000.

c. Date Filed: April 8, 1983.

d. Applicant: Tygh Valley Associates.

e. Name of Project: Tygh Valley Power Project.

f. Location: On White River, in Wasco County, in Tygh Valley, Oregon.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Tom Forbes, P.O. Box 421, Mercer Island, Washington 98040 and Mr. Joel Rector, Attorney at Law, 4832 Colony Circle, Salt Lake City, Utah 84117.

i. Comment Date: July 14, 1983.

j. Description of Project: The proposed project would consist of: (1) an existing 8-foot-high by 226-foot-long concrete dam with spillway elevation at 1018.5-feet msl creating a pondage of approximately 8-acre-feet; (2) an existing 5-foot-diameter, 600-foot-long low pressure pipeline; (3) an existing settling basin with pool elevation at 1017 feet msl; (4) an existing 5-foot-diameter, 480-foot-long penstock (to be renovated); (5) an existing powerhouse to contain 3 new Francis-type, turbine-generating units with a total rated capacity of 5,625 kW, producing 24.3 million kWh of energy annually under a head of 144 feet; and (6) a 0.75-mile-long transmission line to be constructed between the powerhouse and an existing Pacific Power & Light Company transmission line. The proposed project would utilize and renovate the former Pacific Power & Light Company's unlicensed project which was deeded to the State of Oregon.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks a 36-month permit to study the feasibility of constructing and operating the project. Applicant estimates that the feasibility studies conducted under the permit would cost $125,000.

k. Purpose of Project: The Applicant proposes to sell the project power to the Pacific Power & Light Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

26a. Type of Application: Preliminary Permit.

b. Project No: 7210–000.

c. Date Filed: April 11, 1983.

d. Applicant: WP, Incorporated.

e. Name of Project: Boundary Creek Project.

f. Location: On Boundary Creek, near Bonners Ferry, in Boundary County, Idaho.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Gary W. Tripp, WP, Incorporated, 821 East Thomas Street, Seattle, Washington 98102.

i. Comment Date: July 15, 1983.

j. Description of Project: The proposed run-of-river project would consist of: (1) a 10-foot-high, 25-foot-wide concrete diversion structure located on Boundary Creek 8.5 miles upstream from its confluence with the Kootenai River; (2) a 25,000-foot-long, 6-foot-diameter pipeline; (3) an 8,300-foot-long, 63-inch-diameter penstock; (4) a powerhouse containing two turbine-generator units with a total installed capacity of 25,660 kW and an average annual generation of 73,720 GWh; and (5) appurtenant facilities. Project power would be sold to a private or public utility. The project would affect 1,020 acres of Kaniksu National Forest lands.

A preliminary permit, if issued, does not authorize construction. The Applicant seeks a 36-month permit to study the feasibility of constructing and operating the project and estimates the cost of the studies at $100,000–200,000.

k. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

27a. Type of Application: Preliminary Permit.

b. Project No: 7220–000.

c. Date Filed: April 12, 1983.

d. Applicant: Muskingum River Hydro Associates.

e. Name of Project: Ellis Lock and Dam No. 11.

f. Location: On the Muskingum River in Muskingum County, Ohio.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. Sections 791(a)–825(r).

(h) Contact Person: Mr. Wayne L. Rogers, President, Synergics, Inc., 1444 Foxwood Court, Annapolis, Maryland 21401.

i. Comment Date: July 14, 1983.

j. Description of Project: The proposed project would consist of: (1) the existing Ellis Lock and Dam No. 11 owned by the Ohio Department of Natural Resources; (2) a new powerhouse containing two generating units having a total rated capacity between 4.5 and 5.0 MW; (3) and existing 138-kV transmission line owned by the American Electric Power Company; and (4) appurtenant facilities. The Applicant estimates that the average annual energy output would be from 27 to 30 GWh.

k. Purpose of Project: The most likely market for the energy derived at the proposed project would be the American Electric Power Company.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit is 24 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on results of these studies Applicant would decide whether to proceed with more detailed studies, and the preparation of an application for license to construct and operate the project. Applicant estimates that the cost of the work to be performed under the preliminary permit would be $36,000.

28a. Type of Application: Preliminary Permit.

b. Project No: 7233–000.

c. Date Filed: April 18, 1983.

d. Applicant: Aero Construction, Inc.

e. Name of Project: Aberdeen Lock and Dam.

f. Location: On the Tombigbee River, in Monroe County, Mississippi.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. Sections 791(a)–825(r).

h. Contact Person: Ralph L. Laukhuff, Jr., Forte and Tablada, Inc., P.O. Box 64844, Baton Rouge, Louisiana 70896.

i. Comment Date: July 18, 1983.

j. Description of Project: The proposed project would utilize the existing Army Corps of the Engineers' Aberdeen Lock and Dam, presently under construction, and would consist of: (1) a proposed powerhouse with an installed generating capacity of 4 MW; and (2) appurtenant facilities. The Applicant estimates the average annual energy generation to be 14.5 GWh.

k. Purpose of Project: Aero Construction, Inc. plans to market the hydroelectric power to Monroe County Electric and/or local municipalities.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

m. *Proposed Scope of Studies under Permit:*—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 24 months. During this time the significant legal, institutional, engineering, environmental, marketing, economic and financial aspects of the project will be defined, investigated, and assessed to support an investment decision. The report of the proposed study will address whether or not a commitment to implementation is warranted, and, if findings are positive, the Applicant intends to submit a license application. The Applicant's estimated total cost for performing these studies is $20,000.

n. *Purpose of Preliminary Permit*—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering, economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

29a. Type of Application: Preliminary Permit.

b. Project No: 7243–000.

c. Date Filed: April 22, 1983.

d. Applicant: Metropolitan District Commission.

e. Name of Project: Circular Dam.

f. Location: Charles River, Cities of Newton, Wellesley and Needham, Suffolk, Norfolk and Middlesex Counties, Massachusetts.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Alfred F. Ferullo, MDC, Director of Environmental Quality, 20 Somerset Street, Boston, Massachusetts 02108.

i. Comment Date: June 27, 1983.

j. Competing Application: Project No. 7053–000 Date Filed: 2/3/83.

k. Description of Project: The proposed project would consist of: (1) an existing 10-foot high, 84-foot long granite block dam; (2) a 0.1 acre reservoir with in stroage capacity at elevation 71.40 feet M.S.L.; (3) a new powerhouse located near the east dam abutment containing turbine-generators with a total rated capacity of 275 kW; (4) a tailrace channel; (5) a 100-foot long transmission line; and (6) appurtenant facilities. The dam is owned by the Applicant. The project would generate up to 1,220,000 kWh annually.

l. Purpose of Project: Energy produced at the project would be sold to Boston Edison Company.

m. This notice also consists of the following standard paragraphs: A3, B, C and D2

30a. Type of Application: Preliminary Permit.

b. Project No: 6946–000.

c. date Filed: December 20, 1982.

d. Applicant: Grand Mesa Water Conservancy District.

e. Name of Project: Grand Mesa.

f. Location: Surface Creek in Delta County, Colorado.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Herschel G. Burgess, President, Grand Mesa Water Conservancy District, Box 129, Cedaredge, Colorado 81413.

i. Comment Date: July 25, 1983.

j. Description of Project: The proposed project consists of two separate developments. Development #1 would consist of: (1) an existing 20-foot-long, 5-foot-high concrete diversion structure owned by the Cedar Mesa Ditch

Company; (2) enlarging a 9,000-foot-long feeder ditch; (3) a proposed 5,500-foot-long feeder ditch leading to; (4) a proposed 10-acre surface area, 100 acre-foot storage capacity forebay reservoir at elevation 8440 feet M.S.L. created by; (5) a proposed 600-foot-long, 65-foot-high, earth/rockfill dam to be owned by the Applicant; (6) a proposed 8,510-foot-long, 36-inch-diameter penstock; (7) a proposed powerplant with an installed capacity of 2.5 MW; (8) a proposed 18,000-foot-long, 12.4–kV transmission line; and (9) appurtenant facilities. Development #2 would consist of: (1) an existing 20-foot-long, 5-foot-high diversion structure owned by Cedar Mesa Ditch Company; (2) a proposed 2,600-foot-long feeder ditch leading to; (3) a proposed 10-acre surface area, 100 acre-foot storage capacity forebay reservoir at elevation 7605 feet M.S.L. created by; (4) a proposed 900-foot-long, 60-foot-high, rock/earthfill dam to be owned by the Applicant; (5) a proposed 6,570-foot-long, 36-inch-diameter penstock; (6) a proposed 4,500-foot-long, 42-inch-diameter penstock; (7) a proposed powerplant with an installed capacity of 1.9 MW; (8) a proposed 16,000-foot-long, 12.4-kV transmission line; and (9) appurtenant facilities. The estimated average annual energy is 28,000 MWh.

k. Purpose of Project: Project energy would be sold to either Delta-Montrose Electrical Association or the City of Delta.

l. This notice also consists of the following standard paragraphs: A4b, A4c, A4d, B, C, and D2.

m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time Applicant would investigate project design alternatives, financial feasibility, environmental effects of project construction and operation, project power potential, and conduct geologic testing. Depending upon the outcome of the studies, the Applicant would decide whether to proceed with an application for FERC license. Applicant estimates that the costs of the studies under permit would be $250,000.

31a. Type of Application: Preliminary Permit.

b. Project No: 7232–000.

c. Date Filed: April 18, 1983.

d. Applicant: Aero Construction, Inc.

e. Name of Project: Columbus Lock and Dam.

f. Location: On the Tombigvee River in Lowndes County, Mississippi.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Ralph L. Laukhuff, Jr., Forte and Tablada, Inc., P.O. Box 64844, Baton Rouge, Louisiana 70896.

i. Comment Date: July 25, 1983

j. Description of Project: The proposed project would utilize the exisitng Army Corps of Engineers' Columbus Lock and Dam and consist of: (1) a proposed powerhouse which will contain an installed generating capacity of 6 MW; and (2) appurtenant facilities. The Applicant estimates the average annual energy generation to be 22 GWh.

k. Purpose of Project: Areo Construction, Inc. plans to market the hydroelectric power to Four Counties Electric Power and/or local municipalities.

l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.

m. *Proposed Scope of Studies under Permit*—A preliminary permit, if issued, does not authorize construction. The Applicant seeks issuance of a preliminary permit for a period of 24 months. During this time the significant legal, institutional, engineering, environmental, marketing, economic and financial aspects of the project will be defined, investigated, and assessed to support an investment decision. The report of the proposed study will address whether or not a commitment to implementation is warranted, and, if findings are positive, the Applicant intends to submit a license application. The Applicant's estimated total cost for performing these studies is $20,000.

n. *Purpose of Preliminary Permit*—A preliminary permit does not authorize construction. A permit, if issued, gives the Permittee, during the term of the permit, the right of priority of application for license while the Permittee undertakes the necessary studies and examinations to determine the engineering economic, and environmental feasibility of the proposed project, the market for power, and all other information necessary for inclusion in an application for a license.

a. Type of Application: Exemption (5MW or Less).

b. Project No: 7211–000.

c. Date Filed: April 11, 1983.

d. Applicant: Vernon L. and Betty J. Herzinger.

e. Name of Project: Salmon Falls Creek.

f. Location: On Salmon Falls Creek, near Buhl, in Twin Falls County, Idaho, and occupying BLM lands.

g. Filed Pursuant to: Energy Security Act of 1980, Section 408 16 U.S.C. 2705 and 2708 *as amended*.

h. Contact Person: Marc Auth, J–H–B Engineers, Inc., 250 South Beechwood Avenue, Boise, Idaho 83709.

i. Comment Date: July 5, 1983.

j. Description of Project: The proposed project would consist of: (1) the rehabilitation of an existing 6-foot-high breached rock-and-earth-fill dam; (2) a 6-foot-high, 8-foot-long concrete weir at crest elevation 2,935 feet; (3) a 12-foot-long, 8-foot-wide intake structure; (4) a 500-foot-long, 6-foot-diameter steel penstock; (5) a powerhouse at elevation 2,920 feet, containing three generating units, rated at 120 kW, 93kW, and 53 kW respectively; (6) a tailrace; and (7) a 500-foot-long transmission line. The average annual energy generation is estimated to be 1.8 million kWh.

k. Purpose of Project: Power will be sold to Idaho Power Company.

l. This notice also consists of the following standard paragraphs: A1, B, C, D3a.

a. Type of Application: Preliminary Permit.

b. Project No: 7185–000.

c. Date Filed: March 30, 1983.

d. Applicant: Mr. Richard R. Gresham.

e. Name of Project: NG Rock Creek #5.

f. Location: On Rock Creek in Shoshone County, Idaho near the Town of Mullan.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Richard Gresham, P.O. Box 52, Kellogg, Idaho 83837.

i. Comment Date: July 25, 1983.

j. Description of Project: The proposed project would consist of: (1) a 2.9-foot-high, 16-foot-long diversion structure at elevation 30 feet; (2) a 16-inch-diameter, 2,900-foot-long penstock; (3) a powerhouse containing two generating units with a combined rated capacity of 150 kW, operating under a head of 455 feet; and (4) a 250-foot-long underground cable tying into an existing Washington Power Company transmission line. The average annual energy output would be 1,100,000 kWh.

A preliminary permit, if issued does not authorize construction. The Applicant seeks a 24 month permit to study the feasibility of constructing and operating the project. No new access road will be needed for the purpose of conducting these studies. The estimated cost for conducting these feasibility studies is $13,010.

k. Purpose of Project: Project power will be sold to Washington Water Power Company.

l. This notice also consists of the following standard paragraphs: A4b, A4c, A4d, B, C, and D2.

34 a. Type of Application: License (Under 5 MW).

b. Project No: 4587–002.

c. Date Filed: February 28, 1983.
d. Applicant: Dennis V. McGrew, Thomas M. McMaster, and Kenneth R. Koch.
e. Name of Project: Ruth Creek.
f. Location: On Ruth Creek, near Glacier, in Whatcom County, Washington, on U.S. lands in Mt. Baker National Forest.
g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).
h. Contact Person: Thomas R. Childs, McGrew and Associates, c/o Western Power, Inc., P.O. Box 5663, Bellingham, Washington 98227.
i. Comment Date: July 25, 1983.
j. Description of Project: The proposed project would consist of: (1) a 9-foot-high, 50-foot-long concrete diversion structure at elevation 2,630 feet; (2) a 6,320-foot-long, 48-inch-diameter steel penstock; (3) a powerhouse containing one generating unit rated at 2.8 MW at elevation 2,210 feet; (4) a tailrace; and (5) a 1.9-mile-long, 55-kV transmission line. The average annual energy generation is estimated to be 11.5 million kWh.
k. Purpose of Project: The energy generated by the project would be sold to Puget Sound Power and Light Company.
l. This notice also consists of the following standard paragraphs: A2, B, C, and D1.
35a. Type of Application: Preliminary Permit.
b. Project No: 7207–000.

h. Contact Person: Ted S. Sorenson, 550 Linden Dr., Idaho Falls, Idaho 83401.
i. Comment Date: July 25, 1983.
j. Description of Project: The proposed all new run-of-the-creek project would utilize lands of the United States administered by Interior's Bureau of Land Management and would consist of: (1) a concrete diversion structure with sill elevation 5,654 feet m.s.l. and having radial gate control and a fish ladder; (2) a 34,000-foot-long 5-foot-deep earthen feeder ditch; (3) a forebay having a surface area of ⅓-acre and a gross storage capacity of 2 acre-feet at surface elevation 5,626 feet m.s.l.; (4) a screened intake structure; (5) a 42-inch diameter 4,700-foot-long steel penstock; (6) a powerhouse containing a generating unit having a rated capacity of 1,100–kW operated under a 276-foot head and at a flow of 60 cfs; (7) a 0.2-mile-long transmission line; (8) an 18,900-foot-long earthen outfall ditch; and (9) appurtenant facilities.
k. Purpose of Project: Project energy would be sold to Utah Power & Light Company. Applicant estimates that the average annual generation would be 3,000,000 kWh.
l. This notice also consists of the following standard paragraphs: A4b, A4c, A4d, B, C and D2.
m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 24 months, during which time it would perform studies and, if feasible, would prepare an application for an FERC license. Applicant estimates the cost of the work under the permit would be $25,000.
38a. Type of Application: Preliminary Permit.
b. Project No: 7072–000.
c. Date Filed: February 10, 1983, revised on April 5, 1983.
d. Applicant: Beaver Power Group IV, Ltd.
e. Name of Project: Lock Haven Dam.
f. Location: On West Branch of the Susquehanna River, in Clinton County, near Dunnstown, Pennsylvania.
g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).
h. Contact Person: B. Ryland Wiggs, Esquire, Suite 207, 2285 Schoenersville Road, Bethlehem, Pennsylvania 18018.
i. Comment Date: July 25, 1983.
j. Description of Project: The project would consist of: (1) an existing reinforced concrete dam 820 feet long and 11 feet high; (2) a reservoir with a normal water surface elevation of about 544 feet USGS; (3) a proposed headrace approximately 250 feet long; (4) a proposed powerhouse housing four tubular turbine/generators with a total rated capacity of 3,120 kW; (5) a proposed tailrace approximately 250 feet long and 20 feet in depth; (5) a proposed switchyard and transmission lines; and (6) appurtenant facilities. Applicant estimates that the average annual energy generation would be 16,399,000 kWh.
k. Purpose of Project: The Applicant anticipates that power will be sold to Pennsylvania Power and Light Company and/or another entity via a tie-in with P.P. & L's distribution system.
l. This notice also consists of the following standard paragraphs: A4a, A4c, B, C, and D2.
m. Proposed Scope of Studies under Permit: A preliminary permit, if issued, does not authorize construction. Applicant seeks issuance of a preliminary permit for a period of 36 months during which time it would prepare studies of the hydraulic, construction, economic, environmental, historic and recreational aspects of the project. Depending on the outcome of

the studies, Applicant would prepare an application for an FERC license. Applicant estimates the cost of the studies under the permit would be $375,000.

39a. Type of Application: Major License 5 MW or Less.

b. Project No: 4687–001.

c. Date Filed: December 8, 1981.

d. Applicant: Long Lake Energy Corporation.

e. Name of Project: Mechanicville Lock C–2 Project.

f. Location: On the Hudson River, Champlain Canal, in Saratoga County, New York.

g. Filed Pursuant to: The Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Paul J. Elston, Long Lake Energy Corporation, 420 Lexington Avenue, Suite 3020, New York, New York 10170.

i. Comment Date: July 25, 1983.

j. Description of Project: The proposed project would consist of: (1) the existing concrete gravity Lock C–2 Dam, 15 feet high and 692 feet long; (2) a reservoir with a surface area of 323 acres, a mean surface elevation of 46.8 feet m.s.l.; (3) a new intake; (4) a new power canal; (5) a new powerhouse having two units with a total generating capacity of 4,146 kW; (6) a new tailrace; (7) the existing switchyard owned by Niagara Mohawk Power Corporation; (8) a 5,000 KVA transmission line 1,100 feet long along the existing access road and connecting to the Niagara Mohawk Power Corporation 5,000 KVA transmission line; and (9) appurtenant facilities. Applicant estimates total cost of the proposed project would be $6,910,398. The Applicant estimates the annual average energy production to be 13,690,000 kWh. The Lock C–2 Dam is owned by the New York State Department of Transportation.

k. Purpose of Project: All project energy would be sold to the Niagara Mohawk Power Corporation.

l. This notice also consists of the following standard paragraphs: A2, B, C, D1.

40a. Type of Application: Exemption for Small Hydroelectric Power Project of 5MW or less capacity.

b. Project No: 5118–001.

c. Date Filed: February 25, 1983.

d. Applicant: Glenn M. Phillips.

e. Name of Project: Big Sheep Creek.

f. Location: Stevens County, Washington; Big Sheep Creek.

g. Filed Pursuant to: Energy Security Act of 1980, Section 408, (16 U.S.C. 2705 and 2708, *as amended*).

h. Contact Person: Mr. David Ward, Farmer, McGuin, Flood, Bechtel & Ward, 1000 Potomac Street, N.W., Suite 402, Washington, D.C. 20007.

i. Comment Date: July 5, 1983.

j. Description of Project: The proposed project would consist of: (1) a 6-foot-high diversion structure at stream bed elevation 1580 feet msl; (2) a 20-foot-wide, 5-foot-deep and 500-foot-long diversion canal; (3) a 700-foot-long, 48-inch-diameter penstock; (4) a 700-foot-long, 54-inch-diameter penstock; (5) a powerhouse containing two turbines, one with an installed capacity of 1,000 kW and the other with an installed capacity of 3,000 kW; and (6) a 1000-foot-long, 12.5-kV transmission line connecting with an existing Washington Power Company transmission line.

k. Purpose of Project: The estimated annual output of 16 million kWh generated by the proposed project would be sold to the Washington Power Company.

l. This notice also consists of the following standard paragraphs: A1, B, C, D3a.

Competing Applications

A1. Exemptions for Small Hydroelectric Power Project under 5MW Capacity—Any qualified license applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, either a competing license application that proposes to develop at least 7.5 megawatts in that project, or a notice of intent to file such a license application. Submission of a timely notice of intent allows an interested person to file the competing license application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted.

A notice of intent must conform with the requirements of 18 CFR 4.33 (b) and (c) (1982). A competing license application must conform with the requirements of 18 CFR 4.33 (a) and (d).

A2. Applications for License—Anyone desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, either the competing application itself (see 18 CFR 4.33 (a) and (d), and Part 16, where applicable) or a notice of intent (see 18 CFR 4.33 (b) and (c)) to file a competing application. Submission of a timely notice of intent allows an interested person to file an acceptable competing application no later than the time specified in § 4.33(c) or §§ 4.101 to 4.104 (1982).

A3. Public notice of filing of the initial application, which has already been given, established the due date for filing competing applications or notices of intent. In accordance with the Commission's regulations, no competing application for license, exemption or preliminary permit, or notices of intent to file competing applications, will be accepted for filing in response to this notice (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate). Any application for license or exemption from licensing, or notice of intent to file a license or an exemption application, must be filed in accordance with the Commission's regulations (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate).

Preliminary Permits

A4a. Existing Dam or Natural Water Feature Project—Anyone desiring to file a competing application for preliminary permit for a proposed project at an existing dam or natural water feature project, must submit the competing application to the Commission on or before 30 days after the specified comment date for the particular application (see 18 CFR 4.30 to 4.33 (1982)). A notice of intent to file a competing application for preliminary permit will not be accepted for filing.

A4b. No Existing Dam—Anyone desiring to file a competing application for preliminary permit for a proposed project where no dam exists or there are proposed to be major modifications, must submit to the Commission on or before the specified comment date for the particular application, the competing application itself, or a notice of intent to file such an application (see 18 CFR 4.30 to 4.33 (1982)).

A4c. The Commission will accept applications for license or exemption from licensing, or a notice of intent to submit such an application in response to this notice. A notice of intent to file an application for license or exemption must be submitted to the Commission on or before the specified comment date for the particular application. Any application for license or exemption from licensing must be filed in accordance with the Commission's regulations (see 18 CFR 4.30 to 4.33 or §§ 4.101 to 4.104 (1982), as appropriate).

A4d. Submission of a timely notice of intent to file an application for preliminary permit allows an interested person to file an acceptable competing application for preliminary permit no later than 60 days after the specified comment date for the particular application.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, .211, .214

(1982). In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filling is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426. An additional copy must be sent to: Fred E. Springer, Chief, Applications Branch, Division of Hydropower Licensing, Federal Energy Regulatory Commission, Room 208 RB at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

Agency Comments

D1. License applications (5 MW or less capacity)—Federal, State and local agencies that receive this notice through direct mailing from the Commission are requested to provide comments pursuant to the Federal Power Act, the Fish and Wildlife Coordination Act, the Endangered Species Act, the National Historic Preservation Act, the Historical and Archeological Preservation Act, the National Environmental Policy Act, Pub. L. 88–29, and other applicable statutes. No other formal requests for comments will be made.

Comments should be confined to substantive issues relevant to the issuance of a license. A copy of the application may be obtained directly from the Applicant. If an agency does not file comments with the Commission within the time set for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D2. Preliminary permit applications—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. Exemption applications (5 MW or less capacity)—The U.S. Fish and Wildlife Service, The National Marine Fisheries Service, and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 408 of the Act, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be includes as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. Exemption applications (Conduit)—The U.S. Fish and Wildlife Service, the National Marine Fisheries Service, and the State Fish and Game agency(ies) are requested, for the purposes set forth in Section 30 of the Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substative issues relevant to the granting of an exemption. If an agency does not file comments with 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: May 20, 1983.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14227 Filed 5-26-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP80–175–001]

El Paso Natural Gas Company; Petition To Amend

May 23, 1983.

Take notice that on April 29, 1983, El Paso Natural Gas Company (Petitioner), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP80–175–001 a petition to amend the order issued in Docket No. CP80–175 on February 28, 1980, pursuant to Section 7(c) of the Natural Gas Act so as to reflect deletion of authorization to modify certain compression facilities, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner states that by order issued February 28, 1980, it was authorized to construct and operate 1,070 horsepower of additional compression through modifications to three existing Solar Centaur T–3000 gas turbine-driven centrifugal compressor units, two at Petitioner's Jal No. 3 filed plant in Lea County, New Mexico, and one at Petitioner's Puckett plant in Pecos County, Texas. Petitioner explains that the increase in horsepower was to be a result of inspection and overhauling to be performed by Solar Turbines International.

Petitioner further explains that subsequent to Petitioner's proposed shipment of the final unit to be overhauled to Solar Turbines International it was advised that Custom Equipment Rebuilders, a division of Universal Parts and Repairs, Inc. could perform the necessary inspection, maintenance and overhauling of the remaining Solar Centaur T–3000 compressor unit located at the Jal No. 3 field plant at a lower cost to Petitioner. It is asserted that such overhauling would not require upgrading the remaining compressor unit from its current ISO rating of 3,300 horsepower to 3,550 horsepower. Petitioner, therefore, requests deletion of its

authorization to upgrade such compressor unit.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 13, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14363 Filed 5-26-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-249-000]

Niagara Interstate Pipeline System; Application for a Permit

May 23, 1983.

Take notice that on March 25, 1983, Niagara Interstate Pipeline System (Applicant), Tenneco Building, 1010 Milam, Houston, Texas 77002, filed in Docket No. CP83-249-000 an application for a permit pursuant to Executive Order Nos. 10485 and 12038, the Secretary of Energy's Delegation Order No. 0204-5 and Section 153.10 of the Commission's Regulations (18 CFR 153.10) authorizing Applicant to construct, operate, connect and maintain facilities at the international boundary between the United States and Canada near Niagara Falls, New York, for the importation of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that Applicant is concurrently filing an amendment to its application pending in Docket No. CP83-170-000 so as to reflect the facilities required to import the actual volume of gas approved for export by the Canadian National Energy Board (NEB). It is stated that the NEB approved for export in its January 1983 decision substantially less gas than petitioning exporters requested. It is stated that the related applications filed pursuant to Section 3 of the Natural Gas Act associated with the proposed importation of gas include the following dockets:

Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee)	CP81-298-000 CP82-470-000
Texas Eastern Transmission Corporation	CP82-46-000 CP82-326-000 CP82-423-000
Transcontinental Gas Pipe Line Corporation	CP82-46-000 CP82-125-000 CP82-125-005
Algonquin Gas Transmission Company	CP82-46-000

Applicant states that the facilities to be constructed at or near the international boundary would consist of two 36-inch pipelines which would interconnect with the facilities of TransCanada PipeLines Limited on the Canadian shore of the Niagara River, would cross the Niagara River, and would connect with a single 42-inch pipeline to be constructed by Applicant on the United States side of the river. Applicant states that it also proposes to construct a check meter station in the vicinity of the United States shore of the Niagara River. Applicant further states that its proposed facilities would parallel existing facilities owned and operated by Tennessee.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 13, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate actionto be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a part to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14364 Filed 5-26-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-289-000]

Northern Natural Gas Co., a Division of InterNorth, Inc.; Application

May 23, 1983.

Take notice that on April 22, 1983, Northern Natural Gas Company, Division of InterNorth, Inc. (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP83-289-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon the sale of 150 Mcf per day of seasonal service demand gas to Kansas Power and Light (KP&L), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that the request for authorization for abandonment of service is the direct result of the expiration of KP&L's existing service agreement for seasonal service demand which expired March 27, 1982. It is asserted that KP&L has indicated to Applicant that the 150 Mcf per day firm entitlement is in excess of its needs due to its customers' conservation and economic downtrend. Therefore, the reduction would assist KP&L in achieving maximum utilization of its available supply source, it is asserted.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 13, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14366 Filed 5-26-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-283-000]

Northwest Pipeline Corp; Application

May 23, 1983.

Take notice that on the April 20, 1983, Northwest Pipeline Corporation (Applicant), 295 Chipeta Way, Salt Lake City, Utah 84108, filed at Docket No. CP83-283-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon all or much of its Ignacio, Colorado, gas conditioning/extraction plant, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that Applicant purchases and gathers gas in the San Juan Basin area of Colorado and New Mexico. It is, further stated that because much of this gas is "wet" gas it must be conditioned, (i.e., liquefiables must be removed) prior to its delivery into Applicant's mainline transmission system. It is asserted that the conditioning of this gas is necessary to make the gas transportable and this process is currently performed at Applicant's Ignacio, Colorado, extraction plant which is located adjacent to its Ignacio compressor Station.

Applicant states that the Ignacio extraction plant was constructed in the mid-1950's as part of the original gas gathering and transmission system constructed and operated by Applicant's predecessor, Pacific Northwest Pipeline Corporation (Pacific Northwest). It is explained that although the Commission generally does not assert jurisdiction over extraction plants and require their certification the existing Ignacio plant was included as part of the original Pacific Northwest system certificate application, was specifically mentioned in the subsequent order of the Commission, and was thus arguably certificated along with the other clearly jurisdictional facilities covered by said application.

It is asserted that the Commission has consistently refrained from requiring certification of extraction plants pursuant to Section 7(c) of the Natural Gas Act based upon its experience that the interests of gas consumers can be adequately served through the exercise of its rate authority over pipelines served by such plants. Consequently, it is further asserted if the existing Ignacio conditioning/extraction plant were to be built today, certification would not be required. Applicant states that it has been stated in a recent Commission General Counsel's opinion that the Ignacio plant is a certificated facility, and that in order to obtain certainty, uniformity, and to avoid potential future conflict, Applicant seeks an order permitting and approving the abandonment of all or so much of the existing plant as is appropriate for Applicant to accomplish the purposes hereinafter described.

The existing plant is an ambient temperate lean oil absorption plant capable of removing propane, butanes, pentanes and hexanes-plus and has a nominal design capacity of 300 MMcf per day at a design propane recovery level of 30 percent. Feed gas from the San Juan Basin is delivered to the Ignacio plant by Applicant's gathering system at a nominal pressure of 200 psig. Upstream from the plant the Ignacio compressor pressure of 200 psig system at a nominal station increases the gas pressure to a nominal 800 psig prior to the conditioning, extracting operations in the plant and subsequent delivery into Applicant's mainline transmission system. The Ignacio extraction plant has been included in Applicant's cost-of-service and revenues from the sale of liquids extracted by Applicant are credited to Applicant's cost of service.

Applicant intends to modernize its Ignacio facility by replacing a major portion of the nearly thirty-year-old existing extraction plant with a more efficient state-of-the-art cryogenic turboexpander plant. It is stated that the modernized plant would remove greater amounts of liquefiables than can be removed by the existing plant and, in addition, would have the capability of removing ethane. Although the modernized plant would remove more liquefiables, Applicant's customers would receive the same thermal amount of gas in the residue stream because more gas could be processed in the plant, it is explained. Applicant states that the new facilities will be included in rate base; and the current rate treatment of the costs and revenues associated with the new facilities will be continued, that is, Ignacio's cost-of-service would be included in Applicant's overall cost-of-service, and revenues from extracted products will be credited to that cost of service.

Applicant states that it and certain of its customers operate gas liquefaction facilities which are served from Applicant's general system supply and that certain problems have arisen in the operation of these plants due to excess amounts of heavy hydrocarbons in Applicant's gas supply. It is asserted that the proposed modification of the existing Ignacio plant would help assure a gas quality compatible with the requirements of Applicant's customers.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 13 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10) All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ES83-43-000]

Pacific Power & Light Co.; Application

May 23, 1983.

Take notice that on May 16, 1983, Pacific Power & Light Company (Applicant) filed its application with the Federal Energy Regulatory Commission,

pursuant to Section 204 of the Federal Power Act, seeking an order (1) authorizing it to issue and sell not more than 3,000,000 additional shares of its common stock pursuant to its Dividend Reinvestment and Stock Purchase Plan and (2) exempting the issuance from competitive bidding pursuant to 18 CFR 34.2(b)(2).

Any person desiring to be heard or to make any protest with reference to the application should, on or before June 14, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with 18 CFR 385.211 or 385.214, respectively. The application is on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-14367 Filed 5-26-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-43-005]

Panhandle Eastern Pipe Line Co. et al.; Application

May 23, 1983.

Take notice that on April 25, 1983, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas 77001, and Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP82-43-005 a joint application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon the limited term transportation of natural gas provided by Applicants for United Gas Pipe Line Company (United), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants seek authorization to terminate an October 13, 1981, limited-term transportation agreement among Applicants and United. It is asserted that the agreement between Applicants and United expired on December 31, 1982. Applicants were performing the limited-term transportation service for United pursuant to Rate Schedules LT-1 and LT-3 of Panhandle's and Trunkline's FERC Gas Tariffs, Original Volume No. 2, respectively, it is stated.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 13, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5206-002]

David H. Scott; Surrender of Preliminary Permit

May 23, 1983.

Take notice that David H. Scott, Permitee for the West Manton Power Project, FERC No. 5206, has requested that his preliminary permit be terminated. The preliminary permit for Project No. 5206 was issued on January 14, 1982, and would have expired on June 30, 1983. The project would have been located on North Fork Battle Creek and Digger Creek in Shasta County, California.

David H. Scott filed the request on April 29, 1983, and the surrender of the preliminary permit for Project No. 5206 is deemed accepted as of April 29, 1983, and effective as of 30 days after the date of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-284-000]

Southwest Gas Transmission Co.; Application

May 23, 1983.

Take notice that on April 22, 1983, Southwest Gas Transmission Company (Applicant), P.O. Box 15015, Las Vegas, Nevada 89114, filed in Docket No. CP83-284-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the acquisition from Transwestern Pipeline Company (Transwestern) of interstate pipeline facilities located in Mohave County, Arizona, and the transportation of natural gas on behalf of El Paso Natural Gas Company (El Paso) for ultimate delivery to Southwest Gas Corporation (Southwest) at the Arizona/Nevada border, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it would acquire from Transwestern approximately 8.9 miles of 20-inch O.D. pipeline located in Mohave County, Arizona. It is stated that the Arizona facilities connect Transwestern's Northern Arizona pipeline system with Southwest's 9.6-mile 20-inch O.D. pipeline at the Arizona/Nevada boundry. It is stated that the Nevada facilities, owned and operated by Southwest, and the Arizona facilities, owned and operated by Transwestern, were originally built to deliver up to 350,000 Mcf of natural gas per day to the Mohave Power Plant in Ft. Mohave, Nevada, during emergency situations. It is further stated that no emergency requiring the use of the Arizona and Nevada facilities has ever occurred.

Applicant states that, as the nominee of Southwest, it has the right to purchase the Arizona facilites from Transwestern at their net depreciated book value, estimated at approximately $1 million as of July 1983.

Applicant proposes to transport gas on behalf of El Paso for ultimate redelivery to Southwest at the Arizona/Nevada border pursuant to the terms

and conditions contained in its proposed *pro forma* FERC Gas Tariff, Original Volume No. 2, Rate Schedule T–1. Monthly demand charges are estimated by Applicant at $32,326.

Applicant further states that El Paso will file an application for a certificate of public convenience and necessity for authorization to, *inter alia*, construct and operate inter-connection facilities, operate and maintain the Arizona facilities and establish a new delivery point to Southwest at the Arizona/Nevada state line where the Arizona facilities connect with the Nevada facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 13, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commisson by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket Nos. CI77–329, CP77–304, CP84–97]

Texaco Inc., Sabine Pipe Line Company; Petition for Clarification of Settlement Orders

May 23, 1983

Take notice that on April 28, 1983, Texaco Inc. filed a petition for clarification of the settlement orders in the above-entitled proceedings, issued July 14 and 26, 1977, and February 10, 1978. The settlement, as modified and approved, provided essentially that Texaco would pay back to the interstate market from onshore sources other than gas previously dedicated to the interstate market approximately 208 Bcf of gas relating to past periods and additional volumes relating to a period subsequent to the settlement. The settlement also provided that Texaco would phase out use of natural gas for steam generation in the existing gas-fired boilers (Port Arthur Plant and Port Neches Plant) during a three-year conversion program. Delivery authorization for natural gas from the Federal Domain for process usage at Port Authur through Sabine Pipe Line Company was limited to three years.

Texaco states that pursuant to the Commission orders herein it ceased all deliveries of natural gas from the Federal Domain, Offshore Louisiana, to the Port Arthur Refineries on July 4, 1980; that to replace such gas, it substituted intrastate gas for process gas use; that Texaco converted all of its existing boiler facilities located at the power stations for steam generation at the Port Arthur Refineries so as to be able to Burn No. 6 fuel oil; that Texaco is no longer transporting natural gas from the Federal Domain, Offshore Louisiana, through Sabine to the Port Arthur Refineries; and that no natural gas from any source is now being used under the boilers at the Port Arthur Refineries.

Texaco seeks clarification of the orders issued herein to permit the following: It proposes to install equipment to permit use of small amounts of natural gas as a standby boiler fuel in the event of flameout of the boilers, which normally burn refinery offgases. It also proposes initially one natural gas-fired combustion gas turbine to generate electricity and hot air exhaust for plant use at a consumption of 8000 Mcf/D of natural gas, plus two more of these over the next several years. Texaco states these are needed because refinery operations have changed to produce less steam and require more electricity. Finally, Texaco proposes to replace a worn out waste heat recovery boiler which uses natural gas and plant produced gas and (perhaps) to install a natural gas-fired combustion turbine to drive a process compressor, which, according to Texaco, would be more economical than the present steam-driven arrangement.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 13, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary

[FR Doc. 83–14370 Filed 5–26–83: 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP83–299–000]

Transcontinental Gas Pipe Line Corp.; Application

May 23, 1983.

Take notice that on April 29, 1983, Transcontinental Gas Pipe Line Corporation (Applicant), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP83–299–000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon a transportation service for Libby Owens Ford Company (LOF), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that it is presently authorized to transport certain quantities of natural gas for LOF which is received from Panhandle Eastern Pipe Line Company and Trunkline Gas Company for the account of LOF.

It is stated that LOF has sold its reserves from which production was being transported and, therefore, terminated its transportation agreement with Applicant in a letter dated March 3, 1983. Applicant states that LOF has advised that there is no possibility that it would desire further transportation service under the existing agreement. Applicant, therefore, requests approval to abandon the transportation of natural gas for LOF.

Any person desiring to be heard or to make any protest with reference to said

application should on or before June 13, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP81-387-002]

United Gas Pipe Line Company; Petition To Amend

May 23, 1983.

Take notice that on April 27, 1983, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP81-387-002 a petition to amend the order issued December 2, 1981, in Docket No. CP81-387-000 pursuant to Section 7(c) of the Natural Gas Act so as to authorize the delivery of gas to First Energy Corporation (First Energy) in the order of priority as set out in a May 1, 1982, amendment to a transportation agreement, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Specifically the amended agreement provides that the gas to be transported by United to First Energy at Bayou Cassottee, Jackson County, Mississippi, would be delivered in the following order or priority:

First, volumes up to 798 Mcf of gas per day would be designated as contract sales gas.

Second, volumes up to 300 Mcf of gas per day would be considered as transported gas.

Third, volumes up to 1,702 Mcf of gas per day would be sales contract gas.

Fourth, all remaining volumes would be delivered as transported gas.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 13, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP77-24-014]

United Gas Pipe Line Company et al.; Petition to Amend

May 23, 1983.

Take notice that on April 29, 1983, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, and Arkansas Louisiana Gas Company, a division of Arkla, Inc. (Arkla), P.O. Box 21734, Shreveport, Louisiana 71151 filed in Docket No. CP77-24-014 a petition to amend the order issued January 13, 1977,[1] as amended, in Docket No. CP77-24 so as to authorize the transportation of natural gas to two additional redelivery points, all as more fully set forth in the petition to amend which is on file with the Commission and open for public inspection.

[1] This proceeding was commenced before the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the Commission.

United and Arkla propose to establish two new redelivery points pursuant to letter agreements between United and Arkla dated June 15, 1982, and October 6, 1982. It is stated that the first is located in the Rudd Unit 1 No. 2 Well, W. R. Anderson Survey, Abstract No. 60, Waskon Field, Harrison County, Texas. It is further stated that the second is at the existing 2-inch tap near the Northwest Corner of Section 3, Township 21 North, Range 9 West, Webster Parish, Louisiana. United and Arkla further propose the implementation of future delivery and redelivery points without amendment to Docket No. CP77-24 with the understanding that such changes would be reported on an annual basis.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 13, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-59127; TSH-FRL 2371-7]

Toxic Substances; Premanufacture Exemption Applications; Certain Chemicals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5 (a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing

exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's revised statement of interim policy published in the **Federal Register** of November 7, 1980 (45 FR 74378). This notice, issued under section 5(h)(6) of TSCA, announces receipt of two applications for exemptions, provides a summary, and requests comments on the appropriateness of granting each of the exemptions.

DATE: Written comments by: June 13, 1983.

ADDRESS: Written comments, identified by the document control number "[OPTS–59127]" and the specific TME number should be sent to: Document Control Officer (TS–793), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Management Support Division, Environmental Protection Agency, Rm. E–401, 401 M Street, SW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Theodore Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm E–216, 401 M Street, SW, Washington, DC 20460.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TME received by EPA. The complete non-confidential document is available in the Public Reading Room E–107.

TME 83–55

Manufacturer. Confidential.

Chemical. (G) Tannins, hydroxyethylamino and methylamino methylated.

Use/Production. Confidential. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. A total of 15 workers may have dermal exposure during manufacturing, processing, use and disposal.

Environmental Release/Disposal. Disposal by publicly owned treatment works (POTW) and landfill.

TME 83–56

Manufacturer. Confidential.

Chemical. (G) Esterified vinyl, alkenyl polymer.

Use/Production. (G) Performance enhancer. Prod. range: 120,000 lbs.

Toxicity Data. No data submitted.

Exposure. Manufacture and processing: dermal, during sampling and in case of accidental leaks or spills.

Environmental Release/Disposal. Confidential.

Dated: May 20, 1983.

Linda A. Travers,

Acting Director, Management Support Division.

BILLING CODE 6560–50–M

[OPTS–51468] TSH–FRL 2371–8]

Toxic Substances; Premanufacture Notices; Certain Chemicals

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture of import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of interim policy published in the **Federal Register** of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of twenty-eight PMNs and provides a summary of each.

DATES: Close of Review Period:

PMN 83–673 and 83–674—July 25, 1983.

PMN 83–709 and 83–710—August 7, 1983.

PMN 83–729, 83–730, 83–731, 83–732, 83–733, 83–734, 83–735 amd 83–736—August 10, 1983.

PMN 83–737 and 83–738—August 13, 1983.

PMN 83–739, 83–740, 83–741, 83–742 and 83–743—August 14, 1983.

PMN 83–744, 83–745 and 83–746—August 15, 1983.

PMN 83–747, 83–748, 83–749, 83–750, 83–751 and 83–752—August 16, 1983.

Written comments by:

PMN 83–673 and 83–674—June 25, 1983.

PMN 83–709 and 83–710—July 8, 1983.

PMN 83–729, 83–730, 83–731, 83–732, 83–733, 83–734, 83–735 and 83–736—July 16, 1983.

PMN 83–737 and 83–738—July 14, 1983.

PMN 83–739, 83–740, 83–741, 83–742 and 83–743—July 15, 1983.

PMN 83–744, 83–745 and 83–746—July 16, 1983.

PMN 83–747, 83–748, 83–749, 83–750, 83–751 and 83–752—July 17, 1983.

ADDRESS: Written comments, identified by the document control number "[OPTS–51468]" and the specific PMN number should be sent to: Document Control Officer (TS–793), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E–409, 401 M St., SW., Washington, DC 20460 (202–382–3532).

FOR FURTHER INFORMATION CONTACT: Theodore Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS–794), Office of Toxic Substances, Environmental Protection Agency, Rm. E–216, 401 M St., SW., Washington, DC 20460 (202–382–3729).

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manfacturer on the PMNs received by EPA. The complete non-confidential document is available in the Public Reading Room E–107.

PMN 83–673

Withdrawal of Intent To Prepare an Environmental Impact Statement; DeSoto Parish, Louisiana

AGENCY: Environmental Protection Agency (EPA), Region VI, Dallas, Texas.

ACTION: Withdrawal of notice of intent to prepare an environmental impact statement (EIS).

SUMMARY: On January 29, 1982, EPA published in the **Federal Register** (47 FR 4335, 4336) its intention to prepare a draft EIS for the issuance of an NPDES permit to the Louisiana Division of Dow Chemical USA for discharge of wastewater from the Caster Bayou Project located in DeSoto Parish, Louisiana. Dow Chenical USA has withdrawn its permit application and has decided not to proceed with the Caster Bayou Project at this time. The EIS that EPA had been preparing in conjunction with the US Army Corps of Engineers has therefore been terminated.

Dated: May 24, 1983.

FARM CREDIT ADMINISTRATION

[Farm Credit Administration Order No. 843; Revocation of FCA Order No. 828]

Authority Delegations; Officers to Act as Governor

ACTION: Notice.

The Governor of the Farm Credit Administration has issued Order No. 843 authorizing certain officers of the Farm Credit Administration to act as Governor in the event the Governor is absent or unable to perform the duties of the office. The text of the Order is as follows:

1. In the event that the Governor of the Farm Credit Administration is absent or is not able to perform the duties of the Office for any other reason, the officer of the Farm Credit Administration who is the highest on the following list and who is available to act is hereby authorized to exercise and perform all fuctions, powers, authority, and duties pertaining to the Office of Governor of the Farm Credit Administration:

(a) Senior Deputy Governor;

(b) Deputy Governor and Chief of Staff;

(c) Deputy Governor, Office of Supervision;

(d) Deputy Governor, Office of Administration;

(e) Deputy Governor and Chief Examiner;

(f) General Counsel;

(g) Any other officer of the Farm Credit Administration designated by the Governor.

2. This order shall be effective on May 26, 1983, and supersedes Farm Credit Administration Order No. 828 dated October 1, 1980 (45 FR 65306).

[Farm Credit Administration Order No. 842; Revocation of FCA Order No. 777]

Delegation of Governor's Authority to Approve Terms, Conditions and Take Other Action Involving Various Obligations of the Banks

ACTION: Notice.

The Governor of the Farm Credit Administration issued Order No. 842 delegating the Governor's authority to authorize and approve terms, conditions and take other action involving the various obligations of the banks of the Farm Credit System. The text of the Order is as follows:

Whereas, the Governor of the Farm Credit Administration is authorized by sections 4.2, 4.3, 4.4 and 4.5 of the Farm Credit Act of 1971, as amended, 12 U.S.C. 2001, *et seq.* ("Act"), to approve the issuance, forms, amounts, maturities, rates of interest, terms, conditions and participation by the several banks of the Farm Credit System in each issue of individual, consolidated and Systemwide obligations and to execute such obligations on their behalf; and

Whereas, The Governor is authorized by section 5.13 of the Act to exercise and perform his powers through such other officers and employees of the Farm Credit Administration as he shall designate;

Now, therefore, it is hereby ordered, effective immediately, that:

(1) The Director, Division of Marketing and Funding is hereby designated as the person authorized and empowered to approve the issuance, forms, amounts, maturities, rates of interest, terms, conditions and participation by the several banks of the Farm Credit System in each issue of Systemwide discount notes, and to execute such notes on their behalf; and

(2) When the Governor is absent or not able to perform the duties of the Office for any other reason, the Acting Governor, determined in accordance with Farm Credit Administration Order No. 843, is hereby designated as the person authorized and empowered to approve the issuance, forms, amounts, maturities, rates of interest, terms, conditions, and participation by the several banks of the Farm Credit System in each issue of individual, consolidated and Systemwide obligations except

discount notes, and to execute such obligations on their behalf.

Donald E. Wilkinson,

Governor, Farm Credit Administration.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by Bank Holding Companies; Anchor Bancorp, Inc., et al.

The companies listed in this notice have applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Minneapolis** (Bruce J. Hedblom, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Anchor Bancorp, Inc.*, Wayzata, Minnesota; to acquire 86.72 percent of the voting shares or assets of West Saint Paul State Bank, West St. Paul, Minnesota. Comments on this application must be received not later than June 22, 1983.

B. **Board of Governors of the Federal Reserve System** (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *Broadway Bancshares Inc.*, San Antonio, Texas; to acquire 100 percent of the voting shares of Eisenhower National Bank, Fort Sam Houston, Texas. This application may be inspected at the offices of the Board of Governors of the Federal Reserve Bank of Dallas. Comments on this application must be received not later than June 13, 1983.

2. *Commercial Bank Investment Company*, Denver, Colorado; to retain 100 percent of the voting shares or assets of Century Bank Southeast, N.A., Englewood, Colorado and Century Bank North, Denver, Colorado. This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Kansas City. Comments on this application must be received not later than June 22, 1983.

Board of Governors of the Federal Reserve System, May 23, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-14253 Filed 5-26-83; 8:45 am]

BILLING CODE 6210-01-M

Bank Holding Company; Proposed de Novo Nonbank Activities; Central of Kansas, Inc.

The organization identified in this notice has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to the application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment on the application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Central of Kansas, Inc.*, Junction City, Kansas (financing and insurance activities; Kansas): To engage, through its subsidiary, Central of Kansas Finance, Inc. in consumer and commercial finance activities, including the extension of direct loans for the purchase of consumer goods, the extension of loans for home improvements, the discount of retail and installment notes or contracts, the purchase of retail and installment notes or contracts; and acting as an agent for the sale of life, accident, health and physical damage insurance directly related to its extensions of credit. These insurance activities are permitted under section 601 (A) and (B) of the Garn-St Germain Depository Institutions Act of 1982. These activities would be conducted from an office in Junction City, Kansas, serving north Central Kansas, including Geary County, Kansas, the contiguous counties and the Fort Riley Military Reservation. Comments on this application must be received not later than June 22, 1983.

Board of Governors of the Federal Reserve System, May 23, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-14256 Filed 5-26-83; 8:45 am]

BILLING CODE 6210-01-M

F & M Financial Services Corp.; Proposed Acquisition of Leasenu, Inc.

F & M Financial Services Corporation, Menomonee Falls, Wisconsin, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Leasenu, Inc., Menomonee Falls, Wisconsin.

Applicant states that the propose subsidiary would engage in leasing activities. These activities would be performed from offices of Applicant's subsidiary in Menomonee Falls, Wisconsin, and the geographic area to be served is the State of Wisconsin. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the

evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than June 20, 1983.

Board of Governors of the Federal Reserve System, May 23, 1983.

James McAfee,

Associate Secretary of the Board.

G. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *Timber Bancorp*, Roseburg, Oregon; to become a bank holding company by acquiring 100 percent of the voting shares of Timber Community Bank, Roseburg, Oregon. Comments on this application must be received not later than June 22, 1983.

H. **Board of Governors of the Federal Reserve System** (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *Girod Trust Company, S.A.*, Geneva, Switzerland; to become a bank holding company by acquiring at least 80 percent of the voting shares of Girod Trust Company, Old San Juan, Puerto Rico. This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of New York. Comments on this application must be received not later than June 22, 1983.

2. *IVB Financial Corporation*, Philadelphia, Pennsylvania; to become a bank holding company by acquiring 100 percent of the voting shares of Industrial Valley Bank and Trust Company, Philadelphia, Pennsylvania. This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Philadelphia. Comments on this application must be received not later than June 22, 1983.

Board of Governors of the Federal Reserve System, May 23, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-14257 Filed 5-26-83; 8:45 am]

BILLING CODE 6210-01-M

Persia Bancorp, Inc.; Formation of Bank Holding Company

Persia Bancorp, Inc., Woodbine, Iowa, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 84 percent or more of the voting shares of Home Savings Bank, Persia, Iowa. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Persia Bancorp, Inc., Woodbine, Iowa, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Willard Insurance Agency, Persia, Iowa.

Applicant states that the proposed subsidiary would engage in general insurance activities in a community of less than 5,000 persons. These activities would be performed from offices of Applicant's subsidiary in Persia, Iowa, and the geographic area to be served is in and within ten miles of Persia, Iowa. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permisible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether

consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Reserve Bank not later than June 23, 1983.

Board of Governors of the Federal Reserve System, May 23, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-14255 Filed 5-26-83; 8:45 am]

BILLING CODE 6210-01-M

Security Pacific Corp.; Proposed Expansion of Activities of Security Pacific Mortgage Services, Inc.

Security Pacific Corporation, Los Angeles, California, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to engage through its indirect subsidiary, Security Pacific Mortgage Services, Inc., Los Angeles, California, in execution and clearance, on behalf of affiliated and unaffiliated persons, of financial futures contracts on U.S. Government securities and U.S. and foreign money market instruments on commodity exchanges which Security Pacific Mortgage Services, Inc., may join as a clearing member; the execution and clearance, on behalf of affiliated and unaffiliated persons, of options on financial futures contracts, options on securities issued or guaranteed by the U.S. Government or its agencies and options on U.S. and foreign money market instruments; and the purchase and sale, for its own account and as a broker for affiliated and unaffiliated persons, of securities issued or guaranteed by the U.S. Government or its agencies. Security Pacific Mortgage Services, Inc., will offer incidental investment advice in connection with the proposed activities, including its brokerage activities with respect to U.S. government securities and options on government securities. These activities will be performed from offices of Applicant's subsidiary in Denver, Colorado; Los Angeles, California; Atlanta, Georgia and Seattle, Washington, and the geographic area to be served is worldwide.

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C., not later than June 23, 1983.

Board of Governors of the Federal Reserve System, May 23, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-14256 Filed 5-26-83; 8:45 am]

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket Nos. 78P-0432 et al.]

Availability of Approved Variances for Laser Light Shows

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces that the Acting Director, Office of Radiological Health (formerly the Bureau of Radiological Health) of FDA's National Center for Devices and Radiological Health has approved variances from the performance standard for laser products for certain laser light shows, or laser light show projectors manufactured and produced by 10 organizations. The projector provides a laser display to produce a variety of special lighting effects principally to provide entertainment to general audiences.

DATES: The effective dates and termination dates of the variances are listed in the table below.

ADDRESS: The application and all correspondence on the various applications have been placed on display in the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Norbert P. Heib, Jr., National Center for Devices and Radiological Health (HFX-460), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3426.

SUPPLEMENTARY INFORMATION: Under § 1010.4 (21 CFR 1010.4) of the regulations governing establishment of performance standards under section 358 of the Radiation Control for Health and Safety Act of 1968 (42 U.S.C. 263f), each of the organizations listed in the table below has been granted a variance from § 1040.11(c) of the performance standard for laser products (21 CFR 1040.11(c)). Each variance permits the listed manufacturer to introduce into commerce a demonstration laser product that is the manufacturer's particular variety of laser light show, or laser light show projector or both, assembled and produced by it. All the laser products will have levels of accessible laser radiation in excess of the Class II levels permitted by § 1040.11(c) but not exceeding those required to perform the intended function of the product.

Suitable means of radiation protection will be provided by constraints on the physical and optical design of the products, and by procedures for personnel who will operate the products. Therefore, on the dates specified in the table below, FDA approved the requested variances by letter, from the Acting Director, Office of Radiological Health, to each manufacturer.

So that the product will bear evidence of the variance granted to the manufacturer of that product, each product shall bear on the certification label required by § 1010.2(a) (21 CFR 1010.2(a)) the docket number and effective date of the variance as specified in the table below.

Docket No.	Manufacturing organization	Demonstration laser products	Effective date/ Termination date
78P-0432 (extension)	Laser Concepts, 3246 Grand Avenue South, Room 100, Minneaplois, MN 55408.	Laser Light Shows and Projector, Laserscan 2001 Scanner, Which Incorporates a Class III Helium-Neon Laser, and for Laser Light Shows Assembled and Produced by Laser Concepts Using the Laserscan 2001.	Mar. 15, 1983. May 1, 1985.
80P-0151 (extension)	Guptill Arena, Route 1, Cohoes, NY 12407	Laser Light Show Incorporating a SFC-2002 Laser Scanning System Manufactured and Produced by Guptill Arena.	Feb. 10, 1983. Feb. 10, 1985.
80P-0215 (extension)	Metatron Laser Art, 3130 Ala Ilima, Apt. 6A, Honolulu, HA 96818.	The Class IIIb Metatron Laser Art Projector, Model M.L. 95-5K, and Laser Light Shows Assembled and Produced by Metatron Laser Art Alone or With Laser Show, Inc.	Mar. 16, 1983. Mar. 16, 1985.
80P-0480 (extension)	Sudekum Planetarium, Cumberland Museum Science Center, 800 Ridley Boulevard, Nashville, TN 37203.	Laser Light Shows and the Incorporated Laser Projectors Assembled and Produced by the Cumberland Museum and Science Center. These Shows May Incorporate a Class III Laser Systems Development Corporation Model C-3(a) He Ne and Ar-ion Laser Projector or a Projector Containing a Class III Amencan Optical Co. Model 3100 He Ne Laser System	Feb. 4, 1983 Aug 31, 1983.
80P-0495 (extension)	Showlasers, Inc., P.O. Box 470206, Dallas, TX 75247.	The Class IV Showlaser Model LP1 Laser Effects Projector Containing Argon, Krypton, or Dye Lasers and for Laser Light Shows Assembled and Produced by Showlasers, Inc.	Mar. 7, 1983. Feb. 26, 1985.
81P-0278 (amendment) (reinstate- [redacted].	Lightform, NS 118, Buffalo State College, 1300 Elmwood Avenue, Buffalo, NY 14222.	The Lightform Laser Light Show Containing the Lightform Projectors Which May Use He-New, Ar-Kr, He-Cd, NdYAG, Copper Vapor, or Mercury Vapor Lasers With a Maximum Peak Power of 20 Watts.	Mar. 9, 1983. July 21, 1984
82P-0248 (amendment)	Yellow Brick Raod, Inc., 2777 Allen Parkway, Suite 984, Houston, TX 77019.	Laser Light Shows Assembled and Produced by Yellow Brick Road, Inc. at Numbers Disco and in Mobile Shows to be Performed in a Variety of Locations Incorporating the LMS Series Krypton Laser Projector Manufactured by Laser Media, Inc. The Numbers Disco Portion of this Variance is for a Fixed Installation While the Mobile Portion is for Shows to be Performed at Different Locations for Varying Periods of Time.	Mar. 9, 1983. Aug. 19, 1984.
83P-0071	Busch Entertainment Corp., d.b.a. Bush Gardens. P.O. Drawer FO, Williamsburg, VA 23187.	Laser Light Shows Produced and Assembled by Busch Entertainment Corporation d.b.a. Busch Gardens at the Hastings Theater Incorporating a Laser Media LMS Series Laser Projection System.	Mar. 15, 1983 Mar. 15, 1985.
83P-0078	Lazarus Productions, 2821 Ninth Street, Berkeley, CA 94710.	Laser Light Shows Incorporating the Macron Beam I Laser Projector Assembled and Produced by Lazarus Productions.	Mar. 17, 1983. Mar. 17, 1985.
83P-0085	Mr. Albert J. Hill, 2728 Grove Street, Berkeley, CA 94703.	Laser Light Shows Assembled and Produced by Albert J. Hill Incorporating Class IV Laserscape II Krypton and ABP-1 Argon Laser Projectors.	Mar. 17, 1983. Mar. 17, 1985.

In accordance with § 1010.4, the application and all correspondence (including the written notice of approval) on the various applications have been placed on public display in the Dockets Management Branch, Food and Drug Administration (address above), and may be seen in that office between 9 a.m. and 4 p.m., Monday through Friday.

Dated: May 19, 1983.

William F. Randolph,

Acting Associate Commissioner for Regualtory Affairs.

[FR Doc. 83-14264 Filed 5-26-83; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 83N-0030; DESI 50213]

Certain Fixed-Combination Drug Products Containing a Tetracycline and One or More Sulfonamides (With or Without Analgesic) for Oral Administration; Final Order on Objections and Request for a Hearing; Withdrawal of Approval of New Drug Applications

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Commissioner of Food and Drugs denies a hearing and withdraws approval of the new drug applications for Tetrex Syrup with Triple Sulfonamides, Azotrex Syrup, Polycycline Suspension with Triple Sulfonamides, and Azotrex Capsules. These products, which contain a tetracycline in fixed combination with one or more sulfonamides (with or without an analgesic—phenazopyridine hydrochloride), are or have been offered to treat various infections, primarily those involving the urinary tract. The basis of the withdrawal is that the drug products lack substantial evidence of effectiveness for their labeled indications.

EFFECTIVE DATE: June 27, 1983.

FOR FURTHER INFORMATION CONTACT: Douglas I. Ellsworth, National Center for Drugs and Biologics (HFN-8), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857; 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of April 2, 1969 (34 FR 6008), the Food and Drug Administration (FDA) announced its evaluation of reports received from the National Academy of Sciences/National Research Council, Drug Efficacy Study Group (NAS/NRC) on Tetrex Syrup with Triple Sulfonamides (NDA 60-050), Azotrex Syrup (NDA 60-031), Polycycline Suspension with Triple Sulfonamides (NDA 50-282), and Azotrex Capsules (NDA 50-213); all manufactured by Bristol Laboratories, Inc., P.O. Box 657, Syracuse, NY 13201 (Bristol). These products contain tetracycline and one or more sulfonamides as antibacterial components. One product also contains an analgesic component—phenazopyridine hydrochloride. FDA evaluated these antibiotic-containing combination drug products as lacking substantial evidence of effectiveness, proposed to initiate proceedings under section 507 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 357) to revoke provisions for their certification, and offered interested persons 30 days to submit data bearing on the proposal.

Because the data submitted in response to the April 1969 notice did not provide substantial evidence of effectiveness for any of these combination drugs, FDA published an order in the **Federal Register** of June 30, 1970 (35 FR 10587) that amended the antibiotic regulations (formerly 21 CFR Parts 146c and 148n; now 21 CFR Part 446) to revoke provisions for their certification. Also affected by this order was Urobiotic Capsules (NDA 60-568) containing oxytetracycline hydrochloride (equivalent to 125 or 250 milligrams (mg) of oxytetracycline), 250 mg of sulfamethizole, and 50 mg of phenazopyridine hydrochloride marketed by Pfizer, Inc., 235 East 42nd St., New York, NY 10017 (Pfizer). This order was to become effective in 40 days and gave affected manufacturers and interested persons 30 days to file objections and request a hearing. Subsequently, by order published in the **Federal Register** of August 8, 1970 (35 FR 12653), FDA extended the time for filing objections and hearing requests an additional 8 days and changed the effective date of the June 1970 order to August 17, 1970. The August 1970 order also stated that the effective date of the amendments would be extended if objections were filed.

On July 29, 1970, Bristol filed objections and requested a hearing. Bristol's submission consisted solely of

legal objections; no data were presented to support the claims made for the firm's affected drugs. On August 7, 1970, Pfizer requested a hearing and supplied data concerning Urobiotic 250 Capsules—the product with 250 mg of oxytetracycline. (Pfizer discontinued the marketing of the product with 125 mg of oxytetracycline.) No objections or hearing requests were filed by any other person.

Despite the filing of timely objections by Bristol and Pfizer, the amendments inadvertently were not stayed by the agency, and succeeding codifications of the antibiotic regulations did not explicitly provide for the certification of these products. Nevertheless, FDA permitted Bristol and Pfizer to continue distribution of their products, with appropriate batch testing, pending resolution of their hearing requests. Later, FDA exempted all classes of antibiotic drugs from batch certification and such products became the subjects of approved new drug applications. (See 47 FR 39155; September 7, 1982.)

By letters dated January 17, 1978, the Director of the Bureau of Drugs advised Bristol and Pfizer that he had evaluated their hearing requests and concluded that summary judgment should be considered. Under 21 CFR 430.20(b)(8)(iii), the letters enclosed a proposed order denying the hearing requests. The Director notified the firms that they had 60 days to respond to the proposal and to demonstrate that there is a genuine and substantial issue of fact which justifies a hearing. Pfizer responded with data, information, and analyses. These materials are currently under review, and the order that follows does not apply to Pfizer's NDA 60–568 for Urobiotic.

Bristol responded with further legal arguments; no data or analyses were submitted. The Commissioner of Food and Drugs has considered the legal arguments offered by Bristol and concludes that they are insubstantial and present no genuine issue of material fact requiring a hearing.

I. The Drugs

A. Tetrex Syrup with Triple Sulfonamides: Each 5 milliliters (mL) contains tetracycline (equivalent to 125 mg of tetracycline hydrochloride), 167 mg of sulfadiazine, 167 mg of sulfamerazine, and 167 mg of sulfamethazine.

B. Azotrex Syrup: Each 5 mL contains tetracycline (equivalent to 125 mg of tetracycline hydrochloride) and 250 mg of sulfamethizole.

C. Polycycline Suspension with Triple Sulfonamides: Each 5 mL contains 125 mg of tetracycline hydrochloride, 167 mg of sulfadiazine, 167 mg of sulfamerazine, and 167 mg of sulfamethazine.

D. Azotrex Capsules: Each capsule contains tetracycline phosphate complex (equivalent to 125 mg of tetracycline hydrochloride), 250 mg of sulfamethizole, and 50 mg of phenazopyridine hydrochloride.

II. Recommended Uses

A. Tetrex with Triple Sulfonamides is not currently marketed and current labeling is not available. Previous labeling recommended the drug product for mixed infections and for infections due to organisms that are more sensitive to tetracycline and sulfonamides than to either antibacterial agent alone, including mixed infections of the urinary tract and of the respiratory tree.

B. Azotrex Syrup is not currently marketed and current labeling is not available. Previous labeling recommended the drug product to provide systemic and local antibacterial action in acute and chronic urinary tract infections due to organisms sensitive to tetracycline and sulfamethizole. Labeling also indicated that the drug product could be used in mixed infections in which the invading organisms are more sensitive to the combination than to either antibacterial agent alone.

C. Polycycline Suspension with Triple Sulfonamides is not currently marketed and current labeling is not available. Previous labeling recommended the drug product for the treatment of bacterial infections suspected to be more susceptible to combined therapy than to either tetracycline or sulfonamide therapy alone; for the treatment of bacillary dysentery, especially that caused by the Shigella organism; and for the tratment of gonorrhea. The labeling also indicated that sulfonamides, when combined with an antibotic, assist in the prevention of secondary infections, as well as augment the effectiveness of the antibiotic.

D. Azotrex Capsules is currently marketed and current labeling recommends the drug product as follows:

> This drug product provides systemic and local antibacterial action in acute and chronic urinary tract infections due to organisms sensitive to tetracycline and sulfamethizole. It may be used in mixed infections where the invading organisms are more sensitive to the combination than to either antibacterial agent alone and is not intended for the treatment of infections where complete response to either component might be expected.
>
> It is indicated in the treatment of cystitis, urethritis, pyelonephritis, ureteritis, and prostatitis due to bacterial infection, prior to and following genitourinary surgery and instrumentation, prophylactically in patients with urethrostomies and cord bladders.
>
> In geriatrics this drug is particularly useful when exacerbations of infection occur in such conditions as cystocele, prostatitis, and nonspecific urethritis.
>
> Infections caused by beta-hemolytic streptococci should be treated for at least 10 days to help prevent the occurrence of rheumatic fever or acute glomerulonephritis.

The labeling also claims that Azotrex Capsules possesses two effects: one an antibacterial effect due to its tetracycline and sulfamethizole components; the other an analgesic effect due to its phenazopyridine hydrochloride component.

III. Legal Arguments

In the proposed final order, the Bureau of Drugs stated that Bristol's objections were based on then-pending court cases and noted that both cases were subsequently decided adversely to Bristol's contentions and reliance. *Pfizer, Inc.* v. *Richardson*, 434 F.2d 536 (2d Cir. 1970) and *Pharmaceutical Mfrs. Ass'n* v. *Richardson*, 318 F. Supp. 301 (D. Del. 1970). The Bureau also pointed out that it is settled that the Commissioner has the authority to establish criteria for adequate and well-controlled clinical investigations necessary to demonstrate effectiveness of drug products on the market, including antibiotics, and may condition the holding of a formal evidentiary hearing on a showing that reasonable grounds exist. *Weinberger* v. *Hynson, Westcott, & Dunning, Inc.*, 412 U.S. 609 (1973); *Agri-Tech, Inc.* v. *Richardson*, 482 F.2d 1148 (8th Cir. 1973); *Pfizer, Inc.* v. *Richardon, supra; Ciba-Geigy Corp.* v. *Richardson*, 446 F.2d 466 (2d Cir. 1971); *Upjohn Co.* v. *Finch*, 422 F.2d 944 (6th Cir. 1970); *Pharmaceutical Mfrs. Ass'n* v. *Richardson, supra.* In response to the proposed final order, Bristol reaffirmed its legal objections. Bristol's response does not change the fact that the courts have ruled adversely to the firm's objections.

Bristol further contends that all data in the record of this proceeding that are scientifically pertinent to the drugs manufactured by Bristol must be considered in support of its products. The Commissioner agrees; however, no data have been submitted in this proceeding that are scientifically pertinent to Bristol's products. The data submitted by Pfizer, the only other manufacturer involved in this proceeding (in support of a product previously certified under a different antibiotic regulation than any of Bristol's products—previously 21 CFR 148n.4 for Urobiotic 250 as opposed to 21 CFR 146c.204, 146c.217, and 146c.222 for

Bristol's products), relate to a combination that contains a ratio of 250 mg of oxytetracycline to 250 mg of sulfamethizole as its antibacterial components. None of Bristol's products contains this ratio of a tetracycline component to a sulfonamide component. Azotrex Capsules and Azotrex Syrup each contain a ratio of 125 mg of tetracycline to 250 mg of sulfamethizole. Tetrex Syrup with Triple Sulfonamides and Polycycline Suspension with Triple Sulfonamides each contain a ratio of 125 mg of tetracycline to 501 mg of sulfonamides. Obviously, the submitted data are not applicable to Bristol's products (21 CFR 314.111(a)(5); 300.50).

IV. Findings

On the basis of the foregoing, the Commissioner finds that there is a lack of substantial evidence that Tetrex Syrup with Triple Sulfonamides, Azotrex Syrup, Polycycline Suspension with Triple Sulfonamides, and Azotrex Capsules have the effects they are represented to have under the conditions of use prescribed, recommended, or suggested in their labeling, and a lack of substantial evidence that each component in these products contributes to the total effects claimed for them. Furthermore, Bristol has failed to show that there is a genuine and substantial issue of fact requiring a hearing.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053 as amended (21 U.S.C. 355)) and under the authority delegated to the Commissioner (21 CFR 5.10), Bristol's request for a hearing is denied, and approval of the new drug applications for Tetrex Syrup with Triple Sulfonamides (NDA 60–050), Azotrex Syrup (NDA 60–031), Polycycline Suspension with Triple Sulfonamides (NDA 50–282), and Azotrex Capsules (NDA 50–213) is withdrawn effective June 27, 1983.

Dated: May 19, 1983.

Mark Novitch,

Deputy Commissioner of Food and Drugs.

[FR Doc. 83–14263 Filed 5–26–83; 8:45 am]

BILLING CODE 4160–01–M

[Docket No. 83N–0154]

International Drug Scheduling; Convention on Psychotropic Substances; Benzodiazepines

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces that it will consder the submitted data or comments concerning the abuse potential, actual abuse, and medical usefulness of 12 "benzodiazepine" or "minor tranquilizer" drugs in preparing a response from the United States to the World Health Organization (WHO) about the abuse liability of these drugs. WHO will use this information to consider whether to recommend that international restrictions be placed on these drugs. The information was requested in a notice in the **Federal Register** of May 13, 1983. The May 13 notice also stated that the official notification from WHO had not been received and that when it was, it would be published in a subsequent **Federal Register** notice. The official notification is now available and is reprinted below as required by law.

DATE: Comments by June 13, 1983.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD, 20857, 301–443–6490.

FOR FURTHER INFORMATION CONTACT: Edwin V. Dutra, Jr., National Center for Drugs and Biologics (HFN–7), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD, 20857, 301–443–6490.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of May 13, 1983 (48 FR 21661), FDA asked people to submit information on abuse potential, actual abuse, and medical usefulness of 12 "benzodiazepine" or "minor tranquilizer" drugs. As stated in the May 13, 1983 notice, the Controlled Substances Act (CSA) (Title II of the Comprehensive Drug Abuse Prevention and Control Act of 1970) provides that, when WHO notifies the United States under Article 2 of the Convention on Psychotropic Substances that it has information that may justify adding a drug or other substance to one of the schedules of that Convention, transferring a drug or substance from one schedule to another, or deleting it from the schedules, the Secretary of State must transmit the notice to the Secretary of Health and Human Services (HHS). The Secretary of HHS must then publish the notice in the **Federal Register** and provide an opportunity for interested persons to submit comments to assist HHS in preparing scientific and medical evaluations of the drug or substance.

The Secretary of HHS received the following notice from WHO on behalf of the Secretary-General:

The Secretary General of the United Nations presents his compliments to the Secretary of State of the United States of America and has the honour to inform His Excellency's Government that he has been asked to assist the Director-General of the World Health Organization in obtaining data on the following 39 benzodiazepines:

alprazolam	loprazolam
bromazepam	lorazepam
camazepam	lormetazepam
chlordiazepoxide	medazepam
clobazam	nimetazepam
clonazepam	nitrazepam
clorazepate	nordazepam
clotiazepam	oxazepam
cloxazolam	oxazolam
delorazepam	pinazepam
diazepam	pirenzepine
estazolam	prazepam
ethyl loflazepate	propizepine
etifoxine	temazepam
fludiazepam	tetrazepam
flunitrazepam	tofisopam
flurazepam	tibezonium
halazepam	triazolam
haloxazolam	zopiclone
ketazolam	

A WHO expert group will review these substances in September with a view to determining whether any of them should be brought under the control of the 1971 Convention on Psychotropic Substances.

The Secretary-General would therefore be most grateful if His Excellency's Government would submit data on each substance concerning the extent or likelihood of abuse, the degree of seriousness of the public health and social problems associated with such abuse and the usefulness in medical therapy.

It would also be very useful if His Excellency's Government would indicate whether any of the above-mentioned substances have been seized from the illicit drug traffic during the past three years, and, if so, the amounts seized, the number of such seizures and, where this could be determined, the provenance of the substances. Any additional information on clandestine laboratories where these substances may have been manufactured and on precursors used in this process would also be valuable.

The Secretary-General has already received information relating to a number of the above-mentioned substances in response to this Notes verbales NAR/CL.5/1981 of 9 March 1981 (concerning chlordiazepoxide, clonazepam, clorazepate, diazepam, flurazepam, lorazepam, medazepam, nitrazepam, oxazepam, oxazolam, prazepam and temazepam) as well as NAR/CL.11/1982 of 30 March 1982 (concerning alprazolam, bromazepam, camazepam, clobazam, cloxazolam, estazolam, fludiazepam, flunitrazepam, halazepam, ketazolam, nimetazepam, nordazepam, pinazepam, tetrazepam and triazolam). It would accordingly be appreciated if data concerning the substances mentioned above for the first time (clotizepam, delorazepam, ethyl loflazepate, etifoxine, haloxazolam, loprozolam, lormetazepam, pirenzepine, propizepine, tofisopam, tibezonium and zopiclone) could be submitted together with any supplementary information which would be useful to update the files already prepared on the other 27 substances.

In view of the fact that the Secretary-General must prepare a report for WHO on

this subject, it would be appreciated if the information requested in this note could be sent to the Director, United Nations Division of Narcotic Drugs, Vienna International Centre, P.O. Box 500, A–1400 Vienna, Austria, as soon as possible, and preferably before 15 July 1983.

April 21, 1983.

Therefore, as required by section 201(d)(2)(A) of the Controlled Substances Act (21 U.S.C. 811(d)(2)(A)), FDA on behalf of HHS invites interested persons to submit data or comments regarding the named benzodiazepine drugs. As stated in the May 13 notice, however, full information on only 12 minor tranquilizer drugs need be submitted. These 12 drugs are clotizepam, delorazepam, ethyl loflazepate, etifoxine, haloxazolam, loprazolam, lormetazepam, pirenzepine, propizepine, tibezonium, tofisopam, and zopiclone. As explained in the notification above and in the May 13 notice, supplementary information only is requested for the other 27 substances.

Note.—In the May 13, 1983 notice discussed above the substance "propizepine" is misspelled throughout the document. The correct spelling is as it appears in this notice.

Interested persons may, on or before June 13, 1983, submit to the Docket Management Branch (address above), written comments regarding this action. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: May 19, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

Panel on Review of Allergenic Extracts; Republishing of Meeting Notice

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is republishing the notice announcing a meeting of the Panel on Review of Allergenic Extracts scheduled for June 3 and 4, 1983. The meeting was announced in the **Federal Register** of May 13, 1983 (48 FR 21660). The notice is being republished because the meeting will have a closed presentation of data session. The Panel has received new information relevant to a pending biological license application for a modified ragweed pollen allergenic extract. This new information involves trade secret or confidential commercial information.

Panel on Review of Allergenic Extracts

Date, time, and place. June 3 and 4, 8 a.m., Rm. 115, Bldg. 29, 8800 Rockville Pike, Bethesda, MD.

Type of meeting and contact person. Closed presentation of data, June 3, 8 a.m. to 9 a.m.; open public hearing, June 3, 9 a.m. to 10 a.m.; open committee discussion, June 3, 10 a.m. to 5 p.m., June 4, 8:30 a.m. to 1:30 p.m.; Clay Sisk, National Center for Drugs and Biologics (HFN–6), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–5455.

General function of the committee. The committee reviews and evaluates data on the safety, effectiveness, and appropriate use of allergenic products intended for use in the diagnosis, prevention, or treatment of human diseases.

Agenda—Open public hearing. Any interested persons may present data, information, or views, orally or in writing, on issues pending before the committee.

Open committee discussion. The committee will continue the reevaluation of allergenic biological products previously classified in Category IIIA, the designation for those licenses biological products judged to have insufficient available data to classify as safe and effective, but which should remain licensed pending completion of further testing as provided in 21 CFR 601.25(e). The products are being reclassified under the procedures described in the **Federal Register** of October 15, 1982, (47 FR 46138) and 21 CFR 601.26. Allergenic extracts of pollens, molds, basidiomycetes, insects, foods, house dust, and inhalant allergens will be discussed.

Closed presentation of data. The committee will review trade secret or confidential commercial information relevant to a pending biological license application for a modified ragweed pollen allergenic extract. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Dated: May 24, 1983.

Mark Novitch,

Acting Commissioner of Food and Drugs.

[FR Doc. 83–14429 Filed 5–26–83; 8:45 am]

BILLING CODE 4160–01–M

Health Care Financing Administration

Medicaid Program; Hearing; Reconsideration of Disapproval of a New Hampshire State Plan Amendment

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of Hearing.

SUMMARY: This notice announces an administrative hearing on July 12, 1983 in Boston, Massachusetts to reconsider our decision to disapprove New Hampshire State Plan Amendment 82–17.

CLOSING DATE: Requests to participate in the hearing as a party must be received by June 13, 1983.

FOR FURTHER INFORMATION, CONTACT: Docket Clerk, Bureau of Eligibility, Reimbursement and Coverage, 365 East High Rise, 6325 Security Boulevard, Baltimore, Maryland 21207, Telephone: (301) 594–8261.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to disapprove a New Hampshire State Plan Amendment.

Section 1116 of the Social Security Act and 45 CFR Parts 201 and 213 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a State plan or plan amendment. HCFA is required to publish a copy of the notice to a State Medicaid agency that informs the agency of the time and place of the hearing and the issues to be considered. (If we subsequently notify the agency of additional issues which will be considered at the hearing, we will also publish that notice.)

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained in 45 CFR 213.15(b)(2). Any interested person or organization that wants to participate as amicus curiae must petition the Hearing Officer before the hearing begins, in accordance with the requirements contained in 45 CFR 213.15(c)(1).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

The issue in this matter is whether New Hampshire's proposal to limit Medicaid reimbursement for inpatient hospital services violates section 1902(a)(13)(A) of the Social Security Act (Act), 42 U.S.C. 1396(a)(13)(A). This provision requires, in relevant part, that payment for hospital services under the

State plan be through the use of payment rates which the State finds, and makes assurances satisfactory to the Secretary, are reasonable and adequate to meet the costs which must be incurred by efficiently and economically operated facilities in order to provide care and services in conformity with applicable State and Federal laws, regulations and quality and safety standards. The New Hampshire State Medicaid Plan currently provides for reimbursement of the reasonable costs of inpatient hospital services based upon the Medicare program's principles of reimbursement. New Hampshire proposes to amend its State plan to permit a reimbursement methodology which would limit payment to a percentage of the reasonable cost of services when the costs exceed the amount budgeted for such services. HCFA has determined that, although a State may consider budgetary constraints when it establishes a reimbursement methodology, the State cannot use such constraints to avoid the reimbursement requirements of section 1902(a)(13)(A) of the Act. HCFA determined that the budget constraints contained in the reimbursement mehodology proposed by New Hampshire would reduce reimbursement for all inpatient hospital services to 80 percent of the reasonable costs of services. As indicated above, sections 1902(a)(13)(A) of the Act requires a State to utilize reimbursement rates which are reasonable and adequate to meet the costs which must be incurred by an efficiently and economically operated facility. HCFA therefore concluded that application of New Hampshire's proposed methodology, which would reduce reimbursement to 20 percent below the costs which must be incurred by even the most efficiently and economically operated facility in the State, violates section 1902(a)(13)(A) of the Act.

The notice to New Hampshire announcing an administrative hearing to reconsider our disapproval of its State plan amendment reads as follows:

Mr. Richard A. Chevrefils, *Director,*
Department of Health and Welfare,
Division of Welfare,
Hazen Drive,
Concord, New Hamsphire 03301

Dear Mr. Chevrefils: This is to advise you that your request for reconsideration of the decision to disapprove New Hampshire State Plan Amendment 82-17 was received on April 25, 1983. You have requested a reconsideration of whether this plan amendment, which would limit Medicaid reimbursement for inpatient hospital services to an amount determined solely by State budget appropriations, conforms to the requirements for approval under the Social Security Act and pertinent Federal requirements.

I am scheduling a hearing on your request to be held on July 12, 1983, at 10:00 a.m. in Room 1211, John F. Kennedy Federal Building, Boston, Massachusetts. If this date is not acceptable, we would glad to set another date that is mutually agreeable to the parties.

I am designating Mr. Stanley Krostar as the presiding official. If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached on (301) 594-8261.

Sincerely yours,

Carolyne K. Davis, Ph. D.

(Sec. 1116 of the Social Security Act (42 U.S.C. 1316))

(Catalog of Federal Domestic Assistance Program No. 13.714, Medical Assistance Program)

Dated: May 24, 1983.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

BILLING CODE 4120-03-M

Medicare Program; Temporary Delay in Periodic Interim Payments (PIP) to Hospitals

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: General notice.

SUMMARY: This notice announces a delay of Medicare payments that would otherwise be made in the last 3 weeks of September 1983 and September 1984 to hospitals reimbursed under the Periodic Interim Payment (PIP) method. This notice also specifies the conditions under which HCFA will authorize accelerated payments to individual hospitals to prevent them from experiencing severe financial distress as a result of the delay in payment. The notice reflects recent legislation (section 120 of Pub. L. 97-248), and is intended to help ensure that Medicare payments are made in accordance with that legislation.

DATES: Effective Date: Effective for the last 21 day period for which PIP payments would otherwise be made in fiscal year 1983 (October 1, 1982-September 30, 1983) and fiscal year 1984 (October 1, 1983-September 30, 1984), respectively.

FOR FURTHER INFORMATION CONTACT: William J. Goeller, (301) 597-1802.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1814(b) of the Social Security Act (the "Act") (42 U.S.C. 1395f(b)) requires that hospitals and other institutional providers furnishing health care services to Medicare beneficiaries be paid on the basis of the lesser of the reasonable cost or the customary charges for those services. Since virtually all providers' charges exceed their costs, the discussion below refers to cost reimbursement.

In addition, because the actual costs of a provider's services cannot be determined until the provider submits its detailed cost report after the end of its accounting period, section 1815(a) of the Act (42 U.S.C. 1395g(a)) requires that payments for services furnished be made at such time, or times, as the Secretary believes appropriate, but not less often than monthly. These are referred to as interim payments. The total interim payments made during each accounting period are intended to approximate, as closely as possible, the total Medicare reimbursement that would be due during the year, and are estimated based on the data available.

Current Medicare regulations (42 CFR 405.454) permit the amount of these interim payments to be determined by either the "regular method", or the "periodic interim payment" (PIP) method. Under the "regular method", payments of estimated costs are based on the volume of services, as indicated by individual provider billings submitted during a billing cycle. Under the PIP method, providers are paid on a fixed interval at predetermined rates that are based on estimated annual costs. In both cases, adjustments are made at the settlement of the cost report to reflect the actual amount due the provider. At that time, any underpayments or overpayments for the period are corrected.

The PIP method was designed as an administrative device to reduce the pressure of paperwork on providers in the preparation, submittal, and processing of billing forms, and to alleviate cash flow problems experienced by them under the regular method as a result of bill processing problems. Its principal feature is that it permits payment of predetermined, standard amounts that are not directly based on individual provider billings submitted during a billing cycle and, therefore, are not dependent on provider and intermediary bill processing practices.

Providers reimbursed under the PIP method generally receive payments for a two-week service period, and these

payments are issued no earlier than 14 days after the end of the service period to which they apply. This method, therefore, involves an average lapse of three weeks between delivery of service and disbursement of payment for these services. The average time lag between the date of service and the date of payment under the regular method is approximately six weeks.

II. Temporary Deferral of PIP

A. Recent Legislation

In recognition that the average time lag in payment for providers using the PIP method is approximately three weeks shorter than the average lag for providers receiving payment under the regular method, and in the interest of controlling FY 1983 and FY 1984 program outlays, Congress enacted legislation to require a delay in the flow of PIP payments to hospitals during both September 1983 and September 1984. (See S. Rep. No. 97–494, 97th Cong., 2nd Sess. 30 (1982).) This legislation (section 120 of Pub. L. 97–248, the Tax Equity and Fiscal Responsibility Act of 1982) provides that, notwithstanding section 1815(a) of the Act, with respect to the last 21 days for which PIP payments would otherwise be made during FY 1983, these payments will be deferred until FY 1984. The legislation also requires a similar deferral of PIP payments for the last 21 days for which PIP payments would otherwise be made during FY 1984. Section 120 thus supersedes 42 CFR 405.454(j) to the extent that the latter is inconsistent with the former. In practice, this will mean a delay in issuance of one and one-half PIP payments at the end of both fiscal years 1983 and 1984 in those cases where payments are on a biweekly cycle. Where the PIP cycle is not on a biweekly basis, 21 days' worth of payments will be delayed at the end of each of the two fiscal years. To minimize hardship to hospitals as a result of this delay, we will instruct intermediaries to pay the reimbursement amounts no later than October 4, 1983 for payments deferred in FY 1983 and no later than October 2, 1984 for payments deferred in FY 1984.

The following example illustrates the manner in which the PIP delay will be implemented: The Medicare fiscal intermediary for Hospital A is ordinarily scheduled to issue biweekly PIP payments to the hospital on September 9 and 23, and October 7, 1983. Each biweekly payment is in the amount of $100,000. However, as a result of the temporary delay requirements for PIP, the intermediary will adjust its payments for the last three weekly payment amounts that would have otherwise been issued in FY 1983. It will release a PIP payment in the amount of $50,000 to Hospital A on September 9, 1983. (Half the regular PIP payment is withheld since half of the two-week period represented by that PIP payment falls within the three-week period whose payments must be delayed.) No PIP payment is issued on September 23, 1983. (That payment would have been for the two-week period falling entirely within the three-week period whose payment must be delayed.) On October 4, 1983, the intermediary will release a payment of $150,000 to Hospital A covering the amounts withheld from the September payment schedule. The intermediary also will resume its normal PIP schedule and issue a payment of $100,000 to the hospital on October 7, 1983.

The implementation of this provision will not change the normal schedule of PIP disbursement for any period other than those identified above. In accordance with the intent of Congress to control FY 1983 and FY 1984 expenditures, we will not consider this temporary deferral as a basis for hospitals to request or obtain accelerated payments, or for any upward adjustment in PIP rates during the quarter that deferral occurs, except as described in section II. B. below. Intermediaries will be expected to maintain all regular PIP activities and schedules while delaying the payments deferred as a result of section 120 so that there will be no other effect on the PIP process.

Under the law, this deferral of PIP will apply solely to hospitals; it will not apply to skilled nursing facilities and home health agencies being reimbursed under this payment mechanism. Also, it will not apply to hospitals that are paid under the regular method.

B. Hospitals Under Financial Hardship

The legislative history of this provision cited above indicates that Congress recognized that any short-term interruption in cash flow could result in substantial financial distress to hospitals with insufficent working capital and who are unable to obtain a short-term loan.

This situation will be particularly acute for those hospitals that receive a substantial portion of their reimbursement revenues from the Medicare program. In these instances, Congress expected the Department to utilize existing regulations that provide for accelerated payments for providers in financial difficulties.

Current regulations at 42 CFR 405.454(h) permit accelerated payments to a provider when the provider has experienced financial difficulties due to delay by the intermediary in making payments. Accordingly, under this temporary deferral, we will authorize intermediaries to make accelerated payments to hospitals that are experiencing cash flow problems caused by the interruption of PIP when:

A. The provider received more than one-half of its total revenue from the Medicare program in the last cost-reporting period for which a completed cost report was submitted, and

B. The provider, on the basis of the intermediary's knowledge, cannot obtain a short-term loan from its usual lending sources to cover its cash flow shortfall resulting from the temporary deferral of PIP payments.

In these situations only, a fiscal intermediary will be permitted to make accelerated payments to the hospital for the period between the last full PIP amount made for FY 1983 and FY 1984 and the date on which the deferred PIP payment is made in the following fiscal year.

(Secs. 1102, 18414(b), 1815(a), 1833(a)(2), 1861(v), and 1871 of the Social Security Act; 42 U.S.C. 1302, 1395f(b), 1395g(a), 1395l(a)(2), 1395x(v), and 1395hh)

(Catalog of Federal Domestic Assistance Program, No. 13.773, Medicare—Hospital Insurance Program, No. 13.774 Medicare—Supplementary Medical Insurance Program)

Dated: April 14, 1983.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

BILLING CODE 4120–03–M

Health Resources and Services Administration

National Advisory Council on the National Health Service Corps; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of June 1983:

Name: NATIONAL ADVISORY COUNCIL ON THE NATIONAL HEALTH SERVICE CORPS

Date and Time: June 15–17, 1983, 1:00 p.m.

Place: Parklawn Building, Conference Room M on June 15. Parklawn Building, Conference Room G on June 16–17, 5600 Fishers Lane, Rockville, Maryland 20857.

Open for entire meeting.

Purpose: The Council will advise and make appropriate recommendations on the National Health Service Corps (NHSC) program as mandated by legislation. It will

also review and comment on proposed regulations promulgated by the Secretary under provisions of the legislation.

Agenda: The meeting will cover remarks by the Administrator, and the Director of the Bureau of Health Care Delivery and Assistance; discussion of the National Health Service Corps 1984 Placement and Reimbursement Policies; and the status of the legislation.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should write to or contact Ms. Charlotte Walch, or Mr. Billy Sandlin, National Health Service Corps, Health Resources and Services Administration, Room 6–40, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, telephone: 301 443–5493.

Agenda items are subject to change as priorities dictate.

Dated: May 24, 1983.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

BILLING CODE 4160–15–M

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on May 20.

Public Health Service

National Institutes of Health

Subject: Career Information Service Call Record Form (0925–0176)—reinstatement
Respondents: Individuals
OMB Desk Officer: Fay S. Iudicello

Office of the Assistant Secretary for Health

Subject: Evaluation of the Data Collection Policies of the National Ambulatory Medical Care Survey (0937–0109)—New
Respondents: Hospitals
OMB Desk Officer: Fay S. Iudicello

Health Care Financing Administration

Subject: Early and Periodic Screening, Diagnosis and Treatment Report (HCFA–156)—New
Respondents: State Medicaid agencies
Subject: Health Insurance Claim Form (HCFA 1500)—Revised
Respondents: Physicians and medical suppliers participating in the Medicare program
OMB Desk Officer: Fay S. Iudicello

Copies of the above information collection clearance packages can be obtained by calling the HHS Reports Clearance Officer on 202–245–6511.

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, D.C. 20503, Attn.: (name of OMB Desk Officer).

Dated: May 23, 1983.

Dale W. Sopper,

Assistant Secretary for Management and Budget.

BILLING CODE 4150–4–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. D–83–696]

Office of Regional Administrator; Region V, Chicago; Designation

AGENCY: Housing and Urban Development Department

ACTION: Designation of Acting Regional Administrator; Order of Succession.

SUMMARY: The Regional Administrator, Region V (Chicago) is designating officials who may serve as Acting Regional Administrator during the absence, disability or vacancy in the position of Regional Administrator.

EFFECTIVE DATE: May 27, 1983.

FOR FURTHER INFORMATION CONTACT: Richard J. Flando, Regional Counsel, Department of Housing and Urban Development, Region V, 300 South Wacker Drive, Chicago, Illinois 60606.

SUPPLEMENTARY INFORMATION: Designation of Acting Regional Administrator, Region V, Chicago.

The officers appointed to the following listed positions in Region V, (Chicago) are hereby designated to serve as Acting Regional Administrator, Region V, Chicago, during the absence, disability or vacancy in the position of the Regional Administrator with all the powers, functions and duties redelegated or assisgned to the Regional Administrator. Provided,

That no officer is authorized to serve as Acting Regional Administrator unless all other officers whose title precede his or hers in this designation are unable to act by reason of absence, disability or vacancy in said listed position:

1. Deputy Regional Administrator
2. Executive Assistant to the Regional Administrator
3. Regional Counsel
4. Director, Office of Regional Administration
5. Director, Office of Regional Housing
6. Director, Office of Regional Community Planning and Development
7. Director, Office of Regional Fair Housing and Equal Opportunity

The above designations supersede and cancel the designation of Acting Regional Administrator published on February 15, 1977 (42 FR 9233) and effective as of January 1, 1977, and any supplemental delegations, published or unpublished, that may be in effect prior to the date of this document.

(Delegation of Authority effective May 4, 1962 (27 FR 4319; Interim Order II, 31 FR 815, January 21, 1966))

Alfred C. Moran,

Regional Administrator, Region V, Chicago.

BILLING CODE 4210–01–M

[Docket No. N–83–1242]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ADDRESS: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410, telephone (202) 755–5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposals should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirements are described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: Procurement Policies and Procedures

Office: Administration.
Form Number: Handbook 2210.3 Rev. 1.
Frequency of Submission: On Occasion.
Affected Public: State or Local Governments and Businesses or Other Institutions (except farms).
Estimated Burden Hours: 150,000.
Status: New.
Contact: Michael Franklin, HUD, (202) 755–5294; Robert Neal, OMB, (202) 395–7316.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act. 42 U.S.C. 3535(d).

Dated: May 16, 1983.

Proposal: ADP Contracts

Office: Administration.
Form Number: Unassigned.
Frequency of Submission: Weekly, biweekly and monthly.
Affected public: Businesses or other institutions (except farms).
Estimated Burden hours: 10,431.
Status: New.
Contact: Margaret Bassford, HUD, (202) 755–5280; Robert Neal, OMB, (202) 395—7316.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: May 16, 1983.

Proposal: Application for Grants and Cooperative Agreements

Office: Administration.
Form number: SF–424, SF–269, SF–270, SF–272, etc.
Frequency of submission: On occasssion.
Affected public: Individuals or households, State or local governments and businesses or other institutions (except farms).
Estimated burden hours: 240,000.
Status: New.
Contact: Michael Franklin, HUD, (202) 755–5294; Robert Neal, OMB, (202) 395–7316.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C 3535(d).

Dated: May 16, 1983.

Proposal: Procurement from Established Supply Sources and Small Purchases

Office: Administration.
Form number: Handbook 2210.10.
Frequency of submission: On occasion.
Affected public: Business or other institutions (Except farms).
Estimated burden hours: 31,675.
Status: New.
Contact: Michael Franklin, HUD, (202) 755–5294; Robert Neal, OMB (202) 395–7316.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42, U.S.C. 3535(d).

Dated: May 16, 1983.

Proposal: Bidders Mailing List Application

Office: Administration.
Form Number: SF–129 and Checklist.
Frequency of Submission: On occasion.

[Docket No. N-83-1244]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ADDRESS: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street. S.W., Washington, D.C. 20410, telephone (202) 755–5310. This is not a tool-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David s. Cristy, acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposals should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirements are described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: Request for Approval of Advance, of Escrow Funds.

Office: Housing.
Form Number: HUD–92464.
Frequency of Submission: On occasion.
Affected Public: Businesses or other institutions (except farms).
Estimated Burden Hours: 18,000.
Status: Extension.
Contact: William C. Howell, HUD, (202) 426–0730; Robert Neal, OMB, (202) 395–7316.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: April 22, 1983.

Proposal: Application for Assignment of Portion of Set-Aside to Specific Project

Office: Housing.
Form Number: HUD–52516.
Frequency of submission: On occasion.
Affected Public: State or local governments.
Estimated Burden Hours: 20.
Status: Extension.
Contact: Ken Hoagland, HUD, (202) 426–0730; Robert Neal, OMB, (202) 395–7316.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: April 22, 1983.

BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[F-48315, F-14858-A]

Alaska Native Claims Selection; Gana-a 'Yoo, Ltd.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14 of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1611 (1976) (ANCSA)), will be issued to Gana-a 'Yoo, Limited, for the village of Galena, for approximately 11.24 acres. The lands involved are certain portions of U.S. Survey No. 2627 within Tps. 8 and 9 S., R. 10 E., Kateel River Meridian, Alaska.

The decision to issue conveyance will be published once a week, for four (4) consecutive weeks, in the TUNDRA TIMES upon issuance of the decision. For information on how to obtain copies, contact the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the regulations in 43 CFR Part 4, Subpart E, as revised.

If an appeal is taken, the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of the decision by personal service or certified mail, return receipt requested, shall have thirty days from the receipt of the decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who failed or refused to sign their return receipt, and parties who received a copy of the decision by regular mail which is not certified, return receipt requested, shall have until June 27, 1983 to file an appeal.

Any party known or unknown who is adversely affected by the decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of and requirements for filling an appeal may be obtained from the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

Department of the Army, Alaska District, Corps of Engineers, P.O. Box 7002, Anchorage, Alaska 99510

Gana-a 'Yoo, Limited, Box 38, Galena, Alaska 99741

Doyon, Limited, Land Department, Doyon Building, 201 First Avenue, Fairbanks, Alaska 99701

B. LaVelle Black,

Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-84-M

[INT DEIS 83-36]

Arizona; Safford District Draft Wilderness Environmental Impact Statement

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of availability of draft environmental impact statement (DEIS) and public hearings schedule.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, BLM has prepared a DEIS on the Proposed Wilderness Program for the Safford District, Cochise, Gila, Graham, and Greenlee Counties, Arizona and Hidalgo County, New Mexico.

The Proposed Action (Preferred Alternative) recommends portions of four wilderness study areas (WSAs) as suitable for inclusion in the National Wilderness Preservation System. The total public land in the four areas is 34,881 acres. The following table lists the WEAs and the total suitable and nonsuitable WSA acres.

PROPOSED ACTION

[BLM's preferred alternative]

Wilderness study areas		Public land acres		
Number	Name	WSA	Suitable	Nonsuitable
1A	Needle's Eye	9,485	8,970	515
8	Black Rock	8,492	6,590	1,902
14	Fishhooks	15,013	10,083	4,930
15	Day Mine	16,629	0	16,629
22/23/24(A)	Gila Box	17,831	0	17,831
22/23/24(B)	Turtle Mountain	17,422	0	17,422
48	Javelina Peak	17,870	0	17,870
60	Paloncito Mountains	12,317	0	12,317
65	Happy Camp Canyon.	16,761	9,238	7,523
Totals	9	131,820	34,881	96,939

There are four additional alternatives analyzed in the DEIS. They are: All Wilderness (9 WSAs, 131,820 acres), Enhanced Wilderness (9 WSAs, 98,618 acres), Moderate Wilderness (5 WSAs, 45,073 acres), and No Wilderness (no action).

DATES: BLM invites written comments on the DEIS to be submitted within 90 days of its filing with the Environmental Protection Agency. Comments must be received by August 31, 1983.

ADDRESSES: Comments should be sent to the District Manager, Bureau of Land Management, 425 E. 4th Street, Safford, Arizona 85546.

A limited number of DEIS copies are available upon request to the District Manager at the above address.

Public reading copies are available for review at the following locations:

Safford District Office, Bureau of Land Management, 425 E. 4th Street, Safford, Arizona 85546 Telephone: (602) 428–4040

Office of Public Affairs, Bureau of Land Management, Interior Building, 18th and C Streets, NW., Washington, D.C. 20240, Telephone: (202) 343–5717

Public Room, Arizona State Office Bureau of Land Management 2400 Valley Bank Center, Phoenix, Arizona 85073, Telephone: (602) 261–3706

In addition, the DEIS will be available for review at city libraries in Clifton, Globe, and Safford, Arizona and at libraries at Arizona State University in Tempe, Northern Arizona University in Flagstaff, and the University of Arizona in Tucson.

FOR FURTHER INFORMATION CONTACT: Lester K. Rosenkrance, District Manager, or Steve Know, Team Leader, at the above Safford district address.

SUPPLEMENTARY INFORMATION: BLM will receive oral and written comments at formal public hearings to be held on July 18, 1983 in Safford, Arizona; July 19, 1983 in Lordsburg, New Mexico; July 20, 1983 in Tucson, Arizona; and July 21, 1983 in Phoenix, Arizona. All hearings will begin at 7:00. The Safford hearing will be at the Old Armory Meeting Room, 921 Thatcher Boulevard. The Lordsburg hearing will be at the Lordsburg Cultural Center West Meeting Room, 313 E. 4th Street. The Tucson hearing will be at the Pima County Board of Supervisors Hearing Room, 111 W. Congress, 1st Floor. The Phoenix hearing will be at the Hotel Westcourt Ball Room, 10220 N. Metro Parkway East, Metro Center.

A hearing officer will preside over the hearings. A time limit may be placed on oral comments depending on the number of people who wish to make a statement. Those wanting to testify may preregister by submitting a written request by July 15, 1983 to the District Manager, Bureau of Land Management, 425 E. 4th Street, Safford, Arizona 85546. Individuals who do not preregister may register at the hearing location prior to the hearing.

BLM will give written and oral comments on the DEIS equal consideration during preparation of the Final EIS.

Dated: May 16, 1983.

D. Dean Bibles,

State Director.

[FR Doc. 83-14004 Filed 5-26-83; 8:45 am]

BILLING CODE 4310-84-M

Availability of the Draft Wilderness Environmental Impact Statement for Clark County, Nevada

AGENCY: Bureau of Land Management (BLM), Department of Interior.

ACTION: Notice of Availability of the Draft Environmental Impact Statement for Wilderness Study Areas: Clark Count, Nevada.

SUMMARY: Pursuant to Section 603 of the Federal Land Policy and Management Act of 1976 and Section 102(2)(c) of the National Environmental Policy Act of 1969, the BLM Las Vegas District has prepared a Draft Environmental Impact Statement (DEIS) on proposed wilderness suitability recommendations for Wilderness Study Areas (WSAs) in Clark County, Nevada.

SUPPLEMENTARY INFORMATION: The Clark County Wilderness DEIS analyzes the potential effects of designating or not designation all or portions of seven Wilderness Study Areas, totaling 383,429 acres, as wilderness. The goal of this analysis is to recommend for wilderness designation those areas where wilderness is determined to be the most appropriate use of the land and its resources. This analysis involved evaluation of the potential manageability of wilderness, accessibility of identified mineral values for exploration and development, and the enhancement and development of such resource values and uses as wildlife habitat, recreation, livestock grazing, cultural resources, utility corridors, critical watershed, and others.

The recommendations made in the Draft EIS are not final decisions. Following the public comments on the DEIS, a final EIS and recommendations will be prepared for the signature of the Secretary of the Interior, and submitted through the President to Congress for final decision on which areas will be designated into the National Wilderness Preservation System.

A mineral survey will be conducted by the U.S. Geological Survey and U.S. Bureau of Mines on those lands preliminarily recommeded suitable for wilderness designation prior to final recommendation by the BLM.

The following Wilderness Study Areas are evaluated in the Clark County Wilderness DEIS:

Arrow Canyon Range NV-050-0215—32,853 acres
Muddy mountains NV-050-0229—96,170 acres
Mount Stirling NV-050-0401—69,650 acres
La Madre Mountains NV-050-0412—56,967 acres
Pine Creek NV-050-0414—24,000 acres
North McCullough Mountains NV-050-0425—47,166 acres
South McCullough Mountains NV-050-0435—56,623 acres

Four alternatives were considered in addition to the Preferred Alternative. They are All Wilderness, Management Enhancement, Wilderness Accent, and No Wilderness (No Action). A discussion of the affected environment is briefly summarized and the environmental consequences anticipated from each of the five alternatives are documented in the DEIS.

The BLM's Preferred Alternative for each of the WSAs is as follows:

Arrow Canyon Range (NV-050-0215)—The entire WSA, totalling 32,853 acres, would be recommended nonsuitable.

Muddy Mountains (NV-050-0229)—A total of 44,260 acres, including the Muddy Peak area, Hidden Valley, Lovell Wash and Gale Hills, would be recommended for wilderness designation. A total of 51,910 acres, including Bitter Springs valley and the California Wash bajada, would be recommended for non-wilderness.

Mount Stirling (NV-050-0401)—A total of 30,190 acres, including Wheeler Peak and the northern spring Mountains, would be recommended of wilderness designation. A total of 39,460 acres, including Mr. Stirling and the surrounding foothills, would be recommended for non-wilderness.

La Madre Mountains (NV-050-0412)—A total of 44,388 acres, including the La Madre Mountains ridgeline, White Rock Hills and Brownstone Basin, would be recommended for wilderness designation. A total of 12,579 acres, including the easternmost fringe area and the northern flank of La Madre Mountains, would be recommended for non-wilderness.

Pine Creek (NV-050-0414)—A total of 21,530 acres, including all of the Red Rock escarpment, would be recommended for wilderness designation. A total of 2,470 acres, including an area adjacent to the town of Mountain Springs, would be recommended for non-wilderness.

North McCullough Mountains (NV-050-0425)—The entire WSA, totaling 47,166 acres, would be recommended for non-wilderness.

South McCullough Mountains (NV-050-0435)—The entire WSA, totalling 56,623 acres, would be recommended for non-wilderness.

FOR FURTHER INFORMATION CONTACT: Kemp Conn, District Manager, Attn: Wilderness EIS Team Leader, Bureau of Land Management, P.O. Box 26569, Las Vegas, NV. 89126, (702) 385-6403 or 385-6463.

Copies of the DEIS are available for review at the following BLM offices:

Office of Public Affairs, 18th and C Streets, NW., Washington, D.C. 20240
Nevada State Office, 300 Booth Street, Reno, NV 89520
Battle Mountain District Office, North 2nd and Scott Streets, Battle Mountain, NV 89820
Carson City District Office, 1050 E. William Street, Carson City, NV 89701
Elko District Office, 2002 Idaho Street, Elko, NV 89801
Ely District Office, Star Route 5, Box 1, Ely, NV 89301
Las Vegas District Office, 4765 W. Vegas Drive, Las Vegas, NV 89126
Arizona Strip District Office, 8916 East Tabernacle, St. George, UT 84770
Cedar City District Office, 1579 North Main, Cedar City, UT 84720
Riverside District Office, 1695 Spruce Street, Riverside, CA 92507

Also, copies are available for review at the following public libraries:

Boulder City Library, 539 California Ave., Boulder City, NV 8005
Bunkerville Library, Bunkerville, NV 89007
Charleston Heights Library, 800 Brush St., Las Vegas, NV 89107
Clark County Community College, Learning Resource Center, 3200 E. Cheyenne Ave., North Las Vegas, NV 89030
Clark County Library, 1401 E. Flamingo Rd., Las Vegas, NV 89109

James Dickinson Library, Documents Division, University of Nevada, 4505 Maryland Parkway, Las Vegas, NV 89154
Getchell Library, Government Publications Department, University of Nevada, Reno, NV 89507
Virgin Valley Library, Mesquite, NV 89024
Nevada State Library, Library Building, Carson City, NV 89710

A copy of the Draft EIS will be sent to all individuals, agencies, and groups who have expressed an interest in the wilderness review process in Clark County, and a limited number of copies are available on request to the District Manager. A Wilderness Technical Report has also been prepared, providing supplementary information to the DEIS, and is also available on request to the above address.

DATES: Written comments concerning issues pertinent to the Clark County Wilderness EIS will be accepted for 90 days following the publication of this notice of availability. A public hearing on the DEIS has been scheduled for June 28, 1983 at 7:00 p.m. in the Natchez Room of the Showboat Hotel, 2800 E. Fremont, in Las Vegas, Nevada. Interested individuals, representatives of organizations, and public officials wishing to testify are requested to contact the District Manager for advance registration, at the above address or phone number, by 4:15 p.m., June 27, 1983. Oral testimony will be limited to ten minutes.

Dated: May 9, 1983.

Edward F. Spang,

State Director, Nevada.

BILLING CODE 4310-84-M

[ES 32196]

Mississippi; Realty Action, Modified Competitive Sale of Public Land in Greene County, Mississippi

The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, U.S.C. 1713), at no less than the fair market value:

St. Stephens Meridian, Mississippi

T. 2N., R. 4 W.,

Factional Section 30, containing 30.4 acres.

The land will be sold at public auction by modified competitive bidding. Marion and Alvia Blankinchip, Box 432, Leakesville, Mississippi 39451, the adjoining landowners will have a preference right to purchase the tract. Such preference is offered due to an historical claim of ownership which this family has exerted on the subject property for over 100 years, and subsequent improvements made by them to the tract.

The land has not been used for, and is not required for any Federal purpose. The location and physical characteristics of the parcel make it difficult and uneconomical to manage as public land. Disposal would best serve the public interest. The sale is consistent with the Bureau's planning system for the land involved. The land will not be offered for sale until at least 60 days after the date of this notice.

A patent for the land, when issued, will be subject to the following conditions:

1. All minerals will be reserved to the United States in accordance with Section 209 (a) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1719.

2. The sale of these lands will be subject to oil and gas lease ES 11614 issued November 1, 1980.

Bidding Information and Instruction

Bidder Qualifications: The Federal Land Policy and Management Act of 1976 requires that bidders must be citizens of the United States, 18 years of age or over, or, in the case of a corporation, be subject to the laws of any State of the United States. Bids may be made by a principal (the one desiring to purchase the land) or his qualified agent.

Bid Standards: No bid will be accepted for less than the appraised fair market value of $13,500. Bids must be for all the land identified in this notice.

Method of Bidding: Bids may be made either by mail or personally at the sale. Bids sent by mail will only be considered if received at the Jackson District Office, 300 Woodrow Wilson Drive, Jackson, Mississippi 39213, prior to 1:00 p.m. on September 9, 1983. Bids sent by mail must be in sealed envelopes accompanied by a certified check, postal money order, bank draft or cashier's check made payable to the Bureau of Land Managment for not less than one-fifth of the amount of the bid. All sealed envelopes must be marked in the lower left-hand corner, "Sealed Bid, Public Land Sale, ES-32196". If two or more valid sealed bids in the same amount are received and they are the high bid, the determination of which bid is to be considered the highest bid shall be by a drawing. The drawing, if required, shall be held immediately following the opening of the bids. The hghest qualifying sealed bid shall then be announced.

Oral bids will be received immediately after all sealed bids have been opened and the highest sealed bid is announced. The highest sealed bid will be the base for oral bids. All oral bids must be in increments of $20.00. Sealed bidders present at the sale may also make oral bids. The highest bid price, either sealed or oral, will establish the sale price.

Modified Bidding: For a period of 30 days following the date of the sale, Marion and Alvia Blankinchip will have a preference right to purchase the land by meeting the highest bid. If they meet the highest bid, the land will be sold to them and the other low bids will be returned. Refusal or failure by the designated bidder to meet the highest bid shall constitute a loss of preference rights, and the land will be sold to the highest bidder.

Final Details: Once a high bid is accepted, the successful bidder shall submit the balance of the full bid price within the time designated by the authorized officer. Failure to submit the required balance within the period of time allowed will result in cancellation of the sale and the bid deposit will be forfeited. If the high bid is accepted, the full price is paid, and the required citizenship or corporate qualifications are met, title to the lands will be conveyed by a patent. Publication of this Notice will segregate the lands form all appropriations under the public land laws, but not the mineral leasing laws. This segregation will terminate upon the issuance of a patent, or 2 years from the date of this Notice, or upon publication of a notice of termination.

Further Information: Detailed information concerning the sale can be obtained by contacting Robert Gausman at (703) 235–2855, or at the following address. For a period of 45 days from the date of this Notice, interested parties may submit comments to the Eastern States Director, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304. Any adverse comments will be evaluated by the Eastern States Director, who may vacate or modify this Notice of Realty Action and issue a final determination. In the absence of any action by the Eastern States Director, this realty action will become the final determination of the Department of the Interior.

G. Curtis Jones, Jr.,

Eastern States Director.

BILLING CODE 4310–84–M

[ES 32195]

Ohio; Realty Action, Competitive Sale of Public Land in Seneca County, Ohio

The following described parcels have been identified as suitable for disposal by sale under the provisions of Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713), at no less than the appraised fair market value:

First Principal Meridian, Ohio	Acres	Appraised value
T. 3 N., R. 16 E., Section 16		
Parcel A: NE¼SW¼	40	$18,000
Parcel B: S½NW¼SE¼	20	12,000

The land will be sold by competitive bidding.

Bidding Information and Instructions: The Federal Land Policy and Management Act (90 Stat. 2757; 43 U.S.C. 1717) and regulations promulgated thereunder require that bidders be citizens of the United States, 18 years of age or over, or, in the case of a corporation, be subject to the laws of any state of the United States. Bids may be made by a principal (the one desiring to purchase the land) or his duly authorized agent. Agents will be required to submit proof of power of attorney.

Method of Bidding: Each bid must be for all the land in a specified parcel. Sealed bids must be submitted to the Eastern States Office, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304. Such bids will only be considered if received at the above address after 7:30 a.m., August 15, 1983, but prior to 10 a.m., September 9, 1983. No oral bids will be accepted. Sealed bids, accompanied by a certified check, postal money order, bank draft, or cashiers check made payable to the Bureau of Land Management for not less than one fifth of the amount of the bid must be in a separate sealed envelope, within the transmittal envelope. The sealed envelopes must be marked in the lower lefthand corner, "Sealed Bid, Parcel ———, Public Land Sale ES 32195." All sealed bids will be opened at 10 a.m. on September 9, 1983.

The successful high bidder will be required to submit the remainder of the payment by cash, certified check, bank draft, money order, or combination thereof, within thirty (30) days after receipt of the decision accepting the highest bid. If final payment is not received within the specified 30 day period, the bid will be rejected, the deposit forfeited, and the parcel offered to the next highest bidder. All unsuccessful sealed bids will be returned within 30 days of the sale.

Those parcels not sold pursuant to this Notice of Realty Action shall remain available for sale 2 years from the date of this Notice. Subsequent purchases may be transacted at the Eastern State Office.

A patent for the land, when issued, will contain the following reservation: All minerals will be reserved to the United States. Said mineral reservation will include the right to explore, prospect for, mine, and remove same under applicable law and regulations promulgated thereunder, as prescribed by the Secretary of the Interior.

Publication of this Notice will segregate the lands from all appropriations under the public land laws, but not the mineral leasing laws. This segregation will terminate upon the issuance of a patent, or 2 years from the date of this Notice, or upon publication of a notice of termination.

Detailed information concerning the sale can be obtained by contacting Robert Gausman at (703) 235–2855, or at the following address. For a period of 45 days from the date of this Notice,

interested parties may submit comments to the Eastern States Director, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304. Any adverse comments will be evaluated by the Eastern States Director, who may vacate or modify this Notice of Realty Action and issue a final determination. In the absence of any action by the Eastern States Director, this realty action will become the final determination of the Department of the Interior.

G. Curtis Jones, Jr.,

Eastern States Director.

Parcel 25: T. 5 S., R. 15 E., SBBM., CA 13602 Sec. 10, S½NW¼SE¼SE¼	5	4,950

Each of the twenty-five parcels totaling 4887.91 acres will be separately offered for sale at the public sales scheduled for July 28, 1983. The subject public land sales will be held at the Bureau of Land Management, California Desert District Office, 1695 Spruce Street, Riverside, California.

Disposal of the subject lands will serve important public objectives, including but not limited to, expansion of communities and increasing the opportunity for industrial, commercial and agricultural development. The majority of the surrounding private lands have been developed for agriculture. The subject land would better meet the public's needs by disposing of these lands, rather than maintaining them in Federal ownership. The proposed sales are consistent with the Bureau's planning system. Disposing of these lands will provide more consistency and logic in local land-use patterns.

The terms and conditions applicable to the sale are:

1. A right-of-way for ditches and canals will be reserved to the United States (43 U.S.C. 945).

2. All minerals in the land will be reserved to the United States (43 U.S.C. 1719); however, under Section 209 of the said Act of October 21, 1976, the high bidder may apply to purchase the mineral interests.

3. The patent will be subject to all valid existing rights.

4. Federal law requires that all bidders be United States citizens, or in the case of corporations be authorized to own real estate in the State of California. A State, State instrumentality or political subdivision must be authorized to hold property. Proof of these requirements shall accompany the bid.

5. Upon disqualifiction of an apparent high bidder, the next high bid will be honored.

DATES: The above described land will be offered for sale by sealed and oral bids. The sealed bids will be opened at 10:00 a.m. on July 28, 1983, at the California Desert District Office of their Bureau of Land Management, 1695 Spruce Street, Riverside, California, 92507. Bids may be made by a principal or a duly qualified agent, either mailed or delivered to the California Desert District Office, Bureau of Land Management, at the above address. Sealed bids shall be considered only if received prior to 10:00 a.m. on July 28, 1983, and are made for at least the appraised value of the land. Each sealed bid shall be accompanied by certified check, postal money order, bank draft, or cashier's check made payable to the Bureau of Land Management for not less than one-fifth of the amount of the bid. The sealed envelope must be marked in the lower left hand corner "Desert Center Public Land Sale, Parcel No. —— sale held July 28, 1983." No bid will be accepted for less than the appraised value, and bids must include all of the land in the parcel. The sealed bids shall be opened and publicly declared at the beginning of the oral bidding. Only those bidders submitting qualified sealed bids will be allowed to participate in the oral auction. The purpose of the oral bid is to allow each qualified participant to revise their bid. Oral bidding will begin at 11:00 a.m. on July 28, 1983 at the California Desert District Office. The person declared to have entered the highest qualifying oral bid shall submit payment for case, personal check, bank draft, moneyorder or any combination for not less than one-fifth of the amount of bid immediately following the close of the sale.

The successful bidder, whether such bid is a sealed or oral bid, shall submit the remainder of the full bid price prior to the expiration of 30 days from the date of the sale. Failure to submit the full bid price prior to, but not including the 30th day following the day of the sale, shall result in cancellation of the sale of the specific parcel and the deposit forfeited and disposed of as other receipts of sale. If two or more sealed bids for the same amount are received and no oral bids are received, then the apparent high bidder shall be determined by a drawing.

FOR FURTHER INFORMATION CONTACT: Concerning the sale, including the land

report and environmental assessment report, is available for review at the California Desert District Office at 1695 Spruce Street, Riverside, California 92507. For a period of 45 days from the date of publication of this notice, interested parties may submit comments to the State Director, California State Office, Federal Office Building, 2800 Cottage Way, Room E–2841, Sacramento, California 95825. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become a final determination.

Dated: May 18, 1983.

Bary Freet,

Assistant District Manager for Administration.

BILLING CODE 4310–84–M

[Coal Lease Application ES 32085]

Tuscaloosa County, Alabama; Invitation—Coal Exploration License Application

Members of the public are hereby invited to participate with Mitchell and Neely, Inc., in a program for the exploration of coal deposits owned by the United States of America in the following described lands located in Tuscaloosa County, Alabama:

Huntsville Meridian, Alabama

T. 18 S., R. 9 W.,
Sec. 31, S½NE¼, S½NW¼, SW¼, SE¼;
Sec. 32, S½SW¼.

The area described contains 560.00 Total Acres.

Any party electing to participate in this exploration program shall notify, *in writing* both the Eastern States Director, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304; and Mitchell and Neely, Inc., P.O. Box 5957, Birmingham, Alabama 35259. Such written notice must refer to serial number ES 32085 and be received no later than 30 calendar days after the last publication of this Notice in the **Federal Register** or 10 calendar days after the last publication of this Notice in the Tuscaloosa News and Birmingham News, whichever is later. This Notice will be published for two consecutive weeks.

This proposed exploration program is fully described and will be conducted pursuant to an exploration plan to be approved by the Minerals Manager, Eastern Region, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304. The exploration plan is available for public inspection at this office.

Pieter J. VanZanden,

Eastern States Associate Director.

BILLING CODE 4310–84–M

Federal Mineral Leasing Other Than Oil, Gas, Geothermal, Oil Shale and Combined Hydrocarbon Leasing; Extension of Comment Period on Combined Mineral Lease Form Proposal

AGENCY: Bureau of Land Management, Interior.

ACTION: Extension of comment period on combined mineral lease form proposal.

SUMMARY: The cobined mineral lease form proposal was published in the **Federaal Register** on April 28, 1983 (48 FR 19240) with a 30-day comment period. In response to the request of several individuals that the comment period be extended, the comment period is extended by this notice to June 30, 1983.

DATE: Comments should be submitted by June 30, 1983. Comments received or postmarked after that date may not be considered in the decisionmaking process on the final combined mineral leasing form.

ADDRESS: Comments and suggestions should be sent to: Director (650), Bureau of Land Management, 1800 C Street, N.W., Washington, D.C. 20240. Comments will be available for public review in Room 3538 of the above address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Marcia Rohn (202) 343–8537.

Minerals Management Service

Oil and Gas and Sulfur Operations on the Outer Continental Shelf; Receipt of Proposed Development and Production Plan

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of receipt of a proposed development and production plan.

SUMMARY: Notice is hereby given that Chevron U.S.A., Inc. has submitted a development and production plan describing the activities it proposes to conduct as operator of Lease OCS–P 0316, offshore California. The purpose of this Notice is to inform the public that the Minerals Management Service (MMS) is considering approval of the plan and that it is available for public review and comment.

DATES: The plan may be reviewed weekdays, 8:00 a.m. to 3:00 p.m. Written comments must be received or postmarked by July 18, 1983.

ADDRESSES: The plan is available for public review at the Office of the Regional Manager, Pacific OCS Region, Minerals Management Service, Room 160, 1340 West 6th Street, Los Angeles, California 90017. Written comments may be mailed or hand-delivered to the same address.

FOR FURTHER INFORMATION CONTACT: Mr. H. T. Cypher, Regional Supervisor, Field Operations, Pacific OCS Region, (213) 688–4551.

SUPPLEMENTARY INFORMATION: Section 25 of the Outer Continental Shelf Lands Act, 43 U.S.C. 1351, requires the MMS to make any development and production plans available for public review. Regulation 30 CFR 250.34 provides for the publication of a Notice that such a plan is available for review.

National Park Service

Martin Luther King, Jr., National Historic Site and Preservation District Advisory Commission, Meeting

Notice is hereby given in accordance with the Federal Advisory Commission Act that a meeting of the Martin Luther King, Jr., National Historic Site Advisory Commission will be held at 11:00 a.m. on Thursday, June 23, 1983, at the Martin Luther King, Jr., Community Center, Conference Rooms A and B, 450 Auburn Avenue NE., Atlanta, Georgia 30312.

The purpose of the Martin Luther King, Jr., National Historic Site Advisory Commission is to consult and advise with the Secretary of the Interior on matters of planning, development and administration of the Martin Luther King, Jr., National Historic Site. The purpose of this meeting will be to: (1) Review the Advisory Commission Impact Study; and (2) review the scope of work for the Development Study by the City of Atlanta.

The members of the Advisory Commission are as follows:

Mr. William Allison, Chairman

Mr. John H. Calhoun, Jr.
Dr. Elizabeth A. Lyon
Mr. C. Randy Humphrey
Mrs. Christine King Farris
Mr. Handy Johnson, Jr.
Mr. Howard H. Arnold III
Mrs. Freddye Scarborough Henderson
Mrs. Millicent Dobbs Jordan
Mr. John W. Cox
Reverend Joseph L. Roberts, Jr.
Mrs. Coretta Scott King, Ex-Officio Member
Director, National Park Service, Ex-Officio Member

The meeting will be open to the public; however, facilities and space for accommodating members of the public are limited. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing further information concerning the meeting or who wish to submit written statements may contact Janet C. Wolf, Superintendent, Martin Luther King, Jr., National Historic Site, 522 Auburn Avenue NE., Atlanta, Georgia 30312; Telephone 404/221–5190. Minutes of the meeting will be available approximately 4 weeks after the meeting.

Dated: May 19, 1983.

Neal G. Guse, Jr.,

Acting Regional Director, Southeast Region.

INTERSTATE COMMERCE COMMISSION

[OP4FC–315]

Motor Carriers; Finance Applications; Decision-Notice

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved; subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board Number 2, Members Carleton, Williams, and Ewing.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 4 at (202) 275–7669.

MC-FC-81396, filed April 12, 1983. By decision of May 20, 1983, issued under 49 U.S.C. 10926 and the Commission's transfer rules at 49 CFR 1181, Review Board Number 2 approved the transfer to John Perkins Trucking Co., Inc., Greenville, SC, of Permit Nos. MC-134017, issued May 31, 1973, Sub 2, issued October 23, 1973, Sub 3, issued December 20, 1973, Sub 5, issued December 30, 1974, Sub 7, issued May 8, 1979, Sub 10, issued March 4, 1981, and Sub 11, issued February 23, 1983, to R.M. Henderson d/b/a H & M Motor Lines, Greenville, SC, authorizing the transportation of plastic articles, burlap articles, and paper articles (except in bulk), from Newark, NJ, to points in the U.S. (with exceptions), from Garden City KS, to points in the U.S. (except AK and HI), from Newark, NJ, to points in ME, NH, VT, MA, CT, RI, NY, NJ, DE, PA and MD (exceptions from above), and from Atlanta, GA, to points in the U.S. (except AK and HI), all under continuing contract(s) with Packaging Products and Design Corp. of Newark, NJ, meat, meat products, meat by-products and packinghouse products (with exceptions), from named states to specific city-state destinations, under continuing contract(s) with AJC International, Inc., packaging materials, between points in the U.S., under continuing contract(s) with Armin Plastics South Carolina, Inc. of Greenville, SC, and general commodities (with exceptions), between points in the U.S. (except AK and HI), under continuing contract(s) with Fabri-Kal Corp. of Piedmont, SC. An application for temporary authority has been filed. Representative: Gerald K. Gimmel, 444 N Frederick Ave., Suite 200, Gaithersburg, MD 20877, (301) 840–8565.

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods.) The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160,19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application, must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (elg., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisified before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to Team 2, (202) 275–7030.

Volume No. OP2–240

Decided: May 19, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier. (Member Parker not participating.)

MC 167932, filed May 9, 1983. Applicant: DONALD D. THOMPSON d.b.a. D. THOMPSON TRUCKING, 7015 Mieras Rd., Yakima, WA 98901. Representative: Donald D. Thompson (same address as applicant), 509–453–9764. Transporting *food and other edible products and byproducts intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizers, and other soil conditioners*, by the owner of the motor vehicle in such vehicle, between points in the U.S. (except AK and HI).

Agatha L. Mergenovich,

Secretary.

[FR Doc. 83–14307 Filed 5–26–83; 8:45 am]

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers or property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart, B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(C)(2)(E). Persons wishing to oppose an application must follow the rules under

49 CFR Part 160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings:

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commussion's regulations.

We make additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the applications is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from the date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 3 at (202) 275–5223.

Volume No. OP3–234

Decided: May 19, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 133434 (Sub-3), filed April 27, 1983, previously noticed in the **Federal Register** issue of May 16, 1983. Applicant: CONGRESSIONAL MOVERS, INC., 8933 D'Arcy Road, Upper Marlboro, MD 20772. Representative: David Earl Tinker, 1000 Connecticut Ave., N.W., Suite 1112, Washington, DC 20036–5391, (202) 887–5868. Transporting *household goods, furniture and fixtures,* between points in DE, MD, VA, WV and DC, on the one hand, and, on the other, points in the U.S.

Note.—This republication corrects the territorial description.

Volume No. OP3–233

Decided: May 18, 1983.

By the Commission, Review Board No. 3, Members Krock, Joyce, and Dowell.

MC 149604 (Sub-5), filed April 20, 1983, previously noticed in the **Federal Register** issue of May 16, 1983. Applicant: ACTION TRANSIT COMPANY, Rt. 21 South, P.O. Box 894, Mooresville, NC 28115. Representative: M. Diane Neal, 2230 Shepler Church Ave., S.W., P.O. Box 6270, Canton, OH 44706, (216) 456–4571. Transporting *general commodities* (except household goods and classes A and B explosives), between points in the U.S. under continuing contract(s) with C–E Industrial Products, Combustion Engineering, Inc., of Valley Forge, PA.

Note.—This republication shows applicant is fit and able to transport commodities in bulk.

For the following, please direct status calls to Team 2 at 202–275–7293.

Volume No. OP2–241

Decided: May 19, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier. (Member Parker not participating.)

[No. 39195 et al.*]

Atlas Van Lines, Inc.; Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of provisional exemption.

SUMMARY: Five motor contract carriers have each requested exemption from the tariff filing requirements of 49 U.S.C. 10702, 10761, and 10762. The sought relief is provisionally granted for future as well as existing contracts.

DATES: Comments are due on June 13, 1983. The sought relief will become final on June 28, 1983, unless, in response to timely filed adverse comments, the Commission issues a further decision withdrawing this relief.

ADDRESSES: Send an original and 15 copies of comments to: No. 39195, Room 21139, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:
Barbara Gardner, (202) 275-0961
or
Howell I. Sporn, (202) 275-7691

SUPPLEMENTAL INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T. S. Infosystems, Inc., Room 2227, Washington, DC 20423, or call 289-4357 in the DC metropolitan area or toll free (800) 424-5403.

Decided: May 20, 1983.

By the Commission, Division 1, Commissioners Andre, Taylor, and Sterrett. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,
Secretary.

Secretary.

Volume OP5–F–242

Decided: May 20, 1983.

Interstate Motor Freight System—Continuance in Control Exemption—120300 Canada, Inc.

MC–F–15255. Interstate Motor Freight System (IMF) seeks an exemption from the requirement under Section 11343 of prior regulatory approval for its continuance in control of 120300 Canada, Inc. IMF presently controls Central Michigan Trucking, Southwest Continental Freight Lines, Inc., Cross Country Carriers, Inc., Coast to Coast Transportation, Inc. and Southwest Freight Line, Inc. While 120300 Canada now holds no authority from the Commission, approval of the proposed transfer of a portion of the rights held by Direct Transportation System in No. MC–37918 (Sub-No. 19), in MC–FC–81423 will make it a carrier within the jurisdiction of the Commission. The control of this carrier by Interstate will thus be subject to Commission jurisdiction. Therefore, the instant proceeding is prospective, anticipating the approval of the transfer in MC–FC–81433. Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, D.C. 20423, and (2) Petitioner's representative, Richard H. Streeter, Wheeler & Wheeler, 1729 H Street NW., Washington, DC 20006. Comments should refer to No. MC–F–15255.

Volume OP2–242

Decided: May 19, 1983.

Petitioners

MC–F–15281. C.T. Transport, Inc. seeks an exemption from the requirement under Section 11343 of prior regulatory approval for its continuance in control of its wholly-owned motor carrier subsidiary, Universal Am-Can, Ltd. (MC–167922). C.T. Transport, Inc., a motor carrier (MC–141609), is a wholly-owned subsidiary of Centra, Inc. Centra, Inc. controls directly or indirectly the following motor carriers: (1) Superior Forwarding Company, Inc. (MC–75406), (2) Port Side Transport, Inc. (MC–161151), (3) Central Transport, Inc. (MC–19311), (4) U.S. Truck Company, Inc. (MC–59336), and (5) McKinlay Transport Limited (MC–123282). Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commssion, Washington, DC 20423, and (2) Petitioner's representative: Leonard R. Kofkin, 140 South Dearborn St., Suite 1515, Chicago, IL 60603. Comments should refer to No. MC–F–15281.

DEPARTMENT OF LABOR

Employment and Training Administration

Migrant and Seasonal Farmworker Programs: Fiscal Year 1984 State Planning Estimates, Preapplications for Federal Assistance, and Solicitation for Grant Application

AGENCY: Employment and Training, Labor.

ACTION: Notice.

SUMMARY: The purpose of this document is to announce planning and application instructions for Fiscal Year 1984 Migrant and Seasonal Farmworker Programs funded under Title IV, Section 402 of the Job Training Partnership Act (JTPA). This notice consists of: *PART I—State Planning Estimates* of funds expected to be available; *PART II—Preapplication for Federal Assistance,* an invitation for private nonprofit organizations, authorized by their charter or articles of incorporation to provide employment and training or other services described in this notice, and public agencies to submit preapplications for Federal assistance; and, *PART III—Solicitation for Grant Application (SGA),* an invitation for these agencies and organizations to submit funding applications in accordance with Section 402 of JTPA and the SGA set forth below.

FOR FURTHER INFORMATION CONTACT: Alfred E. Berndt, Chief, Division of Farmworker and Rural Employment Programs, or Virginia Villarreal, 601 D Street, NW., Room 6114, Washington, D.C. 20213, Phone: 202/376–7615.

SUPPLEMENTARY INFORMATION: The Department, under the Comprehensive Employment and Training Act, published in the **Federal Register** the State Planning Estimates for Migrant and Seasonal Farmworker Programs and, for those areas open to competition, and invitation to submit preapplications for Federal assistance and funding applications. The Department will continue this policy for Section 402 programs under JTPA.

The Department will not consider any funding application which does not meet the Precondition for Grant Application requirements provided as part of the SGA in Part III. In addition, prior to the final selection of an applicant as a potential grantee, the Department, as provided in Part III, will conduct a 14-point responsibility review of the available records to determine if the applicant has reasonably administered Federal funds. Any applicant which does not have its application considered or is not selected as a potential grantee because of these provisions shall be advised of its appeal rights.

The State Planning Estimates provided in Part II of this notice are only for the purpose of developing the funding applications being solicited herein. The estimates represent a 12-cent reduction from the Fiscal Year 1983 CETA, Section 303 farmworker allocations, and this reduction is reflective of the President's Fiscal Year 1984 budget request for Section 402 of JTPA, the successor legislation. The Department expects to use 1980 Decennial Census of the Population data for final State allocations. These data will be available later.

Detailed budgets and planning summaries will not be part of the funding application. These will be negotiated with applicants selected for grant awards, and the negotiations will be based on the final Section 402 regulations. The funding application being solicited in this notice will discuss these aspects in general terms as part of a narrative. Cost limitations on certain activities which will be proposed in Section 402 regulations are provided as part of the SGA in Part III.

Part I—State Planning Estimates

The State Planning Estimates provided here are only for the purpose of developing the funding applications being solicited herein. The estimates represent a 12-percent reduction from the Fiscal Year 1983 CETA, Section 303 farmworker allocations, and this reduction is reflective of the President's Fiscal Year 1984 budget request for Section 402 of the JTPA.

The Department used 1977 Social Security data for the Fiscal Year 1983 allocations. The Department expects to use 1980 Decennial Census of the Population data for the final Section 402, Fiscal Year 1984 State allocations. These data will be available by early summer. The formula for the final allocations will be published in the **Federal Register** for comments along with the rationale for such formula and proposed allocations no later than 30 days prior to the publication of the final allocations of available funds in the **Federal Register**. Applicants are advised that the Department will propose in the Section 402 regulations to be published for comments that it will reserve the right not to allocate any funds for use in a

State whose allocation is less than $120,000.

Applicants should use the State Planning Estimates listed below in developing Fiscal Year 1984 preapplications for Federal assistance and funding applications.

Fiscal Year 1984 State Planning Estimates

Alabama	$760,232
Alaska	16,544
Arizona	1,256,112

Puerto Rico	1,520,464
Total	57,629,440

Part II—Preapplication for Federal Assistance

All States and the Commonwealth of Puerto Rico are open for competition for Section 402 funds for fiscal year 1984. Applications for statewide programs are strongly encouraged. Applicants applying for grants shall submit a preapplication consisting of:

(1) A Standard Form 424 described at 41 CFR 29–70.214–4;

(2) An attachment identifying the target area to be served by State and counties;

(3) For a private nonprofit organization, a certification from a certified public accountant that its financial management system is capable of safeguarding Federal funds; and,

(4) For a public agency, a certification by the chief fiscal officer attesting to the adequacy of the agency's accounting system to safeguard Federal funds.

Two copies of preapplications for Federal assistance shall be submitted either by mail or hand delivered. Mailings must be posted by registered or certified mail, return receipt requested, and postmarked no later than 20 calendar days following the date of publication of this notice. All hand-delivered preapplications will be accepted daily between the hours of 8:15 a.m. and 4:45 p.m. A receipt will be provided bearing the time and date of delivery. No hand deliveries will be accepted after 4:45 p.m. on the 20th calendar day following the date of publication of this notice. No exceptions to these mailing and hand-delivery conditions will be granted. Preapplications not meeting these conditions will not be accepted.

Preapplications for Federal assistance must be mailed or hand delivered to: Mr. Edward A. Tomchick, Contracting/Grant Officer, Employment and Training Administration, Room 7122, 601 D Street, N.W., Washington, D.C. 20213.

Part III—Solicitation for Grant Application (SGA)

The Department of Labor is soliciting applications for grants under the provisions of Title IV, Section 402 of JTPA to provide job training, employment opportunities, and other services for migrant and seasonal farmworkers. A seasonal farmworker is defined as a person who during the 52 weeks preceding application was employed at least 25 days in farmwork or earned at least $400 in farmwork, and who has been primarily employed in farmwork on a seasonal basis, without a constant year round salary (one employer). A migrant farmworker is defined as a seasonal farmworker who performs or has performed farmwork during the preceding 12 months which requires travel such that the worker is unable to return ot his/her domicile (permanent place of residence) within the same day. To be eligible for the Section 402 program, these individuals must have during a consecutive 12-month period preceding their application for enrollment: (1) Received at least 50 percent of their total earned income or been employed at least 50 percent of their total work time in farmwork; and (2) been identified as a member of a family which receives public assistance or whose annual family income does not exceed the higher of either the poverty level or 70 percent of the lower living standard income level. Dependents of the above individuals must also meet the requirements of Sections 167(a)(5) and 504 of the JTPA.

In awarding grants through this SGA, the Department will rate individual applications by a panel which will use criteria described in this SGA. The competitive process and the content of the funding application are as follows:

(1) *Precondition for Grant Application.* The Department will not consider an application submitted in response to this SGA if any of the following factors exist:

(i) The application is not submitted by either a private nonprofit organization, authorized by its charter or articles of incorporation to provide employment and training or other services described in this notice, or a public agency;

(ii) The applicant has not complied with the preapplication for Federal assistance provisions described in Part II above; and

(iii) The Department's efforts to recover debts from the applicant (for which three demand letters have been sent) established by final agency action have been unsuccessful, or fraud or criminal activity has been proven to exist within the applicant's organization.

(iv) The applicant has not met the funding application submission requirements provided in this SGA.

(2) *Responsibility Review.* The Department, prior to the final selection of an applicant as a potential grantee, will conduct a review of the available records to determine whether or not the organization has responsibly administered Federal funds. This review is intended to establish overall responsibility, and it is independent of the competitive process. The following information will be taken into consideration in making the final selection of an applicant as a potential grantee:

(i) The Department's efforts to recover debts from the applicant (for which three demand letters have been sent) established by final agency action have been unsuccessful, or failure to comply with an approved repayment plan.

(ii) Serious administrative deficiencies identified in final findings and determinations, such as failure to maintain a financial management system as required by Federal regulations.

(iii) Established fraud or criminal activity within the organization.

(iv) Willful obstruction of the audit process.

(v) Substantial failure to provide services to applicants as agreed to in a current or recent grant.

(vi) Failure to correct deficiencies brought to the grantee's attention as a

result of monitoring activities, reviews, assessments, etc.

(vii) Failure to return a grant closeout package or outstanding advances within 90 days of expiration date or receipt of closeout package, whichever is later, unless an extension has been requested and granted; final billings reflecting serious cost category or total budget cost overrun.

(viii) Failure to submit required reports.

(ix) Failure to properly report and dispose of government property as instructed by the Department.

(x) Failure to have maintained cost controls resulting in excess cash on hand.

(xi) Failure to procure or arrange for audit coverage for any 2-year period when required by the Department.

(xii) Failure to audit subrecipient within the required period when applicable.

(xiii) Final disallowed costs in excess of 5 percent of the grant or contract award.

(xiv) Failure to establish a mechanism to resolve subrecipient's audit within established time frames.

(3) *General.* Applicants should develop Section 402 programs in which job training and other activities are designed, to the maximum extent feasible, to lead to employment opportunities enabling participants to become economically self-sufficient. General guidelines relative to the types of training activities and services and relative to allowable costs, cost allocations, and cost classification are provided below. Applicants are strongly encouraged to use these guidelines for the development of their funding applications.

(i) *Training activities and services.* A grantee may provide assistance to eligible individuals to obtain or retain employment, to participate in other program activities leading to their eventual placement in unsubsidized agricultural or nonagricultural employment, and to participate in activities leading to stabilization in agricultural employment through training and supportive services which may include, but are not limited to:

(A) Job search assistance, including job clubs;

(B) Job development;

(C) Training, such as classroom, on-the-job, work experience, and tryot employment, in jobs skills for which demand exceeds supply;

(D) Training related and non-training related supportive services, including commuting assistance and financial and personal counseling;

(E) Relocation assistance;

(F) Programs conducted in cooperation with employers or labor organizations to provide early intervention in the event of the disruption of employment opportunities.

(ii) *Restrictions on certain activities.*

(A) Public service employment is not an allowable activity under Section 402 programs.

(B) Tryout employment shall conform to Section 205(d)(3)(B) of the JTPA.

(C) Work experience programs shall be combined with classroom or other training. The work experience portion shall not exceed 1,000 hours in a one year period.

(iii) *Allowable costs.* To be allowable, a cost should be necessary and reasonable for proper and efficient administration of the program, be allocable thereto under these principles, and, except as suggested here, be a general expense required to carry out the overall responsibilities of the recipient.

(A) Unless otherwise indicated below, direct and indirect costs shall be charged in accordance with 41 CFR 29–70.102.

(B) Funds may be used for construction activities only to:

(1) Provide compensation to participants employed by public or private nonprofit agencies;

(2) Reimburse OJT costs to private for profit employers;

(3) Purchase equipment, materials, and supplies for use in the training of such participants; and

(4) Cover costs of a training program in a construction occupation, including costs such as instructors' salaries, training tools, books, and needs-based payments and compensation to participants.

(C) Costs associated with building repairs, maintenance, and capital improvements of exisiting facilities used primarily for programs under the Act are allowable with prior approval of the Department.

(D) Unemployment compensation costs are allowable for administrative staff hired in accordance with the administrative provisions of the regulations, and for participants required to be covered for unemployment compensation purposes.

(E) Costs which are billed as a single unit charge do not have to be allocated or prorated among the several costs categories but may be charged entirely to training when the agreement:

(1) Is for training;

(2) Is fixed unit price; and

(3) Stipulates that full payment for the full unit price will be made only upon completion of training by a participant and placement of the participant into unsubsidized employment in the occupation trained for and at not less than the wage specified in the agreement.

(F) Travel costs. The cost of participant and staff travel necessary for the operation or administration of programs under the Act are allowable as follows:

(1) Travel costs of Section 402 administrative staff or members of governing boards of grantee organizations are allowable without the prior approval of the Department if the travel specifically relates to programs under Section 402. All other travel to be charged to JTPA Section 402 grants will require the prior approval of the Department. These costs should be charged to administration.

(2) Travel costs of other grantee officials of multifunded programs charged with overall grantee responsibilities are allowable only if costs specifically relate to programs under Section 402.

(3) Travel costs to enable participants to obtain or retain employment, access other services or to participate in programs under this Act are allowable as direct costs but will be limited to the grantee's jurisdiction or within daily commuting distance, unless part of an approved component of the grantee's program. These costs will be charged to training related supportive services.

(4) Travel costs for participants in administrative or programmatic positions using their personal or other forms of transportation in the performance of their jobs are allowable and will be charged appropriately.

(5) Travel policies of all grantees, subgrantees and contractors will be generally consistent with those set forth in the Department Travel and Transportation Manual.

(iv) *Section 402 cost allocation.* Allowable costs for Section 402 programs will be charged against the following four cost categories: Administration; training; training-related supportive services; and non training-related supportive services.

(A) Costs are allocable to a particular cost category to the extent that benefits are received by such category.

(B) All grantees should plan, control, and report expenditures against the aforementioned cost categories.

(C) All grantees are responsible for ensuring that subrecipients and contractors plan, control, and report expenditures against the aforementioned cost categories.

(v) *Suggested limitations on cost categories.* Applicants are encouraged to use the following suggested cost

limitations for the development of their funding applications:

(A) Costs for administration should not exceed 15 percent of the total amount of the grant.

(B) Costs for nontraining-related supportive services should not exceed 15 percent of the total amount of the grant.

(G) Costs for training-related supportive services should not exceed 15 percent of the total amount of the grant.

(D) Costs for training should be no less than 50 percent of the total amount of the grant.

(vi) *Classification of costs by category.* All grant costs shall be charged to the four cost categories listed above. Within each category costs shall be assigned and accounted for as follows:

(A) Administration

Administration costs consist of all direct and indirect costs associated with the management of the program. Administrative costs should be limited to those necessary to effectively operate the program. These costs include but are not limited to: the salaries and fringe benefits of personnel engaged in executive, fiscal, data collection, personnel, legal, audit, procurement, data processing, communications, maintenance, and similar functions; and related materials, supplies, equipment, office space costs, and staff training.

Also included are salaries and fringe benefits of direct program administrative positions such as superivsors, program analysts, labor market analysts, and project directors. Additionally, all costs of clerical personnel, materials, supplies, equipment, space, utilities, and travel that are identifiable with these program administration positions are charged to administration.

Allowances and reimbursement costs for governing boards and advisory councils shold be prorated as administrative costs among all the grants, from whatever source administered by the grantee.

(B) Training.

(1) Instruction and related costs, e.g., salaries, fringe benefits, space, utility, travel and equipment, consist of goods and services which affect those program participants who are in either a work environment, or classroom setting (including classroom training in conjunction with Vocational Exploration of Job Readiness or tryout employment) and should be charged to training. Training costs include, but are not limited to, the following: The costs associated with on-the-job training services; employer outreach necessary to obtain job listings or job training opportunities, salaries; fringe benefits; equipment and supplies of personnel engaged in providing training, including remedial education; job related counseling for participants; employability assessment and job development; job related counseling; tuition fees, books and other teaching aids; equipment and materials used in providing training to participants, classroom space and utility costs; job search assistance, labor market orientation, and job referral costs. In addition:

(2) Wages and fringe benefits for participants in work experience, tryout employment, classroom training, should be charged to training. Cost-of-living increases are considered wages.

(3) Allowances should be charged to training.

(4) Any single cost which is properly chargeable to training and to one or more other categories should be prorated among training and other appropriate cost categories.

(C) Training-Related Supportive Services

Costs of services which are necessary to enable an eligible individual to participate in training or subsidized employment under Section 402 and to obtain subsequent unsubsidized employment should be charged to training-related supportive services. Such supportive services may include but are not limited to transportation, health care, special services and materials for the handicapped, child care, meals, temporary shelter, financial counseling, and other reasonable expenses required for participation in the program and may be provided in-kind or through cash assistance. Training-related supportive services costs and related costs should be charged to this cost category.

(D) Nontraining-Related Supportive Services

(1) "Services only" are the costs of the goods and services provided to participants who are not engaged in work experience, tryout employment or training activities, including but not limited to such goods and services as: transportation, health care, temporary shelter, meals and other nutritional assistance, legal or paralegal assistance and emergency assistance.

(2) Direct placement services are services such as job development, job counseling, job preparation, job placement and job referral services provided to participants who are not engaged in work experience, tryout employment or training activities. These nontraining-related supportive services costs and those costs associated with providing these services (i.e., salaries, fringe benefits, space, utility, transportation, equipment, etc.) should be charged to this cost category.

(vii) *Cost categories assignable to program activities.*

(A) Classroom training. Cost categories are: administration, training, and training-related supportive services.

(B) On-the-job training. Cost categories are: administration, training and training-related supportive services.

(C) Work Experience. Cost categories are: administration, training, and training-related supportive services.

(D) Tryout employment. Cost categories are: administration, training, and training-related supportive services.

(4) *Content of Application.* This segment of the SGA provides the format and content of the Funding Application. Exclusive of eligibility documentation and letters of support and commitment, the funding application should not exceed 75 pages of double-spaced, unreduced type. The format for the application should be in five sections. The first section will contain the eligibility documentation. Sections 2 through 5 will provide the narrative description, including any charts and tables if applicable, with the second section describing the administration and staffing of the applicant organization; the third section describing the applicant's program experience; the fourth section describing the applicant's program approach and delivery system; and the fifth section describing the applicant's linkages and coordination with other relevant organizations and activities. Briefly, these sections should contain:

(i) *Section I—Eligibility Documentation.* The following documents are to be submitted by an applicant to support eligibility for Section 402 funds.

(A) A statement indicating the legally constituted authority under which the organization functions;

(B) An employer identification number from the Internal Revenue Service, and for nonprofit applicants, proof of the organization's tax-exempt status.

(ii) *Section II—Administration and Staffing.* This section will describe the applicant's administrative organization and staffing. Elements to be included in the description are:

(A) The number of people presently involved in the administration of the organization and the number of people who will be involved in the

administration of the proposed program, their job titles, and the total administrative costs for the proposed program;

(B) A description of the management and administration plan including:

(1) Organization structure;

(2) Monitoring system;

(3) Evaluation system;

(4) Personnel or merit system;

(5) Accounting system;

(6) Fiscal reporting and participant tracking;

(7) Allowance payment system, if applicable;

(8) Grievance procedures;

(9) Equal Employment Opportunity.

(iii) *Section III—Program Experience.* This section will describe the applicant's experience and capability in providing employment and training programs for migrant and seasonal farmworkers. The applicant should discuss the type of programs operated; the employment, training, and services activities which were provided; the number of participants involved in each activity; the actual vs. planned performance; the amount of funding, etc.

(iv) *Section IV—Program Approach and Delivery System.* This section will describe the applicant's approach to fulfilling the intent of Section 402 of the JTPA and the method of delivering the proposed program. Elements to be included in the description are:

(A) A description of migrant and seasonal farmworker needs in the area;

(B) An assessment of job opportunities in the area;

(C) A detailed description of each program activity to be provided;

(D) The rationale for the program mix of training, employability development, and supportive services activities;

(E) A list of delivery agents, if applicable, and the services to be provided by each.

(v) *Section V—Linkages and Coordination.* This section will describe the applicant's demonstrated and documented ties with appropriate State and local agencies, private nonprofit organizations, and other groups providing resources and services to farmworkers. Letters of commitment for such resources should be attached to the application.

(5) *Specific Rating Criteria.* As directed at Section 402(c)(1) of the JTPA, it will be determined by a competitive review panel if applicants demonstrate an understanding of the problems of migrant and seasonal farmworkers, a familiarity with the area to be served, and a previously demonstrated capability to administer effectively a diversified employability development program for migrant and seasonal farmworkers. In addition, the Department will be looking for a coherent, effective management approach and an ability to administer an effective program. Although applications will not be rated against the cost limitation factors suggested in this SGA, the Department will consider the overall cost relationships of the proposed program. Each application considered by the Department will be reviewed and rated by the panel using the following specific criteria:

(i) *Administrative Capability (Range, 0 to 40 points).* The administrative capability factor is a rating of the applicant's management experience and efficiency. The rating shall include consideration of the managerial expertise of the organization's present and proposed staff in managerial and decisionmaking positions. The highest rating of 40 points will be awarded to organizations which demonstrate proven ability to operate a cost-effective program which provides timely and effective services within the period of performance and which clearly shows the capability to administer efficiently a multi-activity delivery system.

(ii) *Program Experience (Range, 0 to 30 points).* This factor rates the applicant against a previously demonstrated capability to administer effectively a diversified employability development program for migrant and seasonal farmworkers. This factor is divided into two subfactors.

The first subfactor, performance, will compare the planned versus actual performance for the applicant's previous program of employment and training and other services for farmworkers. The highest rating of 15 points will be awarded to applicants who have met or exceeded their planned performance levels.

The second subfactor, program experience, will review the types of programs the applicant has operated in the past. The highest rating of 15 points will be awarded to applicants which have operated a comprehensive, multi-activity program of employment and training and other services for farmworkers.

(iii) *Program Approach and Delivery System (Range, 0 to 20 points).* This factor rates the proposed program's potential impact on the full range of farmworker needs and its fulfillment of the intent of Section 402 in relation to: (1) An understanding of the problems of migrant and seasonal farmworkers, and (2) a familiarity with the area to be served. The highest rating of 20 points will be awarded to an organization which has adequately analyzed the economic situation of the target area and the needs of the target group and has developed a program based on this analysis. This program should provide the appropriate mix of training and supportive services that can be successfully implemented to meet these needs. The service delivery system aspect is a rating of the applicant's ability to deliver the proposed program, the appropriateness of the plan, and its potential ability to be effective.

(iv) *Linkages and Coordination (Range, 0 to 10 points).* This factor rates the applicant on: (1) Plans for involving appropriate agencies and programs in the design and operation of the applicant's proposed program, and (2) the extent to which the applicant assures that any training or other services provided will meet the needs of participants. The highest rating of 10 points will be awarded to organizations which demonstrate documented programmatic ties with the appropriate agencies in providing resources and services to farmworkers.

(6) *Submission of Funding Application.* Three (3) copies of the funding application shall be submitted either by mail or hand delivered. Mailings must be posted by registered or certified mail, return receipt requested, no later than 45 calendar days following the date of publication of this notice. All hand-delivered applications will be accepted daily between the hours of 8:15 a.m. and 4:45 p.m. A receipt will be provided bearing the time and date of delivery. No hand deliveries will be accepted after 4:45 p.m. on the 45th calendar day following the date of publication of this notice. No exceptions to these mailing and hand-delivery conditions will be granted. Applications not meeting these conditions will not be accepted.

Funding applications must be mailed or hand delivered to: Mr. Edward A. Tomchick, Contracting/Grant Officer, Employment and Training Administration, Room 7122, 601 D Street, N.W., Washington, D.C. 20213.

(7) *Notification of Selection.*

(i) Respondents to this SGA which are designated as potential grantees will be notified by the Department. The notification will invite each potential grantee to negotiate the final terms and conditions of the grant, will establish a reasonable time and place for the negotiation, and will indicate the State or area to be covered by the grant. Grants may be awarded for a 2-year period.

(ii) In the event that no grant applications are received for a specific State or area or that those received are deemed to be unacceptable, or where a

grant agreement is not successfully negotiated, the Department may give the Governor first right to submit an acceptable application pursuant to the Precondition for Grant Application and Responsibility Review tests. Should the Governor not accept the offer within fifteen days, the Department may then: (1) Designate another organization or organizations or (2) reopen the area for competitive bidding.

(iii) An applicant whose grant application is not selected by the Department to receive Section 402 funds will be notified in writing.

(iv) Applicants who submit grant applications which have been rejected may not resubmit a new grant application for the State(s) or area(s) in which they are interested in providing services until the area(s) is announced by the Department as reopened for competition.

(v) Any applicant whose grant application is denied in whole or in part by the Department will be advised of its appeal rights.

Signed at Washington, D.C., this 23rd day of May 1983.

Paul A. Mayrand,

Acting Director, Office of Special Targeted Programs.

David T. Duncan,

Grant Officer, Employment and Training Administration.

BILLING CODE 4510-30-M

Job Training Partnership Act Employment and Training Programs for Indian and Native Americans

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This Solicitation for Notices of Intent (SNOI) announces the requirements and procedures to be followed by organizations interested in submitting a Notice of Intent to apply for Program Year 1984 funds pursuant to Section 401 of the Job Training Partnership Act (JTPA). Such funds are provided to eligible, designated entities through grants. This SNOI sets forth the process by which applicants will be selected and designated as potential grantees with whom the Department of Labor (DOL) will negotiate Program Year 1984 grants.

FOR FURTHER INFORMATION CONTACT: SNOI Information, Division of Indian and Native American Programs, Employment and Training Administration, 601 D Street NW., Room 6102, Washington, D.C. 20213, (202) 376-7053.

SUPPLEMENTARY INFORMATION:

1. *Purpose.* To announce the requirements and procedures to be followed by organizations interested in submitting a Notice of Intent to apply for Program Year 1984 funds.

2. *References.* Section 401, JTPA.

3. *Types of Eligible Applicants.* The following entities are eligible to submit a Notice of Intent.

a. *Indian tribes, bands or groups.* Indian tribes, bands or groups which meet the requirements in Par. 4., below.

b. *Alaskan Native entities.* Alaskan Native entities as defined in the Alaskan Native Claims Settlement Act which meet the requirements in Par. 4., below.

c. *Hawaiian Native entities.* Any private nonprofit organization or public agency representative of the Native Hawaiian community which meets the requirements of Par. 4., below, and which the DOL determines will best meet the needs of Native Hawaiians.

d. *Public or private agencies.* Private nonprofit organizations or public agencies which meet the requirements of Par 4., below, to serve areas where there are significant numbers of Indians or Native Americans, but where there are no Indian tribes, bands or groups, Alaskan Native entities or Hawaiian sponsors or consortia of such sponsors eligible for designation. Where it is not feasible to designate a public agency or private nonprofit organization, DOL may designate a private for profit organization.

e. *Consortium grantees.* The DOL may designate as a Native American grantee a consortium of any of the types of applicants described in pars. a, b, c and d, above, which may or may not be independently eligible.

f. In a situation where the DOL does not designate Indian tribes, bands or groups or Alaskan Native villages or groups to serve such groups, the DOL will, to the maximum extent feasible, enter into arrangements for the provision of services to such groups with other types of grantees which meet with the approval of the Indian tribes, bands, groups or Alaskan Native villages or groups to be served. In such cases, the DOL will consult with the governing body of such Indian tribes, bands, groups or Alaskan Native groups prior to the designation of a Native American grantee.

g. In designating Native American grantees to serve groups other than those in Par. f., above, such as nonreservation Indians and Native Hawaiians, the DOL will, whenever feasible, designate grantees which are directly controlled by Indian or Native American people. Where it is not feasible to designate such types of grantees, DOL will consult with Indian or Native American controlled organizations in the area with respect to the designation of a Native American grantee. Where a private nonprofit organization is designated, DOL shall require any such grantee not directly controlled by Indian or Native American people to establish a Native American Employment and Training Planning Council and to implement an Indian preference policy with respect to hiring of staff and contracting for services with regard to all funds provided pursuant to JTPA (Sec. 7(b) of the Indian Self-Determination and Education Assistance Act.)

4. *Basic Eligibility Requirements.* To be eligible for designation, an applicant must have:

a. A governing body;

b. An Indian or Native American population within its designated service area of at least 1,000 persons;

c. The capability to administer an Indian and Native American employment and training program. For purposes of this paragraph, "capability to administer" means that the applicant can demonstrate that it possesses, or can acquire the managerial, technical, or administrative staff with the ability to properly administer grant funds, develop employment and training opportunities, evaluate program performance and comply with the provisions of the Act, DOL regulations at 20 CFR Part 29-70, and forthcoming regulations specific to this program. Evidence of "capability to administer" may consist of such factors as:

(1) Previous experience in operating an effective employment and training program serving Indians or Native Americans;

(2) The number and kind of activities of similar magnitude and complexity that the applicant has successfully completed;

(3) Information from other Federal agencies regarding program performance or financial and mangement capability.

5. *Required Notice of Intent Documentation and Procedures.* a. An applicant for designation as a Program Year 1984 Native American grantee shall submit a Notice of Intent to apply for funds. Such Notices of Intent must be postmarked no later than 20 calendar days following the date of publication of this announcement and be addressed to the Chief, Division of Indian and Native American Programs (DINAP), Employment and Training Administration, U.S. Department of

Labor, 601 D Street NW., Room 6102, Washington, D.C. 20213. Notices of Intent may also be delivered to that office in person to arrive no later than 4:45 P.M. (EDT) on the 20th calendar day following the date of publication of this announcement. A waiver of up to 10 calendar days may be granted. Notices of Intent submitted under this waiver must be postmarked no later than 30 calendar days following the date of publication of this announcement. If a Notice of Intent submitted under this waiver is delivered in person, it must arrive no later than 4:45 P.M. (EDT) of the 30th calendar day following the date of publication of this announcement. If the 20th or 30th calendar day falls on a Saturday or Sunday, personal delivery and receipt on the following Monday is authorized. Such Notices of Intent shall be submitted on Standard Form 424 as a preapplication for federal assistance.

b. In addition to the Standard Form 424, an applicant must submit the following information:

(1) A description of the geographic area or areas which the applicant proposes to serve, together with the Indian and Native American population in such areas, to the extent known, and the source of the population information. The description must include a list of States (if more than one), in alphabetical order, and under each State, a list of counties, in alphabetical order, followed by a list of tribes, bands or groups (if any), in alphabetical order, and the square mileage of the requested service area. If the applicant was a Native American grantee for the period prior to the one which is being applied for, the applicant must also list any counties and tribes, bands or groups which are being added to, or deleted from, the previous fiscal year's service area and a complete and detailed explanation justifying the requested change;

(2) A statement that the applicant has an Indian or Native American population within its requested service area of at least 1,000 persons and the source of this information;

(3) A description of the applicant's organization, including the legal status of the applicant, the process of selection of the governing body, the duties and responsibilities of the governing body, and in the case of private nonprofit organizations, a copy of the articles of incorporation;

(4) A description of the applicant's capability to operate an Indian or Native American employment and training program, including a statement of the applicant's past successes in operating programs for Indians or other Native Americans and a statement of the applicant's experience in managing the types of programs and activities allowable under JTPA;

(5) A description of the planning process including private sector and tribal enterprise employer involvement which the applicant proposes to undertake in developing a plan for the use of funds;

(6) Information related to a grantee's administrative responsibility. The DOL will conduct an independent review to determine whether each applicant is currently delinquent in repaying any DOL claims or has any outstanding administrative problems.

Applicants are, therefore, encouraged to submit any documents related to these factors including documents and correspondence previously submitted to DOL. Submittal of such materials will be in the applicant's best interest and will enable DOL to move rapidly to complete the Notice of Intent and grantee designation review process.

(7) A statement identifying the applicant by type as specified in Par. 3.

c. Additional requirements for consortium applicants are as follows:

(1) All the members shall be in geographic proximity to one another. A consortium may operate in more than one State.

(2) An administrative unit shall be designated for operating the program, which may be a member of the consortium or an agency formed by the members.

(3) The consortium shall be the Native American grantee.

d. A consortium applicant must submit a consortium agreement. A waiver of up to 30 calendar days for submittal of this agreement may be granted. Agreements submitted under this waiver must be postmarked no later than 30 calendar days following the postmarked date on the submitted Notice of Intent. The agreement shall include:

(1) A statement that the consortium shall have a period of duration at least equal to that of the grant.

(2) An identification of the consortium members.

(3) The geographic area or areas which will be served. The areas must include a list of States in alphabetical order, and under each State, first the counties and then the reservations, both in alphabetical order.

(4) A description of the population to be served.

(5) A statement from each member assuring that each signatory has the necessary legal authority to enter into a consortium agreement.

(6) A statement that the consortium agreement will be signed by the chief elected official or chief executive officer of each consortium member, or by the chief elected official or chief executive officer of one or more consortium members, or by the chief executive officer of the consortium's administrative unit.

(7) A statement that each consortium member jointly and separately accepts responsibility for the operation of the program.

(8) A description of the powers, functions and responsibilities reserved by the consortium members, the process by which decisions will be made and the process by which each member will review and approve the comprehensive employment and training plan.

(9) A statement that the right of reallocating funds within the consortium shall be reserved to the consortium's members.

(10) A statement identifying the administrative unit which will operate the program and delineating its organizational structure, powers, functions and the responsibilities of those individuals who will be acting for and on behalf of the tribes, bands or groups and how such individuals were selected. The administrative unit shall be delegated all powers necessary to administer the program effectively, including the power to enter into contracts and subgrants and other necessary agreements, to receive and expend funds, to employ personnel, to organize and train staff, to develop procedures for program planning, to monitor financial and program performance, and to modify the grant agreement through agreement with DOL.

(11) A consortium which submitted a consortium agreement in the preceding year may, in lieu of executing a new consortium agreement, attest in writing, signed by the chief elected official or chief executive officer of each consortium member, that the prior agreement is extended and amended, as necessary, to meet the requirements of this SNOI.

e. The process of reviewing several hundred Notices of Intent is extremely difficult and time-consuming. Since all applicants are interested in early notification of their designation, nondesignation or conditional designation as a Program Year 1984 grantee, the review process can be expedited by:

(1) Submitting Notices of Intent to arrive on or before the due date;

(2) Sending a duplicate copy of the Notice of Intent, simultaneously, to DINAP Federal Representatives who are outstationed; (This applies to current year grantees only.)

(3) Organizing Notice of Intent documentation in accordance with the sequence of documentation and information requirements of Pars. 5.a.; 5.b. (1), (2), (3), (4), (5), (6), (7); and 5.d;

(4) Insuring that all submitted documents have original signatures and dates where such are required.

f. All applicants are advised that DOL will not designate an entity to be a Program Year 1984 grantee in cases where it is established that:

(1) DOL's efforts to recover unappealed debts (for which three demand letters have been sent) established by final DOL action have been unsuccessful, or

(2) Fraud or criminal activity has been proven to exist within the organization.

All applicants are further advised that should an applicant be designated as a Program Year 1984 grantee and information concerning items f. (1) or (2) is subsequently discovered, such information will apply adversely to subsequent funding decisions.

6. *Responsibility Review.* Prior to finally designating, nondesignating or conditionally designating an applicant to be a Program Year 1984 grantee, DOL will conduct a review of the available records to determine whether or not the organization has responsibly administered Federal funds. This review is intended to establish overall responsibility. The following information will be taken into consideration in making the final decision:

a. Serious administrative deficiencies identified in final findings and determinations such as failure to maintain a financial management system as required by Federal regulations; or

b. Willful obstruction of the audit process: or

c. Substantial failure to provide services to applicants as agreed to in a current or recent grant; or

d. Failure to correct deficiencies brought to the grantee's attention as a result of monitoring activities, reviews, assessments, etc.; or

e. Failure to return a grant closeout package or outstanding advances within 90 days of expiration date or receipt of closeout package, whichever is later, unless an extension has been requested and granted; final billings reflecting serious cost category or total budget cost overrun; or

f. Failure to submit required reports: or

g. Failure to properly report and dispose of government property as instructed by DOL; or

h. Failure to have maintained cost controls resulting in excess cash on hand; or

i. Failure to procure or arrange for audit coverage for any two-year period when required by DOL; or

j. Failure to audit subrecipients within the required period when applicable; or

k. Final disallowed costs in excess of five percent of the grant or contract award; or

l. Failure to establish a mechanism to resolve subrecipients' audits within established timeframes.

7. *Designations, Conditional Designations and Non-Designations.* On or about August 1, 1983, DOL will designate, conditionally designate or not designate Native American grantees for Program Year 1984. Each applicant will be notified by letter of the determination. Those applicants who are not designated will be advised of procedures for appeal. Conditional designations will include the conditions and the acting required to remove the conditions and be finally designated.

Signed at Washington, D.C., this 16th day of May, 1983.

Edward A. Tomchick,

Grant Officer, Office of Contracting.

Paul Mayrand,

Acting Director, Office of Special Targeted Programs.

Herbert Fellman,

Chief, Division of Indian and Native American Programs.

[FR Doc. 83-13991 Filed 5-26-83; 8:45 am]

BILLING CODE 4510-30-M

Federal-State Unemployment Compensation Program; Ending of Extended Benefit Periods in the States of Rhode Island and Vermont

This notice announces the ending of the Extended Benefit Periods in the States of Rhode Island and Vermont, effective on May 21, 1983.

Background

The Federal-State Extended Unemployment Compensation Act of 1970 (26 U.S.C. 3304 note) established the Extended Benefit Program as a part of the Federal-State Unemployment Compensation Program. The Extended Benefit Program takes effect during periods of high unemployment in a State, to furnish up to 13 weeks of extended unemployment benefits to eligible individuals who have exhausted their rights to regular unemployment benefits under permanent State and Federal unemployment compensation laws. The Act is implemented by State unemployment compensation laws and by Part 615 of Title 20 of the Code of Federal Regulations (20 CFR Part 615).

Extended Benefits are payable in a State during an Extended Benefit Period, which is triggered "on" when the rate of insured unemployment in the State reaches the State trigger rate set in the Act and the State law. During an Extended Benefit Period individuals are eligible for a maximum of up to 13 weeks of benefits, but the total of Extended Benefits and regular benefits together may not exceed 39 weeks.

The Act and the State unemployment compensation laws also provide that an Extended Benefit Period in a State will trigger "off" when the rate of insured unemployment in the State is no longer at the trigger rate set in the law. A benefit period actually terminates at the end of the third week after the week for which there is an off indicator, but not less than 13 weeks after the benefit period began.

Extended Benefit Period commenced in the State of Rhode Island on February 20, 1983 and in the State of Vermont on January 23, 1983, and have now triggered off.

Determination of "off" Indicator

The heads of the employment security agencies of the States named above have determined that the rate of insured unemployment in each State for the period consisting of the week ending on April 30, 1983, and the immediately preceding twelve weeks, fell below the State trigger rate, so that for that week there was an "off" indicator in each State.

Therefore, the Extended Benefit Periods in these States terminated with the week ending on May 21, 1983.

Information for Claimants

Each State employment security agency will furnish a written notice to each individual who is filing claims for Extended Benefits of the end of the Extended Benefit Period and its effect on the individual's right to Extended Benefits. 20 CFR 615.13(d)(3).

Persons who wish information about their rights to Extended Benefits in the States named above should contact the nearest State employment service officer or unemployment compensation claims office in their locality.

Signed at Washington, D.C. on May 10th, 1983.

Albert Angrisani,

Assistant Secretary of Labor.

BILLING CODE 4510-30-M

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibility under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the proposed forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency forms under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of any particular revision they are interested in.

Each entry will contain the following information:

The Agency of the Department issuing this form.
The title of the form.
The Agency form number, if applicable.
How often the form must be filled out.
Who will be required to or asked to report.
Whether small business or organizations are affected.
The standard industrial classification (SIC) codes, referring to specific respondent groups that are affected.
An estimate of the number of responses.
An estimate of the total number of hours needed to fill out the form.
The number of forms in the request for approval.
An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202–523–6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room S–5526, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Arnold Strasser, Telephone 202–395–6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, NEOB, Washington, D.C. 20503.

Any member of the public who wants to comment on a form which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Revision

- Employment and Training Administration
- National Longitudinal Survey of Work Experience (Mature Men) 1983
- LGT–1121; LGT1C; MT–290
- Annually
- Men aged 45–59
- 2,800 responses; 1,260 hours

The information provided in this survey will be used by the Department of Labor to help develop programs designed to improve the retirement planning for men in this age group.

Extension (Burden Change)

- Employment Standards Administration
- Notice of Issuance of Insurance Policy
- CM–921
- Annually
- Business or other for-profit
- 5,000 responses; 833 hours; 1 form

The CM–921 provides insurance carriers with the means to supply DCMWC with information which shows that a responsible coal mine operator is insured pursuant to the requirements set forth by the Black Lung Benefits Reform Act of 1972.

- Mine Safety and Health Administration
- Certificate of Training
- On occasion
- Businesses or other for-profit and small businesses or organizations
- SIC: Major groups 10, 11, 12 and 14
- 20,000 respondents; 80,000 hours

Upon completion of each training program the mine operator is required to certify on a form that the miner has received the required training in each subject area of the approved health and safety training plan. MSHA Form 5000–23 provides the mining industry with an expeditious and nationally uniform method for the compilation of this safety training information.

Reinstatement

- Occupational Safety and Health Administration
- Occupational Safety and Health Administration Complaint, OSHA–7
- On occasion
- Individuals or households
- 13,000 responses; 3,692 hours

The OSHA–7 form is used by employees to report unhealthful and/or unsafe conditions in the workplace. Employee reports are authorized by Section 8(f) of the Occupational Safety and Health Act. The information is used by OSHA to evaluate the alleged hazardous working conditions and to schedule an inspection or respond in another manner, as appropriate.

Signed at Washington, D.C. this 24th day of May 1983.

Paul E. Larson,

Departmental Clearance Officer.

BILLING CODES 4510–30–M; 4510–27–M; 4510–43–M; 4510–26–M

MOTOR CARRIER RATEMAKING STUDY COMMISSION

Public Hearing

Date: Thursday, June 16, 1983.

Place: Russell Senate Office Building, Room SR253 (old 235), Constitution Avenue and First Street NE., Washington, D.C. 20510.

Time: 10:30 a.m.

Purpose: To receive testimony from various parties on:

1. Collective ratemaking in the bus industry, and the need for antitrust immunity; and

2. The impact of implementation of the Bus Regulatory Reform Act of 1982 on persons over the age of 60.

Anyone who is interested in submitting written testimony for the record of the Study Commission may do so by sending same to: Gary D. Dunbar, Executive Director, Motor Carrier Ratemaking Study Commission, 100 Indiana Avenue NW., Washington, D.C. 20001.

For further information, Contact: Gary D. Dunbar, Executive Director, (202) 724–9600.

Submitted this, the 24th day of May, 1983.

Gary D. Dunbar,

Executive Director.

[FR Doc. 83–14312 Filed 5–26–83; 8:45 am]

BILLING CODE 6820–BD–M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 83–49]

NASA Advisory Council, Aeronautics Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 93–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee, Informal Advisory

Subcommittee on Safety and Operating Systems.

DATE AND TIME: June 14, 1983, 8:30 a.m. to 5 p.m.; June 15, 1983, 8:30 a.m. to 4:30 p.m.; June 15, 1983, 8:30 a.m. to 12 noon.

ADDRESS: NASA Langley Research Center, Building 1244, Room 223, Hampton, VA.

FOR FURTHER INFORMATION CONTACT: Mr. Roger Winblade, National Aeronautics and Space Administration, Code RJT–2, Washington, DC 20546 (202/755–3000).

SUPPLEMENTARY INFORMATION: The Informal Advisory Subcommittee on Safety and Operating Systems has been established to assist the NASA in assessing the current adequacy of aircraft safety and transport aircraft operating systems technology and recommend actions to reduce deficiencies through modification of the planned NASA research and technology program. The Subcommittee, chaired by J. D. Smith, is composed of ten members. The meeting will be open to the public up to the seating capacity of the room (approximately 50 people including the Subcommittee members and participants).

Type of meeting: Open.

Agenda

June 14, 1983

8:30 a.m.—Opening Remarks.
9:30 a.m.—Status of Recommendations from last Meeting.
10 a.m.—Update of NASA FY 1984 Budget and Aeronautics Long Range Plan.
11 a.m.—Summary of the Office of Science and Technology Policy (OSTP) Study on Federal Policy for Aeronautics Research and Technology.
1 p.m.—Review of NASA Research Activities Applicable to Aircraft Safety and Transport Aircraft Operating Systems.
5 p.m.—Adjourn.

June 15, 1983

8:30 a.m.—Advanced Transport Operating Systems Program Review.
11 a.m.—Crew Station Technology Status.
1 p.m.—Intergrated Digital/Electric Aircraft Program.
1:45 p.m.—Review of NASA Research Activities Applicable to Aviation Safety.
3:45 p.m.—Reports from Ex-Officio Members.
4:30 p.m.—Adjourn.

June 16, 1983

8:30 a.m.—Subcommittee Recommendations.
12 noon—Adjourn.

Richard L. Daniels,

Director, Management Support Office, Office of Management.

May 23, 1983.

[FR Doc. 83–14296 Filed 5–26–83; 8:45 am]

BILLING CODE 7510–01–M

[Notice 83–51]

NASA Advisory Council, Aeronautics Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee, Informal Advisory Subcommittee on Transport Aircraft.

DATE AND TIME: June 20, 1983, 8:30 a.m. to 4:30 p.m.; June 21, 1983, 8:30 a.m to 12 noon.

ADDRESS: NASA Headquarters, Federal Building 10B, Room 625, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: Mr. Roger Winblade, National Aeronautics and Space Administration, Code RJT–2, Washington, DC 20546 (202/755–3000).

SUPPLEMENTARY INFORMATION: The Informal Advisory Subcommittee on Transport Aircraft has been established to assist the NASA in assessing the current adequacy of transport aircraft technology and recommend actions to reduce deficiencies through modification of the planned NASA research and technology program in transport advanced aerodynamics, avionics and controls, structures and materials, and propulsion. The Subcommittee, chaired by Mr. Russell Hopps, is comprised of eight members. The meeting will be open to the public up to the seating capacity of the room (approximately 40 persons including the Subcommittee members and participants).

Type of meeting: Open.

Agenda

June 20, 1983

8:30 a.m.—Chairperson's Opening Remarks.
8:45 a.m.—Executive Secretary's Report.
9 a.m.—Systems Technology Status Reports.
10:45 a.m.—NASA Budget Status and Overview of the Aeronautics Long Range Plan.
1 p.m.—The Future of Air Transport and NASA's Aeronautics Role.
2 p.m.—Emerging Technologies in Air Transportation.
3 p.m.—Discussions on Transport Aircraft Major Issues.
4:30 p.m.—Adjourn.

June 21, 1983

8:30 a.m.—Subcommittee Discussion of Transport Aircraft Research and Technology Programs.
10 a.m.—Subcommittee Recommendations.
12 Noon—Adjourn.

Richard L. Daniels,

Director, Management Support Office, Office of Management.

[FR Doc. 83–14297 Filed 5–26–83; 8:45 am]

BILLING CODE 7510–01–M

[Notice 83–50]

NASA Advisory Council, Space Systems and Technology Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Systems and Technology Advisory Committee, Informal Executive Subcommittee.

DATE AND TIME: June 15, 1983, 8:30 a.m. to 5 p.m.; June 16, 1983, 8:30 a.m. to 12 noon.

ADDRESS: National Aeronautics and Space Administration, 600 Independence Ave., SW., Room 625, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Mr. C. Robert Nysmith, National Aeronautics and Space Administration, Code R, Washington, DC 20546 (202/755–8550).

SUPPLEMENTARY INFORMATION: The Informal Executive Subcommittee was established to provide overall guidance and direction to the space research and technology activities of the Space Systems and Technology Advisory committee. The Subcommittee, chaired by Mr. Robert L. Walquist, is comprised of six members. The meeting will be open to the public up to the seating capacity of the room (approximately 50 persons including the Subcommittee members and participants).

Type of Meeting: Open

Agenda:

June, 15, 1983

8:30 a.m.—Chairperson's Remarks.
9 a.m.—Review of NASA Space Technology Long Range Plan.
11 a.m.—Discussion of NASA Technology High Priority Goals.
12:30 p.m.—Subcommittee Chairperson's Report.
5 p.m.—Adjourn.

June 16, 1983

8:30 a.m.—Discussion and

Consolidation of Subcommittee Reports.

11 a.m.—Summary of Meeting Results to the Office of Aeronautics and Space Technology Management.

12 noon—Adjourn.

Dated: May 23, 1983.

Richard L. Daniels,

Director, Management Support Office, Office of Management.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Museum Advisory Panel (Overview); Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), as amended, notice is hereby given that a meeting of the Museum Advisory Panel (Overview) to the National Council on the Arts will be held on June 15-16, 1983, from 9:00 a.m.—5:30 p.m. at the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, D.C.

A portion of this meeting will be open to the public on June 15 from 9:00 a.m.–2:00 p.m. and on June 16 from 9:00 a.m.–5:30 p.m. to discuss Future Direction and Fiscal 1985 Guidelines revisions.

The remaining sessions of this meeting on June 15 from 2:00 p.m.–5:30 p.m. are for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c) (4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 682-5433.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

May 20, 1983.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards, Meeting

In accordance with the purposes of Sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the Advisory Committee on Reactor Safeguards will hold a meeting on June 9-11, 1983, in Room 1046, 1717 H Street, NW, Washington, D.C. Notice of this meeting was published in the **Federal Register** on April 27 and May 25, 1983.

The agenda for the subject meeting will be as follows:

Thursday, June 9,1983

8:30 a.m.–8:45 a.m.: Opening Remarks (Open)—The ACRS Chairman will report briefly on matters of current interest regarding ACRS activities.

8:45 a.m.– 9:45 a.m.: NRC Severe Accident Policy Statement (SECY-82-1B) (Open)—The Committee members will hear a briefing regarding the proposed NRC policy for dealing with severe accidents in the licensing of nuclear power plants.

9:45 a.m.– 10:45 a.m.: Pipe Cracking in Boiling Water Reactors (Open)—The Committee members will hear a report by members of the NRC staff regarding stress corrosion cracking in the primary coolant systems of several BWR's.

Portions of this session will be closed as necessary to discuss Proprietary Information related to this matter.

10:45 a.m.–12:15 p.m. and 1:15 p.m.–2:45 p.m.: Double Ended Pipe Break (Open)—The Committee will hear and discuss a report from the NRC Staff regarding proposed changes in requirements for use of the double-ended pipe break as the Design Basis Accident for nuclear power plants.

2:45–4:45 p.m.: NRC Reactor Safety Reseach Program and Budget (Open) —The members of the Committee will discuss proposed ACRS comments and recommendations regarding the proposed NRC safety research program and budget for FY 1985–86.

4:45–p.m.—6;15–p.m.: Prioritization of Generic Issues (Open)—The members of the Committee will discuss proposed priorities for dealing with outstanding generic issues. Members of the NRC Staff will participate, as appropriate.

Friday, June 10, 1983

8:30 a.m.–9:00–a.m.: Future ACRS Activities (Open) —The members will discuss anticipated subcommittee activities and proposed items for Committee consideration.

9:00 a.m.–10:00 a.m.: NRR Activities (Open)—The Committee members will meet with members of the NRC Staff to discuss activities related to the Systematic Evaluation Program, Phase III, NREP/IREP, and Systems Interaction Programs of the NRC Staff.

10:00 a.m.–11:00 a.m.: Generic Implications of the Salem Nuclear Plant Circuit Breaker Failure (Open) —The Committee will hear and discuss a report from the NRC Staff regarding the generic implications of recent failures of shutdown-system circuit breakers in the Salem Nuclear Generating Station.

11:00 a.m.–1:00 p.m. Anticipated Transients Without Scram (Open)—The members of the Committee will consider a proposed change in NRC regulations regarding requirements to deal with anticipated transients without scram. Representatives of the NRC Staff will participate as appropriate.

Portions of this session may be closed as required to discuss Proprietary Information regarding this matter.

2:00 p.m.–3:00 p.m.: Station Blackout (Open)—Members of the Committee will consider the proposed NRC action plan for resolution of USI–44, Station Blackout. Representatives of the NRC Staff will participate as appropriate.

3:00 p.m.–4:30 p.m. ECCS Evaluation (Open)—The members of the Committee will here reports and discuss proposed changes in ECCS Evaluation Models for boiling water reactors. Representatives of the NRC and the General Electric Company will make presentations and respond to questions regarding this matter.

Portions of this session may be closed as required to discuss Proprietary Information regarding this matter.

4:30 p.m.–6: 30 p.m. NRC Reactor Safety Research Program and Budget (Open) —The Committee will continue its discussion regarding the proposed NRC safety research program and budget for FY 1985–86.

Saturday, June 11, 1983

8:30 a.m.–12:30 p.m.: Preparation of ACRS Reports (Open)—The Committee will prepare its reports to the NRC regarding topics considered during this meeting. In addition, the Committee will complete its report on the FDA for the GESSAR II standardized nuclear plant which was reviewed during the 276th ACRS meeting.

1:30p.m.–3:30 p.m.: ACRS Subcommittee Activities (Open)—The members will hear and discuss the reports of designated subcommittees regarding safety-related matters including use of probabilistic risk assessment in the regulatory process, QA initiatives in the nuclear industry, developments regarding human factors in the licensing process.

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 1, 1982 (47 FR 43474). In accordance with these procedures, oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Committee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS Executive Director as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture and television cameras during this meeting may be limited to selected portions of the meeting as determined by the Chairman. Information regarding the time to be set aside for this purpose may be obtained by a telephone call to the ACRS Executive Director (R. F. Fraley) prior to the meeting. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACRS Executive Director if such rescheduling would result in major inconvenience.

I have determined in accordance with Subsection 10(d) Pub. L. 92–463 that it is necessary to close portions of this meeting as noted above to discuss Proprietary Information (5 U.S.C. 552b(c)(4)).

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted can be obtained by a prepaid telephone call to the ACRS Executive Dirctor, Mr. Raymond F. Fraley (telephone 202/634–3265), between 8:15 a.m. and 5:00 p.m. e.d.t.

Dated: May 24,1983.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 83–14375 Filed 5–26–83; 8:45 am]

BILLING CODE 7590–01–M

Applications for Licenses To Import/Export Nuclear Facilities or Materials

Pursuant to 10 CFR 110.70(b) "Public notice of receipt of an application", please take notice that the Nuclear Regulatory Commission has received the following applications for import/export licenses. A copy of each application is on file in the Nuclear Regulatory Commission's Public Document Room located at 1717 H Street, N.W., Washington, D.C.

A request for a hearing or petition for leave to intervene may be filed within 30 days after publication of this notice in the **Federal Register**. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, the Secretary, U.S. Nuclear Regulatory Commission and the Executive Secretary, Department of State, Washington, D.C. 20520.

In its review of applications for licenses to export production or utilization facilities, special nuclear material or source material, noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility or material to be exported. The table below lists all new major applications.

Dated this 23rd day of May 1983 at Bethesda, Maryland.

For the Nuclear Regulatory Commission.

James V. Zimmerman,

Assistant Director, Export/Import and International Safeguards, Office of International Programs.

EXPORTS/IMPORTS

Name of applicant, date of application, date received, application No.	Material type	Material in kilograms		End-use	Country of destination
		Total element	Total isotope		
Exxon Nuclear Co., May 10, 1983–May 13, 1983, ISNM83012.	3.4 percent enriched uranium.	23,000	782	Fabrication of fuel for reexport to-Biblis A. W. Germany	From France.
Exxon Nuclear Co., May 10, 1983–May 13, 1983, XSNM02001 (01).	3.4 percent enriched uranium.	[1]15,254	[1]518	Amend license to increase quantity authorized for export to Biblis A.	West Germany.
Transnuclear, Inc., May 17, 1983–May 17, 1983, XSNM01913 (02).				Amend to authorize export of Australian origin material	West Germany.

BILLING CODE 7590–01–M

[Docket No. 70–1201]

Negative Declaration on Renewal of License No. SNM–1168, Babcock & Wilcox Co., Nuclear Fuel Fabrication Plant, Lynchburg, Virginia

The U.S. Nuclear Regulatory Commission (the Commission) is considering the renewal of Special Nuclear Material License SNM–1168 for the continued operation of the Nuclear Fuel Fabrication Plant at Lynchburg, Virginia.

The Commission's Division of Fuel Cycle and Material Safety has prepared an environmental impact appraisal for the proposed renewal of license SNM–1168. On the basis of this appraisal, the Commission has concluded that the environmental impact created by the proposed license renewal action would not be significant and does not warrant the preparation of an environmental impact statement and, accordingly, it has been determined that a Negative Declaration is appropriate. The environmental impact appraisal (NUREG–0987) is available for public inspection at the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C. A copy may be purchased by writing to the U.S. Nuclear Regulatory Commission, Sales Manager, Division of Technical Information and

Document Control, Washington, D.C. 20555.

Dated at Silver Spring, Maryland this 25th day of May 1983.

R. G. Page,

Chief, Uranium Fuel Licensing Branch, Division of Fuel Cycle and Material Safety, NMSS.

BILLING CODE 7590-01-M

Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued a revision to a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.97, Revision 3, "Instrumentation for Light-Water-Cooled Nuclear Power Plants to Assess Plant and Environs Conditions During and Following an Accident," describes a method acceptable to the NRC staff for complying with the Commission's regulations to provide instrumentation to monitor plant variables and systems during an accident in a light-water-cooled nuclear power plant. This revision modifies, updates, and clarifies the previous guidance based on additional studies and evaluations.

Comments and suggestions in connection with: (1) Items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Copies of active guides may be purchased at the current Government Printing Office price. A subscription service for future guides in specific divisions is available through the Government Printing Office. Information on the subscription service and current prices may be obtained by writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Publication Sales Manager.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland, this 23rd day of May 1983.

For the Nuclear Regulatory Commission.

Denwood F. Ross,

Acting Director, Office of Nuclear Regulatory Research.

[FR Doc. 83-14379 Filed 5-26-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-537-CP]

United States Department of Energy, Project Management Corporation, Tennessee Valley Authority (Clinch River Breeder Reactor Plant); Construction Permit Evidentiary Hearing

May 24, 1983.

Please take notice that an Evidentiary Hearing will be held in this Construction Permit Licensing proceeding before an Atomic Safety and Licensing Board (Board), pursuant to the Atomic Energy Act of 1954 as amended (the Act), and the regulations set forth in Title 10, Code of Federal Regulations (CFR), Part 50, "Licensing of Production and Utilization Facilities," Part 51, "Licensing and Regulatory Policy and Procedures for Environmental Protection," and Part 2, "Rules of Practice."

An Evidentiary Hearing will commence on Monday, July 18, 1983 at 8:30 a.m., local time, at the Schools Administration Building, Conference Seminar Room, New York Avenue and Newcomb, Oak Ridge, Tennessee 37830. The hearing will cover evidence on the contentions, questions and issues described *post*, and other matters mandated by the NRC regulations.

The Clinch River Breeder Reactor Plant (CRBRP), a demonstration scale liquid metal fast breeder reactor (LMFBR), was originally authorized by Congress in 1970. In April, 1975, the Project Management corporation (PMC) and the Tennessee Valley Authority (TVA) filed a § 104(b) application with the U.S. Nuclear Regulatory Commission (NRC) for a license to construct and operate the proposed CRBRP. The Application and Environmental Report (ER) were docketed on April 11, 1975. The Preliminary Safety Analysis Report (PSAR) was docketed on June 13, 1975. Legislation enacted by Congress in January 1976, authorized realignment of responsibilities of the participants in the project. The license application was accordingly amended in May 1976, to recognize that the U.S. Energy Research and Development Administration (ERDA) had overall responsibility for managing the design, construction, and operation of the CRBRP. The NRC Staff conducted a review of the CRBRP between 1975 and 1977. The Staff issued a Final Environmental Statement (FES) in Feburary 1977, which recommended the grant of a Construction Permit, and issued a Site Suitability Report (SSR) in March 1977, which stated that the site was suitable from the standpoint of radiological health and safety.

The parties to this proceeding are the Applicants, the NRC Staff, and the Natural Resources defense Council, Inc. and the Sierra club (Intervenors). The State of Tennessee (State) and City of Oak Ridge (City) participated as an "interested state" or "municipality," pursuant to 10 CFR 2.715(c). On April 22, 1977, the Energy Research and Development Administration (ERDA), predecessor to DOE, moved that all hearing procedures be suspended because the Carter Administration had determined that construction of the CRBRP would be indefinitely deferred. As a result, on April 25, 1977 the Board ordered the hearing procedures and schedules to be suspended.

In the ensuing four year period, the project continued design, research and development and procurement activities, while licensing activities remained suspended. In each of those years, Congress acted to preserve the project by providing substantial funding.

In August 1981, President Reagen Signed the Omnibus Budget Reconciliation Act of 1981 (Pub. L. No. 97-35), which expressed the intention that the project be expeditiously completed. In a Nuclear Policy Statement of October 8, 1981, the President directed that "government agencies proceed with a demonstration of breeder reactor technology, including completion of the Clinch River Breeder Reactor."

On January 11, 1982, the Applicants filed a motion to lift the suspension of hearings, and on January 19, 1982, the Board granted this motion and issued a Notice of Prehearing Conference.

Evidentiary hearings were held August 23-27, 1982, November 16-19, 1982, December 13-17, 1982 and January 4-5, 1983. The Board entered a Partial Initial Decision on February 28, 1983 (LBP-83-8). The Board concluded that, upon balancing all conflicting factors contained in the record of the proceeding, and weighing the environmental, economic, technical and other benefits against the environmental and other costs, and considering available alternatives, a limited work authorization (LWA-1) should be issued for the CRBRP pursuant to 10 CFR 50.10(e).

The Construction Permit evidentiary hearings will be conducted by a Board which has been duly designated by the

Chairman of the Atomic Safety and Licensing Board Panel, consisting of Gustave A. Linenberger, Jr., Dr. Cadet H. Hand, Jr., Members and Marshall E. Miller, Esq., Chairman.

The contentions, questions and issues to be considered at the hearing are as follows:

Contentions (1, 3 and 9)

1. The envelope of DBAs should include the CDA.

(a) Neither Applicants nor Staff have demonstrated through reliable data that the probability of anticipated transients without scram or other CDA initiators is sufficiently low to enable CDAs to be excluded from the envelope of DBAs.

(b) Neither Applicants nor Staff have established that Applicants' "reliability program" even if implemented is capable of eliminating CDAs as DBAs.

(1) The methodology described in the PSAR places reliance upon fault tree and event tree analysis. Applicants have not established that it is possible to obtain sufficient failure mode data pertinent to CRBR systems to validly employ these techniques in predicting the probability of CDAs.

(2) Applicants' projected data base to be used in the reliability program is inadequate. Applicants have not established that the projected data base encompasses all credible failure modes and human elements.

(3) Even if all of the data described in Applicants' projected data base is obtained, applicants have not established that CDAs have a sufficiently low probability that they may be excluded from the CRBR design bases.

(4) Applicants have not established that the test program used for their reliability program will be completed prior to Applicants' projected date for completion of construction of the CRBR.

3. Neither Applicants nor Staff have given sufficient attention to CRBR accidents other than the DBAs for the following reasons:

(a) Nether Applicants nor Staff have done an adequate, comprehensive analysis comparable to the Reactor Safety Study ("Rasmussen Report") that could identify other CRBR accident possibilities of greater frequency or consequence than the accident scenarios analyzed by Applicants and Staff.

(b) Neither Applicants' nor Staff's analyses of potential accident initiators, sequences, and events are sufficiently comprehensive to assure that analysis of the DBAs will envelope the entire spectrum of credible accident initiators, sequences, and events.

(c) Accidents associated with core melt through following loss of core geometry and sodium-concrete interactions have not bee adequately analyzed.

(d) Neither Applicants nor Staff have adequately identified and analyzed the ways in which human error can initiate, exacerbate, or interfere with the mitigation of CRBR accident.

9. Neither Applicants nor Staff have demonstrated that Applicants' plans for coping with emergencies are adequate to meet NRC requirements.

(c) The PSAR contains insufficient analysis of the time required to evacuate various sectors and distances within the plume exposure pathway EPZ for transient and permanent populations, nor does it note major impediments to the evacuation or taking of protective actions.

(f) Applicants' proposed emergency plans fail to take into account the special measures necessary to cope with a CDA, including the need for increased protective, evacuation and monitoring measures, reduced response time and special protective action levels.

(g) Applicants and Staff have failed to provide adequate assurance that the proposed emergency plans will meet the requirements and standards of 10 CFR 50.47(b).

Board Questions

1. In its safety Goal Development Program announcement (48 FR 10772, March 14, 1983) the Commission stated that during the 90-day period (ending June 8, 1983) for public comment on the proposed evaluation plan "it is expected that preliminery information on new radiological source terms will become available * * *" (*Id.*, at 10778). The Staff is requested to advise whether that information will be evaluated for any impact on this proceeding, and the reasons for its answer.

2. As regards fuel performance, to date the use of the term "failed fuel" has not consistently permitted delineation of the various failure modes that might have been alluded to (e.g., clad perforation, fission product leakage, clad bulging or rupture, melting of fuel pellets, etc.). The Applicants are requested to summarize the anticipated performance of the CRBR fuel associated with normal operation and accidental transients, describe various failure modes that must be dealt with, identify any operational limits (e.g., maximum linear heat generation rates, maximum cladding hot spot temperatures, etc.) to be imposed, and to review the basis for confidence (e.g., supportive evidence) that the proposed fuel behavior characteristics will be realized.

3. Avoidance of primary coolant pipe rupture seems to depend in part upon the fact that coolant temperature is well below its boiling temperature and that coolant pressure is near atmospheric pressure (10 atmos.). Applicants are requested to present a technical summary of how these coolant characteristics will result in a reduced likelihood of pipe rupture in piping designed for CRBR use.

4. Applicants are requested to explain how the CRBR will be configured to assure that convective circulation of the sodium coolant will be available to prevent fuel damage, if needed. This explanation should reference any supportive experimental or operational evidence. The Staff is requested to advise the Board whether it accepts convective circulation as a viable mechanism for fuel protection, and the reasons for its answer.

5. In the area of quality, the Applicants are requested to explain whether (and/or how) differing functional levels of effort will be applied, depending upon whether a component or system is necessary for safety, important to safety, or not safety related. The divisions of authority and functional responsibilities for quality assurance and quality control amongst the various contractors and the Applicants should be discussed with emphasis on how the management of the various CRBR contractor fabrication and construction efforts will be coordinated to assure the minimizing of QA and QC oversights, especially where interfacing is involved. Applicants are also requested to describe what efforts will be undertaken to insure that accurate as-built plans and specifications will be available when needed, if the CRBR is constructed.

6. The SER discussion of quality seems to emphasize quality assurance and the various separate contractor organizations that will implement it. Does the Staff consider that QC responsibilities and activities are separate from QA or an integral part thereof? The Staff is requested to discuss its answer to this question and to explain briefly how it will monitor QA and QC efforts for adequacy.

7. Applicants are requested to discuss commercial and recreational river traffic (if any) from two points of interest:

(a) Practical methods of controlling same during off-normal plant conditions, and

(b) The potential for hazardous cargo posing a threat to the CRBR.

8. Applicants are requested to discuss the design characteristics of the containment/confinement structures and the steam generator, with respect to challenges to those structures arising from transient (or accident) induced overpressure and overtemperature conditions. This discussion should address any engineered safety systems or components tht will be relied upon for protection (e.g., containment shell cooling), and should reference supportive test or operational experience.

9. The Staff's attention is directed to the discussion of protective action guidelines (PAGs) at pages 29–30 of the Partial Decision of February 28, 1983. The Staff is requested to address the question of whether a PAG revision for the CRBR should be made, and to explain its answer.

10. The Staff's testimony at Tr. 3694 anticipates the need for further research and development on measurement capabilities to achieve DOE's goals for material control and accountability at the DRP. The Staff is requested to explain whether this additional effort is currently underway or definitively planned for the future, and the extent to which it is critical to the effectiveness of CRBR fuel safeguards measures.

11. In discussing the energetics of accidents beyond design basis, the Staff offers the statement that there will be an "isentropic expansion yield to one atmosphere" (NUREG–0968, Vol. 2, p. A. 2–5). The Staff is requested to discuss briefly what is the physical significance of this statement and the extent to which it contributes to any conservatism in the analyses of energy releases. Phenomenologically, how has the Staff satisfied itself that "approximately 2550 MJ would be required to produce a slug impact kinetic energy close to the head design capability of 75 MJ" (Ibid.).

12. NUREG–0968 contains many references to items that are to be resolved at the OL review stage. In view of the apparently advanced stages of hardware design and procurement currently in being, the Board is

concerned that said OL review (assuming a CP issues) may require substantive changes of a costly and time consuming nature, or in the alternative, result in a compromise of performance safety. The Staff is requested to offer comments upon this situation and to provide whatever insights it can now offer for avoiding such problems.

13. With respect to the fuel system, the Staff has identified certain operational fallback positions potentially available to mitigate unresolved problems (NUREG–0968, Vol. 1, p. 4–47, 48). The Staff is requested to discuss briefly the extent if any to which invoking such operational fallbacks might compromise the achievement of CRBR programmatic objectives.

14. Operation with leaking fuel pins could conceivably offer the opportunity for these pins to "inhale" some amount of sodium whenever the reactor is shut down. Should this occur, subsequent return to operation at power might then result in a significant increase in pellet-to-cladding gap conductance with an attendant off-normal performance of the fuel. The Staff is requested to comment upon whether it sees this as a problem requiring resolution and the reasons for its answer.

15. The Applicants have proposed a reliability assurance program that focuses primarily on plant protective systems. The Board requests Applicants to address the question of whether said program will (or ought to) take account of findings derived from the CRBR quality assurance program, and if so, describe the administrative mechanism envisaged to accomplish this.

16. The SER discusses the impact of aerosol behavior on containment shell cooling. The Staff is requested to comment on whether changing concrete aggregate from calcitic to dolomitic limestone could significantly alter the behavior of the aerosols, and explain the basis for the answer.

17. What is the status of the Staff's review of, and what is the Staff's position with respect to, "The Eight Areas of Concern" listed in Section I, Table II of NUREG/CR–3224?

Any person who wishes to make an oral or written statement in this proceeding but who has not filed a petition for leave to intervene, may request in writing permission to make a limited appearance pursuant to the provisions of 10 CFR 2.715 of the Commission's Rules of Practice. Limited appearances will be permitted at the discretion of the Board at times, within limits, and on such conditions as may be determined by the Board. Persons desiring to make a limited appearance are requested to inform in writing the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, D.C. 20555, not later than twenty (20) days from the date of publication of this notice in the **Federal Register**. A person permitted to make a limited appearance does not become a party, but may state his or her position and raise questions which he or she would like to have answered to the extent that the questions are germane and within the scope of the hearing as specified above. A member of the public does not have a right to participate in this evidentiary hearing unless granted the right to intervene as a party or the right of limited appearance.

Written limited appearance statements may be submitted to the Board at any time prior to closing the record in this phase of the proceeding. Oral statements will only be received at times designated by the Board in order not to interfere with the taking of evidence in this adjudicatory proceeding. Both oral and written statements will be made a part of the record of this proceeding.

It is so ordered.

Dated at Bethesda, Maryland, this 24th day of May 1983.

For the Atomic Safety and Licensing Board.

Marshall E. Miller,

Chairman, Administrative Judge.

OFFICE OF PERSONNEL MANAGEMENT

Proposed Extension of Form For OMB Review

AGENCY: U.S. Office of Personnel Management.

ACTION: Notice of proposed extension of form submitted to OMB for clearance.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980, this notice announces a proposed extension of a form that collects information from the public. Section 205(b) of the Ethics in Government Act of 1978 (Pub. L. 95–521, as amended) set forth certain requirements to be met by a person requesting to inspect or obtain a copy of a financial disclosure report. OPM Form 1401, Request to Inspect or Receive Copies of SF 278, Financial Disclosure Report, serves as the standardized application form for this purpose. For copies of this proposal, call John P. Weld, Agency Clearance Officer, on (202) 632–7720.

DATE: Comments on this proposal should be received within 10 working days from the date of this publication.

ADDRESSES: Send or deliver comments to:

John P. Weld, Agency Clearance Officer, U.S. Office of Personnel Management, 1900 E Street, N.W., Room 6469, Washington, D.C. 20415; and

Frank Reeder, Information Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: John P. Weld, (202) 632–7720.

Office of Personnel Management.

Donald J. Devine,

Director.

BILLING CODE 6325–01–M

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Acid Rain Peer Review Panel Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770), notice is hereby given of the following meeting:

Name: Acid Rain Peer Review Panel.

Dates, times, & location: June 2, 3, 4, 1983, 9:00 a.m.–4:30 p.m.

Office: Room 5104, New Executive Building, 17th and Pennsylvania Avenue, N.W., Washington, D.C.

Type of meeting:

Part Open: June 2, 1983, 10:00 a.m.–4:30 p.m.
June 3, 1983, 9:00 a.m.–4:30 p.m.
June 4, 1983, 9:00 a.m.–3:30 p.m.

Part Closed: June 2, 1983, 9:00 a.m.–10:00 a.m.
June 4, 1983, 3:30 p.m.–4:30 p.m.

Proposed agenda:

(1) Committee administrative business, personnel policies.

(2) Discussion of written comments received from the public.

(3) Discussion of final working group 1 & 2 reports.

(4) Preparation of the final panel report.

Reason for closed meeting: Discussion of personnel policies require discussion of internal personnel procedures of the Executive Office of the President. Accordingly, these portions of the meeting will be closed to the public pursuant to 5 U.S.C. 552b(c)(2).

Public participation: Parts of the meeting as indicated above are open to the public. Due to limited meeting room capacity, individuals wishing to attend should contact Ms. Jean D. Robinson at (202) 395–7288, prior to 3:00 p.m. on June 1, 1983.

Jerry D. Jennings,

Executive Director, Office of Science & Technology Policy.

BILLING CODE 3170–01–M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Docket Nos. 301-40, 41, 42]

National Soybean Processor Association; Initiation of Investigation

On April 6, 1983 the Chairman of the Section 301 Committee received a petition filed under Section 301 of the Trade Act of 1974 (19 U.S.C. 2411 *et seq.*) by the National Soybean Processors Association alleging that the Governments of Brazil, Argentina, Spain, Portugal, Malaysia and Canada engage in practices which burden and restrict U.S. commerce.

Specifically, the petition alleges that Brazil grants subsidies on the production and export of soybean oil and meal in a manner which is inconsistent with Brazil's obligations under the Agreement on the Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade (the Subsidies Code) and which is otherwise unreasonable and a burden on U.S. commerce. It further alleges that Argentina grants subsidies on the export of soybean oil and meal in a manner which is inconsistent with Article XVI of the General Agreement on Tariffs and Trade (the GATT) and which is otherwise unreasonable and a burden on U.S. commerce. With respect to Spain, the petitioner alleges that the government grants subsidies on the export of soybean oil and meal in a manner which is inconsistent with the Subsidies Code and is otherwise unreasonable and a burden on U.S. commerce, and that the government maintains unjustifiable quantitative restrictions on the consumption of soybean oil. With respect to Portugal, the petitioner alleges that the government provides subsidies on the production and export of soybean oil and meal in a manner which is inconsistent with the GATT and is other wise unreasonable and a burden on U.S. commerce and that it maintains unjustifiable quantitative restrictions on imports of meal. The petitioner alleges that Malaysia subsidizes its exports of refined palm oil in a manner which is inconsistent with the GATT and otherwise unreasonable and a burden on U.S. commerce by imposing a higher export tax on crude palm oil that on refined palm oil. Finally, the petitioner alleges that Canada and the province of Alberta provide subsidies on the production of rapeseed oil in a manner which is inconsistent with Canada's obligations under the Subsidies Code and which is otherwise unreasonable and a burden on U.S. commerce.

A copy of the petition is available for public inspection in the Office of the United States Trade Representative, Room 223, 600 17th Street, NW., Washington, D.C. 20506.

On May 23, the United States Trade Representative, (USTR) decided to initiate an investigation with respect to the allegations against (1) Spain; (2) Brazil except that involving differential export taxes; and (3) Portugal insofar as they relate to U.S. exports of soybean meal. For the reasons set forth below, the USTR decided not to include the remaining allegations within the scope of the investigation.

With respect to Canada, the USTR decided not to initiate an investigation because the Government of Canada has indicated that the crushing subsidy provided by the province of Alberta (the major allegation against Canada) will terminate on July 1, 1983. Of course, should this processing subsidy continue, the issue would be open for further consideraton.

With respect to the allegation that the imposition of differential export taxes by the Governments of Malaysia, Argentina and Brazil constitute an export subsidy, the USTR decided not to initiate an investigation because, in its view, such practices do not constitute export subsidies.

With respect to the allegations that Portugal and Argentina subsidize the production and/or export of soybean oil, USTR decided not to initiate an investigation because the petition does not contain sufficient information in support of the allegation.

Upon request of the petitioner, a public hearing has been scheduled for June 24, 1983, to consider the issues raised in the petition with respect to the allegations under investigation. The hearing will be held at the office of the USTR, Room 403, 600 17th Street, NW., Washington, D.C. at 10:00 a.m.

Requests to present oral testimony must be submitted by June 10 and briefs accompanying oral testimony must be received no later than June 20. Written briefs from persons not wishing to present oral testimony should be received on or before June 24. Requests to present oral testimony as well as written submissions should conform to the requirements set forth in 15 CFR 2006.8 and 2006.9 and should be sent to the chairman, Section 301 Committee, Room 223, 600 17th Street, NW., Washington, D.C. 20506.

In order to assure parties an opportunity to contest information provided by other interested parties in the written briefs and oral testimony, rebuttal briefs may be filed by any interested party in accordance with the requirements of 15 CFR 2006.8 no later than July 8.

Jeanne S. Archibald,

Chairman, Section 301 Committee.

[FR Doc. 83-14321 Filed 5-26-83 8:45 am]

BILLING CODE 3195-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13261; (812-5528)]

Allied Capital Corp. and Allied Investment Corp.; Filing of an Application

May 20, 1983.

Notice is hereby given that Allied Capital Corporation ("ACC"), 1625 Eye Street, NW., Washington, DC 20006, a closed-end, internally-managed investment company registered under the Investment Company Act of 1940 ("Act"), and its wholly-owned subsidiary, Allied Investment Corporation ("AIC"), a closed-end, internally-managed investment company licensed as a small business investment company under the Small Business Investment Act of 1958 (together, the "Applicants"), filed an application on April 14, 1983, and amendments thereto on April 25 and May 6, 1983, for an order of the Commission, pursuant to Sections 17(b) and 17(d) and Rule 17d-1 thereunder, exempting Applicants' proposed transaction from the provisions of Sections 17(a)(1) and 17(d). All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below, and are referred to the Act and the rules thereunder for further information as to the provisions to which the exemptions apply.

AIC has developed an opportunity to arrange a $2,000,000 debenture financing for Southern Broadcasting Corporation ("Southern Broadcasting") and Southern Broadcasting's corporate parent, BMS Broadcasting, Inc. ("BMS"), upon the terms summarized below. AIC has the capacity and proposes to participate in such financing to the extent of $500,000. Two other venture capital investment entities have agreed to participate in the financing, to the following extent:

Atlantic Ventures Partners	$500,000
Teribe S.A.	1,000,000
	1,500,000

Because one of the participants in the Applicants' proposed transaction

includes Teribe S.A. ("Teribe"), a Panamanian corporation and the parent of Alcap, Limited ("Alcap"), and because Alcap holds 17.7% of ACC's outstanding capital stock, Teribe may be deemed an affiliate or an affiliate of an affiliate of ACC pursuant to Section 2(a)(3) of the Act.

Of ACC's outstanding capital stock, 237,000 shares (17.7%) are held by Alcap, a British Virgin Islands corporation and a wholly-owned subsidiary of Teribe. Teribe, in turn, is a second-tier subsidiary of Enterprises Quilmes, S.A. ("EQ"), a Luxembourg holding company listed on the Paris and Luxembourg Stock Exchange. Mr. Willem F.P. de Vogel, a vice president of Three Cities Research, Inc. ("Three Cities"), a New York affiliate of EQ, serves as a director on ACC's and AIC's boards of directors. Under an agreement dated October 30, 1980, pursuant to which Alcap acquired its investment in ACC, Alcap has the right to nominate two persons for election to ACC's board of directors, but to date has chosen to nominate only one person, Mr. de Vogel. As a matter of practice, ACC elects all members of its own board of directors to constitute the board of directors of AIC.

Applicants' proposed transaction involves Southern Broadcasting, a Florida corporation that owns and operates a television station in Melbourne, Florida. Southern Broadcasting's parent, BMS, owns 66.1% of Southern Broadcasting and it has substantially no other business. Messrs. John Boyce and Jerry Boyce (collectively, together with their controlled companies, the "Boyces") own 45% of BMS's 1,000 outstanding shares of capital stock. On December 31, 1982, Southern Broadcasting had assets of approximately $6,382,900 and a negative net worth of approximately $1,942,500; for the six months then ended it had revenues of approximately $335,000 and it reported a $1,730,600 net loss.

Up to the closing of the sale of the debentures, Southern Broadcasting funded its negative cash flow with advances from Sun Bank, N.A., of Orlando, Florida ("Sun Bank"), and from the Boyces. By May 5, 1983, Sun Bank had advanced $1,500,000 and the Boyces had advanced $1,612,109. At the closing, one-half of Sun Bank's advances and all but $575,000 of the Boyces' advances were repaid from the proceeds of the debentures' sales. The investors' agreement stipulates that the remaining balance of such advances will accrue interest but that no part of such interest and none of the principal of the remaining balance wil be paid unless and until Southern Broadcasting has sustained a specified positive cash flow for a specified period. The Boyces remain committed to provide to Southern Broadcasting, through BMS, up to $750,000 in equity funds to the extent necessary to cover any further cash flow deficiency. Sun Bank has converted its remaining $750,00 of advances into a five year, secured, term loan, and has also made a commitment to furnish up to $500,000 in working capital loans against the security of a letter of credit, from another bank, that Applicants expect the Boyces to arrange.

The debentures purchased by Applicants are joint and several obligations of Southern Broadcasting and BMS, and will bear interest at the rate of fourteen percent per annum, payable monthly. During the first 36 months from closing, Southern Broadcasting and BMS will, on the $2,000,000 disbursed, pay interest only; in each of the succeeding 60 months they will pay an amount calculated to amortize the principal and interest in level payments over the five-year period. The debentures will mature in any event on May 1, 1991, and Southern Broadcasting and BMS may prepay them in whole or in part at any time.

In addition to the debentures, Applicants state that the investors purchased, for a nominal consideration, eight-year warrants to purchase 25 percent of Southern Broadcasting's equity after giving effect to such purchase and to any additional investment in such equity by the Boyces. The warrants' aggregate exercise price will be $200,000 through September 30, 1985, and thereafter an amount, if greater than $200,000, equal to 12.5% (25% of 50%) of the positive difference between three times Southern Broadcasting's gross revenues for its fiscal year ended June 30, 1985, and $10,000,000. After five years from closing, the investors may, by right, resell the warrants, or any shares purchased upon the exercise thereof, to Southern Broadcasting or BMS at a price per share equal to the difference per share, fully diluted, between three times Southern Broadcasting's revenues for its most recently ended fiscal year and the sum of the then outstanding balances of the debentures and the Sun Bank term loan, minus, in a sale of warrants, the exercise price thereof. The investors pledged their warrants to Sun Bank as additional collateral for its term loan to Southern Broadcasting.

Applicants and the other investors will participate in the Southern Broadcasting-BMS debentures and the Southern Broadcasting warrants on identical terms, pro-rata as follows:

	Debentures	Warrants (percent)
Allied Investment Corporation [1]	$500,000	6 25
Atlantic Venture Partners	500,000	6 25
Teribe [1 2]	1,000,000	12 50
Total	2,000,000	25.00

[1] Subject to the order requested herein
[2] A Netherlands Antilles affiliate of Teribe purchased the debentures, but Teribe purchased the warrants.

The investment agreement contains first refusal rights to participate in additional equity financing; "piggy-back" registration rights; provisions for collateral, whereby the rights of the debentureholders are subordinated to those of Sun Bank; and other representations, warranties, and covenants.

Southern Broadcasting must pay all legal fees incident to the proposed transaction and has paid a $40,000 financing fee to AIC that AIC will not share with the other participants regardless of whether AIC participates therein. Applicants state that the payment to AIC of a financing fee for services rendered does not make the basis of its participation less advantageous than that of the other participants in contravention of Rule 17d–1. Southern Broadcasting will pay an $80,000 brokerage commission to Ferris & Company, Inc. ("Ferris"), a member of the New York Stock Exchange, for its services in introducing the financing to AIC. Mr. Robert E. Long, a director of ACC and AIC and an officer of Ferris will share this commission with an unaffiliated finder and personally may receive no more than $20,000 of such commission. Mr. Long's share thus falls within the percentage limitation imposed on brokerage commissions in Section 17(e)(2)(C). Applicants assert that, because Mr. Long owns less than 5% of the capital stock of Ferris, and because he does not control Ferris, Ferris itself is not an "affiliated person" or an "affiliate" of an investment company, and Ferris is therefore not subject to Section 17(e).

Applicants acknowledge that AIC's participation in a transaction in which Teribe participates might be considered a participation by AIC and Teribe in a joint enterprise in contravention of Section 17(d) of the Act and Rule 17d–1 thereunder unless authorized by order of the Commission. Applicants state that the transaction's terms required disbursement of the financing on May 5, 1983. Realizing that the requested order could not be issued prior to that date, Teribe agreed to buy for its own account the participation proposed for AIC, and

to resell such participation to AIC at cost plus accrued interest (as long as the order is issued prior to June 16, 1983). Such resale would, however, contravene Section 17(a)(1) of the Act unless exempted therefrom by order of the Commission pursuant to Section 17(b).

Applicants represent that the proposed transaction meets the standards for exemption of both Section 17(b) and Rule 17d–1 and that an order of the Commission should therefore be issued authorizing the transaction.

Applicants represent that the board of directors of AIC (identical in composition with ACC's board of directors) unanimously approved the proposed transaction, and state that the boards of directors include one representative of Alcap, one representative of another institutional investor not involved in the proposed transaction, and nine others. The ten directors unaffiliated with and not interested in Alcap, EQ, Teribe, Three Cities, Southern Broadcasting, BMS, or any other investor in the proposed transaction personally own, in the aggregate, a number of ACC's shares greater than the number owned by Alcap. Applicants represent that, other than through securities holdings in ACC, none of ACC's directors have any personal financial interest in the proposed transaction. As earlier noted, Applicants acknowledge that Mr. Robert E. Long, a director of ACC and AIC and an officer of Ferris, will share a commission with Ferris for his services in the proposed transaction.

Applicants contend that the terms of the proposed transaction may be presumed to be fair and reasonable because they have been negotiated at arms-length by parties who are independent of one another. Applicants acknowledge that Nutter, McClennen & Fish ("NMF") represented the investors in the proposed transaction, that NMF represents ACC and its subsidiaries before the Commission, and that NMF from time to time has acted and acts as special counsel to Teribe and its affiliates. Southern Broadcasting will pay NMF's fees for its services emanating from this exemptive request. Applicants submit that none of the participants in the proposed transaction has the economic power or other influence to overreach any of the other parties.

Applicants represent that AIC's participation in the Southern Broadcasting financing will occur on a basis identical to all the others' participation, with the exception of the payment to AIC of a financing fee for services rendered in structuring and negotiating the transaction. As noted earlier, Applicants contend that such a financing fee does not make AIC's basis of participation less advantageous than that of the other participants.

Applicants submit that the proposed investment is consistent with the fundamental investment policies of AIC and, hence, of ACC (included in AIC's fundamental policies is the policy to make loans to and purchase debentures with warrants from small business concerns as contemplated by the Small Business Investment Act of 1958). Applicants further submit that the proposed transaction is consistent with the general purposes of the Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 14, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

[FR Doc. 83–14350 Filed 5–20–83; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 22951 (70–6870)]

Consolidated Natural Gas Co.; Proposed Issuance and Sale of Notes To Banks and Commerical Paper to Dealer by Holding Company; Intrasystem Financing; Issuance and Sale of Subsidiary Common Stock to Holding Company; Exception From Competitive Bidding

May 20, 1983.

Consolidated Natural Gas Company ("Consolidated"), 100 Broadway, New York, New York 10005, a registered holding company, and certain of its subsidiaries, CNG Coal Company, CNG Development Company, CNG Energy Company, CNG Producing Company, CNG Research Company, Consolidated Gas Supply Corporation, Consolidated Natural Gas Service Company, Inc., Consolidated System LNG Company, The East Ohio Gas Company, The Peoples Natural Gas Company, The River Gas Company, and West Ohio Gas Company, have filed an application-declaration with this Commission pursuant to Sections 6(a), 7, 9(a), 10, 12(b), and 12(f) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 43, 45, 50(a)(2), and 70 thereunder.

Consolidated proposes to obtain funds for financing the seasonal increase in gas storage inventories of subsidiary companies by issuing up to $175 million of unsecured notes to banks, from time to time through March 31, 1984, which would mature within 12 months from the date of the first borrowing. There would be no commitment fees, required compensating balances, or closing or related charges. The notes would bear variable interest at Consolidated's option at either (i) The prime rate in effect from time to time at the Chase Manhattan at its principal office in New York City, (ii) an increment of three-eights of one percent (.375%) over the London Interbank Offered Rate ("LIBOR"), as quoted by the London office of Chase Manhattan, or (iii) an increment of one half of one percent (0.50%) over the bid rate for Certificates of Deposit ("CD"), quoted to Chase Manhattan Bank N.A. for the purchase at face value of its CD. Borrowing at prime may be prepaid, in whole or in part, without penalty or premium, upon five days written notice. Borrowings at LIBOR or by CD may only be repaid at the end of the LIBOR or CD period. The borrowings will be made from time to time as required to finance the subsidiaries' gas storage inventories and will be repaid as gas is withdrawn from storage and sold during the 1983–1984 heating season.

Consolidated, in order to meet working capital requirements, proposes to issue and sell commercial paper, in the form of short-term bearer notes, to A.G. Becker Incorporated ("Becker"), a dealer in commercial paper, in a principal amount not to exceed $175 million, from time to time through May 31, 1984. The commercial paper will have varing maturities of not more than 270 days after date of issue and will be issued and sold in varying denominations of not less than $50,000 and not more than $5 million directly to Becker, at a discount which will not be in excess of the discount rate per annum prevailing at the date of issuance for commercial paper of comparable quality and like maturity. The commercial paper will not be payable prior to maturity.

Consolidated proposes to sell commercial paper only so long as the discount rate or the effective interest cost on the date of sale does not exceed the equivalent cost of borrowings from a commercial bank. No commission or fee will be payable in connection with the issue and sale of such commerical paper notes. Becker, as principal, will reoffer such notes at a discount not to exeed one-tenth of one percent per annum less than the prevailing discount rate to Consolidated.

If the issuance of commercial paper becomes impractical because of market conditions or other factors, Consolidated proposes to issue short-term notes to Chase Manhattan and Citibank, N.A. Consolidated would borrow up to an aggregate principal amount of up to $75 million outstanding at any one time from Chase Manhattan from time to time through May 31, 1984. Such borrowings would be at the bank's prime interest rate on the borrowing date. Consolidated would also borrow an aggregate principal amount of up to $50 million outstanding at any one time from Citibank, N.A., from time to time through May 31, 1984. Such unsecured borrowings from Citibank would be charged a commitment fee of one eight of one percent (0.125%) on the principal amount at Citibank's base rate of interest on each borrowings date. Borrowings from both banks would be evidenced by notes of Consolidated maturing within 90 days or each borrowing date. The notes may be prepaid, in whole or in part, at any time without prior notice or premium. There will be no closing or related charges with respect to such bank loans. Assuming a 10.50% prime rate and assuming that the full line is borrowed, the effective interest cost of borrowings from Chase Manhattan would be 10.50% and the effective interest cost of borrowings from Citibank with a commitment fee of .125% on the principal would be 10.625%. The additional bank line of up to $50 million required to support the issuance of $175 million of commercial paper notes will be supported by existing bank lines. Should these lines be used and commercial paper outstanding exceeds $125 million and additional line of credit would be obtained and an amendment would be filed to this application-declaration.

Consolidated seeks to have the 5% limitation in condition (3) of the first sentence of Section 6(b) exemption from the provisions of Section 6(a) of the Act raised to 19% from the order date in this matter through May 31, 1984. Such an increase would permit Consolidated to have outstanding at any one time up to $175 million aggregate principal amount short-term, unsecured bank notes and commercial paper.

Consolidated proposes to make, from time to time up to May 31, 1984, open account advances aggregating up to 401.5 million to its subsidiary companies for inventory gas financing and working capital. The advances would be made as requested by each subsidiary and will be repaid within a year of the first advance to such subsidiary company. Interest would be at substantially the same effective rate of interest as the related gas storage bank loan, sale of commercial paper, and/or bank borrowing by Consolidated. If there is no outstanding short-term debt, the interest rate would be at the prime commercial rate of interest in effect from time to time at The Chase Manhattan Bank, N.A. Such advances will be made up to the following principal amounts:

Company	Amount
CNG Development Company	$10,000,000
CNG Producing Company	45,000,000
Consolidated Gas Supply Corporation	165,000,000
Consolidated Natural Gas Service Company, Inc	1,500,000
The East Ohio Gas Company	125,000,000
The Peoples Natural Gas Company	45,000,000
The River Gas Company	2,000,000
West Ohio Gas Company	8,000,000
Total	401,500,000

Consolidated proposes to make long-term non-negotiable loans, aggregating $100 million to the subsidiaries set forth below. The loans will be evidenced by long-term, non-negotiable notes of the subsidiary companies maturing in the years coinciding with the scheduled retirements of debentures sold by Consolidated in April 1983 or over a period of time to be determied by Consolidated's officers. Interest will be predicated on and substantially equal to the effective cost of money to Consolidated through the debenture sale. The loans would partially finance ths subsidiaries' capital expenditures and would be made up to the following principal amounts:

Company	Amount
CNG Producing Company	[illegible]
Consolidated Gas Supply Corporation	40,000,000
Consolidated Natural Gas Service Company, Inc	5,000,000
East Ohio Gas Company	10,000,000
The Peoples Natural Gas Company	[illegible]
West Ohio Gas Company	2,000,000
Total	100,000,000

Consolidated proposes to make revolving credit advances, of up to $100 million at any one time to subsidiary companies set forth below to finance revolving credit advances made in 1982 and repaid in 1983. Such advances may be made, repaid and remade through May 31, 1984, as requested by the treasurer of each subsidiary company, upon letter agreement by each subsidiary company in accordance with Consolidated's Credit Agreement, with interest at substantially the same effective rate of interest as paid by Consolidated under the Credit Agreement. Should Consolidated have no outstanding amount under its Credit Agreement, the interest rate would be the prime commercial rate in effect from time to time at Chase Manhattan. Such advances will be made up to the following principal amounts:

Company	Amount
CNG Producing Company	$40,000,000
Consolidated Gas Supply Corporation	30,000,000
The East Ohio Gas Company	25,000,000
The Peoples Natural Gas Company	5,000,000
Total	100,000,000

Consolidated proposed to purchase from the six subsidiaries listed below, and such subsidiaries propose to issue and sell to Consolidated, an aggregate of $113.9 million of capital stock at par value. The sales would be made as needed by the subsidiaries from time to time through May 31, 1984. Consolidated would make such purchases primarily from internal funds. The amounts and number of shares per subsidiary would be as follows:

Subsidiary	Number of shares	Aggregate par value
CNG Coal Co	25,000($100 par)	$2,500,000
CNG Development Co	350,000 ($100 par)	35,000,000
CNG Energy Co	10,000 ($100 par)	1,000,000
CNG Producing Co	300,000 ($100 par)	30,000,000
CNG Research Co	4,000 ($100 par)	400,000
Consolidated Gas Corp	450,000 ($100 par)	45,000,000
Total		113,900,000

The authorized capital stock of CNG Development Company and Consolidated Gas Supply Company is not sufficient to cover the additional shares they propose to issue. In order to accommodate the proposed transactions and to provide for future issues, they propose to amend their certificates of incorporation to increase their authorized shares from 500,000 to 600,000 and from 2,500,000 to 2,700,000 respectively.

At the time of this filing Consolidated System LNG Company has no financing requirements. In the event that financing

does become necessary, an amendment will be filed to this application-declaration.

Consolidated requests an exception from the competitive bidding requirements of Rule 50(b) pursuant to paragraph (a)(5) with respect to the sale of commercial paper because such commercial paper will have maturities of nine months or less, current rates for commercial paper for prime borrowers, such as Consolidated, are published daily in financial publications and it is not practical to invite competitive bids for commercial paper. Consolidated also proposes that the Rule 24 certificates of notification regarding the proposed transactions be filed on a quarterly basis.

The application-declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 13, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicants-declarants at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective.

For the Commission, by the division of Corporate Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 22950; (70-6867)]

Middle South Energy, Inc.; Proposal Relating to Nuclear Fuel Lease

May 20, 1983.

Middle South Energy, Inc. ("MSE "), 225 Baronne Street, New Orleans, Louisiana 70112, a subsidiary of Middle South Utilities, Inc. ("Middel South"), a registered holding company, has filed an application and amendments thereto with this Commission pursuant to Sections 9(s) and 10 of the Public Utility Holding Company Act of 1935 ("Act").

On October 17, 1979, MSE entered into a lease ("Lease") with Port Gibson Energy, Inc. ("Port Gibson"), a subsidiary of Lehman Leasing, Inc., an affiliate of Lehman Brothers Kuhn Loeb, Inc., and investment banking firm. Under the lease, MSE leases from Port Gibson the nuclear fuel, including facilities incident to its use, to be used in Unit No. 1 at MSE's Grand Gulf Nuclear Generating Station ("Grand Gulf 1"). Under the Lease, MSE is responsible for operating, maintaining, repairing, replacing, and insuring the nuclear fuel and for paying all taxes and costs arising out of the ownership, possession or use thereof.

Lease payments, which are payable quarterly, include (A) a quarterly lease charge, which represents an administrative charge of ⅛ of 1 percent per annum of the stipulated loss value, as defined in the Lease, payable by Port Gibson to Lehman Leasing and other allocated operational costs of Port Gibson and (B) a Burn-Up Charge equal to the cost of the nuclear fuel consumed while it is in the reactor and producing heat. When the nuclear fuel is not in the reactor and producing heat, MSE may elect to capitalize quarterly lease charges or daily portions thereof so long as the amount of credit still available to Port Gibson under the Credit Agreement, as it may be amended, exceeds the sum of the stipulated loss value of the nuclear fuel, the amount of such charges and $1 million. MSE may consequently, subject to the foregoing limitation, defer rental payments until those times during commercial operation when the nuclear fuels in the the reactor and producing heat in the production of electric energy. Under the terms of the Lease, the amount of the quarterly lease payments by MSE are measured by, among other things, the amount of costs incurred by Port Gibson, in connection with its acquisition, ownership, and processing of the nuclear fuel, under the Credit Agreement described herein. The term of the lease is through October 15, 2029; however, if either party gives written notice of termination by October 15, 1983, or any subsequent October 15, the Lease will terminate on October 15 of the second following year.

Port Gibson has financed the nuclear fuel by issuing its commercial paper and through borrowings under a Credit Agreement, as amended between Port Gibson and a group of banks (the "banks") with Union Bank of Switzerland ("UBS") acting as agent for such banks ("Agent"). Pursuant to an Assignment Agreement, the banks received an assignment of the rents and other obligations under the Lease and of Port Gibson's rights under Middle South's Guaranty of MSE's lease obligations. Under a Security Agreement, the banks also received a security interest in the nuclear fuel.

MSE has determined that the maximum commitment of Port Gibson under the Lease is insufficient to provide for the total cost of nuclear fuel for Grand Gulf 1. Port Gibson has advised MSE that it is willing to enter into an amendment to the Credit Agreement, the Assignment Agreement and the Security Agreement (the "Amendment") with the parties to the previously amended Credit Agreement and with Norwest Bank of Minneapolis ("Norwest") and perhaps with certain other banks ("New Banks"), collectively referred to as the "Banks". The Amendment will provide, among other things, for an increase of the aggregate commitment under the Credit Agreement, from $110 million to $175 million and thereby increase Port Gibson's maximum obligation to make payments for nuclear fuel from $109 million to $174 million at any one time outstanding. As required by the Lease, MSE would consent to the Amendment.

Port Gibson would issue and sell its commercial paper, supported by an irrevocable letter of credit ("Letter of Credit") issued by UBS and Norwest ("LOC Banks") under the Amendment. In turn, each Bank, to the extent of its commitment under the Credit Agreement, would purchase participation in payments made by UBS under said Letter of Credit and would make from time to time revolving credit loans ("Revolving Credit Loans") to Port Gibson. In accordance with its practice under the Credit Agreement, as amended, Port Gibson proposes to continue to use Lehman Commercial Paper Incorporated as dealer in connection with the sale of commercial paper, which sale will be at a rate expected to be equal to the best rate available (which rate will include ⅛ of 1% per annum dealer discount) consistent with prudent marketing considerations. Manufacturers Hanover Trust Company ("Depositary"), under a depositary agreement ("Depositary Agreement"), as amended, and as proposed to be amended, acts as issuing agent for Port Gibson's commercial paper. Port Gibson, the Banks and the Depositary, with MSE's consent, will enter into a transition agreement to facilitate the transition from Port Gibson's issuance of commercial paper supported by the Letter of Credit previously issued solely by UBS to that now proposed to be issued by UBS and Norwest. The term of the Credit Agreement, as amended, is through October 15, 2029. However, if any party gives written notice of termination by October 15, 1983, or any subsequent

October 15, the Credit Agreement shall terminate on October 15 of the second following year.

Under the proposed Amendment, Port Gibson will pay to UBS an annual agency fee of $20,000 for its services. In consideration of the Letter of Credit by the LOC Banks, Port Gibson will pay the Agent for the account of the LOC Banks, on a quarterly basis, a fee of (x) ¾ of 1% per annum on the average aggregate face amount of commercial paper outstanding during each calendar quarter plus (y) ¼ of 1% per annum on the average aggregate principal amount (i) of all payments made under the Letter of Credit for which the LOC Banks have not been reimbursed and (ii) of Revolving Credit Loans outstanding during each calendar quarter. In addition, Port Gibson will pay to the Agent, on a quarterly basis, for the account of the Banks, for each day that the Banks' commitment shall be in effect, a commitment fee of ⅛ of 1% per annum of the daily excess of the Banks' commitment over the sum of (X) the aggregate principal amount of Revolving Credit Loans outstanding plus (Y) the aggregate face amount of commercial paper outstanding plus (Z) the aggregate amount of all payments made under the Letter of Credit for which the LOC Banks have not been reimbursed by Port Gibson.

MSE has been advised that, based upon a commercial paper rate for the highest rated commercial paper of 8.80% per annum, the effective interest cost to Port Gibson of it proposed borrowings would be 10.03% per annum, assuming all borrowings were made through the issuance of commercial paper and total borrowings were $174.0 million (the average outstanding borrowings expected from July 1, 1983 through December 31, 1984).

If there is a drawing under the Letter of Credit, Port Gibson shall reimburse the LOC Banks therefor on or before the third business day following the drawing and shall pay interest on the amount of the drawing at a rate per annum until the third business day equal to 110% of the Base Rate and thereafter at 125% of the Base Rate. (Base Rate is defined to mean the higher of (a) the prime commercial loan rate of the Agent as announced from time to time for short-term loans in New York at large businesses or (b) the sum of (i) .20% plus (ii) the average interest rate payable on newly issued 90-day negotiable certificates of deposit of $100,000 or more issued by major New York banks as published by the Federal Reserve Bank of New York on the Friday of the immediately preceding week).

Each Revolving Credit Loan will, at the option of Port Gibson, either: (i) bear interest on the outstanding principal amount thereof until due and payable (whether by acceleration or otherwise) at a rate per annum equal to ⅝ of 1% in excess of the rate (rounded upward to the nearest ⅛ of 1%), as determined by the Agent, at which deposits of U.S. Dollars are offered to the London Branch of the Agent in the London interbank market as of 11:00 A.M., London time, two business days prior to the borrowing date for such Revolving Credit Loan in an amount approximating the average principal amount of all Revolving Credit Loans bearing an interest rate so determined to be made on such borrowing date and having a term equal to the term of such Revolving Credit Loan; or (ii) bear interest on the outstanding principal amount thereof until due and payable (whether by acceleration or otherwise) at a rate per annum equal to 110% of the Base Rate, such rate to change as and when the Base Rate changes.

MSE has been advised that (1) if all borrowings were made by means of Revolving Credit Loans the interest on which were based on the London interbank market, such interest rate were 9–$^{7}/_{16}$% per annum and total borrowings were $174.0 million, the net effective interest cost to Port Gibson would be 10.28% per annum (2) if all borrowings were made by means of Revolving Credit Loans the interest on which was based on the Base Rate, such rate were 10.50% per annum and total borrowings were $174.0 million, the net effective interest cost to Port Gibson would be 11.70% per annum.

Port Gibson would make all borrowings in a manner that would minimize the effective cost of borrowing over the term of the Credit Agreement, as amended. The aggregate amount of Port Gibson's Revolving Credit Loans, plus commercial paper at any time outstanding plus the amount of payments made under the Letter of Credit for which the LOC Banks have not been reimbursed, may not exceed the commitment.

Under an Assignment Agreement and as security for the LOC's Banks' Letter of Credit and for loans under the amended Credit Agreement, the Agent and the Banks, would also receive an assignment of the rents and certain other obligations under the Lease and of Port Gibson's rights under Middle South's Guaranty of MSE's lease obligations.

The Commercial Paper Security Agreement is proposed to be amended to add the New Banks as parties. Port Gibson is a party to a Commercial Paper Security Agreement with UBS, in its capacities as representative of the holders of commercial paper and as Agent for the Banks. Under the Commercial Paper Security Agreement, Port Gibson has granted to UBS, as the representative of the holders of the commercial paper, a security interest in the nuclear fuel and in any and all funds and bank accounts of Port Gibson with respect to which the Banks may exercise any right of set-off. UBS, as representative of the holders of the commercial paper has received an assignment of the rights assigned to the Agent and to the Banks for their own benefit in the Assignment Agreement, as amended. UBS, as representative would exercise (1) the security interest in the nuclear fuel and its interest in Port Gibson's rights under the Lease, granted to its as representative for the benefit of the holders of the commercial paper and (2) such interest granted to UBS, as Agent, and to the Banks, for their own benefit, for the equal and ratable benefit of UBS, as Agent, and the Banks and of the commercial paper holders.

The application and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 13, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application, as filed or as it may be amended, may be granted.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 22949; (70-6866)]

Middle South Utilities, Inc.; Proposal by Parent to Guarantee Amended Nuclear Fuel Lease Agreements Between Subsidiary and Non-Affiliate

May 20, 1983.

Middle South Utilities, Inc., 225 Baronne Street, New Orleans, Louisiana 70112, a registered holding company, has filed a declaration with this Commission pursuant to Section 12(b) of the Public Utility Holding Company Act of 1935 ("Act") and Rule 45 thereunder.

Middle South Utilities, Inc. ("Middle South"), is a party to guaranty ("Guaranty") with Port Gibson Energy, Inc. ("Port Gibson"), a Delaware corporation, under which it guaranteed the obligations of Middle South Energy, Inc. ("MSE"), a public utility subsidiary of Middle South, with respect to a lease of nuclear fuel, including facilities incident to its use, under the terms of a fuel lease ("Fuel Lease") dated as of October 17, 1979 between MSE and Port Gibson.

Port Gibson finances the nuclear fuel it leases to MSE pursuant to a credit agreement ("Credit Agreement") dated as of October 17, 1979, with certain banks ("Banks"). On July 30, 1981 Port Gibson entered into an amendment to the Credit Agreement, and certain related agreements ("First Amendment"), whereby the amount of Port Gibson's borrowing capacity under the Credit Agreement was increased from $80 million to $110 million. Port Gibson's maximum obligation to make payments to acquire nuclear fuel to be leased by MSE under the Fuel Lease was increased from $79 million to $109 million.

As described in the related application of MSE (File No. 70-6867), MSE and Port Gibson propose to further increase Port Gibson's maximum obligation to make payments to acquire nuclear fuel to be leased by MSE under the Fuel Lease from $109 million to $174 million. Port Gibson's borrowing capacity under the Credit Agreement, as amended, will concurrently be increased form $100 million $175 million by means of a further amendment ("Second Amendment"). The proposed Second Amendment may, among other things, add certain new banks ("New Banks") as parties to the Credit Agreement and to an assignment agreement and to a security agreement, each dated as of October 17, 1979, as amended. Middle South acknowledged notice and consented to the assignment of Port Gibson's rights under Middle South's Guaranty to an agent ("Agent") for the Banks. Middle South acknowledged notice and consented to the terms of the First Amendment as it related to the Guaranty and the assignment of Port Gibson's rights thereunder, and to the assignment, pursuant to a commercial paper security agreement, dated as of July 30, 1981, among Port Gibson, a representative ("Representative") of the holders of Port Gibson's commercial paper, the Agent, and the Banks ("Commercial Paper Security Agreement"). Of Port Gibson's rights under the Guaranty to the Representative. Similarly, in the proposed transaction. Middle South would acknowledge notice and consent to the terms of the Second Amendment as it relates to the Guaranty and the assignment of Port Gibson's rights thereunder, and to the assignment, pursuant to the proposed amendment to the Commercial Paper Security Agreement, of Port Gibson's rights under the Guaranty to the Representative.

The declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 13, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically issues of fact or law that are disputed. A person who so requests will be notified of any issued hearing, if ordered, and will receive a copy of any notice or order in this matter. After said date, the declaration as filed or as it may be amended, may be permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 13258; (812-5534)]

Sears Government Investment Trust (And Subsequent Trusts and Similar Series of Trusts); Filing of Application for an Order Pursuant to Section 45(a) of the Act Granting Confidential Treatment

May 20, 1983.

Notice is hereby given that Sears Government Investment Trust, and all subsequent and similar series of Trusts (referred to collectively herein as "Trusts"), c/o Dean Witter Reynolds Inc., Unit Investment Trust Department, 5 World Trade Center, New York, NY 10048, each a unit investment trust registered under the Investment Company Act of 1940 ("Act"), and their sponsor, Dean Witter Reynolds Inc. ("Sponsor," and referred to herein with the Trusts as "Applicants"), filed an application on April 22, 1983, for an order of the Commission, pursuant to Section 45(a) of the Act, granting confidential treatment for the profit and loss statements of the Sponsor supplied in connection with registration statements for the Trusts filed with the Commission from time to time. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

The application states that Applicants include Sears Government Investment Trust, Series 1 and all subsequent Trusts and all similar series of Trusts, sponsored by the Sponsor. Applicants represent that Series 1 is, and each future Trust will be, governed by a trust indenture ("Indenture") and a Standard Terms and Conditions of Trust ("Agreement") for that Trust (hereinafter collectively called the "Trust Agreement") under which the Sponsor will act as depositor, United States Trust Company of New York will act as trustee and Standard & Poor's Corporation will act as evaluator. According to the application, the Trust Agreement for each Trust will incorporate standard terms and conditions of trust common to all Trusts. Pursuant to the Trust Agreement, when the portfolio for the Trust has been acquired, the Sponsor will deposit with the Trustee (on the "Date of Deposit") interest-bearing debt obligations and in some cases, units of previously issued series of Trusts ("Portfolio Securities"). Applicants further represent that simultaneously with that deposit the Trustee will deliver to the Sponsor registered certificates ("Certificates") for the requisite number of Units, which will represent the entire beneficial ownership of the Trust at the Date of Deposit. These Units are in turn to be offered for sale to the public through the final prospectus by the Sponsor.

Applicants note that the Portfolio Securities will not be pledged or be in any other way subjected to any debt at any time after the Portfolio Securities are deposited in the Trust. Applicants represent that at least 90% of the Portfolio Securities will be interest-bearing debt obligations issued or

guaranteed by the United States or by any agency or instrumentality thereof ("Securities"), with fixed maturity dates and not having conversion or equity features. In addition, the Sponsor, may deposit in each Trust certain Portfolio Securities (not to exceed 10% of the aggregate principal amount of the Portfolio Securities in such Trust) which are Units of previously issued Trusts ("Trust Units"). Applicants state that the Sponsor is accumulating the Portfolio Securities for the purpose of deposit for Series 1 and will follow a similar procedure of accumulating the Portfolio Securities for each future Trust. Applicants further represent that, in selecting the Portfolio Securities, the following factors are considered: (i) maturities or mandatory payment dates consistent with the life of the Trust; (ii) prices of the Securities relative to other securities of comparable quality and maturity; and (iii) types of such Securities available.

The application states that the portfolio of each Trust will consist of the Portfolio Securities, together with accrued and undistributed interest and principal and undistributed cash realized from the sale, redemption, prepayment, maturity or other disposition of the Portfolio Securities. Certain of the Securities may from time to time be redeemed, prepaid or will mature in accordance with their terms. Applicants represent that the Sponsor may, under the Trust Agreement, direct the Trustee to sell or liquidate any of the Securities only upon the happening of certain events, as specified in the Agreement. Applicants further state that the proceeds from the maturity, sale, prepayment, redemption or other disposition of Portfolio Securities will not be reinvested but will be distributed to Unitholders unless the Trust has elected to qualify as a "regulated investment company" under the Internal Revenue Code of 1954, as amended ("Regulated Investment Company"), in which case the Sponsor may instruct the Trustee to use excess proceeds of sales of Securities to purchase new Securities ("Substitute Securities"). Applicants further assert that except as noted in the application with respect to certain exchanges and except as provided in the Agreement with respect to failed contract obligations and with respect to purchases of Substitute Securities, the Trust Agreement prohibits the substitution of Portfolio Securities in the portfolio for the Portfolio Securities initially deposited.

Applicants state that each Unit in a particular Trust will represent a fractional undivided interest in the principal amount of Portfolio Securities in the Trust. The numerator of the fractional interest represented by each Unit will be 1 and the denominator equal to the number of Units of each Trust will be redeemable. According to Applicants, in the event that any Units shall be redeemed, the denominator of the fraction will be reduced and the fractional undivided interest represented by such Unit increased. Units will remain outstanding until redeemed or until the termination of the Trust Agreement as provided therein. The Trust Agreement may be terminated (i) by written consent of 51% of Unitholders of the Trust, (ii) in the event that the last of the Portfolio Securities then currently in the portfolio of the Trust has matured or has been redeemed or sold upon direction of the Sponsor to the Trustee, or (iii) automatically on a date 50 years after the Date of Deposit. In addition, Applicants assert that the Trust may be terminated, upon written instruction of the Sponsor, if the value of the Trust falls below 30% of the par value of the Portfolio Securities initially deposited in the portfolio. According to the application, following the deposit of Portfolio Securities for each trust by the Sponsor with the Trustee, and following the declaration of effectiveness of the registration statement of that Trust under the Securities Act of 1933 and clearance by the securities authorities of various states, the Sponsor will offer the Units of that Trust to the public at the public offering price set forth in the Prospectus, plus accrued interest.

The application states that, while not obligated to do so, it is the Sponsor's present intention to maintain a market for the Units of each series of the Trusts, and continually to offer to purchase such Units at prices, subject to change at any time, based on the aggregate of the then current offering prices of the Portfolio Securities in the Trust as computed by the Evaluator. If the supply of Units exceeds demand, or for other business reasons, Applicants represent that the Sponsor may discontinue purchases of Units at prices based on the offering prices of the Portfolio Securities. In such event the Sponsor may nonetheless purchase Units, as a service to Unit holders, at a price based on the then current redemption value of those Units. Applicants state that in no event will the price offered by the Sponsor for repurchase of Units be less than the current redemption value, based on the current bid prices for the Securities in the Trust. Applicants further represent that if the Sponsor purchases any Units at the current redemption value as set forth above, it may not resell such Units or reoffer such Units, but may tender such Units to the Trust for redemption.

Applicants request confidential treatment for profit and loss statements of the Sponsor pursuant to Section 45(a) of the Act which provides, in pertinent part, that information filed with the Commission "shall be made available to the public, unless and except insofar as the Commission * * * by order upon application finds that public disclosure is neither necessary nor appropriate in the public interest or for the protection of investors.

Applicants submit that public disclosure of the above financial information is neither necessary nor appropriate in the public interest or for the protection of investors. Investors in the Trusts are not offered an opportunity to acquire any interest whatsoever in the Sponsor. Applicants represent that apart from the Sponsor's obligation under the Trust Agreement to recommend the disposition of underlying Portfolio Securities for the reasons set forth in the Trust Agreement (which obligations may be performed by the Trustee or successor Sponsor if not performed by the current Sponsor), the Sponsor functions solely as an underwriter of the Trusts. Applicants also state that there is no legitimate interest on the part of the investors in the public disclosure of the profit and loss statements of the underwriters from whom the Units are purchased.

According to the application, to the extent that the Sponsor's solvency may conceivably be thought relevant to the maintenance of the secondary market in the Units of the Trusts, the Sponsor's statement of financial condition, which is filed with the Commission and various stock exchanges and is readily available to the public, contains fully adequate information in this regard. Applicants further assert that there is adequate disclosure in the Prospectus of the Sponsor's right to terminate secondary market activities in a particular Trust. The application states that Unitholders are nevertheless fully protected by their right under the Trust Agreement to redeem their Units upon presentation of such Units properly endorsed to the Trustee. The unitholders will receive the "Redemption Value" of the Units computed on the underlying assets of the particular Trust. According to Applicants, the existence of the Sponsor and its secondary market activities are irrelevant to the redemption right.

Applicants assert, therefore, that the financial information of the Sponsor is

not material from the standpoint of investors. The soundness of the investors' interest in the Trust is solely a function of the fiscal condition of the issuers whose Securities are contained in the Trust's portfolio. Finally, Applicants represent that the financial operations of the Sponsor will in no way enhance or diminish the prospect for an orderly payment of the underlying Securities.

Notice if further given that any interested person wishing to request a hearing on the application may, not later than June 13, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 13257; (812-5472)]

Sears Tax-Exempt Investment Trust; Filing of Application

May 20, 1983.

Notice is hereby given that Sears Tax-Exempt Investment Trust, Long Term Municipal Portfolio Series 1 and Subsequent Series ("Long Term Series"), Sears Tax-Exempt Investment Trust, Intermediate Term Municipal Portfolio Series 1 and Subsequent Series ("Intermediate Series"), Sears Tax-Exempt Investment Trust, Short Term Municipal Portfolio Series 1 and Subsequent Series ("Short Term Series"), Sears Tax-Exempt Investment Trust, Discount Municipal Portfolio Series 1 and Subsequent Series ("Discount Series"), Sears Tax-Exempt Investment Trust, Multiple Maturity Portfolio Series 1 and Subsequent Series ("Multiple Maturity Series"), Sears Tax-Exempt Investment Trust, Multi-State Program Series 1 and Subsequent Series ("Multi-State Series"), Sears Tax-Exempt Investment Trust, California Municipal Portfolio Series 1 and Subsequent Series ("California Series"), Sears Government Investment Trust, GNMA Portfolio Series 1 and Subsequent Series ("GNMA Series"), Sears Tax-Exempt Investment Trust and Similar Series of Trusts and Sears Government Investment Trust and Similar Series of Trusts (collectively, the "Trusts"), and Dean Witter Reynolds Inc., Sponsor of the Trusts ("Sponsor") (collectively with the Trusts, "Applicants") Unit Investment Trust Dept.; 5 World Trade Center, New York, NY 10048, filed an application on March 4, 1983, and an amendment thereto on May 5, 1983, for an order of the Commission: (i) Pursuant to Section 11 of the Investment Company Act of 1940 ("Act"), approving the terms of certain offers of exchange of units of any Series of any of the Trusts for units of any other Series thereof at a reduced sales load; and (ii) pursuant to Section 6(c) of the Act exempting such exchange transactions from the provisions of Section 22(d) of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below and to the Act for the test of Sections 11 and 22(d).

The application states that Sears Tax-Exempt Investment Trust, Long Term Municipal Portfolio Series 1 and Subsequent Series, Sears Tax-Exempt Investment Trust, Intermediate Term Municipal Portfolio Series 1 and Subsequent Series, Sears Tax-Exempt Investment Trust, Short Term Municipal Portfolio Series 1 and Subsequent Series, Sears Tax-Exempt Investment Trust, California Municipal Portfolio Series 1 and Subsequent Series, and Sears Government Investment Trust, GNMA Portfolio Series 1 and Subsequent Series, are unit investment trusts registered under the Act. Sears Tax-Exempt Investment Trust, Discount Municipal Portfolio Series 1 and Subsequent Series, Sears Tax-Exempt Investment Trust, Multiple Maturity Portfolio Series 1 and Subsequent Series, and Sears Tax-Exempt Investment Trust, Multi-State Program Series 1 and Subsequent Series and are investment trusts that Applicants anticipate will be created and registered under the Act in the future.

According to the application, each of the Long Term, Intermediate Term and Short Term Series will be a separate unit investment trust created under the laws of the State of New York by a separate Trust Indenture and Agreement ("Trust Agreement") among the Sponsor, United States Trust Company of New York as trustee ("Trustee") and Standard & Poor's Corporation as evaluator ("Evaluator"). The investment objectives of each Trust of the Long Term, Intermediate Term and Short Term Series are federally tax exempt income and conservation of capital through investment in a fixed portfolio of interest-bearing municipal bonds. Each of the Discount Series will be a separate unit investment trust, consisting of interest-bearing municipal bonds which are originally issued at a discount or are currently selling in the market at a discount. The intended investment objectives of each Discount Series are conservation of capital and interest income exempt from federal income taxation. Each of the Multiple Maturity Series will consist of three separate unit investment trusts: The Long Term, Intermediate Term and Short Term Series. The Long Term Trust will contain interest-bearing municipal obligations with long term maturities which are more than fifteen years. The Intermediate Trust will contain municipal obligations with intermediate term maturities which are not less than seven years and not more than fifteen years. The Short Term Trust will contain municipal obligations with short term maturities which are less than seven years. The intended investment objectives of each trust composing a Multiple Maturity Series are conservation of capital and interest income exempt from Federal income taxation. Each of the Multi-State Series will consist of two or more separate unit investment trusts created under the laws of the State of New York by a separate Trust Agreement among the Sponsor, the Trustee and the Evaluator. Each separate trust portfolio of the Multi-State Series will contain interest-bearing municipal bonds issued by governmental entities located within the State for which that trust is named. The investment objectives of each Trust composing a Multi-State Series are conservation of capital and interest income which is exempt from Federal, State and local income taxation for residents in States for which the Trust is named. Applicant states that each of the California Series will be a separate unit investment trust. Each trust portfolio will contain interest-bearing municipal bonds issued by governmental entities located within the State of California. The intended investment objectives of each California Series are conservation of capital and interest income which is exempt from Federal, State and local income taxation for California residents. Each of the GNMA Series will be a

separate unit investment trust, consisting of interest-bearing mortgage backed securities issued by the Government National Mortgage Association. The intended investment objectives of each GNMA Series are current distribution of principal and interest and preservation of capital. The application states that while the Sponsor presently expects to create Discount Series, Multiple Maturity Series and Multi-State Series and to offer to investors Units of such Trusts, none of these Trusts had been created nor had any of their Units been registered with the Commission as of the date of the application.

Applicants state that while the Sponsor is not obligated to do so, it is the Sponsor's present intention to maintain a market for Units of each Trust and continuously to maintain a market for Units of each Trust and continuously to offer to purchase such Units at prices in excess of the redemption prices as described in the applicable prospectus.

Applicant represent that the Sponsor proposes to allow purchasers of Units of any of the Trusts ("Certificateholders") to exchange Units which they may hold in any one of the Trusts for Units of other Series of the same Trust or of any of the other Trusts which the Sponsor had repurchased and which have not been tendered for redemption.[1] The Sponsor would impose a reduced fixed sales charge per Unit exchanged. Applicants state that the structures of the various Series of the Exchange Trusts are very similar in most respects to each other, but the investment objectives of each Exchange Trust are different. Applicants state that the Sponsor intends to hold the exchange option being proposed ("Exchange Option") open under most circumstances, but it does, however reserve the right to modify, suspend or terminate the Exchange Option at any time without further notice to Certificateholders.

The application states that although the composition of particular Exchange Trusts and particular Series differ in various respects depending on the nature of the underlying portfolios, their structures are substantially the same. The Sponsor acquires a portfolio of securities, believed by it to satisfy the standards applicable to the investment objectives of the particular Series, which securities are then deposited in trust with the Trustee in exchange for certificates representing Units of undivided interest in the deposited portfolio. Those Units are then offered to the public at a public offering price that is based upon the offering prices of the underlying securities plus a sales charge (4.00% of the public offering price). Applicants represent that the sales charge applicable to future series may be varied by the Sponsor.

Applicants state that the Exchange Option would apply only to Units of various Series of The Exchange Trusts as to which a secondary market is being maintained. Applicants represent that while it is not presently contemplated that Certificateholders would be permitted to exchange their Units of other Series of the same Trust or into Units of any Series of the Exchange Trusts which are available on original issue, the Sponsor might at some future date determine to permit such exchanges and therefore desires that any exemptive order issued pursuant to this application apply also to Units which are available on original issue.

According to the application, the exchange effected by the Exchange Option would operate in a manner essentially identical to any secondary transaction, except that the Sponsor seeks authority to impose a reduced sales charge on each transaction pursuant to the Exchange Option. Units of any Series repurchased by the Sponsor will be soled by the Sponsor at a public offering price based upon the offering side evaluation of the underlying securities plus a sales charge of 4.00% of the public offering price. Applicants seek authority to permit the Sponsor to sell Units of the Exchange Trusts pursuant to the Exchange Option at a price equal to the offering side evaluation of the underlying securities divided by the number of Units outstanding ("Unit Offering Price"), plus a fixed charge of $15 per Unit. Applicants assert that such $15 fixed charge can be expected to approximate about 1½% of the offering price. According to the application, the Sponsor reserves the right to increase or decrease such fixed charge from time to time in the event of fluctuations in the costs of professional assistance and operational expenses in connection with these exchange transactions.

Applicants represent that a Certificateholder who has purchased Units of a Series and paid a per Unit sales charge which was less than the per Unit sales charge of the Series of the Exchange Trust for which such Certificateholder desires to exchange would be allowed to exercise the Exchange Option at the Unit Offering Price plus a fixed sales charge of $15 per Unit, provided the Certificateholder has held his Units for a period of at least eight months. Any such Certificateholder who has not held the Units to be exchanged for the eight month period would be required to exchange such Units at the Unit Offering Price plus a sales charge based on the greater of $15 per Unit or an amount which, together with the initial sales charge paid in connection with the acquisition of the Units being exchanged, equals the sales charge of the Series of the Exchange Trust for which such Certificateholder desires to exchange, determined as of the date of the exchange. Applicants further state that a Certificateholder would not be permitted to make up any difference between the amount representing the Units being submitted for exchange and the Units being acquired.

Section 6(c) of the Act provides, in pertinent part, that the Commission upon any application may conditionally or unconditionally exempt any person, security, or transaction from any provision of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Section 11(c) of the Act provides, in pertinent part, that exchange offers involving registered unit investment trusts are subject to the provisions of Section 11(a) of the Act irrespective of the basis of exchange. Section 11(a) of the Act provides that it shall be unlawful for any registered open-end company or any principal underwriter for such a company to make, or cause to be made, an offer to the holder of a security of such company or any other open-end investment company to exchange his security for a security in the same or another such company on any basis other than the relative net asset values of the respective securities to be exchanged, unless the terms of the offer have first been submitted to and approved by the Commission. Applicants request an order, pursuant to Section 11 of the Act, approving the terms of the Exchange Option.

Applicants assert that the purpose of the Exchange Option is to permit the Sponsor to pass on to the Certificateholder who wishes to exchange Units the cost savings resulting from the exchange. The cost savings result from reductions in time and expense related to advice, financial planning, and operational expense required for the Exchange Option.

[1] The investment companies to which this Exchange Option applies are referred to collectively as the "Exchange Trusts" or, individually, as the "Exchange Trusts."

Applicants believe that the proposed reduction in sales charge would be beneficial to all Certificateholders. Applicants submit that, under the proposed Exchange Option, a person desiring to dispose of Units of one Series and acquire Units of another Series of the Exchange Trusts may wish to do so for a number of reasons, such as changes in his or her particular investment goals or requirements or in order to take advantage of possible tax benefits flowing from the exchange.

Applicants further assert that requiring Certificateholders who hold Units of a Series of the Exchange Trusts which were acquired at a lower sales charge than the sales charge of Units to be acquired under the Exchange Option to pay an adjusted sales charge for such exchange during the first eight months in which they have held the Units to be exchanged is appropriate. In addition, Applicants assert it is essential to maintain equitable treatment of various purchasers of Units. After a Certificateholder of a Series with a lower sales charge has held his Units for an adequate period of time (here proposed to be eight months), the discriminatory nature of his effecting an exchange transaction is not as compelling, and thus possible abuses are not material.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 13, 1983 at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19789; File No. SR-NASD-83-5]

Self Regulatory Organizations; Proposed Rule Change; National Association of Securities Dealers, Inc.; Relating To Overallotment Options

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 17, 1983, the National Association of Securities Dealers, Inc. ("Association") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Association is proposing a rule change to the Interpretation of the Board of Governors—Review of Corporate Financing ("Interpretation") under Article III, Section I of the Association's Rules of Fair Practice. The following language will appear in the Interpretation:

*Overallotment Options**

When proposed in connection with the distribution of a public offering of securities on a "firm commitment" basis, any option to be granted to an underwriter or related person for an overallotment of more than fifteen percent of the amount of securities being offered (computed excluding any securities offered pursuant to the option) shall be presumed to be unfair and unreasonable.

II. Self-Regulatory Organization's Statement Regarding the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) *Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.* The proposed rule change amends the longstanding policy of the Association which presumptively established as unfair and unreasonable the granting to underwriters or related persons an overallotment option of more than ten percent of the amount of securities being underwritten in a public offering. Overallotment options are granted by issuers to underwriters to permit them at their discretion to increase the number of shares which will be issued as part of an offering conducted on a "firm commitment" basis. The options are intended to assist underwriters in achieving a more orderly distribution by providing flexibility in the amount of securities being offered. Additionally, the options facilitate stabilizing activities.

Although the Association's policy on overallotment options was never codified into the Interpretation, the policy has been consistently applied from the 1960's and has been periodically reviewed by the Association's Corporate Financing Committee. The ten percent limitation was retained based upon the belief that an underwriter should be able to measure demand for a new issue within a ten percent range. There was an additional concern that large overallotment options can alter the underwriter's obligation such that a firm commitment offering becomes more akin to a "best efforts" undertaking.

Over the past several months, the Association asserts that the increased volatility of prices and trading volume in the securities markets has made it increasingly difficult for underwriters to accurately judge demand ot to achieve an orderly distribution of an issuers securities. During this period, the Association has received a number of requests for exceptions from the ten percent policy. Increased market volatility was most often cited as the primary reason behind these requests. The Association decided to review the ten percent policy to ascertain its viability under current market conditions.

The Association concluded that it is in the issuers' and investors' interest for it to place reasonable restrictions upon overallotment options. It felt that such restrictions assist in assuring that the size of an offering does not become distored from that originally described to investors and is helpful in achieving a more orderly distribution. Recognizing that price and volume volatility has changed dramatically since the adoption of the ten percent policy it was concluded that greater latitude in determining the size of an offering may

* New language is italicized.

be necessary in the present market environment.

The possibility of permitting different sizes of overallotment options for initial public offerings and other distributions was considered bt it was noted that conditions could vary sufficiently for particular offerings in each category as to make any such distinction unfair. It was therefore decided to retain a single percentage limitation for all offerings.

Substantial attention was devoted to the amount of overallotment options which should be viewed as presumptively reasonable. Large overallotment options would eliminate distinctions between "firm commitment" and "best efforts" offerings and confuse potential investors as to the size of the offering and resulting effect on issuer's financial status. The size of the overallotment option in any offering is normally negotiated between the issuer and underwriter within regulatory parameters. It is expected that many, if not most, options to be granted under the proposed rule change will be less than the presumptively reasonable maximum. The Association expects to consistently apply the fifteen percent maximum without exception (other than highly unusual circumstances where an exception is granted by the Committee after a hearing).

The Association is charged under both Sections 15A(b)(2) and 15A(b)(6) of the Securities Exchange Act of 1934 with the responsibility of promulgating rules which prevent fraudulent and manipulative practices, promote just and equitable principles of trade, remove impediments to and perfect the mechanisms of a free and open market, and generally protect investors. The proposed rule change will specifically further these purposes by maintaining an orderly distribution of securities while permitting issuers and underwriters increased flexibility in determining the size of an offering necessitated by present market conditions.

(B) *Self-Regulatory Organization's Statement on Burden on Competition.* The Association believes the proposed rule change will not impose an unreasonable burden on competition. Raising the amount of overallotment options presumptively considered reasonable to fifteen percent of the amount of securities underwritten by an NASD member, would provide issuers and underwriters with increase flexibility in structuring the size of public offerings. This policy would apply to all public offerings, including an initial pubilc offering, which are underwritten on a "firm commitment" basis and in which any Association member participates. This regulatory relaxation in response to present market conditions will further the purposes expressed in the 1934 Act.

(C) *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others.* No comments were solicited or received in connection with the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the Submission, All subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C 552, will be available for inspection and copying in the Commission's Public Reference Section, Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 19, 1983.

George A. Fitzsimmons,

Secretary.

SMALL BUSINESS ADMINISTRATION

Reporting and Recordkeeping Requirements Under OMB Review

AGENCY: Small Business Administration.

ACTION: Notice of reporting requirements submitted for OMB review.

SUMMARY: Under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), agencies are required to submit proposed reporting and recordkeeping requirements to OMB for review and approval, and to publish a notice in the **Federal Register** notifying the public that the agency has made such a submission.

DATE: Comments must be received on or before June 30, 1983. If you anticipate commenting on a submission but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB reviewer and the agency clearance officer of your intent as early as possible.

Copies: Copies of the proposed forms, the requests for clearance (S.F. 83), supporting statements, instructions, transmittal letters, and other documents submitted to OMB for review may be obtained from the Agency Clearance Officer. Comments on the items listed should be submitted to the Agency Clearance Officer and the OMB Reviewer.

FOR FURTHER INFORMATION CONTACT:

Agency Clearance Officer: Elizabeth M. Zaic, Small Business Administration, 1441 L St., NW., Room 200, Washington, D.C. 20416, Telephone: (202) 653-8538; or

OMB Reviewer: J. Timothy Sprehe, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3235, New Executive Office Building, Washington, D.C. 20503, Telephone: (202) 395-4814.

DEPARTMENT OF STATE

[Public Notice CM-8/534]

Advisory Committee on International Investment, Technology, and Development; Meeting

The Department of State will hold a meeting of the Working Group on Transborder Data Flow of the Advisory Committee on International Investment, Technology, and Development on Monday, June 20, 1983, from 10:00 a.m. to noon, in the Loy Henderson Conference Room, Department of State, 2201 C Street, NW., Washington, D.C. 20520.

An agenda for the meeting will include reports on the OECD Committee for Information, Computer and Communications Policy (ICCP) meeting and the ICCP meeting on the follow-up to the OECD Privacy Guidelines, both held last March, and preparations for the ICCP Working Group on TBDF to meet in late June. Ambassador Diana Lady Dougan, Coordinator for International Communication and Information Policy, will brief the group.

Members of the public wishing to attend the meeting must contact Mr. Lincoln's office (202) 632-2728 in order to arrange admittance to the State Department. Please use the "C" street entrance.

The Chairman of the Working Group will, as time permits, entertain oral comments from members of the public attending the meeting.

Dated: May 13, 1983.

Philip T. Lincoln, Jr.,

Executive Secretary.

BILLING CODE 4710-07-M

VETERANS ADMINISTRATION

Expand and Renovate Building No. 1; Veterans Administration Medical Center, Cheyenne, Wyoming; Finding of No Significant Impact

The Veterans Administration (VA) has assessed the potential environmental impacts that may occur as a result of the proposed construction of a three level clinical addition. The preferred plan to be implemented is concept C-1, as described below.

Several alternative plans involving different functional adjacencies have been examined, including the "No Action" alternative.

Concept 1 is a plan that proposed a separate three level addition, directly west of the main clinical building, connected by an elevator core and new main entrance.

Concept 2 is a plan that proposes an addition with infill between the north and west wings of the building.

Concept 3 is a plan with two variants (C and C-1), both showing a three level addition to the west of the main clinical building and connected by two corridors. The two variants differ in how Canteen Service is located. Scheme C provided new construction for the Canteen while scheme C-1 proposes the Canteen in future backfill space. The C-1 plan will provide construction connected directly to the west wing of the main clinical building. Minimal renovation will be accomplished in building No. 1.

The "No Action" alternative would maintain most of the medical center in its existing situation, with continual development planning on a five year basis. Most projects developed for consideration would include maintenance and minor proposals to keep the existing facility on an accredited operational basis. However, many significant and basic facility problems would not be addressed by implementing this alternative.

The preferred concept for implementation accommodates the site constraints of both elevation and onsite land use. Development of the new addition in the central area of the reservation allows the major construction to be centralized and phased.

Short term effects of minor air degradation during construction are anticipated.

Mitigation of environmental effects will occur through implementation of air quality control measures during construction. VA construction specifications will include section EP, Environmental Protection, which specifically address actions to be taken to minimize air quality impacts.

A determination of effect, relative to architectural significance of the VA Medical Center will be made by the VA as required by Section 106 of the National Historic Preservation Act and the Advisory Council's regulations "Protection of Historic and Cultural Properties" (36 CFR Part 800). The selected plan attempts to accommodate the architectural significance of the site and will be submitted to the Advisory Council on Historic Preservation in consultation with the State Historic Preservation Officer.

The significance of the identified impacts have been evaluated relative to considerations of both context and intensity, as defined by the Council on Environmental Quality (40 CFR 1508.27).

This Environmental Assessment has been prepared in accordance with the requirements of the National Environmental Policy Act Regulations, §§ 1501.3 and 1508.9. A "Finding of No Significant Impact" has been reached based on the information presented in this assessment.

The assessment is being placed for public examination at the Veterans Administration, Washington, D.C. Persons wishing to examine a copy of the document may do so at the following office: Mr. William F. Sullivan, Director, Office of Environmental Affairs, (088C), Room 423, Veterans Administration, 811 Vermont Ave., NW., Washington, D.C. 20420 (202-389-3316). Questions or requests for single copies of the Environmental Assessment may be addressed to the above office.

Dated: May 23, 1983.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

Master Plan, Medical Center Lenwood Division, Augusta, Georgia; Finding of No Significant Impact

The Veterans Administration (VA) has assessed the potential environmental impact that may occur as a result of the development of a master plan for new construction. The preferred

plans to be implemented is concept number two, as described below. The facility program would provide approximately 740,000 gross square feet of space for all VA services.

Several alternative plans involving different functional adjacencies and various project locations within the VA property have been examined, including the "No Action" alternative.

Concept one (1) is considered the "minimum" scheme because the amount of new construction is less, but more renovation of existing structures is included. The concept would utilize buildings no. 18, 19, 20, 34, 76 and 94. Building no. 34 would be utilized on an interim basis and would eventually be demolished and replaced with a new addition. All other on-site buildings not identified above would be demolished and replaced with new construction, except for the architecturally significant quarters buildings and the existing boiler plant-chiller complex.

Concept two (2) involves the development of a new complex situated centrally within the VA property. The architecturally significant building nos. 18, 19 and 20 and the architecturally significant quarters areas will be maintained and utilized. Also building no. 76 will be adapted for re-use as a research complex, but maintaining its exterior envelope. New construction includes a compact multi-level structure, oriented in and east-west direction, with a maximum height of four levels. The new building will include a central support sub-level, nursing home, ambulatory care, psychiatric support, intermediate medicine and psychiatric beds. Additionally, various other services and clinics are located within the new structure to meet the functional and treatment needs of the psychiatric medical center.

Concept three (3) proposes development of a new complex identical to the above description, but in a less dense configuration. Moreover, the new structure is oriented in a north-south direction with patient care bed towers radiating from a central support area. Concept three also necessitates considerable on-site road realignments and relocation of recreation facilities.

The "No Action" alternative would maintain most facilities in their existing situation, with continual development of medical center planning on a five year basis. Most projects developed for consideration would include maintenance and minor proposals to keep the existing facility on an accredited operational basis. However, many significant and basic facility problems would not be addressed by implementing this alternative.

The development of the proposed master plan concept will have impacts on the human and natural environment affecting minor air degradation and associated increased noise levels during construction phases.

Demolition of building nos. 1–8, 12, 13, 14, and eventually 34 will require adherence to historical compliance procedures. The VA will record the structures as required and will coordinate with the Advisory Council on Historic Preservation in consultation with the Georgia State Historic Preservation Officer. The potential for a determination of adverse effect does exist in relation to the removal of building nos. 12, 21 and 34.

All environmental attributes analyzed would not be affected if the "No Action" alternative was selected. However, historic and architectural considerations would still remain a major element to address as required by the National Historic Preservation Act.

The following mitigative actions will occur during project development. To provide for integral control of storm water drainage, on-site retention basins will be utilized. Noise control during construction can be achieved utilizing barriers. Specific noise attenuation will require achieving at least barrier noise level reductions or equivalents.

A determination of effect, relative to historic-architectural significance of the VAMC, will be made by the VA as required by Section 106 of the National Historic Preservation Act and the Advisory Council's regulations "Protection of Historic and Cultural Properties" (36 CFR, Part 800). Utilization of some historic structures is planned (building nos. 18, 19, 20). Main new development located centrally and southwest, within the VA property, will require removal of buildings considered architecturally significant. The selected plan attempts to accommodate the historic nature of the site and will be submitted to the Advisory Council on Historic Preservation in consultation with the State Historic Preservation Officer.

The significance of the identified impacts have been evaluated relative to considerations of both context and intensity, as defined by the Council on Environmental Quality (40 CFR 1508.27).

This Environmental Assessment has been performed in accordance with the requirements of the National Environmental Policy Act Regulations, Sections 1501.3 and 1508.9. A "Finding of No Significant Impact" has been reached based on the information presented in this assessment.

The assessment is being placed for public examination at the Veterans Administration, Washington, D.C. Persons wishing to examine a copy of the document may do so at the following office: Mr. William F. Sullivan, Director, Office of Environmental Affairs, (088C), Room 423, Veterans Administration, 811 Vermont Ave., NW, Washington, D.C. 20420, (202–389–3316). Questions or requests for single copies of the Environmental Assessment may be addressed to the above office.

Dated: May 19, 1983.
By direction of the Administrator.

Everett Alvarez, Jr.,
Deputy Administrator.

Agency Forms Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

The Veterans Administration has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document lists revised forms, extended forms and form letters, new forms, and a reinstated form. This entry contains the following information: (1) The department or staff office issuing the form; (2) The title of the form; (3) The agency form number, if applicable; (4) How ofter the form must be filled out; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to fill out the form; and (8) An indication of whether section 3504(H) of Pub. L. 96–511 applies.

ADDRESSES: Copies of the proposed forms and supporting documents may be obtained from Patricia Viers, Agency Clearance Officer (004A2), Veterans Administration, 810 Vermont Ave. NW., Washington, D.C., 20420, (202) 389–2146. Comments and questions about the items on this list should be directed to the VA's OMB Desk Officer, Rich Shepard, Office of Management and Budget, 726 Jackson Place, NW., Washington, D.C., 20503, (202) 395–6880.

DATES: Comments on the forms should be directed to the OMB Desk Officer within 60 days of this notice.

By direction of the Administrator.

Dated: May 20, 1983.

Dominic Onorato,
Associate Deputy Administrator for Information Resources Management.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

DATE AND TIME: Tuesday, May 31, 1983, 9:30 a.m. (eastern time).

PLACE: Commission Conference Room No. 2000, second floor, Columbia Plaza Office Building, 2401 E Street NW., Washington, DC 20506.

STATUS: Part will be open to the public and part will be closed to the public.

MATTERS TO BE CONSIDERED:

1. Ratification of Notation Vote/s.
2. A Report on Commission Operations: Report on the Field Reorganization Plan.
3. Freedom of Information Act Appeal No. 83–02–FOIA–045–NY, concerning a request for access to records in a Title VII/EPA/ADEA case file where suit has been filed on the charges.
4. Freedom of Information Act Appeal No. 83–4–FOIA–30–HU, concerning a request for the contents of a closed ADEA Complaint file.
5. Freedom of Information Act Appeal No. 83–5–FOIA–52–SE, concerning a request for the investigator's memorandum and investigative plan from a closed Title VII file.

Closed:

1. Litigation Authorization; General Counsel Recommendations.

Note.—Any matter not discussed or concluded may be carried over to a later meeting. (In addition to publishing notices on EEOC Commission meetings in the **Federal Register**, the Commission also provides recorded announcements a full week in advance on future Commission sessions. Please telephone (202) 634–6748 at all times for information on these meetings).

CONTACT PERSON FOR MORE INFORMATION: Treva McCall, Executive Secretary to the Commission at (202) 634–6748.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 4:10 p.m. on Friday, May 20, 1983, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider a recommendation regarding an amendment to the Purchase and Assumption Agreement entered into on February 15, 1983, by and between the Corporation, the Corporation acting as Receiver of United American Bank in Knoxville, Knoxville, Tennessee, and First Tennessee Bank, Knoxville, Tennessee, and to a Memorandum of Understanding entered into on March 16, 1983, between the Corporation and First Tennessee Bank.

In calling the meeting, the Board determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Mr. Michael A. Mancusi, acting in the place and stead of Director C. T. Conover (Comptroller of the Currency), that Corporation business required its consideration of the matter on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter could be considered in a closed meeting pursuant to subsections (c)(4) and (c)(8) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(4) and (c)(8)).

Dated: May 23, 1983.

6

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Monday, May 23, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Application of The Community Savings Bank, Rochester, New York, an insured mutual savings bank, for consent to merge, under its charter and with the title "The Rochester Community Savings Bank," with Rochester Savings Bank, Rochester, New York, and to establish the nineteen offices of Rochester Savings Bank as branches of the resultant bank.

Recommendations regarding the Corporation's assistance agreements involving insured banks pursuant to section 13(c) of the Federal Deposit Insurance Act.

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,680-L (Amended): American City Bank, Los Angles, California, Newport Harbour National Bank, Newport Beach, California; Western National Bank, Santa Ana, California, Bank of San Marino, San Marino, California.

The Board further determined, by the same majority vote, that no earlier notice of the changes in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: May 23, 1983.

Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its open meeting held at 2:00 p.m. on Monday, May 23, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Issac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C.T. Conover (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,681-L: Franklin National Bank, New York, New York

Case No. 45,682-L: American City Bank, Los Angeles, California

By the same majority vote, the Board further determined that no earlier notice of these changes in the subject matter of the meeting was practicable.

Dated: May 23, 1983.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 9:30 a.m. on Tuesday, May 31, 1983, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Application for Federal deposit insurance:

First State Bank of Dwight, Dwight, Nebraska, an operating noninsured bank.

Application for Federal deposit insurance for a state-licensed U.S. branch of a foreign bank:

Korea Exchange Bank, Seoul, Republic of Korea, for Federal deposit insurance of deposits received at and recorded for the accounts of its proposed state-licensed branch to be located at 49-51 West 33rd Street, New York, New York.

Applications for consent to merge and establish one branch:

Rio Grande Valley Bank, Albuquerque, New Mexico, an insured State nonmember bank.

for consent to merge, under its charter and title, with First City National Bank, Albuquerque, New Mexico, and to establish the sole office of First City National Bank as a branch of the resultant bank.

Bank of Weirton, Weirton, West Virginia, an insured State nonmember bank, for consent to merge, under its charter and title, with The Peoples Bank, Weirton, West Virginia, and to establish the sole office of The Peoples Bank as a branch of the resultant bank.

Request for waiver of section 337.2(b) of the Corporation's rules and regulations:

Bank of Montreal Trust Company, New York, New York.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Memorandum and Resolution re: The Monroe Bank and Trust Company, Monroe, Connecticut

Memorandum and Resolution re: The Hamilton Bank and Trust Company, Atlanta, Georgia

Memorandum and Resolution re: The Bollinger County Bank, Lutesville, Missouri

Memorandum and Resolution re: Franklin National Bank New York, New York

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications, requests, or actions involving administrative enforcement proceedings approved by the Director or Associate Director (Administration and Corporate Applications) of the Division of Bank Supervision and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Reports of the Director, Office of Corporate Audits and Internal Investigations:

Audit Report re: Southern National Bank Liquidation Site, Birmingham, Alabama, Report on Internal Accounting Controls, Year Ended October 31, 1982 (dated December 23, 1982).

Audit Report re: On-Line Automated Loan Asset Accounting System Banco Credito y Ahorro Ponceno Ponce, Puerto Rico (dated March 4, 1983).

Audit Report re: The Mission State Bank and Trust Company Mission, Kansas (dated March 18, 1983).

Audit Report re: Integrated Monitoring System (dated April 20, 1983).

Discussion Agenda:

No matters scheduled.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, NW., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: May 24, 1983.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10 a.m. on Tuesday, May 31, 1983, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b (c)(2), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5) U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Appeal from an initial denial of a request for records under the Freedom on Information Act.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.

Names of employees authorized to be exempt from disclosure pursuant to provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, DC.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: May 24, 1983.

Federal Deposit Insurance Corporation.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of May 31, 1983, at 450 5th Street, N.W., Washington, D.C.

A closed meeting will be held on Tuesday, June 1, 1983, at 10 a.m.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10).

Chairman Shad and Commissioners Evans, Longstreth and Treadway voted to consider the items listed for the closed meeting in closed session.

The subject matter of the closed meeting scheduled for Tuesday, June 1, 1983, at 10 a.m., will be:

Access to investigative files by Federal, State, or Self-regulatory authorities.
Litigation matters.
Formal orders of investigation.
Institution of injunctive action.
Institution of administrative proceedings of an enforcement nature.
Settlement of administrative proceedings of an enforcement nature.
Regulatory matter regarding financial institution.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contract: Steve Boehm at (202) 272–2467.

May 23, 1983.

Part II

Department of Labor

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

Modifications to General Wage Determination Decisions

The numbers of the decisions being modified and their dates of publication in the **Federal Register** are listed with each State.

Department of Energy

Federal Energy Regulatory Commission

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Volume 900]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 24, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd., Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease
Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: recompletion tight formation
Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

[FR Doc. 83-14334 Filed 5-26-83; 8:45 am]

BILLING CODE 6717-01-C

[Volume 901]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: May 24, 1983.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register.**

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487-4808, 5285 Port Royal Rd., Springfield, Va. 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102-1: New OCS lease
- 102-2: New well (2.5 Mile rule)
- 102-3: New well (1000 Ft rule)
- 102-4: New onshore reservoir
- 102-5: New reservoir on old OCS lease

Section 107-DP: 15,000 feet or deeper
- 107-GB: Geopressured brine
- 107-CS: Coal Seams
- 107-DV: Devonian Shale
- 107-PE: Production enhancement
- 107-TF: New tight formation
- 107-RT: Recompletion tight formation

Section 108: Stripper well
- 108-SA: Seasonally affected
- 108-ER: Enhanced recovery
- 108-PB: Pressure buildup.

Kenneth F. Plumb,

Secretary.

Part IV

Nuclear Regulatory Commission

Light-Water Nuclear Power Reactors; Fracture Toughness Requirements

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

Fracture Toughness Requirements for Light-Water Nuclear Power Reactors

AGENCY: Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Commission is amending its regulations which specify fracture toughness requirements for light-water nuclear power reactors and its requirements for reactor vessel material surveillance programs. The amendments clarify the applicability of these requirements to all plants, modify certain requirements, and shorten and simplify these regulations by more extensively incorporating by reference appropriate National Standards.

EFFECTIVE DATE: July 26, 1983.

FOR FURTHER INFORMATION CONTACT: Dr. P. N. Randall, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone (301) 443–5903.

SUPPLEMENTARY INFORMATION: On November 14, 1980 the Nuclear Regulatory Commission published in the **Federal Register** (45 FR 75536) proposed amendments to its regulation, 10 CFR Part 50, "Domestic Licensing of Production and Utilization Facilities," which would amend Appendix G, "Fracture Toughness Requirements," and Appendix H, "Reactor Vessel Material Surveillance Program Requirements." These amendments comprised a proposed general revision of Appendices G and H designed to update them after seven years of use and to make them more consistent with current technology and pertinent National Standards. Interested persons were invited to submit written comment by January 13, 1981. Thirteen letters of comment were received. All were from utilities or vendors and addressed the application of specific requirements contained in the proposed rule. There were no adverse general comments or objections to the proposed revisions. A brief summary of the more significant comments and the staff responses follows:

The most significant technical question, which affects pressure-temperature limits for all plants, concerned a new requirement for fracture control at structural discontinuities, contained in paragraph IV.A.2 of Appendix G. The critical locations are the closure flange regions of the reactor vessel where bending stress is introduced during boltup. The requirement in the proposed rule was that the temperature at the highly stressed region be at least 150°F above the reference temperature of the material whenever pressure exceeded 20 percent of the preoperational system hydrostatic test pressure. Commenters felt this was overly restrictive, and cited certain hardships caused during hydrotests and normal heatup and cooldown operations. In response to the comments, the requirement has been revised to provide a separate, lower temperature requirement for hydrotest conditions than for normal operation, consistent with the margins of safety specified in the ASME Code. In addition, the temperature requirement for normal operation was reduced slightly based on further analysis of boltup conditions. Thus, in the final rule, the proposed requirement of 150°F (above the reference temperature of the material) was revised to 90°F for hydrotest and 120°F for normal operation. This requirement will affect principally those plants where radiation damage to the beltline region is low, and the pressure-temperature limits are thus more likely to be controlled by the closure flange regions.

Paragraph IV.A.4. of Appendix G was expanded to specify that the quantity "RT_{NDT}+60°F" referred to the adjusted reference temperature of the reactor vessel material in the region that was controlling the pressure-temperature limits (beltline or closure flange regions) following the analysis required by paragraph IV.A.2.

The requirements concerning thermal annealing of reactor vessels, given in paragraphs IV.B. and V.D. of Appendix G, represent no basic change from those published in 1973. However, the recent investigation of pressurized thermal shock effects prompted some studies of annealing to identify and resolve possible engineering difficulties. If the results show that changes should be made in paragraph IV.B. or V.D., a further amendment to Appendix G will be issued.

Minor changes in wording were made in several paragraphs, and footnotes were added to clarify the meaning of two paragraphs.

A number of comments addressed the reporting requirements for surveillance reports, paragraphs III.A. and III.C. of Appendix H. Based on commenters suggestions, the Commission has revised the proposed requirement that surveillance reports be submitted within 90 days after completion of testing to require submittal of these reports within 1 year of capsule withdrawal unless an extension is granted. This change simplifies implementation of the requirement, because capsule withdrawal schedules must be approved by the Director, Office of Nuclear Reactor Regulation, as provided in paragraph II.B.3. of Appendix H. The primary purposes of the requirement—timely reporting of test results and notification of any problems—are accomplished as well by the provisions of the final rule.

Copies of the abstract of comments and the staff's response, which gives a point-by-point discussion of each issue raised by the commenters, and copies of the value-impact analysis supporting the rule are available for public inspection and copying for a fee at the Commission's Public Document Room at 1717 H Street NW., Washington, DC. Single copies may be obtained by written request to the Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: P. N. Randall.

Regulatory Analysis

The Commission has prepared a regulatory analysis for this regulation. The analysis examines the costs and benefits of the rule as considered by the Commission. A copy of the regulatory analysis is available for inspection and copying for a fee at the NRC Public Document Room, 1717 H Street, NW., Washington, DC. Single copies of the analysis may be obtained from P. N. Randall, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone (301) 443–5903.

Paperwork Reduction Act Statement

The reporting and recordkeeping requirements contained in this regulation have been approved by the Office of Management and Budget, OMB approval No. 3150–0011.

Regulatory Flexibility Statement

In accordance with Section 605(b) of the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission hereby certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule affects primarily the utilities that own light water nuclear power reactors, and the vendors of those reactors, none of which meet the definition of "small entities" set forth in Section 601(3) of the Regulatory Flexibility Act or the Small Business Size Standards set out in regulations issued by the Small Business Administration in 13 CFR Part 121.

List of Subjects in 10 CFR Part 50

Antitrust, Classified information, Fire prevention, Intergovernmental relations, Nuclear power plants and reactors, Penalty, Radiation protection, Reactor siting criteria, Reporting and recordkeeping requirements.

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 553 of title 5 of the United States Code, the following amendments to 10 CFR Part 50 are published as a document subject to codification.

1. The authority citation for Part 50 is revised to read as follows:

Authority: Secs. 103, 104, 161, 182, 183, 186, 189, 68 Stat. 936, 937, 948, 953, 954, 955, 956, as amended, sec. 234, 83 Stat. 1244, as amended (42 U.S.C. 2133, 2134, 2201, 2232, 2233, 2236, 2239, 2282); secs. 201, 202, 206, 88 Stat. 1242, 1244, 1246, as amended (42 U.S.C. 5841, 5842, 5846), unless otherwise noted.

Section 50.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Sections 50.58, 50.91 and 50.92 also issued under Pub. L. 97–415, 96 Stat. 2073 (42 U.S.C. 2239). Section 50.78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Sections 50.80–50.81 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Sections 50.100–50.102 also issued under sec. 186, 68 Stat. 955 (42 U.S.C. 2236).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273), §§ 50.10 (a), (b), and (c), 50.44, 50.46, 50.48, 50.54, and 50.80(a) are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); §§ 50.10 (b) and (c) and 50.54 are issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 50.55(e), 50.59(b), 50.70, 50.71, 50.72, and 50.78 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. Paragraph (a) of § 50.12 is revised to read as follows:

§ 50.12 Specific exemptions.

(a) The Commission may, upon application by any interested person or upon its own initiative grant such exemptions from the requirements of the regulations in this part as it determines are authorized by law and will not endanger life or property or the common defense and security and are otherwise in the pubic interest. To obtain an exemption to Appendices G and H to this part, the requirements of paragraph 50.60(b) of this part must be met in addition to the requirements of this paragraph.

* * * * *

§ 50.55a [Amended]

3. In § 50.55a, paragraph (i) is removed and paragraph (j) is redesignated paragraph (i).

4. A new § 50.60 is added to 10 CFR Part 50 to read as follows:

§ 50.60 Acceptance criteria for fracture prevention measures for lightwater nuclear power reactors for normal operation.

(a) Except as provided in paragraph (b) of this section, all lightwater nuclear power reactors must meet the fracture toughness and material surveillance program requirements for the reactor coolant pressure boundary set forth in Appendices G and H to this part.

(b) Proposed alternatives to the described requirements in Appendices G and H of this part or portions thereof may be used when an exemption is granted by the Commission under § 50.12. In addition, the applicant must demonstrate that (i) compliance with the specified requirements would result in hardships or unusual difficulties without a compensating increase in the level of quality and safety, and (ii) the proposed alternatives would provide an adequate level of quality and safety.

5. Appendices G and H are revised to read as follows:

Appendix G—Fracture Toughness Requirements

Table of Contents

I. Introduction and Scope
II. Definitions
III. Fracture Toughness Tests
IV. Fracture Toughness Requirements
V. Inservice Requirements—Reactor Vessel Beltline Materials

I. Introduction and Scope

This appendix specifies fracture toughness requirements for ferritic materials of pressure-retaining components of the reactor coolant pressure boundary of light water nuclear power reactors to provide adequate margins of safety during any condition of normal operation, including anticipated operational occurrences and system hydrostatic tests, to which the pressure boundary may be subjected over its service lifetime.

The ASME Code forms the basis for the requirements of this Appendix. "ASME Code" means the American Society of Mechanical Engineers Boiler and Pressure Vessel Code. If no section is specified, the reference is to Section III, Division 1, "Rules for Construction of Nuclear Power Plant Components." "Section XI" means Section XI, Division 1, "Rules for Inservice Inspection of Nuclear Power Plant Components." If no edition or addenda is specified the applicable ASME Code edition and addenda and any limitations and modifications thereof are specified in § 50.55a of this part.

The ASME Boiler and Pressure Vessel Code has been approved for incorporation by reference by the Director of the Federal Register. A notice of any changes made to the material incorporated by reference will be published in the **Federal Register**. Copies of the ASME Boiler and Pressure Vessel Code may be purchased from the American Society of Mechanical Engineers, United Engineering Center, 345 East 47th St., New York, NY 10017. It is also available for inspection at the Nuclear Regulatory Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

The requirements of this appendix apply to the following materials:

Note.—The adequacy of the fracture toughness of other ferritic materials not covered in this section shall be demonstrated to the Director, Office of Nuclear Reactor Regulation, on an individual case basis.

A. Carbon and low-alloy ferritic steel plate, forgings, castings, and pipe with specified minimum yield strengths not over 50,000 psi (345 MPa), and to those with specified minimum yield strengths greater than 50,000 psi (345 MPa) but not over 90,000 psi (621 MPa) if qualified by using methods equivalent to those described in paragraph G–2110 of the ASME Code as defined in paragraph II.A. of this appendix. The latest edition and addenda permitted by paragraph 50.55a(b) of this part at the time the analysis is made is to be used for the purpose of this paragraph.

B. Welds and weld heat-affected zones in the materials specified in paragraph I.A. of this appendix.

C. Materials for bolting and other types of fasteners with specified minimum yield strengths not over 130,000 psi (896 MPa).

II. Definitions

A. "Ferritic material" means carbon and low-alloy steels, higher alloy steels including all stainless alloys of the 4xx series, and maraging and precipitation hardening steels with a predominantly body-centered cubic crystal structure.

B. "System hydrostatic tests" means all preoperational system leakage and hydrostatic pressure tests and all system leakage and hydrostatic pressure tests performed during the service life of the pressure boundary in compliance with the ASME Code, Section XI.

C. "Specified minimum yield strength" means the minimum yield strength (in the unirradiated condition) of a material specified in the construction code under which the component is built under § 50.55a of this part.

D. "Reference temperature" means the reference temperature, RT_{NDT}, as defined in the ASME Code.

E. "Adjusted reference temperature" means the reference temperature as adjusted for irradiation effects (see Section V of this Appendix) by adding to RT_{NDT} the temperature shift, measured at the 30 ft-lb (41J) level, in the average Charpy curve for the irradiated material relative to that for the unirradiated material.

F. "Beltline" or "Beltline region of reactor vessel" means the region of the reactor vessel (shell material including welds, heat affected zones, and plates or forgings) that directly surrounds the effective height of the active core and adjacent regions of the reactor vessel that are predicted to experience

sufficient neutron radiation damage to be considered in the selection of the most limiting material with regard to radiation damage.

III. Fracture Toughness Tests

A. To demonstrate compliance with the fracture toughness requirements of Sections IV and V of this appendix, ferritic materials must be tested in accordance with the ASME Code and, for the beltline materials, the test requirements of Appendix H of this part. For a reactor vessel that was constructed to an ASME Code earlier than the Summer 1972 Addenda of the 1971 Edition (under § 50.55a of this part), the fracture toughness data and data analyses must be supplemented in a manner approved by the Director, Office of Nuclear Reactor Regulation, to demonstrate equivalence with the fracture toughness requirements of this Appendix.

B. Test methods for supplemental fracture toughness tests described in paragraph V.C.2. of this appendix must be submitted to and approved by the Director, Office of Nuclear Reactor Regulation, prior to testing.

C. All fracture toughness test programs conducted in accordance with paragraphs A and B of this section must comply with ASME Code requirements for calibration of test equipment, qualification of test personnel, and retention of records of these functions and of the test data.

IV. Fracture Toughness Requirements

A. The pressure-retaining components of the reactor coolant pressure boundary that are made of ferritic materials must meet the requirements of the ASME Code supplemented as follows for fracture toughness during system hydrostatic tests and any condition of normal operation, including anticipated operational

1. Reactor vessel beltline materials must have Charpy upper-shelf energy [1] of no less than 75 ft-lb (102J) initially and must maintain upper-shelf energy throughout the life of the vessel of no less than 50 ft-lb (68J), unless it is demonstrated in a manner approved by the Director, Office of Nuclear Reactor Regulation, that lower values of upper-shelf energy will provide margins of safety against fracture equivalent to those required by Appendix G of the ASME Code. The latest edition and addenda of the ASME Code permitted by paragraph 50.55a(b) of this part at the time the analysis is made are to be used for the purposes of paragraphs IV.A.1 and IV.A.2 of this appendix.

2. When the core is not critical, pressure-temperature limits for the reactor vessel must be at least as conservative as those obtained by following the methods of analysis and the required margins of safety of Appendix G of the ASME Code supplemented by the requirements of Section V of this appendix. In addition, when pressure exceeds 20 percent of the preservice system hydrostatic test pressure, the temperature of the closure flange regions that are highly stressed by the bolt preload must exceed the reference temperature of the material in those regions by at least 120°F (67°C) for normal operation and by 90°F (50°C) for hydrostatic pressure tests and leak tests, unless a lower temperature can be justified by showing that the margins of safety for those regions when they are controlling are equivalent to those required for the beltline when it is controlling. The justification submitted for the pressure temperature limits must describe the methods of analysis used.

3. When the core is critical (other than for the purpose of low-level physics tests), the temperature of the reactor vessel must not be lower than 40°F (22°C) above the minimum permissible temperature of paragraph 2. of this section nor lower than the minimum permissible temperature for the inservice system hydrostatic pressure test. An exception may be made for boiling water reactor vessels when water level is within the normal range for power operation and the pressure is less than 20 percent of the preservice system hydrostatic test pressure. In this case the minimum permissible temperature is 60°F (33°C) above the reference temperature of the closure flange regions that are highly stressed by the bolt preload.

4. If there is no fuel in the reactor during system hydrostatic pressure tests or leak tests, the minimum permissible test temperature must be 60°F (33°C) above the adjusted reference temperature of the reactor vessel material in the region that is controlling (as specified in paragraph IV.A.2 of this appendix).

5. If there is fuel in the reactor during system hydrostatic pressure tests or leak tests, the requirements of paragraphs 2 or 3 of this section apply, depending on whether the core is critical during the test.

B. Reactor vessels for which the predicted value of upper-shelf energy at end of life is below 50 ft-lb or for which the predicted value of adjusted reference temperature at end of life exceeds 200°F (93°C) must be designed to permit a thermal annealing treatment at a sufficiently high temperature to recover material toughness properties of ferritic materials of the reactor vessel beltline.

V. Inservice Requirements—Reactor Vessel Beltline Material

A. The effects of neutron radiation on the reference temperature and upper shelf energy of reactor vessel beltline materials, including welds, are to be predicted from the results of pertinent radiation effects studies in addition to the results of the surveillance program of Appendix H to this part.

B. Reactor vessels may continue to be operated only for that service period within which the requirements of Section IV of this appendix are satisfied using the predicted value of the adjusted reference temperature and the predicted value of the upper-shelf energy at the end of the service period to account for the effects of radiation on the fracture toughness of the beltline materials. These predictions are to be made for the radiation conditions at the critical location on the crack front of the assumed flaw.[2] The highest adjusted reference temperature and the lowest upper-shelf energy level of all the beltline materials must be used to verify that the fracture toughness requirements are satisfied.

C. In the event that the requirements of Section V.B. of this appendix cannot be satisfied, reactor vessels may continue to be operated provided all of the following requirements are satisfied:

1. A volumetric examination of 100 percent of the beltline materials that do not satisfy the requirements of Section V.B. of this appendix is made and any flaws characterized according to Section XI of the ASME Code and as otherwise specified by the Director, Office of Nucelar Reactor Regulation.

2. Additional evidence of the fracture toughness of the beltline materials after exposure to neutron irradiation is to be obtained from results of supplemental fracture toughness tests.

3. An analysis is performed that conservatively demonstrates, making appropriate allowances for all uncertainties, the existence of equivalent margins of safety for continued operation.

D. If the procedures of Section V.C. of this appendix do not indicate the existence of an equivalent safety margin, the reactor vessel beltline may, subject to the approval of the Director, Office of Nuclear Reactor Regulation, be given a thermal annealing treatment to recover the fracture toughness of the material. The degree of recovery is to be measured by testing additional specimens that have been withdrawn from the surveillance program capsules and that have been annealed under the same time-at-temperature conditions as those given the beltline material. The results, together with the results of other pertinent annealing-effects studies, are to provide the basis for establishing the adjusted reference temperature and upper-shelf energy after annealing. The reactor vessel may continue to be operated only for that service period within which the predicted fracture toughness of the beltline region materials satisfies the requirements of Section IV.A. of this appendix using the values of adjusted reference temperature and upper-shelf energy that include the effects of annealing and subsequent irradiation.

E. The proposed programs for satisfying the requirements of Sections V.C. and V.D. of this appendix are to be reported to the Director, Office of Nuclear Reactor Regulation, as specified in § 50.4(a) of this Part, for review and approval on an individual case basis at least 3 years prior to the date when the predicted fracture toughness levels will no longer satisfy the requirements of section V.B of this appendix.

---

[1] Defined in ASTM E 185–79 and –82 which are incorporated by reference in Appendix H.

[2] For example, in analyses that follow Appendix G of the ASME Code, the radiation conditions to be used are those predicted for the material one fourth of the way through the vessel wall, i.e., at the deepest point on the crack front of the postulated defect.

Appendix H—Reactor Vessel Material Surveillance Program Requirements

Table of Contents

I. Introduction
II. Surveillance Program Criteria
III. Report of Test Results

I. Introduction

The purpose of the material surveillance program required by this Appendix is to monitor changes in the fracture toughness properties of ferritic materials in the reactor vessel beltline region of light water nuclear power reactors resulting from exposure of these materials to neutron irradiation and the thermal environment. Under the program, fracture toughness test data are obtained from material specimens exposed in surveillance capsules, which are withdrawn periodically from the reactor vessel. These data will be used as described in Sections IV and V of Appendix G to this part.

ASTM E 185–73, –79 and –82, "Standard Practice for Conducting Surveillance Tests for Light-Water Cooled Nuclear Power Reactor Vessels," which are referenced in the following paragraphs, have been approved for incorporation by reference by the Director of the Federal Register. A notice of any changes made to the material incorporated by reference will be published in the **Federal Register**. Copies of ASTM E 185–73, –79, and –82, may be obtained from the American Society for Testing and Materials, 1916 Race St., Philadelphia, PA 19103. Copies will be available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C.

II. Surveillance Program Criteria

A. No material surveillance program is required for reactor vessels for which it can be conservatively demonstrated by analytical methods applied to experimental data and tests performed on comparable vessels, making appropriate allowances for all uncertainties in the measurements, that the peak neutron fluence (E>1MEV) at the end of the design life of the vessel will not exceed 10^{17} n/cm^2.

B. Reactor vessels that do not meet the conditions of paragraph II.A. of this Appendix must have their beltline materials monitored by this Appendix.

1. That part of the surveillance program conducted prior to the first capsule withdrawal must meet the requirements of the edition of ASTM E 185 that is current on the issue date of the ASME Code to which the reactor vessel was purchased. Later editions of ASTM E 185 may be used, but including only those editions through 1982. For each capsule withdrawal after July 26, 1983, the test procedures and reporting requirements must meet the requirements of ASTM E 185–82 to the extent practical for the configuration of the specimens in the capsule. For each capsule withdrawal prior to July 26, 1983 either the 1973, the 1979, or the 1982 edition of ASTM E 185 may be used.

2. Surveillance specimen capsules must be located near the inside vessel wall in the beltline region so that the specimen irradiation history duplicates, to the extent practicable within the physical constraints of the system, the neutron spectrum, temperature history, and maximum neutron fluence experienced by the reactor vessel inner surface. If the capsule holders are attached to the vessel wall or to the vessel cladding, construction and inservice inspection of the attachments and attachment welds must be done according to the requirements for permanent structural attachments to reactor vessels given in Sections III and XI of the ASME Code. The design and location of the capsule holders shall permit insertion of replacement capsules. Accelerated irradiation capsule may be used in addition to the required number of surveillance capsules specified in ASTM E 185.

3. A proposed withdrawal schedule must be submitted with a technical justification therefor to the Director, Office of Nuclear Reactor Regulation, for approval. The proposed schedule must be approved prior to implementation.

C. An integrated surveillance program may be considered for a set of reactors that have similar design and operating features. The representative materials chosen for surveillance from each reactor in the set may be irradiated in one or more of the reactors, but there must be an adequate dosimetry program for each reactor. No reduction in the requirements for number of materials to be irradiated, specimen types, or number of specimens per reactor is permitted, but the amount of testing may be reduced if the initial results agree with predictions. Integrated surveillance programs must be approved by the Director, Office of Nuclear Reactor Regulation, on a case-by-case basis. Criteria for approval include the following considerations:

1. The design and operating features of the reactors in the set must be sufficiently similar to permit accurate comparisons of the predicted amount of radiation damage as a function of total power output.

2. There must be adequate arrangement for data sharing between plants.

3. There must be a contingency plan to assure that the surveillance program for each reactor will not be jeopardized by operation at reduced power level or by an extended outage of another reactor from which data are expected.

4. There must be substantial advantages to be gained, such as reduced power outages or reduced personnel exposure to radiation, as a direct result of not requiring surveillance capsules in all reactors in the set.

III. Report of Test Results

A. Each capsule withdrawal and the test results must be the subject of a summary technical report to be submitted to the Director, Office of Nuclear Reactor Regulation, as specified in § 50.4(a) of this Part, within 1 year after capsule withdrawal, unless an extension is granted by the Director.

B. The report must include the data required by ASTM E 185, as specified in paragraph II.B.1 of this Appendix, and the results of all fracture toughness tests conducted on the beltline materials in the irradiated and unirradiated conditions.

C. If a change in the Technical Specifications is required, either in the pressure-temperature limits or in the operating procedures required to meet the limits, the expected date for submittal of the revised Technical Specifications must be provided with the report.

Dated at Washington, D.C. this 23d day of May 1983.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

Part V

Department of Health and Human Services

Food and Drug Administration

Medical Device Reporting; Reproposal

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 803

[Docket No. 79N-0182]

Medical Device Reporting

AGENCY: Food and Drug Administration.

ACTION: Reproposal.

SUMMARY: The Food and Drug Administration (FDA) is issuing a revised proposal to require manufacturers and importers of medical devices to report to FDA whenever the manufacturer or importer has information that reasonably suggests, or a person alleges and the manufacturer or importer is aware of the allegation, that a device has caused or contributed to a death or serious injury or that a device has malfunctioned, if a recurrence of the malfunction is likely to cause or contribute to a death or serious injury. After FDA analyzes the results of its manufacturer complaint file inspection program, the agency will consider whether any reports in addition to those proposed in this rule are necessary and, if so, will propose additional reporting requirements.

DATES: Comments by July 26, 1983. FDA proposes that any final rule based on this reproposal become effective 60 days after its date of publication in the **Federal Register.**

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Robert A. Forst, National Center for Devices and Radiological Health (HFK-143), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7114.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of November 18, 1980 (45 FR 76183), FDA issued a proposed rule to require device manufacturers and distributors (including importers) to submit to FDA reports concerning devices that (1) may have caused a death or injury; (2) may have a deficiency that could result in a death or injury or that could give inaccurate diagnostic information and, thereby, result in improper treatment; or (3) are the subject of a remedial action. Interested persons were given until February 17, 1981, to submit written comments on the proposal. FDA received more that 200 written comments. In addition, on February 2, 1981, FDA held a public hearing on the proposal, at which 30 persons testified. (The public hearing was originally scheduled for January 22, 1981, but was rescheduled by notice published in the **Federal Register** of January 9, 1981 (46 FR 2364).)

Most of the comments on the 1980 proposal criticized its reporting requirements as too broad in scope and claimed that the cost that the rule would impose on device manufacturers and distributors would outweigh any resulting benefits to the public health. However, other comments stated that, to monitor devices effectively, FDA must receive reports of at least death, or of death and serious injury.

Subsequently, by notice published in the **Federal Register** of November 24, 1981 (46 FR 57568), FDA placed the 1980 proposed rule in abeyance until further notice. FDA decided to place the proposal in abeyance for three reasons: (1) to permit a thorough review and evaluation of the comments received on the proposal; (2) to permit a review of the proposal in light of Executive Order 12291, which was issued February 17, 1981; and (3) to permit the initiation, completion, and analysis of an inspection program of complaint files maintained by manufacturers under the current good manufacturing practice (GMP) regulations for medical devices (21 CFR Part 820). This inspection program, which is ongoing, was designed to provide FDA with data to determine, among other things, whether FDA inspection of manufacturers' complaint files could substitute for some or all of the proposed reporting requirements.

FDA has carefully considered all the written comments received on the 1980 proposal, as well as the oral comments made at the February 2, 1981, public hearing, and believes that, at this time, the broad reporting requirements of that proposal are not appropriate. However, FDA has tentatively concluded that, at a minimum, the agency should require device manufacturers and device importers to report to FDA whenever the manufacturer or importer has information that reasonably suggests, or a person alleges and the manufacturer is aware of the allegation, that one of its marketed devices has caused or contributed to a death or serious injury or has malfunctioned in such a way that recurrence of the malfunction is likely to cause or contribute to a death or serious injury. Therefore, FDA is now publishing for public comment a revised proposal to require such reports.

FDA recognizes that the reporting obligation in this proposal is narrower than that in the 1980 proposal. The 1980 proposal would have required device manufacturers and distributors (including importers) to submit reports to FDA on devices that "may have caused" a death or injury or that "may have a deficiency that could result" in a death or injury. This reproposal would require a device manufacturer or device importer to report to FDA whenever the manufacturer or importer has information that "reasonably suggests, or a person alleges and the manufacturer or importer is aware of the allegation," that one of its marketed devices "has caused or contributed to" a death or serious injury or "has malfunctioned" and, if the malfunction recurs, "is likely to" cause or contribute to a death or serious injury. FDA has tentatively concluded that the 1980 requirements would be unnecessarily broad, and may have resulted in reports not useful to the agency. For these reasons, this reproposal does not require reporting unless information "reasonably suggests, or a person alleges and the manufacturer is aware of the allegation," that a device has caused or contributed to a death or serious injury or that a device has malfunctioned and a recurrence of the malfunction is likely to cause or contribute to a death or serious injury.

In developing this reproposal, FDA has incorporated many suggestions and recommendations made in comments on the 1980 proposal. Because this is a reproposal subject to further public comment, FDA is not at this time summarizing and responding in detail to all comments submitted on that proposal.

FDA is continuing the GMP complaint file review program as announced in the November 24, 1981, notice of abeyance. Phase I of the program involved review of the complaint files of 72 firms and was designed to test the inspection methodology and to ensure FDA's access to these files. Phase I was completed on December 31, 1981. Phase II of the inspection program began on July 14, 1982, and involves review of complaint files of 418 firms using the inspection methodology revised as a result of Phase I of the program. Collection of the data under Phase II should be completed in the near future. Once analyzed, the results of this program will provide FDA and the Department of Health and Human Services with data to determine whether further reporting requirements should be proposed.

Purpose of the Regulations

The purpose of this reproposal is to require a device manufacturer or a

device importer to report promptly to FDA whenever the manufacturer or importer has information that reasonably suggests, or a person alleges and the manufacturer or importer is aware of the allegation, that one of its marketed devices has caused or contributed to a death or serious injury or has malfunctioned, if recurrence of the malfunction is likely to cause or contribute to a death or serious injury. This reproposal would not require any investigation or evaluation of the information by the manufacturer or importer. However, under the complaint file provision of the current GMP regulations for devices (21 CFR 820.198), device manufacturers are required to investigate and maintain a record of all complaints involving the possible failure of a device to meet any of its performance specifications and all complaints pertaining to a device-related death, injury, or hazard to safety. As discussed more fully below ("Complaint Files"), this reproposal does not alter or amend either the general complaint file provision or its investigation requirement (see proposed § 803.1(b)).

Statutory Authority and Legislative History

Section 519 of the Federal Food, and Drug, and Cosmetic Act (the act) (21 U.S.C. 360i) authorizes the Secretary of Health and Human Services to require device manufacturers and importers to maintain records and to make reports that are reasonably necessary to assure that devices are not adulterated or misbranded and are otherwise safe and effective for human use.The legislative history of the Medical Device Amendments of 1976 (Pub. L. 94–295) reflects clear congressional intent to permit FDA to require under the authority of section 519 that device manufacturers, distributors, or both, report to FDA product defects and adverse reactions to their products. In discussing the notification provisions of section 518 of the act (21 U.S.C. 360h), the House Committee on Interstate and Foreign Commerce stated:

> The notification provision is similar to, and to some extent patterned after, comparable authority contained in the National Traffic and Motor Vehicle Safety Act of 1966, the Radiation Control for Health and Safety Act of 1968, and the Consumer Product Safety Act of 1972. These statutes also include requirements that manufacturers provide notification of defects in their products to appropriate Federal agencies. The Committee determined that a comparable provision in new section 518(a) with respect to devices would be unnecessary since the Secretary could require the reporting of such information under the recordkeeping and reporting authority provided in new section 519 of the Act.
>
> (H.R. Rep. No. 94–853, 94th Cong., 2d Sess. 21 (1976))

Elsewhere, the Committee report listed examples of reasonable reporting requirements, including reports of defects, adverse reactions, and patient injuries (id. at 23). That Congress intended FDA to use its authority under section 519 of the act to protect the public from potentially hazardous devices, as well as devices with confirmed hazards, is also clear from the legislative history (see id. at 24).

Section 519 of the act further requires, inter alia, that any reporting requirements established under the authority of that section (1) may not be unduly burdensome (considering the cost of compliance and the need for the requirement); (2) shall state the purpose of any required report or submission; (3) may not, except in certain circumstances, require the disclosure of a patient's identity; and (4) may not, except in limited circumstances, require the manufacturer, distributor, or importer of a class I device to submit periodic reports or to submit information not in its possession. The Committee report cautions, however, that these limitations "should not be construed * * * as limiting the Secretary's authority to obtain information needed to insure that the public is protected from potentially hazardous devices" (id. at 24).

Many comments on the 1980 proposal stated that it exceeded FDA's authority under section 519 of the act because FDA has not justified the need for the proposed rule, which, the comments claimed, the agency was required to do and because the proposed rule would have been unduly burdensome to device manufacturers and distributors.

FDA is reproposing a substantially revised rule for medical device reporting. Therefore, comments alleging that the 1980 proposal had not been shown to be necessary and would have been unduly burdensome are no longer directly relevant. For the following reasons, however, FDA believes that the proposal is necessary and would not be unduly burdensome.

The purpose of this reproposal is to assure that FDA is informed promptly of all serious problems or potentially serious problems associated with devices. FDA is the principal public health agency responsible for monitoring the safety and effectiveness of devices. To carry out its responsibilities, the agency needs to be informed of all device-related deaths and serious injuries and device malfunctions that are likely to cause or contribute to a death or serious injury. Only if FDA is provided with such information will it be able to evaluate the risk, if any, associated with a device and to take whatever steps are necessary to reduce the public's exposure to this risk. These steps could include simply contacting the manufacturer or importer of the device and monitoring its voluntary actions to respond to the problem, initiating a consumer or user education program, or initiating regulatory action such as recall, seizure, or other enforcement action. Moreover, the agency needs to receive this information promptly so that it can react rapidly to the particular device problem and, thereby, prevent or minimize, as much as possible, recurrence of the death or serious injury, or prevent the recurrence of a malfunction that is likely to cause or contribute to a death or serious injury.

FDA believes that compliance with a final rule based on this revised proposal would not be unduly burdensome for device manufacturers and importers. Most of the comments on the 1980 proposal claimed that it would be too costly, because firms would have been required to report minor injuries, device deficiencies, and remedial actions as well as deaths and serious injuries associated with a device. As discussed more fully below ("When a Report is Required"; "How to Report—Time Requirements"), this reproposal has narrowed significantly both the types of incidents that would be reported to FDA and the content of reports that would be submitted and extended the time within which reports are to be submitted. In addition, FDA has clarified in this reproposal that it would merely require the transmittal of information to FDA by device manufacturers and device importers and would not require any additional investigation or evaluation by them except in cases in which, under proposed § 803.24(e), FDA requested supplemental information. For these reasons, FDA believes that a final rule based on this reproposal would not be unduly burdensome.

Many comments claimed that a regulation requiring reports to FDA was unnecessary because FDA already receives reports of adverse device experiences through existing voluntary mechanisms such as the Device Experience Network (DEN) and the United States Pharmacopeia (USP) reporting system. Other comments claimed that the current GMP requirements are sufficient to assure that FDA is informed of serious device problems.

FDA disagrees with these comments. FDA does not believe that GMP complaint files are an adequate substitute for a reporting rule for device-related deaths and serious injuries. FDA needs to be quickly informed of problems of this severity and to be able to react rapidly to them. Current § 820.198 requires device manufacturers to review, evaluate, and investigate all complaints of death, injury, and hazard to safety and to maintain a record of the investigation in a file at the manufacturer's place of business. Section 826.198 does not, however, require any report or other information about a complaint to be transmitted to FDA. FDA becomes aware of a complaint only when the agency reviews the file as part of an inspection (GMP inspection) for compliance with the current GMP regulations. Generally, FDA conducts a GMP inspection at a firm only every other year and the agency does not expect that such inspections will be conducted any more frequently in the future. Thus, were the agency to rely on its inspection of GMP conplaint files for notification of device-related deaths or serious injuries, there could be as much as a 2-year period intervening between a device-related death and the time the agency becomes aware of it. During that intervening period, the agency would not be able to do anything to minimize the risk presented by the device, simply because it would be unaware of the risk. Thus, although maintenance of GMP complaint files is required by the current GMP regulations, such files cannot substitute for a reporting requirement like that of this reproposal. Moreover, as discussed below ("Complaint Files"), this reproposal would not amend, alter, or eliminate the complaint file provision of Part 820.

In addition, FDA does not believe that reporting under the current voluntary system is an adequate substitute for this reproposed rule. At present, FDA receives reports of adverse device experiences through the voluntary DEN system. DEN consists of reports made to the USP reporting system, complaints made to the Government Wide Quality Assurance Program (GWQAP), and the National Electronic Injury Surveillance System (NEISS). None of these reporting programs is a comprehensive one. Through the GWQAP program, FDA receives complaints only about those products purchased under contract by the Veterans Administration and the Department of Defense. Likewise, NEISS is of limited scope: only those device-related problems that are treated in the emergency rooms of participating hospitals are reported to NEISS, and subsequently, to FDA.

Based on its experience, FDA does not believe that all device-related deaths or serious injuries are reported to FDA under the voluntary USP system. From time to time, through such organizations as the American Association of Critical Care Nurses, the American College of Pathologists, and the American College of Physicians, the Office of Medical Devices (formerly the Bureau of Medical Devices) of FDA's National Center for Devices and Radiological Health has actively encouraged the reporting of adverse device experiences to FDA's DEN system by device users. During these periods, the number of device experience reports has significantly increased. Without such encouragement, FDA believes that many incidents go unreported. Unfortunately, FDA does not have the resources to maintain constant contact with all device users to encourage such reports.

In addition, under the existing voluntary system, those with the greatest knowledge and expertise concerning a device usually do not report. Almost all the comments on the 1980 proposal agreed that device manufacturers are the most knowledgeable about their products and the risks associated with them and, thus, are in the best position to report device problems to FDA. Yet, few device manufacturers report under the DEN system. Of those complaints submitted to DEN by manufacturers, many are trade complaints (that is, a complaint about a competitor's product), not reports from the manufacturer of the device in question. Also, in some cases, manufacturers report a device problem to FDA only after a product recall or other remedial action is completed. For these reasons, FDA believes that the existing voluntary mechanisms are inadequate and that the reproposed rule is necessary.

Provisions of the Regulations

Who Shall Report

This revised proposal would require device manufacturers and device importers to report to FDA whenever the manufacturer or importer has information that reasonably suggests, or a person alleges that the manufacturer or importer is aware of the allegation, that one of its marketed devices has caused or contributed to a death or serious injury or has malfunctioned, if recurrence of the malfunction is likely to cause or contribute to a death or serious injury. (The information that triggers a report is discussed more fully below.) "Manufacturer" is defined in proposed § 803.3(c) as any person who is required to register under Part 807, other than an initial distributor of a device imported into the United States. "Importer" is defined in proposed § 803.3(b) as any person who initially imports a device into the United States and is required to register under Part 807. Although manufacturers and importers would be subject to identical reporting requirements (see proposed § 803.24), each has been separately defined to clarify that both would be required to report.

This revised proposal differs from the 1980 proposal in two significant ways with regard to who is required to report. Under the original proposal, all device manufacturers, including manufacturers of general purpose articles, and all device distributors would have been required to report. (In limited cases, distributors would have been permitted to report to the manufacturer instead of FDA.) Under this revised proposal, only device manufacturers required to register under Part 807 and device importers are required to report.

Many comments on the 1980 proposal recommended that all device distributors be exempt from reporting, primarily because manufacturers are more knowledgeable about their devices and are better equipped to evaluate potential device problems and hazards. Other comments stated that FDA would receive unnecessary multiple reports of the same incident if both manufacturers and distributors were required to report. Some comments also stated that including general purpose article manufacturers was excessive and inconsistent, inasmuch as 21 CFR 807.65(c) exempts these firms from the requirement to register as device manufacturers. General purpose articles include items such as laboratory glassware and chemical reagents. A general purpose article can be a device when used in the diagnosis or treatment of disease or other conditions; however, a general purpose article can also be used for a nondevice purpose, such as in a school or an industrial laboratory.

FDA has carefully considered the comments recommending that all distributors be exempt from reporting and has tentatively concluded, with one exception regarding importers outlined below, that this suggestion has merit. FDA agrees that, generally, manufacturers are the most knowledgeable about their devices and the evaluation of any hazards or problems associated with their devices and that, in all likelihood, manufacturers will be informed by device users and distributors of actual and potential

deaths and serious injuries associated with their devices. Where the manufacturer of a given device is subject to the reporting requirements of the proposed rule, imposing comparable requirements on distributors of such a device would not result in any significant incremental benefit to the public health. Therefore, under this revised proposal, only device manufacturers and device importers would be required to report. FDA is retaining in this reproposal the requirement of the 1980 proposal that device importers (defined in proposed § 803.3(b)) report for two reasons: (1) information concerning deaths or serious injuries and requests for correction involving an imported device will most likely be sent to the importer (as the first link in the chain of domestic distribution of a device), not to the foreign manufacturer; and (2) FDA has no authority to require foreign manufacturers to report device incidents to the agency.

FDA has also considered the recommendation that general purpose article manufacturers be exempt from reporting and has tentatively concluded that it has merit. Thus, under this revised proposal, by virtue of the definition of manufacturer (proposed § 803.3(c)), general purpose article manufacturers would be exempt. FDA agrees that it is inconsistent to require such firms to report but not to register. In addition, general purpose products are used for many purposes that are not regulated by FDA. Therefore, the duty to report an incident involving a general purpose article would depend upon its particular use at the time of the incident. Because of its variable nature, FDA believes that such reporting would be of limited value.

Many comments stated that FDA should exempt manufacturers of devices classified under section 513 of the act (21 U.S.C. 360c) into class I (general controls) or class II (performance standards) because such devices inherently have lower risks.

In developing this reproposal, the agency considered exempting class I, or class I and class II, device manufacturers, but rejected such a limitation. FDA agrees with the comments that, generally, the lower the level of classification, the lower the risk and the less likelihood that death or serious injury would be associated with a device. This means, however, that even without an exemption, manufacturers and importers would receive, and subsequently report to FDA, fewer reports about deaths or serious injuries associated with class I devices than they would for class II or class III (premarket approval) devices. Thus, the lower risk devices will in all likelihood require fewer reports. Yet if a device has caused or contributed to a death or serious injury or has malfunctioned and recurrence of the malfunction is likely to cause or contribute to a death or serious injury, its level of classification is irrelevant. Regardless of the nature of the device or its classification, FDA must be notified of all cases in which a device has caused or contributed to a death or serious injury or has malfunctioned and recurrence of the malfunction is likely to cause or contribute to a death or serious injury, so that the agency can respond to the problem. The recently discovered association between the use of tampons (a class II device) and toxic shock syndrome (TSS), a rare, but serious and sometimes fatal disease, demonstrates that a class II device can be associated with a significant risk of death or serious injury. If other risks are presented by class I devices, or other class II devices, FDA needs to be able to learn of them and respond to the situation. Therefore, manufacturers of all devices, regardless of class, should be, and would be, subject to the reporting requirements of this reproposal.

Several comments argued that, under section 519 of the act, FDA is prohibited from requiring manufacturers and importers of class I devices to make reports to the agency, and, thus, that class I device manufacturers must be exempted from any reporting rule.

FDA disagrees with these comments. Section 519 of the act does not entirely exempt class I device manufacturers and importers from reporting requirements; section 519(a)(5) simply imposes some restrictions on requirements for such manufacturers and importers. FDA is prohibited from requiring from a manufacturer or importer of a class I device reports on a periodic basis and reports of information not in the possession of the manufacturer or importer. This revised proposal is consistent with the restrictions of section 519 of the act in that the reports that it would require are not periodic reports and the information that would be required to be submitted is that which has been received by or is in the possession of the manufacturer or importer.

Although most comments on the 1980 proposal recommended that the scope of the regulations be significantly narrowed with respect to the persons required to report, a few comments suggested that the proposal be expanded to require health care providers, such as physicians and other health professionals, hospitals, and clinics to report adverse device experiences to FDA.

FDA continues to encourage health professionals, hospitals, and clinics to report adverse device experiences to voluntary mechanisms such as the USP reporting system. However, FDA has not proposed to adopt this suggestion in this revised proposal for two reasons. First, under section 519 of the act, FDA has authority to require reports only from device manufacturers, importers, and distributors. Few, if any, health professionals, hospitals, or clinics function as device manufacturers, importers, or distributors and thus, FDA does not have the authority to require all such persons or institutions to report. However, as discussed below ("Exemptions from Reporting"), where the activities of a physician or other health professional extend beyond ordinary professional practice and into commercial activity, such physician or other health professional would be required to report. Second, FDA believes that health professionals and health care providers generally notify the manufacturer whenever they have information that reasonably suggests that a device has caused or contributed to a death or serious injury or has malfunctioned if recurrence of the malfunction is likely to cause or contribute to a death or serious injury. Under both the 1980 proposal and this revised proposal, a manufacturer would be required to submit such information to the agency. As is the case with distributors, were health care providers also subject to the reproposal, FDA would receive unnecessary duplicative reports. Thus, FDA has not proposed to require hospitals, clinics, or health professionals to report device-related deaths and serious injuries and device malfunctions to the agency. However, FDA intends to urge health professionals and other health care providers to report promptly all device-related deaths and serious injuries and device malfunctions to the manufacturer (or, with imported devices, to the importer), so that such information would then be transmitted to FDA.

When a Report Is Required

Under this revised proposal, two events would trigger the reporting obligation of a manufacturer or importer. First, proposed § 803.24(a) would require a device manufacturer or a device importer to report to FDA whenever it has information that reasonably suggests, or a person alleges and the

manufacturer or importer is aware of the allegation, that one of its marketed devices has caused or contributed to a death or serious injury. "Serious injury" is defined in proposed § 803.3(e) as an injury that (1) is life threatening, (2) necessitates immediate medical or surgical intervention, (3) results in permanent impairment of a body function or permanent damage to body structure, or (4) results in unanticipated temporary impairment of a body function or unanticipated temporary damage to body structure. Second, proposed § 803.24(a) would require a report to FDA whenever a device manufacturer or a device importer has information that reasonably suggests, or a person alleges and the manufacturer or importer is aware of the allegation, that one of its devices has malfunctioned, and the malfunction, if it recurs, is likely to cause or contribute to a death or serious injury. Under this second provision, a device malfunction occurs whenever it fails to perform its intended function. A malfunction can occur during the operation of the device (e.g., the filter of a kidney dialysis machine clogs during dialysis) or when the device is not in actual use (e.g., a bracket suspending an x-ray head above the table breaks when the machine is not in use). Thus, under this second provision, a device manufacturer or a device importer would be required to report to FDA whenever the manufacturer or importer has information that reasonably suggests, or a person alleges and the manufacturer or importer is aware of the allegation, that one of its marketed devices has malfunctioned if a recurrence of the malfunction is likely to cause or contribute to a death or serious injury, even though there has been no actual death or serious injury.

FDA has carefully considered whether to require a report if, after an investigation or other evaluation, the manufacturer or importer concludes that its device did not cause or contribute to a death or serious injury, did not malfunction, or, if it did malfunction, that a similar malfunction in the future would not cause or contribute to a death or serious injury. The agency believes that such determinations should not excuse persons from submitting reports otherwise required by the regulations. However, as discussed more fully below ("What to Report"), under proposed § 803.24(c)(6), a manufacturer or importer would be permitted to include the results of any such investigation or evaluation in the report to FDA required under proposed § 803.24(a).

FDA believes that it is necessary that the agency receive this information to permit it to make an independent evaluation of the incident and, as discussed more fully later in this section, to assess whether in other circumstances the device could have caused or contributed to a death or serious injury.

FDA received voluminous comments on the 1980 proposal concerning when a report should be required. These comments may be broken down into two categories: (1) those commenting on the nature of the event that results in the information requiring a report (e.g., "injury"); and (2) the degree of association between the device and the incident (e.g., "may have caused").

With respect to the nature of reportable events, a number of comments from manufacturers recommended that only device-related deaths or device-related deaths and serious (or significant) injuries be reported to FDA. Other comments stated that FDA should not require the reporting of anticipated occurrences, pain of short duration, and other minor injuries or reactions.

Section 803.24(a) of this reproposal is now proposing to require the reporting only of device-related deaths and serious injuries and of device malfunctions that are likely to cause or contribute to a death or serious injury. This action is being taken so that the agency can be quickly informed of those most serious health problems which require prompt action. Accordingly, the proposed definition of serious injury does not include minor injuries, temporary impairment of body function or body structure unless unanticipated, and injuries not requiring immediate medical or surgical intervention. Unanticipated temporary injuries such as electrical shocks, severe lacerations, or broken bones are temporary injuries that are not generally accepted as part of the risk of using a device and are avoidable. For this reason, unanticipated temporary impairment of a body function or unanticipated temporary damage to body structure are included in the definition of "serious injury" (proposed § 803.3(e)) and where a device causes or contributes to such an impairment or such damage, or malfunctions such that a recurrence of the malfunction is likely to cause or contribute to such an impairment or such damage, a report would be required under this proposal. FDA will reassess the need to require reporting of anticipated occurrences, pain of short duration, and other minor injuries or reactions after analyzing the data collected in Phase II of its GMP complaint file inspection program. At that time, the agency will determine whether additional reporting requirements are necessary.

Many comments objected to reporting "device deficiencies," claiming that such reporting would encompass all device problems, however minor, including all field service calls and other requests for minor adjustment. Several comments stated that, with such a requirement, FDA would be buried in reports and would be unable to isolate and evaluate significant problems. The 1980 proposal defined "device deficiency" as "the failure of a device (1) to perform its intended function or to meet its specifications in a way that could adversely affect its safety or effectiveness, which failure may be the result of inadequate or erroneous design, manufacture, labeling, storage, transport, relabeling, repackaging, or other cause; or (2) to meet an applicable performance standard."

At this time, until the agency completes and analyzes the results of its GMP complaint file inspection program, FDA is not proposing a requirement for reporting device deficiencies where the criteria for reporting are not otherwise met. If, based upon review and evaluation of that analysis, FDA concludes that reports of device deficiencies are necessary to protect the public health, the agency will propose such requirements.

Many comments objected to reporting "remedial actions." These comments generally claimed that such a provision would require reports of all routine or scheduled maintenance and minor labeling changes.

Although FDA does not fully agree with these comments' broad interpretation of "remedial action," the agency is not reproposing that portion of the 1980 proposal requiring reports of all remedial actions. Under the 1980 proposal, a remedial action was defined as any recall, repair, modification, adjustment, relabeling, destruction, inspection (including patient monitoring), or any other action initiated by a manufacturer to correct any suspected or confirmed device deficiency. Manufacturers would have been required to report to FDA concerning any device which was the subject of a remedial action. Under the reproposal, a remedial action is defined as any recall, repair, modification, adjustment, relabeling, destruction, inspection (including patient monitoring), notification, or any other action that is initiated by a manufacturer or importer in response to

information concerning a potential or actual death or serious injury. Such a remedial action would not be, in and of itself, a reportable event. Instead, as discussed more fully below ("What To Report"), under proposed § 803.24(e), FDA may require the submission of information concerning a remedial action that results from a device-related death, serious injury, or malfunction, and that is reported to the agency under proposed § 803.24. Once FDA has completed and analyzed the results of the GMP complaint file review program, the agency will reevaluate the need for the reporting of all remedial actions. If FDA concludes that such reporting is necessary, it will propose appropriate reporting requirements for remedial actions.

With regard to the degree of association between a device and a death or serious injury, many comments recommended that FDA require the reporting only of deaths and injuries that the manufacturer or importer confirms to be device-related.

FDA disagrees with this approach for two reasons. First, where a device is alleged to have caused or contributed to a death or serious injury, FDA, as the public health agency responsible for protecting the public from unsafe devices, should make an independent evaluation of the device's role, if any, in the death or serious injury. Because reasonable persons can differ as to whether a device has caused or contributed to a death or serious injury, where there is such a difference of opinion, FDA should review and evaluate the role of the device. Requiring reports of death or serious injury, whether or not confirmed to be device related, is consistent with both the existing requirements and recently proposed revisions for reporting adverse reactions associated with new drugs (47 FR 46622; October 19, 1982).

Second, there are cases in which a device malfunctions and the nature or severity of the malfunction is such that, although it did not actually cause or contribute to a death or serious injury, a recurrence of the malfunction would be likely to cause or contribute to a death or serious injury. For example, an incubator theremostat malfunctions in such a way that it could cause or contribute to a death or serious injury of a premature baby; however, at the time of the malfunction, the incubator is not in use and, thus, the malfunction does not cause or contribute to an actual death or serious injury. Under a system of reporting only confirmed device-related deaths and serious injuries, this type of incident would not be reported simply because there would have been no death or serious injury determined to have been caused by a device.

Where a device has malfunctioned and a recurrence of the malfunction is likely to cause or contribute to a death or serious injury, FDA does not believe that it should wait until a death or serious injury has occurred before the agency is notified of the device problem. If FDA is to be able to prevent recurrence of such malfunctions and possible deaths or serious injuries from them, or is to be able otherwise to minimize the public health risks from such malfunctions, the agency needs to receive this information.

What To Report

The revised proposal retains, with some modification, the two-tiered reporting system of the 1980 proposal. Under this revised proposal, a manufacturer or importer would initially submit to FDA a brief report of certain essential information. The purpose of this initial report is to alert the agency to a device-related death or serious injury or a device malfunction that, if it recurs, is likely to cause or contribute to a death or serious injury. The manufacturer or importer would not need to undertake an extensive review and evaluation of the incident before submitting the initial report. Should FDA need additional information to evaluate the risk presented by the reported device problem, under proposed § 803.24(e), the agency could require that the manufacturer or importer supplement its initial report.

FDA proposes to adopt this two-tiered system for two reasons. First, it would not be unduly burdensome for manufacturers and importers because the initial report (the content of which is discussed more fully below) is brief, is very simple, and does not require the manufacturer or importer to investigate and assemble extensive data or information. Second, because the initial report is brief, it could be made to FDA more quickly than a more detailed report and, thus, the agency's evaluation of and response to the device problem would occur that much more quickly. By providing FDA with the option to require supplementary information, the proposed system would assure that, despite the brevity of the initial report, FDA would have access to all information necessary to evaluate and respond to a given device problem.

Under proposed § 803.24(c), the initial report would be required to (1) identify the device; (2) identify the manufacturer or, in the case of an imported device, identify the importer and the foreign manufacturer; (3) identify, by name, address, and telephone number, the individual making the report to FDA; (4) describe, to the extent known, the event giving rise to the information, including whether a death or serious injury has occurred; (5) identify, by name and address, the individual who submitted the information to the manufacturer or importer; and (6) state whether the manufacturer or importer intends to submit additional information, and, if so, when such information will be submitted.

Section 803.24(d) of this revised proposal retains the requirement of the 1980 proposal that a device manufacturer or a device importer report to FDA each time it becomes aware of information described in § 803.24(a) of this revised proposal even if an event of the same or a similar nature has been reported previously to the agency. The purpose of this provision is to assure that FDA is fully informed of the scope of any given device problem, including the number of individuals exposed to the actual or potential risk. However, in contrast to the 1980 proposal, this revised proposal explicitly provides that FDA may notify a manufacturer or importer that a report of a particular type of event is no longer required (e.g., the injury reported becomes recognized by FDA as an inherent risk of using the device in which event it would become part of the product labeling). Proposed § 803.24(d) also provides that, where a manufacturer or importer is informed of the same device-related problem involving the same patient or user by more than one source (e.g., by both the physician and the device's distributor), only one report concerning that patient and event would be required.

Section 803.24(e) of this reproposal provides that, if necessary to evaluate the risk presented by a reported device-related death or serious injury or device malfunction, FDA could require the manufacturer or importer to supplement its initial report. The supplementary items that could be required include, for example, (1) further identification of the device, such as model or catalog number, lot or serial number; (2) a complete description of the event giving rise to the information; (3) any evaluation of the risk of death or serious injury (including failure analysis); (4) any available evaluation by a medical practitioner of the event described in the initial report; (5) any evaluation by the manufacturer or importer as to whether the reported event is attributable to the device; (6) information concerning any remedial action; (7) information concerning manufacture of the device,

such as the total number manufactured, location and date of manufacture, and the device's expiration date; and (8) information concerning distribution of the device. FDA contemplates that, when the agency requires under proposed § 803.24(e) that a manufacturer or importer supplement its initial report, the agency would specify a period of time in which the additional information would be submitted. The time permitted for submission of supplemental information would be determined on a case-by-case basis and would depend upon such factors as the degree of risk from the reported device problem, the extent of the information requested, and the ease or difficulty with which the manufacturer or importer could obtain the information.

A report required under this revised proposal is simpler and briefer than the report that would have been required under the 1980 proposal. Several items that would have been required in an initial report under the 1980 proposal (e.g., the model, catalog, or lot number and the manufacturing location) are now items that may be required by FDA under § 803.24(e) of this reproposal, but that would not be required as part of the initial report. As stated above, in developing this revised proposal FDA has attempted to simplify as much as possible the initial report required of manufacturers and importers.

Several comments suggested that a manufacturer or importer that wishes to have its own evaluation of a device problem or other information included in FDA's file on an event be allowed to supplement a required report in this manner.

FDA believes that this suggestion has merit and, thus, has provided in § 803.24(c)(6) of this reproposal for such voluntary submissions, provided the manufacturer or importer notifies FDA in its initial report that it intends to submit additional information and when it expects to do so.

How To Report—Time Requirements

Section 803.24(b) of this reproposal provides that a manufacturer or importer would report to FDA information that reasonably suggests, or information concerning an allegation by a person, that one of its devices has caused or contributed to a death or serious injury or has malfunctioned and a recurrence of the malfunction is likely to cause or contribute to a death or serious injury. The manufacturer or importer would be required to report this information as soon as the essential information has been obtained, but in any case within 15 working days of initial receipt of the information. In the case of information that reasonably suggests the existence of a device-related death or serious injury or a device malfunction whose recurrence is likely to cause a death or serious injury, the obligation to report within 15 working days begins on the date the manufacturer or importer initially receives or otherwise becomes aware of such information. The report may be made either in writing or by telephone. Telephone reports would be required to be confirmed in writing within 15 working days, so that both the reporter and FDA would have an identical written record of the manufacturer's or importer's report. FDA intends this requirement to mean that the agency should receive the information within the 15-working-day period following the time that the manufacturer or importer initially becomes aware of the information. Thus, manufacturers and importers should consider this requirement in choosing a method of transmitting information to FDA.

The time periods for reporting under the revised proposal represent a significant modification of the 1980 proposal's requirements. As originally proposed, reports of device-related deaths would have been reported by telephone within 72 hours of receipt of the pertinent information, followed by a written report within 7 working days. Injuries and device deficiencies would have been reported in writing within 7 working days. The 1980 proposal also provided that those required to report could request an extension of time to do so. FDA still encourages manufacturers and importers to report device-related deaths and serious injuries as soon as possible.

This revised proposal has eliminated the 1980 proposal for a telephone report for device-related deaths and has extended the time for reporting to 15 working days. (As noted above, a manufacturer or importer may submit a telephone report of death or serious injury provided the report is confirmed in writing within the 15-day period.) With these changes and the streamlined content of the record (discussed above in "What to Report"), the agency believes that manufacturers or importers would have ample time to assemble, process, and transmit the report required by proposed § 803.24.

Numerous comments criticized the 1980 proposal's time requirements. Most of these comments claimed that both the 72-hour and 7-working-day provisions would not allow those reporting sufficient time to investigate the device problem and to gather the necessary information for a report. A number of comments suggested that the agency provide for reporting within 15 working days because it would be consistent with the current rule requiring reports of adverse reactions to new drugs (21 CFR 310.301); others suggested a 30-day provision consistent with a proposed amendment to § 310.301 (44 FR 19434; April 3, 1979).

FDA is proposing a 15-working-day requirement for three reasons. First, the agency believes that this time period reflects an appropriate balance between the manufacturer's or importer's need to gather necessary information and FDA's need to receive promptly reports of device-related deaths and serious injuries, so that the agency can investigate and evaluate the risk and undertake any necessary action to protect the public health.

Second, FDA believes that this 15-working-day period would provide a manufacturer or importer with sufficient time to gather and review necessary information. A manufacturer or importer would obtain most, if not all, of the items required to be reported to FDA under revised § 803.24(c) at the time it receives information described in § 803.24(a) of this reproposal. As stated earlier, this reproposal would not require a manufacturer or importer to investigate an allegation of a device-related death or serious injury or of a device malfunction before making a report to FDA under proposed § 803.24; this reproposal merely requires the prompt transmittal to FDA of such information received by the manufacturer or importer.

Third, in this reproposal the proposed time periods for reporting are similar to other agency rules for adverse product reports, in particular, approved new drugs for human use. The agency's regulations requiring reporting of adverse reactions to such new drugs (§ 310.301) now require reports under those regulations to be made within 15 working days. Although in 1979 FDA proposed a 30-day reporting requirement for adverse reactions to approve new drugs, the agency thereafter tentatively concluded that fatal or life-threatening reactions to such drugs should be required to be reported to FDA within 15 working days, and all other adverse drug experiences within 30 days (47 FR 46547, 46622; October 19, 1982). The 15-working-day period for reporting device-related deaths and serious injuries and device malfunctions that are likely to cause or contribute to a death or serious injury in this reproposal is thus consistent with the newly proposed reporting requirements for fatal or life-threatening reactions to approved new drugs. For those device manufacturers

and importers that also manufacture or import products regulated as approved new drugs for human use, the 15-working-day requirement has the additional advantage that, whatever the product, an adverse reaction report for death and serious injuries would be required to be made to FDA within the same period of time.

Complaint Files

The complaint file requirement of this reproposal does not differ significantly from that of the 1980 proposal. Under § 803.31 of this reproposal, an importer would be required to establish a complaint file and maintain a record of any information, including any written or oral communication received by the importer, concerning a device-related death or serious injury, or a device malfunction that, if it recurs, is likely to cause or contribute to a death or serious injury. The importer also would be required to maintain in the file a copy of the information submitted to FDA under § 803.24 of this reproposal. FDA also proposes in § 803.31(b) of this reproposal to require that the importer retain complaint file records for 2 years from the date of submission of the report required under proposed § 803.24. Such records would be required to be retained even if the importer has ceased distribution of the particular device. Under § 803.31(c) of this reproposal, the importer would be required to maintain the complaint file at its principal place of business and would be obligated to permit any authorized FDA employee to have access to and to copy and verify the records contained in this file.

Neither the 1980 proposal nor this revised proposal would require a device manufacturer to establish and maintain a complaint file because existing § 820.198 already requires a manufacturer to do so. In addition, § 820.198 requires a manufacturer to review, evaluate, and investigate all complaints of death, injury, or a hazard to safety concerning a device that it manufactures. Thus, FDA intends that a manufacturer's existing GMP complaint file could also serve as its medical device reports file.

Some comments argued that GMP complaint files are an adequate substitute for a reporting rule for device-related deaths and serious injuries. In developing this reproposal, FDA considered whether the agency should concurrently modify or eliminate the complaint file requirement of § 820.198 in view of the fact that, under this reproposal, complaints of death or serious injury or complaints of device malfunctions that are likely to cause or contribute to a death or serious injury would be transmitted to FDA, thereby possibly eliminating the need to have a manufacturer maintain a file of such complaints. However, the agency has concluded that there should be no amendment of existing § 820.198 at this time. Both the retention and investigation provisions of § 820.198 are broader than the current proposal, so that not all complaints that currently are required to be maintained in the GMP complaint file would be required to be sent to FDA under this reproposed rule. Also, the GMP complaint file has an independent purpose that could not be performed by these proposed medical device reporting regulations. Specifically, as an integral part of a GMP inspection of a device firm, the FDA investigator reviews and considers the contents of the firm's complaint file maintained under § 820.198; the information gathered in that review may determine, in part, how the investigator conducts the inspection. In addition, a device firm should review the contents of its complaint file as part of its quality assurance (QA) audit, which FDA recommends be done at least annually. For these reasons, the agency has concluded that, at this time, the existing complaint file requirement of § 820.198 should be maintained without change. The agency is also continuing this requirement to determine whether additional reporting requirements may be necessary in the future.

Exemptions From Reporting

Section 803.36 of this reproposal sets out exemptions from the reporting requirements. Two types of exemptions are provided: exemptions for manufacturers or importers that report to FDA under other FDA reporting regulations and statutory exemptions.

Specifically, FDA is proposing to exempt a device manufacturer or importer from the requirements of § 803.24 of this reproposal if the manufacturer or importer complies with reporting requirements for investigational devices (21 CFR 812.150 or 813.153), biologic products (21 CFR 600.14, 606.170, or 640.73), or radiation-emitting products (21 CFR 1002.20 or Part 1003). FDA is proposing these exemptions to avoid requiring duplicate reports to the agency concerning the same adverse product experience. However, a manufacturer or importer would be exempt from this reproposed rule only if a report actually is made to the agency under one of the specified regulations. For example, where a manufacturer of electronic products has information alleging that one of its devices has caused a serious injury by accidentally emitting radiation, concludes that there is a reasonable basis for the allegation, and accordingly reports the incident to FDA under § 1002.20, the manufacturer would be exempt from reporting under this reproposal. However, if, in the same circumstances, the manufacturer concludes that there are no reasonable grounds for the allegation and, thus, does not report under § 1002.20, the manufacturer would be required to report under this reproposal.

At this time, FDA is not proposing to exempt a manufacturer or importer that reports to FDA, as a condition of approval of a premarket approval application for a class III device (i.e., a device subject to premarket approval), information concerning a device-related death or serious injury or device malfunction. In the **Federal Register** of December 12, 1980 (45 FR 81769), FDA proposed procedural regulations for the premarket approval of medical devices (the PMA regulations). One possible requirement of the PMA regulations is postapproval reporting of adverse device experiences, such as deaths or serious injuries. Until the PMA regulation is published in final form and their specific requirements established, FDA is not including in proposed Part 803 an exemption for manufacturers and importers of approved class III devices. If the final PMA regulations include specific requirements on postapproval reporting of adverse device experiences, it might be appropriate to exempt reports under those requirements in the final rule on medical device reporting.

Two types of individuals are exempt by statute from the reporting requirements of section 519 of the act and thus such individuals would not be required to report under the revised proposal. Section 803.36(b) of this reproposal codifies the exemption in section 519(b)(1) of the act for a licensed practitioner who manufactures or imports a device solely for use in his or her professional practice. The legislative history is clear that a licensed practitioner whose activities extend beyond the ordinary practice of his or her profession and into commercial activity is not entitled to this exemption and FDA intends that such practitioners would be required to report. (See H.R. Rep. No. 94–853, 94th Cong., 2d Sess. 24 (1976).) Similarly, § 803.36(c) of this reproposal codifies the exemption in section 519(b)(2) of the act for a person who manufactures or imports a device solely for his or her own use in research or teaching and not for sale, including any person who uses a device under an exemption granted under section 520(g) of the act (21 U.S.C. 360j(g)).

Public Availability of Reports Made Under Part 803

Many comments on the 1980 proposal objected to its reporting requirements because information reported to FDA would be available to the public under the Freedom of Information Act (the FOLA) (5 U.S.C. 552) and FDA's public information regulations (21 CFR Part 20. Many comments claimed that the release of medical device reports required under the 1980 proposal would result in increased and spurious product liability litigation against device manufacturers, importers, and distributors, ultimately resulting in increased costs to the public for devices. Some comments stated that these alleged increased costs must be considered by FDA in promulgating a final rule. Several comments suggested that, because of the potential impact on product liability litigation, FDA should not publicly disclose reports that would be required under the 1980 proposal.

The agency disagrees with these comments for several reasons. FDA is not authorized to withhold from public disclosure reports filed under this reproposal. The public availability of agency records is governed by statute, principally the FOIA. Thus, FDA does not have the discretion to withhold medical device reports received by the agency under this reproposal.

Furthermore, FDA believes that even if there is a potential for abuse of medical device reports in product liability litigation, as well as speculative costs associated with such abuse, the agency cannot responsibly put its statutory obligations to learn of device-related deaths and serious injuries and device malfunctions, and to take appropriate action to protect the public health.

For these reasons, FDA is retaining the provisions of the 1980 proposal that the public availability of manufacturer and importer reports made to FDA be governed by FDA's public information regulations (212 CFR Part 20).

Medical device reports that would be required by this reproposal are similar to those received under existing agency rules for adverse reactions to new drugs (21 CFR Part 310). The reports received under Part 310 generally are publicly available. The agency would, however, delete from any report received under this proposed rule and made publicly available name and other personal identifying information and identifying information of any health institution before making the report available to the public. The agency also would delete from the reports any trade secret or confidential commercial information.

Failure To Report

Seizure, injunction, and criminal prosecution are available to assure compliance with the reproposed rule. Where, with respect to a given device, a manufacturer or importer fails or refuses to submit any material or information that is required by section 519 of the act, that device is misbranded under section 502(t) of the act (21 U.S.C. 352(t)); misbranded devices are subject to seizure and condemnation under section 304 of the act (21 U.S.C. 334). Section 301(k) of the act (21 U.S.C. 331(k)) prohibits the doing of any act to a device after its interstate shipment which results in the device being misbranded. Violations of section 301(k) of the act may be enjoined under section 302 of the act (21 U.S.C. 332), and individuals responsible for such violations are subject to prosecution under section 303 of the act (21 U.S.C. 333). Under section 301(q)(1) of the act, a failure or refusal to report as required by or under section 519 is a violation of the act, as is, under section 301(q)(2) of the act, submission of a materially false or misleading report regarding a device. Like violations of section 301(k) of the act, violations of section 301(q) (1) and (2) may be enjoined under section 302 and individuals repsonsible for the violations may be prosecuted under section 303.

Economic Assessment

As required by Executive Order 12291 and the Regulatory Flexibility Act (Pub. L. 96–354; 5 U.S.C. 601), FDA has carefully examined the economic effects of this reproposed rule on all affected business, including small businesses. FDA estimates that the total annual cost to the entire device industry of the reproposal would be between $1.7 million and $3.5 million. This estimate was derived from data submitted by device manufacturers in comments on the 1980 proposal. This estimate may be higher than the actual cost of the reproposed rule because the costs used to calculate the estimate may include expenses that the agency believes are not attributable to the proposal. FDA believes that the only cost that this reproposed rule would impose on manufacturers is that of preparing and submitting a report. For manufacturers, the cost of reviewing, evaluating, and investigating pertinent information is not attributable to this reproposal, inasmuch as the complaint file requirement of the current GMP regulations (21 CFR 820.198) requires a device manufacturer to undertake such review, evaluation, and investigation. Importers would incur some additional costs under a final rule based on this reproposal in complying with the requirement to establish and maintain a complaint file. Manufacturers and importers may also experience additional costs, in some situations, due to the requirement under § 803.24(e) of this reproposal to submit supplemental information that might require additional review and evaluation of pertinent information. However, in many cases, the agency would conduct its own investigation or would request that the device's foreign manufacturer, not its importer, conduct any necessary investigation and thus, these additional costs to importers would in most cases be limited.

Although several comments on the 1980 proposal claimed that it would increase product liability insurance expenses, no comments provided any specific data on this alleged increase. Furthermore, FDA does not believe that such costs, even if they would result, would be direct costs of the proposal and, thus, need not be addressed by the agency.

FDA has concluded that, if adopted, this reproposal would not be a major rule under any of the criteria of executive Order 12291. Further, FDA certifies that, if adopted, the proposed rule would not have a significant economic impact on a substantial number of small entities. The threshold assessment supporting these conclusions is on file for public review in the Dockets Management Branch (address above) under Docket No. 79N–0182.

Environmental Impact

The agency has determined pursuant to 21 CFR 25.24(b)(12) (proposed December 11, 1979, 44 FR 71742) that this reproposal is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Paperwork Reduction Act of 1980

This reproposed rule contains information collection requirements. As required by section 3504(h) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3504(h)), FDA has submitted a copy of this proposed rule to the Office of Management and Budget (OMB) for its review of these information collection requirements. Other organizations and individuals desiring to submit comments on the information collection requirements should direct them to FDA's Dockets Management

Branch (address above) and to the Office of Information and Regulatory Affairs, OMB, New Executive Office Bldg. (Rm. 3208), Washington, DC 20503, ATTN: Richard Eisenger.

List of Subjects in 21 CFR Part 803

Medical devices; Medical device manufacturers; Medical device importers; Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 502(t), 510, 519, 701(a), 704(a) and (e), 52 Stat. 1055, 76 Stat. 792–795 as amended, 90 Stat. 564–565, 578, 581 (21 U.S.C. 352(t), 360, 360i, 371(a), 374(a) and (e))) and under 21 CFR 5.11 as revised (see 47 FR 16010; April 14, 1982), it is proposed that Chapter I of Title 21 of the Code of Federal Regulations be amended by adding new Part 803, to read as follows:

PART 803—MEDICAL DEVICE REPORTING

Subpart A—General Provisions

Sec.
803.1 Scope.
803.3 Definitions.

Subpart B—Reports and Records

803.24 Reports by manufacturers and importers.
803.31 Complaint files.
803.33 Where to submit a report.
803.36 Exemptions from reporting.

Authority: Secs. 502(t), 510, 519, 701(a), 704 (a) and (e), 52 Stat. 1055, 76 Stat. 792–795 as amended, 90 Stat. 564–565, 578, 581 (21 U.S.C. 352(t), 360, 360i, 371(a), 374 (a) and (e)).

Subpart A—General Provisions

§ 803.1 Scope.

(a) FDA is requiring a device manufacturer or a device importer to report to FDA whenever the manufacturer or importer has information that reasonably suggests, or a person alleges and the manufacturer or importer is aware of the allegation, that one of its marketed devices has caused or contributed to a death or serious injury or has malfunctioned, if a recurrence of the malfunction is likely to cause or contribute to a death or serious injury. These reports will enable FDA to protect the public health by ensuring that devices are not adulterated or misbranded and are otherwise safe and effective for their intended uses. In addition, a device importer is required to establish and maintain a complaint file and to permit any authorized FDA employee at all reasonable times to have access to and to copy and verify the records contained in this file.

(b) This part supplements, and does not supersede, the provisions of Part 820, including the requirement under § 820.198 that a manufacturer establish and maintain a complaint file and the requirement under § 820.180 that a manufacturer allow access to, and copying of, this file by any authorized FDA representative.

(c) References in this part to regulatory sections of the Code of Federal Regulations are to Chapter I of Title 21, unless otherwise noted.

§ 803.3 Definitions.

(a) "FDA" means the Food and Drug Administration.

(b) "Importer" means any person who initially imports a device into the United States and is required to register under Part 807.

(c) "Manufacturer" means any person who is required to register under Part 807, other than a person who initially distributes a device imported into the United States.

(d) A "remedial action" is any recall, repair, modification, adjustment, relabeling, destruction, inspection (including patient monitoring), notification, or any other action that is initiated by a manufacturer or importer in response to information concerning a potential or actual death or serious injury.

(e) A "serious injury" is an injury that (1) is life threatening, (2) necessitates immediate medical or surgical intervention, (3) results in permanent impairment of a body function or permanent damage to body structure, or (4) results in unanticipated temporary impairment of a body function or unanticipated temporary damage to body structure.

(f) Any term defined in section 201 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 321) shall have that definition.

Subpart B—Reports and Records

§ 803.24 Reports by manufacturers and importers.

(a) A manufacturer or importer shall report to FDA whenever the manufacturer or importer has information that reasonably suggests, or a person alleges and the manufacturer or importer is aware of the allegation, that one of its marketed devices (1) has caused or contributed to a death or serious injury or (2) has malfunctioned, and such malfunction, if it recurs, is likely to cause or contribute to a death or serious injury.

(b) A manufacturer or importer shall submit such report in writing or by telephone to FDA as soon as the essential information has been obtained, but in any case within 15 working days of initial receipt of the information. Any report made by telephone is required to be confirmed in writing within 15 working days of the telephone report. An initial or confirmatory report is required to be transmitted so as to be received by FDA within the 15-working-day period.

(c) A medical device report is required to:

(1) Identify the device, including its brand name and common or usual name.

(2) Identify the manufacturer or, in the case of an imported device, identify the importer and the foreign manufacturer;

(3) Identify, by name, address, and telephone number, the individual making the report to FDA;

(4) Describe, to the extent known, the event giving rise to the information received by a manufacturer or importer, including whether a death or serious injury has occurred;

(5) Identify, by name and address, the person submitting the information to the manufacturer or importer; and

(6) State, if the manufacturer or importer intends to submit additional information, when such information will be submitted.

(d) A manufacturer or importer shall report to FDA as required under this part each time it becomes aware of information described in paragraph (a) of this section, even if an event of the same or a similar nature has been reported previously to FDA; provided, however, that if a manufacturer or importer becomes aware from more than one source of information concerning the same patient and the same event, only one report is required. FDA may notify a manufacturer or importer that reports of a particular type of event are no longer required.

(e) If FDA determines that the protection of the public health requires information in addition to that initially submitted under paragraph (c) of this section, a manufacturer or importer shall, upon FDA's request, submit such additional information. Additional items that may be requested include:

(1) Model, catalog, or other identification number or code of the device;

(2) Manufacturing lot or serial number of the device;

(3) A complete description of the event giving rise to the information received by the manufacturer or importer, including whether a death or serious injury has occurred and the number of persons affected;

(4) Any evaluation of the risk of death or serious injury, including failure analysis, and copies of any laboratory

testing or analyses available to or used by the manufacturer or importer;

(5) Any available evaluation by a medical practitioner of the event described in the initial report;

(6) Any evaluation or other determination as to whether the event described in the medical device report is or is not attributable to the device and the basis for such determination;

(7) If the manufacturer or importer determines that the event described in the medical device report is attributable to the device, an outline of the plan for remedial action or, if the manufacturer or importer determines that a remedial action is unnecessary, the basis for such determination;

(8) A copy of any proposed remedial action communication and the names and addresses of recipients of the communication;

(9) Information concerning the device's manufacture, e.g., the total number manufactured or the number in the same batch, lot, or equivalent unit of production, the location and date of manufacture, and the device's expiration date;

(10) Information concerning the device's distribution, e.g., the location and number of devices in inventory stock and distribution channels, a list of all consignees, and the dates of distribution.

§ 803.31 Complaint files.

(a) An importer shall establish a complaint file and maintain a record of any information, including any written or oral communication, received by the importer concerning a device-related death or serious injury, or a device malfunction that has caused or contributed to or if it recurs is likely to cause or contribute to a death or serious injury. The file is also required to contain a copy of the report submitted to FDA under § 803.24.

(b) An importer shall retain copies of records maintained under paragraph (a) of this section for a period of 2 years from the date that the report is submitted to FDA under § 803.24, even if the importer has ceased importing the device that is the subject of the report.

(c) An importer shall maintain the complaint file established under this section at the importer's principal business establishment. An importer shall permit any authorized FDA employee at all reasonable times to have access to and to copy and verify the records contained in the complaint file.

§ 803.33 Where to submit a report.

Any report required under this part is required to be submitted to the Device Monitoring Branch (HFK–125), National Center for Devices and Radiological Health, Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910 (a telephone number will be added in the final rule).

§ 803.35 Exemptions from reporting.

A manufacturer or importer otherwise subject to this part is exempt from reporting as required under this part, if the manufacturer or importer:

(a) Submits a report regarding the death, serious injury, or device malfunction to:

(1) The Director, Office of Biologics, in accordance with § 600.14, § 606.170, or § 640.73.

(2) The Director, Office of Radiological Health, in accordance with § 1002.20 or Part 1003.

(3) The Director, Office of Medical Devices, in accordance with § 812.150 or § 813.153.

(b) Is a practitioner who is licensed by law to prescribe or administer devices intended for use in humans and manufactures or imports devices solely for use in the course of that individual's professional practice.

(c) Is a person who manufactures or imports devices intended for use in humans solely for such person's use in research or teaching and not for sale or under an investigational device exemption granted under Part 812 or 813

Interested persons may, on or before July 26, 1983, submit to the Dockets Management Branch (address above) written comments regarding this proposed rule. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 26, 1983.

Arthur Hull Hayes, Jr.,

Commissioner of Food and Drugs.

Margaret M. Heckler,

Secretary of Health and Human Services.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Executive Order 12423 of May 26, 1983

Foreign Assistance and Arms Control

By the authority vested in me as President by the Constitution and statutes of the United States of America, including Section 621 of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2381), and Section 2778 of Title 22 of the United States Code, it is hereby ordered as follows:

Section 1. Section 1-301(b) of Executive Order No. 12163, as amended, is further amended by deleting "and 635(g)" and inserting in lieu thereof "635(g), and 636(i)".

Sec. 2. Section 1(d) of Executive Order No. 11958, as amended, is further amended to provide as follows: "Those under Sections 22(a), 29 and 30 of the Act to the Secretary of Defense.".

Rules and Regulations

Federal Register
Vol. 48, No. 105
Tuesday, May 31, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1065

Milk in the Nebraska-Western Iowa Marketing Area; Temporary Revision of Diversion Limitation Percentage

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Temporary revision of rules.

SUMMARY: This action temporarily relaxes for May through August 1983 the limit on how much milk not needed for fluid (bottling) use may be moved directly from farms to nonpool manufacturing plants and still be priced under the order. The revision is made in response to a request by a cooperative association representing producers supplying the market in order to prevent uneconomic movements of milk.

EFFECTIVE DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–2089.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Proposed Temporary Revision of Diversion Limitation Percentage: Issued May 2, 1983; published May 6, 1983 (48 FR 20424).

This action has been reviewed under USDA procedures established to implement Executive Order 12291 and has been classified as a "non-major" action.

It has been determined that the need for adjusting certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register**. However, this would not permit the completion of the procedure in time to give interested parties timely notice that the limit on allowable diversions of producer milk to nonpool manufacturing plants would be relaxed for May 1983. The initial request for this action was received April 27, 1983. Public comments on the proposed action were due May 13.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This temporary revision is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C 601 *et seq.*) and the provisions of § 1065.13(d)(4) of the Nebraska-Western Iowa milk order.

Notice of proposed rulemaking was published in the **Federal Register** (48 FR 20424) concerning a proposed relaxation of the limits on the amount of milk that may be moved directly from producer farms to nonpool manufacturing plants for the months of May through August 1983. Interested parties were afforded the opportunity to comment on the proposal by submitting written data, views, and arguments. No comments in opposition to the proposal were received.

After consideration of all relevant material, including the proposal set forth in the aforesaid notice, data, views and arguments filed thereon, and other available information, it is hereby found and determined that for the months of May through August 1983 the diversion limitation percentages set forth in § 1065.13(d) should be increased from the present 50 percent to 60 percent.

Pursuant to the provisions of § 1065.13(d)(4), the diversion limitation percentages set forth in § 1065.13(d) (2) and (3) may be increased or decreased up to 20 percentage points during any month to prevent uneconomic shipments merely for the purpose of assuring that dairy farmers will continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

National Farmers Organization, a cooperative association which represents producers supplying the Nebraska-Western Iowa market, requested that the percentage of allowable diversions be relaxed by 10 percentage points for the months of May through August 1983. The cooperative cited Class I utilization percentages of 34–36 percent for May through August 1982 and stated that because of increasing producer receipts and decreased Class I disposition the percentage of producer milk needed to satisfy the fluid milk requirements of the market during the months of May through August 1983 will be somewhat less than the Class I percentages for last year. Without a relaxation of diversion limits, the cooperative states that it will be forced to deliver milk to a pool distributing plant and then pump it back out and deliver it to a manufacturing plant if the milk of its members regularly associated with the market is to remain a part of the marketwide pool.

Under the present supply-demand conditions, it is concluded that a relaxation of the diversion limits by 10 percentage points for the months of May through August 1983 will prevent uneconomic movements of milk merely for the purpose of qualifying it as producer milk under the order.

It is hereby found and determined that thirty days' notice of the effective date is impractical, unnecessary, and contrary to the public interest in that:

(a) This temporary revision is necessary to reflect current marketing conditions and to maintain orderly marketing in the marketing area for the months of May through August 1983;

(b) This temporary revision does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of the proposed temporary revision was given interested parties and they were afforded opportunity to file written data, views or arguments concerning this temporary revision.

Therefore, good cause exists for making this temporary revision effective for the months of May through August 1983.

List of Subjects in 7 CFR Part 1065

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, that the aforesaid provisions in § 1065.13(d) (2) and (3) of the order are hereby revised for the months of May through August 1983.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Effective date: May 31, 1983.

Signed at Washington, D.C., on: May 24, 1983.

Edward T. Coughlin,

Director, Dairy Division

BILLING CODE 3410–02–M

Farmers Home Administration

7 CFR Part 1924

Suspension and Debarment Proceedings

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) is removing from the Code of Federal Regulations (CFR) an Exhibit to a regulation which governs the procedure for appealing a determination of debarment by FmHA. This Exhibit is being removed since these regulations are contained elsewhere in the CFR. The intended effect of this action is to remove an funneeded Exhibit to a regulation from the CFR.

EFFECTIVE DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: Angela Corley Saunders, Staff Assistant, Program Support Staff, Farmers Home Administration, USDA, Room 6309, South Agricultural Building, Washington, D.C., 20250, telephone (202) 382–9653.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1512–1 which implements Executive Order 12291 and has been determined to be exempt from those requirements because it involves only internal Agency management. It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exception in 5 U.S.C. 553 with respect to such rules. This action, however, is not published for proposed rulemaking since the purpose of this change involves only internal Agency management and publication for comment is not necessary.

The Catalog of Federal Domestic Assistance programs affected are:

10.404 Emergency loans
10.405 Farm Labor Housing Loans and Grants
10.406 Farm Operating Loans
10.407 Farm Ownership Loans
10.408 Grazing Association Loans
10.409 Irrigation, Drainage, and other Soil and Water Conservation Loans
10.410 Low to Moderate Income Housing Loans
10.411 Rural Housing Site Loans
10.413 Recreation Facility Loans
10.414 Resource Conservation and Development Loans
10.415 Rural Rental Housing Loans
10.416 Soil and Water Loans
10.417 Very Low-Income Housing Repair Loans and Grants
10.418 Water and Waste Disposal Systems for Rural Communities
10.419 Watershed Protection and Flood Prevention Loans
10.420 Rural Self-Help Housing Technical Assistance
10.421 Indian Tribes and Tribal Corporation Loans
10.422 Business and Industrial Loans
10.423 Community Facilities Loans
10.424 Industrial Development Grants
10.426 Area Development Assistance Planning Grants
10.427 Rural Rental Assistance Payments
10.428 Economic Emergency Loans
10.429 Above Moderate Income Housing Loans
10.430 Energy Impacted Area Development Assistance Program
10.431 Technical and Supervisory Assistance Grants
10.432 Biomass Energy and Alcohol Fuels Loans and Guarantees

This document has been reviewed in accordance with 7 CFR Part 1901, Subpart G, "Environmental Impact Statements." FmHA has determined that this action does not constitute a major Federal action significantly affecting the quality of the human environment and, in accordance with the National Environmental Policy Act of 1969, Pub. L. 91–190, an Environmental Impact Statement is not required. Appeal procedures under this regulation are governed by USDA's Board of Contract Appeals Proceedings. These proceedings were recently amended and published in the **Federal Register.** Since USDA's Board of Contract Appeals Proceedings are currently contained in 7 CFR Part 24, republication of these proceedings as Exhibit A to Subpart E of Part 1924 of Chapter XVIII is not necessary.

List of Subjects in 7 CFR Part 1924

Construction and repair, Government contracts, Suspension and debarment procedures.

PART 1924—CONSTRUCTION AND REPAIR

Therefore, Subpart E of Part 1924, Chapter XVIII, Title 7, Code of Federal Regulations is amended as follows:

§ 1924.216 [Amended]

1. Section 1924.216(e)(3)(vi) is amended by removing the parenthetical statement at the end of the paragraph.

Exhibit A to Subpart E [Removed]

2. Exhibit A to Subpart E is removed.

BILLING CODE 3410–07–M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 4

[Docket No. 83–22]

Description of Office, Procedures, Public Information

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: The Office of the Comptroller of the Currency (Office) is amending 12 CFR Part 4 to update addresses at which the public may obtain certain information from the Office, to correct typographical errors in certain cross-references to statutes and regulations, to make other technical corrections in the language of the regulation, and to eliminate certain outdated lists from the regulation. The document also amends the schedule of fees imposed in connection with Freedom of Information Act ("FOIA") requests. This last action brings the fees listed in Part 4 into uniformity with those adopted by the Department of the Treasury. It will assure that the Office is appropriately compensated for expenses incurred in connection with FOIA requests and will resolve any ambiguity which might arise as a result of the new fee schedule adopted by the Department of the Treasury.

EFFECTIVE DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: Jerome L. Edelstein, Attorney, Legal Advisory Services Division, 202/447–

1880, Office of the Comptroller of the Currency, Washington, D.C. 20219.

SUPPLEMENTARY INFORMATION: This rulemaking makes certain technical corrections to 12 CFR Part 4, which, among other things, advises the public as to where certain information may be obtained from the Office, and sets forth the schedule of fees charged in connection with the processing of requests for documents sought under the Freedom of Information Act.

Office divisions from which information is available and the officials from whom it is available are being updated to reflect current Office procedures.

Additionally, the lists of forms and publications available from the Office are being deleted. These lists are constantly changing and their presence in the Code of Federal Regulations may be misleading because the information becomes outdated so frequently. In their place the Office has substituted organizational units which are to be contacted to obtain information about forms and lists of publications and copies of current forms and publications.

Title 12 CFR 4.16(b), which delineates exceptions to the disclosure requirements of FOIA, is being amended to more fully reflect one of the statutory exceptions. The proviso to exception 3, as set out in 12 U.S.C. 552(b)(3) was inadvertently omitted from the regulation. It is now included.

Title 12 CFR 4.17(d) is being amended to update the list of reports from banks and to provide accurate information on how to obtain information concerning these reports.

Title 12 CFR 4.17(h) is being revised to update the fees charged in connection with the processing of FOIA requests. On March 24, 1983 the Department of the Treasury published final regulations revising as of April 25, 1983, its schedule of fees charged in connection with the processing of FOIA requests (48 FR 12350). Consequently, the Office is revising its regulation to resolve any ambiguity about fees charged in connection with FOIA requests made to this Office. The revised fee schedule was published by Treasury in order to more clearly reflect the actual cost of answering requests for information. This included increases in the hourly charge and the copying charge, and a statement that charges for a computer search reflects the actual direct cost of the search.

The Office is also making technical changes to § 4.17a (4) and (5). These changes correct certain erroneous cross-references to statutes and regulations. No substantive effect is intended.

Special Studies

A Regulatory Flexibility Analysis for this rulemaking is not required by the Regulatory Flexibility Act.

A Regulatory Impact Analysis is not required because the Office has determined that the proposal is not a "major rule" as defined by Executive Order 12291. The proposal will not have an annual effect on the economy of $100 million or more, will not result in a major increase in costs or prices to consumers, individual industries, Federal, State, or local government agencies, or geographic regions, nor will it have significant adverse effects on competition, employment, investment productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises.

The Office has determined that notice and comment and a 30-day delay of implementation pursuant to the Administrative Procedure Act is not required because these amendments constitute technical changes in the wording of the regulation, provide updated information on the availability of material from the Office, and correct typographical errors in the regulation. The regulation also makes the schedule of fees, put forth in 12 CFR 4.17(h), for processing FOIA requests uniform with that established as of April 25, 1983, by the Department of the Treasury. The fees established by Treasury were published for comment on December 3, 1982 (47 FR 54475) and published in final form on March 24, 1983 (48 FR 12350).

This action eliminates ambiguity after April 25, 1983, concerning fees applicable to those filing FOIA requests with this Office.

List of Subjects in 12 CFR Part 4

National banks, Organization and functions, Freedom of information, Official forms.

PART 4—[AMENDED]

For the reasons set out in the preamble, Part 4 of Title 12 of the Code of Federal Regulations is amended as shown.

1. The authority citation for Part 4 is:

Authority: 12 U.S.C. 1 *et seq.*, 5 U.S.C. 552, unless otherwise noted.

2. The cross-reference citation for Part 4 is amended to read as follows:

Cross Reference: See 31 CFR Part 1, Subtitle A.

3. Section 4.13 is revised to read as follows:

§ 4.13 Forms and instructions.

(a) Information about forms utilized by the Office of the Comptroller of the Currency, other than those applicable to corporate activities, is available from:

(1) *Mailing Address.* Associate Director For Information Resources Management (Administrative Services Division), Comptroller of the Currency, Washington, D.C. 20219.

(2) *Location.* Sixth Floor, 490 L'Enfant Plaza East SW., Washington, D.C.

(b) A list of forms utilized by the Office and forms and instructions are available by writing to: Communications Division, Comptroller of the Currency, Washington, D.C. 20219.

A charge may be assessed for certain forms or instructions or for any form or instruction requested in large quantities.

4. Section 4.14 is amended by revising paragraph (b) to read as follows:

§ 4.14 Publications available to public.

* * * * *

(b) *Other Publications.* In addition to the above, the Comptroller makes other publications available to the public. For information about, or a list of, those publications or to purchase or otherwise obtain a copy of publications or to arrange to inspect such publications, write to: Publications Control Office, Comptroller of the Currency, Washington, D.C. 20219.

5. Section 4.15 is amended by revising paragraph (b) to read as follows:

§ 4.15 Orders, opinions, etc. available to public.

* * * * *

(b) The Comptroller maintains and makes available to the public for inspection and copying a current index identifying the documents referred to in paragraph (a) of this section (other than paragraphs (5), (6), (7), (8), and (9) thereof), issued, adopted, or promulgated after July 4, 1967. Such index is located in the Communications Division, Comptroller of the Currency, 3rd floor, 490 L'Enfant Plaza East SW., Washington, D.C. 20219.

* * * * *

6. Section 4.16 is amended by revising pargaraph (b)(3) to read as follows:

§ 4.16 Other records available to public; exceptions.

* * * * *

(b) * * *

(3) A record, or portion thereof, specifically exempted from disclosure by statute (other than section 552b of Title 12 of the United States Code), provided that such statute requires that the matters be withheld from the public in such a manner as to leave no

discretion on the issue, or establishes particular criteria for withholding or refers to particular types of matters to be withheld.

* * * * *

7. Section 4.17 is amended by revising paragraphs (d)(1) and (h) to read as follows:

§ 4.17 Location of public reading rooms, requests for identifiable records; and service of process.

* * * * *

(d) *Information concerning records.—Information concerning:*

(i) Consolidated Reports of Condition (domestic);

(ii) Consolidated Reports of Condition (foreign and domestic);

(iii) Consolidated Large Bank Supplements;

(iv) Special Reports;

(v) Past Due, Nonaccrual and Renegotiated Loans and Lease Financing Receivables may be obtained from:

(A) *Mailing Address.* Manager, Statistical Branch, Data Processing, Comptroller of the Currency, Washington, D.C. 20219.

(B) *Location.* Sixth Floor, 490 L'Enfant Plaza East SW., Washington, D.C.

(vi) Annual Report of Trust Assets may be obtained from:

(A) *Mailing Address.* Trust Examinations Division, Comptroller of the Currency, Washington, D.C. 20219.

(B) *Location.* Sixth Floor, 490 L'Enfant Plaza East SW., Washington, D.C. 20219.

* * * * *

(h) *Fees.* (1) Unless performed without charge, waived or reduced, fees shall be charged in accordance with this paragraph for services rendered in responding to requests for records.

(2) The Office of the Comptroller of the Currency may request prepayment before releasing documents. If fees for previous requests have not been paid, documents will not be released without prepayment.

(3) A person requesting access to a record of the Comptroller of the Currency shall pay the following:

(i) $.15 per copy of each page, up to 8½" X 14", made by photocopy or similar process;

(ii) Photographs, films, and other materials—actual cost of reproduction;

(iii) Records may be released to a private contractor for copying and the requester will be charged the actual cost of duplication charged by the private contractor;

(iv) Searches other than for computerized records—$10.00 for each hour or fraction thereof for time spent by each clerical, professional, and supervisor in finding the records and information within the scope of the request, and for transportation of personnel and records necessary to the search at actual cost;

(v) Searches for computerized records—Actual direct cost of the search. The fee for computer printouts will be actual costs; and

(vi) When other duplications not specifically identified above are requested and provided, their direct cost to the Office of the Comptroller of the Currency shall be charged. Other services and materials requested which are not covered by this part are chargeable at the actual cost to the Office.

8. Section 4.17a is amended by revising paragraphs (d)(4) and (d)(5) to read as follows:

§ 4.17a Request procedures.

* * * * *

(d) * * *

(4) *Time extension by agreement.* A requester may agree to an extension of the time limits specified in paragraph (d)(1) and (2) of this section. In event of such an agreement, the respective specified time limit shall not be considered as having expired until the period of the extension of time agreed to by the requester has expired.

(5) *Time extension by judicial action.* If a suit is properly instituted against the Comptroller of the Currency by a requester, the court may, pursuant to 5 U.S.C. 552(a)(6)(C), allow the Comptroller of the Currency additional time to complete the review of the records requested.

Dated: April 25, 1983.

C. T. Conover,

Comptroller of the Currency.

[FR Doc. 83-14448 Filed 5-27-83; 8:45 am]

BILLING CODE 4810-33-M

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 307

Termination of Insured Status

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Final rule.

SUMMARY: The Federal Deposit Insurance Corporation ("FDIC") is amending Part 307 of its regulations. The amendment removes the provisions requiring that an assuming or resulting bank or institution that has assumed the liabilities of an insured bank give notice of the assumption to the depositors of the bank whose liabilities have been assumed. The amendment also removes the purpose and scope section of Part 307 and changes the Part and section headings. The amendment is being made to bring the FDIC's regulations into conformity with the Federal Deposit Insurance Act ("FDI Act") as amended by the Garn-St Germain Depository Institutions Act of 1982.

EFFECTIVE DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: MaryBeth Triano, Attorney, Legal Division, Federal Deposit Insurance Corporation, 550—17th Street, NW., Washington, D.C. 20429 (202) 389-4151.

SUPPLEMENTARY INFORMATION: On October 15, 1982, the Garn-St Germain Depository Institutions Act of 1982 became effective. In pertinent part, section 433 of the Garn-St Germain Depository Institutions Act deleted from section 8(q) of the FDI Act the requirement that an insured bank which has assumed the liabilities of another insured bank give notice of the assumption to the depositors of the bank whose liabilities have been assumed. This deleted provision had provided the primary authority for Part 307 of the FDIC's Regulations.

Part 307 governs the notice procedures to be followed by a bank whose insured status has been terminated other than by an action of the FDIC Board of Directors. Due to the revocation of the primary authority for Part 307 and the correspondent Congressional mandate that an assuming or resulting bank no longer be required to notify depositors of the assumption, the regulations requiring that notice of an assumption be sent to depositors are being removed.

The removal of these regulations is consistent with the FDIC's policy of periodically reviewing its regulations to determine whether the regulations should be continued, revised or eliminated. Among the factors to be considered are: (1) The continued need for the regulation; (2) alternative methods of accomplishing the purpose of the regulation; and (3) the need to minimize the burden imposed on those affected by the regulation, especially small banks.

First, because Congress has determined that notice is no longer required, there is no longer a need for a regulation requiring notice. Second, although a public benefit is served by the regulation, alternative methods of notice are available to depositors and the public. These alternative methods included newspaper accounts of the assumption, public announcements and advertisements made by the assuming or resulting bank or institution and physical changes to or on the premises

of the assumed bank. Finally, the elimination of the notice requirement would lessen the burden imposed on those affected by the regulation, especially small banks. In view of these factors and the requirement that the FDIC conform its regulation to congressional mandates, the notice procedures imposed on assuming or resulting banks and institutions are being removed.

Due to the changes required by the adoption of the Garn-St Germain Depository Institutions Act, the purpose and scope of Part 307 has been changed. As a result, the purpose and scope section of Part 307 is being removed and the Part and section headings are being changed. These changes are technical in nature and are being made to more accurately reflect the contents of Part 307.

Regulatory Factors

No regulatory flexibility analysis as set out in the Regulatory Flexibility Act (5 U.S.C. 601–612) will be undertaken since the amendment is not a "rule" as that term is defined in the Regulatory Flexibility Act (5 U.S.C. 601(2)).

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) is also inapplicable here. The amendment does not entail any new reporting or recordkeeping requirements.

Public notice and procedure are impracticable and unnecessary. The elimination of the regulations requiring that notice of assumptions be given to depositors is necessary to bring the FDIC's regulations into conformity with the FDI Act as amended by the Garn-St Germain Depository Institutions Act. The change in headings and the removal of the purpose and scope section of Part 307 are technical in nature. Therefore, in accordance with the Administrative Procedure Act (5 U.S.C. 553), this amendment is effective upon publication.

List of Subjects in 12 CFR Part 307

Bank deposit insurance, Banks, Banking.

For the reasons set forth in the preamble, 12 CFR Part 307 is revised to read as follows:

PART 307—NOTIFICATION OF CHANGES OF INSURED STATUS

Sec.

307.1 Certification of assumption of deposit liabilities.
307.2 Notice to be given when deposit liabilities are not assumed.

Authority: Sec. 2, Pub. L. 797, 64 Stat. 879, 880 as amended by secs. 202, 204, Pub. L. 89–694, 80 Stat. 1046, 1054, and sec. 6(c)(14), Pub. L. 95–369, 92 Stat. 618 (12 U.S.C. 1818(a), 1818(o)); Sec. 304, Pub. L. 95–630, 92 Stat. 3676 (12 U.S.C. 1818(q); Sec. 9, Pub. L. 797, 64 Stat. 881 (12 U.S.C. 1819).

§ 307.1 Certification of assumption of deposit liabilities.

Whenever the deposit liabilities of an insured bank or insured branch of a foreign bank are assumed by another insured bank (whether by merger, consolidation, or other statutory assumption, or by contract), the assuming or resulting bank shall certify to the FDIC that it has agreed to assume the deposit liabilities of the bank whose deposits were assumed. The certification shall be made within 30 days after the assumption takes effect and shall state the date the assumption took effect. This certification shall be considered satisfactory evidence of the assumption.

§ 307.2 Notice to be given when deposit liabilities are not assumed.

Any insured bank or insured branch of a foreign bank whose insured status is voluntarily terminated, but whose deposit liabilities are not assumed shall give notice to each of its depositors of the date of the termination of its insured status under the Federal Deposit Insurance Act. The notice to depositors shall be given in a form, in a manner and at a time approved by the appropriate FDIC Regional Director. The FDIC may require the bank to take other steps that it considers necessary for the protection of depositors.

By Order of the Board of Directors, May 23, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

12 CFR Part 309

Disclosure of Information

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Final rule.

SUMMARY: The Federal Deposit Insurance Corporation ("FDIC") is amending its regulations on disclosure of information. The amendment removes restrictions placed on the disclosure of financial records and information to Federal financial institutions supervisory agencies. This change is necessitated by Federal legislation dealing with the disclosure of financial records.

EFFECTIVE DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: MaryBeth Triano, Attorney, Legal Division, (202) 389–4151, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, D.C. 20429.

SUPPLEMENTARY INFORMATION: Section 309.6 of the rules and regulations of the FDIC provides the procedures for discretionary disclosure of FDIC records and information. The amendment removes some of the restrictions placed on the disclosure of reports of examination and other exempt records to the five member supervisory agencies of the Federal Financial Institutions Examination Council. This revision is being made to bring the FDIC's regulations into conformity with the Right to Financial Privacy Act of 1978 (Pub. L. 95–630; 12 U.S.C. 3401 *et seq.*). On October 15, 1982 Congress passed the Garn-St Germain Depository Institutions Act of 1982 (Pub. L. 97–320) which amended the Right to Financial Privacy Act to clarify that the exchange of records and information regarding financial institutions is permitted between the Federal financial institutions supervisory agencies. The restrictions on disclosures to the Federal financial institutions supervisory agencies, previously thought to be required by the Right to Financial Privacy Act of 1978, have therefore been removed.

Regulatory Factors

No regulatory flexibility analysis as set out in the Regulatory Flexibility Act (5 U.S.C. 601–612) will be undertaken since the amendment is not a "rule" as that term is defined in the Regulatory Flexibility Act (5 U.S.C. 601(2)).

The Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*) is also inapplicable because the amendment does not entail any new reporting or recordkeeping requirements.

Public notice and procedures are impracticable and unnecessary. The elimination of the restrictions on disclosure between Federal financial institutions supervisory agencies is technical in nature and is being made to bring the FDIC's regulations into conformity with the Right to Financial Privacy Act as amended by the Garn-St Germain Depository Institutions Act. Therefore, in accordance with the Administrative Procedure Act (5 U.S.C.

553), this amendment is effective upon publication.

List of Subjects in 12 CFR Part 309

Authority delegations, Disclosure requirements, Freedom of information, Privacy.

For the reasons set forth in the preamble, 12 CFR Part 309 is amended as follows:

PART 309—DISCLOSURE OF INFORMATION

1. The authority citation for Part 309 reads as follows:

Authority: Sec. 2(9 "Seventh" and "Tenth"), Pub. L. No. 797, 64 Stat. 881, as amended by title III, sec. 309, Pub. L. No. 95–630, 92 Stat. 3677 (12 U.S.C. 1819 "Seventh" and "Tenth"); 5 U.S.C. 552.

2. Section 309.6 is amended by revising paragraph (c)(3) to read as follows:

§ 309.6 Disclosure of exempt records by FDIC personnel.

* * * * *

(c) * * *

(3) *Reports of examination and other exempt records—disclosure to Federal financial institutions supervisory agencies.* The Director of the FDIC's Division of Bank Supervision, or anyone designated by him in writing, may disclose to any officer or employee of the Comptroller of the Currency, the Board of Governors of the Federal Reserved System, any Federal Reserve Bank, the Federal Home Loan Bank Board, any Federal Home Loan Bank, and the National Credit Union Administration any report of examination of a bank or any other exempt records. Before information is released to any employees of the above listed Federal financial institutions supervisory agencies, it is the responsibility of the Corporation employee authorized to disclose the information to make an affirmative determination that the requestor is authorized to request the record on behalf of the agency and that the records are requested for a legitimate bank supervisory or regulatory purpose.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 83–ASO–20]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points; Alteration of Control Zone, Sarasota, Florida

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment alters the Sarasota, Florida, control zone by revising the coordinates of Sarasota-Bradenton Airport and reducing the size of a control zone arrival extension. The geographical coordinates of the airport are improperly listed and this action will correct the deficiency. The control zone arrival extension established southeast of the airport is larger than required and will be reduced in width from ten to six miles.

DATES: Effective Date: 0901 G.m.t., August 4, 1983. Comments must be received on or before July 3, 1983.

ADDRESSES: Send comments on the rule in triplicate to: Federal Aviation Administration, Manager, Airspace and Procedures Branch, ASO–530, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763–7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763–7646.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves technical corrections to the description of the control zone and a reduction in the size of an arrival extension and was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the Sarasota, Florida, control zone by revising the geographical coordinates of the airport and reducing the size of an arrival extension. This action will raise the floor of controlled airspace in two areas southeast of the airport from the surface to 700 feet. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983. Under the circumstances presented, the FAA concludes that there is a need to alter the control zone by listing the proper coordinates of the airport and reducing the width of an arrival extension so that it is not in excess of needs. The changes are so minor and nonsubstantive I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., August 4, 1983, as follows:

Sarasota, FL [Revised]

Within a 5-mile radius of Sarasota-Bradenton Airport (lat. 27°23'42"N., long. 82°33'15" W.); within 3 miles each side of Sarasota VORTAC 050°, 142° and 302° radials, extending from the 5-mile radius zone to 8.5 miles northeast, southeast and northwest of the VORTAC. This control zone is effective during the specific days and times established in advance by a Notice to Airmen. The effective days and times will thereafter be continuously published in the Airport/Facility Directory.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) Is not a "major rule" under Executive

Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on May 17, 1983.

George R. LaCaille,

Acting Director, Soutern Region.

14 CFR Part 71

[Airspace Docket No. 83-ASO-13]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points; Alteration of Transition Area, Liberty, North Carolina

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment increases the size of the Liberty, North Carolina, transition area to accommodate Instrument Flight Rule (IFR) operations at May Airport. This action will lower the base of controlled airspace from 1,200 to 700 feet above the surface. An instrument approach procedure, based on the Liberty VORTAC facility, is being developed to serve the airport and this additional controlled airspace is required to protect IFR operations.

EFFECTIVE DATE: 0901 G.m.t., August 4, 1983.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Thursday, April 14, 1983, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by increasing the size of the Liberty, North Carolina, transition area to provide additional controlled airspace for containment of aeronautical operations in the vicinity of May Airport. An instrument approach procedure, predicated on the Liberty VORTAC facility, is being developed to serve the airport and this action will provide the necessary controlled airspace for containment of IFR operations (48 FR 16065). The operating status of May Airport is changed from VFR to IFR. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received in response to circularization. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations increases the size of the Liberty, North Carolina, transition area to accommodate IFR aeronautical activities at May Airport.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Transition area.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., August 4, 1983, as follows:

Liberty, NC [Revised]

That airspace extending upward from 700 feet above the surface within a 5-mile radius of Causey Airport (lat. 35°54'50" N., long. 79°37'03" W.); within 2 miles each side of Liberty VORTAC 358° radial, extending from the 5-mile radius area to the VORTAC; within a 6-mile radius of May Airport (lat. 35°59'55" N., long 79°41'20" W.).

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point Georgia, on May 17, 1983.

George R. LaCaille,

Acting Director, Southern Region.

[Airspace Docket No. 83-ASO-21]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points; Alteration of Control Zone, Wilmington, North Carolina

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: This amendment alters the Wilmington, North Carolina, control zone by revising the geographical coordinates of New Hanover County Airport. The coordinates are improperly listed in the description and this amendment will correct the deficiency so that the description is technically correct. No change in airspace is intended by this action.

DATES: Effective Date: 0901 G.m.t., August 4, 1983. Comments must be received on or before July 3, 1983.

ADDRESSES: Send comments on the rule in triplicate to: Federal Aviation Administration, Manager, Airspace and Procedures Branch, ASO-530, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763-7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves technical correction to the description of the control zone and was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that

provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to revise the geographical coordinates of New Hanover County Airport as the coordinates contained in the description are not correct. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983. Under the circumstances presented, the FAA concludes that there is a need to list the proper coordinates of the airport so that the description of the control zone will be technically correct. The changes are so minor and nonsubstantive I find that notice or public procedure under 5 U.S.C. 553(b) is unnecessary.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., August 4, 1983, as follows:

Wilmington, NC [Revised]

Within a 5-mile radius of New Hanover County Airport (lat. 34°16'14" N., long. 77°54'10" W.).

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on May 17, 1983.

14 CFR Part 71

[Airspace Docket No. 83-ASO-12]

Designation of Federal Airways, Area Low Routes, Controlled Airspace, and Reporting Points; Designation of Control Zone, Naples, Florida

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates a control zone in the vicinity of Naples Municipal Airport, Naples, Florida, which will lower the base of controlled airspace in the vicinity of the airport from 700 feet above the surface to the surface. This will provide controlled airspace protection for aircraft operating to and from the airport during Instrument Flight Rule weather conditions.

EFFECTIVE DATE: 0901 G.m.t., August 4, 1983.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763–7646.

SUPPLEMENTARY INFORMATION:

History

On Thursday, March 10, 1983, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by designating a control zone at Naples, Florida, to provide controlled airspace for aeronautical operations in the vicinity of Naples Municipal Airport (48 FR 10072). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received in response to publication. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Advisory Circular AC 70–3A dated January 3, 1983.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations designates the Naples, Florida, control zone to accommodate aeronautical activities at Naples Municipal Airport.

List of Subjects in 14 CFR Part 71

Aviation safety, Airspace, Control zone.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) (as amended) is further amended, effective 0901 G.m.t., August 4, 1983, as follows:

Naples Municipal Airport, FL [New]

Within a 5-mile radius of Naples Municipal Airport (lat. 26°09'06" N., long. 81°46'32" W.); within 3.5 miles each side of Collier County VOR/DME 052° and 218° radials, extending from the 5-mile radius area to 8.5 miles northeast and southwest of the VOR/DME; excluding that airspace within a one-mile radius of Wing South Airpark (lat. 26°08'59" N., long. 81°42'12" W.). This control zone is effective during the specific days and times established in advance by a Notice to Airmen. The effective days and time will thereafter be continuously published in the Airport/Facility Directory.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in East Point, Georgia, on May 17, 1983.

George R. LaCaille,

Acting Director, Southern Region.

[Airspace Docket No. 82-AGL-31]

Alteration of Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: A portion of the Williston, North Dakota, control zone description was omitted upon publication. This correction indicates the accurate description.

EFFECTIVE DATE: August 4, 1983.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL–530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694–7360.

SUPPLEMENTARY INFORMATION: On page 17060 of the **Federal Register** dated April 21, 1983, a final rule was published to alter the Williston, North Dakota, control zone. A portion of the description was inadvertently omitted. This correction redescribes the control zone to include the portion omitted.

SUPPLEMENTARY INFORMATION: Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.171 of Part 71 of the Federal Aviation Regulations was published in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Control zones, Aviation safety.

Adoption of the amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t. August 4, 1983, as follows:

Williston, ND

Within a 5-mile radius of the Sloulin International Airport (latitude 48°10'37"N., longitude 103°38'18"W.); within 1.5 miles each side of the Williston VORTAC 136° radial, extending from the 5-mile radius area to 1.5 miles southeast of the Williston VORTAC, and within 2 miles north and 3 miles south of the 128° bearing from the Sloulin International Airport, extending from the 5-mile radius area to 10 miles southeast of the airport.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)) and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, it is certified that this—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued In Des Plaines, Illinois, on May 16, 1983.

Monte R. Belger,

Acting Director, Great Lakes Region.

14 CFR Part 71

[Airspace Docket No. 83-AGL-1]

Alteration of Transition Area and Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this Federal action is to alter the Yankton, South Dakota, control zone and transition area descriptions to accommodate two new instrument approach procedures to Chan Gurney Municipal Airport, i.e., an NDB Runway 31 and an ILS Runway 31 procedure, and to revise/reduce the airspace designated for the transition area.

The intended effect of this action is to ensure segregation of the aircraft using these approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions in controlled airspace.

EFFECTIVE DATE: August 4, 1983.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL–530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694–7360.

SUPPLEMENTARY INFORMATION: The current transition area charted for Yankton, South Dakota, does not accurately depict the description as published in Advisory Circular 70–3A, Compilation of Regulations. This action revises the description of the transition area as well as the description of the Yankton control zone to accommodate both the existing airspace requirements and the future airspace requirements for two new instrument approach procedures at Chan Gurney Municipal Airport, i.e., a Runway 31 Non-directional Radio Beacon (NDB) procedure and a Runway 31 Instrument Landing System (ILS) procedure. The control zone will be extended an additional 1½ miles northwest to accommodate existing procedures. The control zone will also be extended to the southeast from the 5-mile radius to the 8½-mile radius of the Yankton very high frequency omni-directional range (VOR) with an extension width of approximately 7 miles to accommodate the two new procedures. The transition area will now be described referencing only that airspace extending upward from 700 feet above the surface within a 9-mile radius of the Chan Gurney Municipal Airport, although minimum descent altitudes for these procedures may be established below the floor of the 700-foot controlled airspace. Any reference to airspace extending from 1200 feet above the surface has been determined no longer necessary and has been deleted.

Aeronautical maps and charts will reflect the defined areas which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

History

On page 10693 of the **Federal Register** dated March 14, 1983, the FAA proposed to amend §§ 71.171 and 71.181 of the Federal Aviation Regulations (14 CFR Part 71) so as to alter the control zone and transition area airspace near Yankton, South Dakota. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rulemaking.

Except for editorial changes, this amendment is the same as that proposed in the notice. Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations were published in Advisory Circular AC 70–3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Control zones, Transition areas, Aviation safety.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, §§ 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) are amended, effective 0901 GMT, August 4, 1983, as follows:

Yankton, SD

Within a 5-mile radius of the Chan Gurney Municipal Airport (latitude 42°55'01"N., longitude 97°23'11"W.); within 2¾ miles each side of the Yankton VOR 321° radial extending from the 5-mile radius to 8½ miles northwest of the VOR; within 2¾ miles southwest of the Yankton 140° radial and 3¼ miles northeast of the Yankton 140° radial extending from the 5-mile radius to 8½ miles southeast of the VOR.

Yankton, SD

That airspace extending upward from 700 feet above the surface within a 9-mile radius of the Chan Gurney Municipal Airport (latitude 42°55'01"N., longitude 97°23'11"W.).

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)) and 14 CFR 11.69)

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, it is certified that this—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on May 11, 1983.

Kenneth C. Patterson,

Acting Director, Great Lakes Region.

14 CFR Part 71

[Airspace Docket No. 82-AGL-28]

Alteration of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends the Circleville, Ohio, transition area description by deleting the Lockborne AFB exclusion currently contained in the published description.

The intended effect of this action is to insure segregation of the aircraft using approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions in controlled airspace.

EFFECTIVE DATE: August 4, 1983.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION: This action amends the Circleville, Ohio, transition area description by deleting all reference to Lockborne AFB as currently referenced in the published Circleville, Ohio, description. The exclusion is no longer necessary. The Lockborne AFB has been renamed Rickenbacker AFB and airspace associated with Rickenbacker AFB will be contained in a later docket in connection with a revised Columbus, Ohio, transition area description. (The Columbus, Ohio, description also references Lockborne AFB and also requires revision.) This action amends only the Circleville, Ohio, transition area description.

Aeronautical maps and charts will reflect the defined areas which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

History

On page 9022 of the **Federal Register** dated March 3, 1983, the FAA proposed to amend § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) so as to alter the transition area airspace near Circleville, Ohio. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rulemaking.

Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was published in Advisory Circular AC 70-3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Transition areas, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., August 4, 1983, as follows:

Circleville, Ohio

That airspace extending upward from 700 feet above the surface within a 12-mile radius of the Pickaway County Memorial Airport (latitude 39°31'00"N., longitude 82°58'55"W.).

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)) and 14 CFR 11.69)

Note. The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, it is certified that this—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on May 16, 1983.

---

14 CFR Part 97

[Docket No. 23646; Amdt. No. 1243]

Air Traffic and General Operating Rules; Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commission of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATE: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase

Individual SIAP copies may be obtained from: 1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures and Airspace Branch (AFO–730), Aircraft Programs Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426–8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260–3, 8260–4 and 8260–5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airman (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instruments Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

Approaches, Standard instrument.

Adoption of the Amendment

PART 97—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.m.t. on the dates specified, as follows:

1. By amending § 97.23 VOR–VOR/DME SIAPs identified as follows:

Effective August 4, 1983

Harrison, AR—Boone County, VOR–A, Amdt. 9
Los Angeles, CA—Los Angeles Int'l., VOR or TACAN Rwy 7L, Amdt. 16
Los Angeles, CA—Los Angeles Int'l., VOR or TACAN Rwy 25R, Amdt. 12
Kenosha, WI—Kenosha Muni, VOR Rwy 14, Amdt. 5

Effective July 7, 1983

DeQuincy, LA—DeQuincy Industrial Airpark, VOR/DME–A, Amdt. 3, cancelled
DeQuincy, LA—DeQuincy Industrial Airpark, VOR/DME Rwy, 33, Original
College Park, MD—College Park, VOR/DME–A, Original, cancelled
Trenton, NJ—Mercer County, VOR Rwy 24, Amdt. 3
Quarryville, PA—Tanglewood, VOR/DME–A, Amdt. 1
Alice, TX—Alice Intl, VOR Rwy 31, Amdt. 8
Alice, TX—Alice Intl, VOR–A, Amdt. 10
Austine, TX—Robert Mueller Muni, VOR/DME or TACAN Rwy 13R, Amdt. 7
Del Rio, TX—Del Rio Intl, VOR–A, Amdt. 9
Del Rio, TX—Del Rio Intl, VOR/DME–B, Amdt. 2
San Angelo, TX—Mathis Field, VOR Rwy 21, Amdt. 13

Effective May 12, 1983

Washington, PA—Washington County, VOR–A, Amdt. 3
Washington, PA—Washington County, VOR–B, Amdt. 3

Effective May 5, 1983

Knoxville, TN—Mc Ghee Tyson, VOR Rwy 23L, Amdt. 4
Knoxville, TN—Mc Ghee Tyson, VOR Rwy 23R, Amdt. 6
Knoxville, TN—Mc Ghee Tyson, VOR/DME Rwy 5R, Amdt. 4

Note.—The FAA published an amendment in Docket No. 23630, Amdt. No. 1242 to Part 97 of the Federal Aviation Regulations (Vol 48 FR No. 95 page 21897; dated May 16, 1983) under § 97.23 effective June 23, 1983, which is hereby amended as follows:

Columbia, MO—Columbia Regional, VOR Rwy 20, Amdt. 6. Change effective date to June 9, 1983.

2. By amending § 97.25 SDF–LOC–LDA SIAPs identified as follows:

Effective August 4, 1983

Harrison, AR—Boone County, LOC Rwy 36, Amdt. 2

Effective July 7, 1983

Alice, TX—Alice Intl, LOC Rwy 31, Amdt. 1
Del Rio, TX—Del Rio Intl, LOC Rwy 13, Amdt. 1
San Angelo, TX—Mathis Field, LOC BC Rwy 21, Amdt. 10

Effective June 9, 1983

Denver, CO—Stapleton Intl, LDA/DME Rwy 35R, Original

Effective May 16, 1983

Milwaukee, WI—Lawrence J. Timmerman, LOC Rwy 15L, Amdt. 1

3. By amending Part 97.27 NDB/ADF SIAPs identified as follows:

Effective August 4, 1983

Harrison, AR—Boone County, NDB Rwy 18, Amdt. 2
Harrison, AR—Boone County, NDB Rwy 36, Amdt. 2
Kenosha, WI—Kenosha Muni, NDB Rwy 14, Amdt. 8

Effective July 7, 1983

DeQuincy, LA—DeQuincy Industrial Airpark, NDB Rwy 15, Amdt. 1
Toledo, OH—Toledo Express, NDB Rwy 7, Amdt. 19
San Angelo, TX—Mathis Field, NDB Rwy 3, Amdt. 12
Del Rio, TX—Del Rio Intl, NDB Rwy 13, Amdt. 1
Denton, TX—Denton Muni, NDB Rwy 17, Amdt. 3
Greer, SC—Greenville-Spartanburg, NDB Rwy 3, Amdt. 12
North Myrtle Beach, SC—Grand Strand, NDB Rwy 23, Amdt. 7

Effective May 5, 1983

Knoxville, TN—Mc Ghee Tyson, NDB Rwy 5L, Amdt 3

Knoxville, TN—Mc Ghee Tyson, NDB Rwy 5R, Amdt. 3

4. By amending § 97.29 ILS–MLS SIAPs identified as follows:

Effective August 4, 1983

Hot Springs, AR—Memorial Field, ILS Rwy 5, Amdt. 8
Los Angeles, CA—Los Angeles Int'l, ILS Rwy 7L, Amdt. 1
Los Angeles, CA—Los Angeles Int'l, ILS Rwy 7R, Amdt. 2, cancelled
Los Angeles, CA—Los Angeles Int'l, ILS Rwy 24L, Amdt. 17
Los Angeles, CA—Los Angeles Int'l, ILS Rwy 25L, Amdt. 16, cancelled
Los Angeles, CA—Los Angeles Int'l, ILS Rwy 24R, Amdt. 18
Los Angeles, CA—Los Angeles Int'l, ILS Rwy 25R, Amdt. 2

Effective July 7, 1983

Toledo, OH—Toledo Express, ILS Rwy 7, Amdt. 19
Greer, SC—Greenville-Spartanburg, ILS Rwy 3, Amdt. 15
Greer, SC—Greenville-Spartanburg, ILS Rwy 21, Amdt. 1
North Myrtle Beach, SC—Grand Strand, ILS Rwy 23, Amdt. 5
Denton, TX—Denton Muni, ILS Rwy 17, Amdt. 3
San Angelo, TX—Mathis Field, ILS Rwy 3, Amdt. 17

Effective May 19, 1983

Lawrence, MA—Lawrence Muni, ILS Rwy 5, Amdt. 1

Effective May 5, 1983

Knoxville, TN—McGhee Tyson, ILS Rwy 5L, Amdt. 6
Knoxville, TN—McGhee Tyson, ILS Rwy 23R, Amdt. 8

5. By amending § 97.31 RADAR SIAPs identified as follows:

Effective July 7, 1983

Eliot, ME—Littlebrook Air Park, RADAR–1, Original

Effective May 5, 1983

Knoxville, TN—McGhee Tyson, RADAR–1, Amdt. 21

6. By amending § 97.33 RNAV SIAPs identified as follows:

Effective July 7, 1983

Greer, SC—Greenville-Spartanburg, RNAV Rwy 21, Amdt. 4
San Angelo, TX—Mathis Field, RNAV Rwy 18, Amdt. 3
San Angelo, TX—Mathis Field, RNAV Rwy 36, Amdt. 3

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348, 1354(a), 1421, and 1510); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.49(b)(3))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. The FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Note.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

Issued in Washington, D.C. on May 27, 1983.

John M. Howard,

Manager, Aircraft Programs Division.

CIVIL AERONAUTICS BOARD

14 CFR Parts 207 and 208

[Order 83-5-114]

Charter Trips and Special Services; Terms, Conditions and Limitations of Certificates To Engage in Charter Air Transportation

AGENCY: Civil Aeronautics Board.

ACTION: Order granting blanket waiver.

SUMMARY: The CAB has granted all U.S. certificated air carriers a blanket waiver to permit the operation of charter flights to and/or from the 1984 Democratic and Republican National Conventions carrying state and national delegates and alternates, party officials, and other person participating in the convention and their immediate families, as well as members of the press.

EFFECTIVE DATE: May 20, 1983.

FOR FURTHER INFORMATION CONTACT: Patricia T. Szrom, Chief, Special Authorities Division, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, (202) 673–5088.

SUPPLEMENTARY INFORMATION:

Order Granting Waivers

On May 10, 1983, United Air Lines, Inc., requested a waiver of the provisions of Parts 207 and 208 of the Board's Economic Regulations to the extent necessary to enable it and other U.S. certificated carriers to carry members, delegates and officials of the Democratic and Republican parties, as well as representatives of the press, on charter flights to and from the 1984 political conventions. In support of its request, United States that a waiver is necessary at this time since plans are already being formulated by the political parties for the 1984 conventions. In addition, since these flights would not conform completely to any of the Board's charter rules, carriers would either have to request individual flight waivers or impose conditions on the charters in an attempt to bring them into conformance with the Board's charter rules [1] which would not be in the public interest. Furthermore, United States that the Board granted a similar waiver to all U.S. certificated carriers in 1980 (Order 80–3–4, March 3, 1980) to permit them to perform charter trips to/and or from the 1980 political conventions.

The 1984 Presidential campaign is now underway and the Democratic and Republican National Conventions will once again be the focal point of political activity next summer.[2] As we did in 1980, and also in 1976, we will waive the requirements of §§ 207.11 and 208.6 of the Board's Economic Regulations to the extent necessary to permit U.S. certificated air carriers to operate charters to and/or from the 1984 Democratic and Republican National Conventions carrying state and national delegates, party officials, and other persons participating in the conventions and their immediate families. Authority will be granted also to permit members of the press to accompany the delegates on these charters.

The grant of this waiver will facilitate attendance by the delegates at these events and will permit the news media to give the public the broadest range of coverage of the conventions. We therefore believe that there are special and unusual circumstances warranting waiver of §§ 207.11 and 208.6 of the Board's Economic Regulations, and that such waiver is in the public interest.

List of Subjects in 14 CFR Parts 207 and 208

Charter flights, Consumer protection, Insurance, Reporting requirements, Surety bonds, Travel agents.

Accordingly, acting under authority delegated by the Board in its Regulations, 14 CFR 385.13:

1. We waive the requirements of §§ 207.11 and 208.6 of the Board's Economic Regulations to the extent necessary to permit U.S. certificated air carriers to operate charters to and/or from the 1984 Democratic and Repubican National Conventions carrying state and national delegates

[1] Such as precluding members of the press from participating on the flights.

[2] The Democratic National Convention will be held in San Francisco July 16–20, 1984 and the Republican National Convention will be held in Dallas, August 20–23, 1984.

and alternates, party officials, and other persons participating in the conventions and their immediate families, and members of the press; and

2. This order shall be served on all U.S. certificated air carriers; and

3. The Board may amend or revoke this order at any time in its discretion without hearing.

Persons entitled to petition the Board for review of this order under the Board's Regulations, 14 CFR 385.50, may file their petitions within 10 days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period unless within such period a petition for review is filed, or the Board gives notice that it will review this order on its own motion.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 1505-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 154 and 271

[Docket No. RM80-47-002, et al.; Order No. 94-C]

Regulations Implementing Section 110 of the Natural Gas Policy Act of 1978 and Establishing Policy Under the Natural Gas Act

Issued May 24, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule and order denying rehearing and denying petitions for stay of, or further comment on, final rule.

SUMMARY: On January 24, 1983, the Federal Energy Regulatory Commission (Commission) issued Order No. 94-A, a Final Rule and Order on Rehearing of Order No. 94 (48 FR 5152 (1983)). Order No. 94-A amended the Commission's interim regulations to provide new rules under section 110 of the Natural Gas Policy Act of 1978 (NGPA, 15 U.S.C. 3301-3432) for first sellers who incur production-related costs.

This Order No. 94-C is a companion to Order No. 94-D (Order on Rehearing of Order No. 94-B) which provides special rules for NGPA sections 105 and 106(b) first sellers. Order No. 94-C denies all petitions for rehearing with one exception. This exception permits recovery of direct taxes in the methodology for determining treating and conditioning allowances under § 271.1104(d)(3)(A) of the Commission's regulations.

EFFECTIVE DATE: The amendments to §§ 154.94(k)(2) and 154.94(k)(4) of the Commission's regulations will be effective June 30, 1983. The amendment to § 271.1104(d)(3)(A) will be effective on May 31, 1983.

FOR FURTHER INFORMATION CONTACT: Albert J. Francese, Office of the General Counsel, Rulemaking and Legislative Analysis Division, Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, D.C. 20426, (202) 357-8033.

SUPPLEMENTARY INFORMATION:

I. Introduction

On January 24, 1983, the Commission, by Order No. 94-A [1] issued final regulations to implement section 110 of the Natural Gas Policy Act of 1978 (NGPA) for production-related costs. Order No. 94-A establishes the requirements that a first seller must satisfy to collect an allowance in excess of an applicable maximum lawful price to recover production-related costs under section 110 of the NGPA.[2]

In issuing its final rule, the Commission has continued the basic cost-recovery objective of section 110 of the NGPA and the Commission's regulations implementing that section. At the same time, the Commission has refined the procedures necessary to collect allowances, reduced the administrative burdens and costs on those subject to the regulations, and developed rules that will recognize changes in industry practices without interfering with those practices.

The Commission first issued rules to recover production-related costs under section 110 in its interim regulations of December 1, 1978.[3] After public comment, these regulations were amended in Order No. 94 [4] and, following additional opportunity for public comment, were further amended and issued as final rules in Order Nos. 94-A and 94-B.[5]

Order No. 94-B generally extended to first sellers of gas under sections 105 and 106(b) the same opportunity to collect adjustments as those selling gas priced under other sections of the NGPA for production-related costs. The regulations for such first sellers of gas differ in three respects from the regulations that apply to those selling gas under all other NGPA pricing sections. First, an area rate clause does not constitute evidence that the purchaser specifically provided that an express amount be paid to the sections 105 and 106(b) seller for the delivery of gas. Second, such first sellers may not collect a generic allowance for old delivery systems. Third, the final rule does not permit such first sellers to collect amounts for delivering and compressing gas prior to the effective date of the rule.

The Commission has received several petitions for rehearing with respect to Order No. 94-A. With one exception, this order denies all petitions for rehearing for the reasons set forth in Part II.[6] In addition, Part III of this order

---

[1] Order No. 94-A, Final Rule and Order on Rehearing of Order No. 94, "Regulations Implementing Section 110 of the Natural Gas Policy Act of 1978 and Establishing Policy Under the Natural Gas Act" Docket No. RM80-47-002 (issued January 24, 1983), 48 FR at 5152 (February 3, 1983), III FERC Stats. and Regs. ¶ 30,419.

Order No. 94-A amended the following sections of the Commission's regulations: 18 CFR 154.94, 270.102(b), 271.1100, 271.1103, 271.1104, 271.1105, and 271.1106.

[4] Order No. 94, "Order Amending Interim Regulations Under the Natural Gas Policy Act of 1978 and Establishing Policy Under the Natural Gas Act," Docket No. RM80-47 (issued July 25, 1980), 45 FR at 53099 (August 11, 1980), FERC Stats. and Regs., Preambles ¶ 30,178 (1977-1981).

[5] Order No. 94-B dealt with particular rules implementing section 110 with respect to the first sale of sections 105 and 106(b) gas. *See* Order No. 94-B, "Order Amending Regulations in Subpart B of Part 270 and Subparts E, F, and K of Part 271, and Affirming Certain Final Regulations issued in Order No. 68," Docket No. RM80-47-003 (issued January 24, 1983) 48 FR at 5190 (February 3, 1983), III FERC Stats. and Regs. ¶ 30,421.

[6] This order on rehearing does not consider the issues raised by petitioners concerning the Commission's interim rules, issued January 24, 1983, for delivery and compression allowances (Docket Nos. RM80-73 and RM80-74, 48 FR at 5180, February 3, 1983, III FERC Stats. and Regs. ¶30,420) or the interim rules implementing refund procedures (Docket No. RM83-6, 48 FR at 5197, Feb. 3, 1983, III FERC Stats. and Regs. ¶30,422). Petitioners'

addresses petitions for reconsideration and clarification also submitted in response to order No. 94–A. The Commission clarifies Part 154 of the final rule in two respects. This order and companion Order No. 94–D [7] constitute the Commission's actions on rehearing of Order Nos. 94–A and 94–B, respectively.

II. Discussion of Petitions for Rehearing, Stay, and Further Comment

The final rules of Order No. 94–A were issued on the basis of extensive Commission consideration and an exhaustive public record spanning a four year period. Following issuance of the final rule, two producers, one producer group, two resellers, one pipeline, two local distributors, one distributor trade association, and one state utility commission filed petitions to rehear, reconsider, or clarify Order No. 94–A.[8]

Many of the allegations of error relate to issues which were fully discussed in Order No. 94–A, and the Commission denies these allegations for the reasons stated in that order and in Order No. 94–C. New issues require a more detailed response on rehearing. However, the Commission finds no convincing reason to modity its final rule except for technical revisions.

Petitioners allege that the Commission abused its direction in the following respects: Eliminating the quality standards and the consequent provision allowing for the recovery of costs to treat and condition natural gas to any quality standard; failing to include an adjustment for the production-related allowances to account for inflation; establishing rules under section 110 which petitioners believe may result in a double recovery of costs incurred to perform production-related services; substituting a self-implementing regulatory system for an application procedure; and not making the final rules retroactive.

Petitioners also request rehearing on other aspects of the final rules. These include questions concerning the propriety of the following: the rules requiring cost allocation; the methodology for the allocation of costs to handle crude oil, liquids, or liquefiables; the exclusion of processing from the definition of production-related costs; and the special provision allowing an area rate clause as authority in some defined circumstances for collecting delivery costs. In that regard, producers allege that the Commission unduly restricted the exercise of area rate clauses by permitting them to trigger only delivery allowances, while distributors argue that the Commission abdicated its responsibility by permitting area rate clauses to trigger delivery allowances.

As a related issue, some petitioners allege that the requirement in the rule for express contractual authorization to collect allowances is arbitrary, capricious, and not supported by substantial evidence, unduly interferes with private contracting practices, and constitutes contract interpretation. Those petitioners further allege that the requirement of express contractual authorization to collect interest for past delivery and compression allowances is unfair.

Further, some petitioners criticize the methodology which defines allowances for treating or conditioning costs from two perspectives. One group alleges that in establishing the methodology, the Commission was remiss in not providing adequate prior notice and opportunity for public comment. Another group alleges that the methodology does not go far enough and should be expanded to include direct taxes as well as a portion of general and administrative expenses. Finally, some petitioners allege that the Commission did not consider the objectives of the NGPA or the consequences of the final rule on consumers of natural gas and the environment.

A. Elimination of Generic Quality Standards

Order No. 94–A modified the Commission's section 110 program by substituting the standards established in individual gas sales contracts for generic quality standards. Some petitioners allege that as a result of this action the Commission abused its discretion by reversing Order No. 94 and ignoring the legislative history of the NGPA which they read to preclude the Commission from allowing more costs to provide quality gas than allowed under practices as they existed when the NGPA was enacted. Some petitioners also argue that the Commission has not offered an adequate explanation of the problems which the Commission sought to avoid or of the benefits to be gained by eliminating generic quality standards.

The Commission believes that the reasons for making this change are fully explained in Order No. 94–A and warrant only a brief review here in response to petitioner's allegations. Although the generic quality standards were discussed by nearly everyone who commented on, or filed petitions to rehear Order No. 94, only one commenter supported the use of the standards.[9] On reviewing these comments and petitions, the Commission determined that the use of generic quality standards posed problems for the future that could be avoided by relying directly on the standards set forth in individual gas sales contracts. The primary problem posed for the future by the generic standards is that, even though the generic standards reasonably reflected industry practice at the time the standards were established, they did not provide adequately for future changes in industry practice. Thus, in the future, the generic standards would have had a tendency to freeze rather than reflect industry practices. By replacing the generic standards with rules that refer directly to the terms of the individual contracts, the final regulations provide significantly more flexibility and accuracy.

Petitioners who characterize this change as a reversal of Order No. 94 or prior Commission practice misunderstand the bases of Order No. 94 and prior Commission practice. As discussed in detail in Order No. 94–A,[10] the Commission has looked to contracting practices in determining quality adjustments, beginning with

---

arguments with respect to delivery and compression allowances and refund procedures will be addressed in those dockets.

[7] Order No. 94–D, "Order denying Rehearing and Denying Stay of Order No. 94–B, "Docket No. RM80–003, *et al.* (issued May 24, 1983). Order No. 94–D addresses petitioners' contentions which exclusively apply to Order No. 94–B. Order No. 94–C addresses those issues which apply to Order No. 94–A only and those which could apply to both Order Nos. 94–A and 94–B.

[8] The Commission received timely peirions for rehearing of the final rules in Order No. 94–A from the following petitioners: Southern California Gas Company and Pacific Lighting Gas Supply Company (Docket No. RM80–47–003); Indicated Producers (Shell Oil, *et al.*) (Docket No. RM80–47–005); Gulf Oil Corporation (Docket No. RM80–47–006); UGI Corporation (Docket No. RM80–47–007); Public Service Commission of the State of New York (Docket No. RM80–47–008); and Associated Gas Distributors (Docket No. RM80–47–009).

The Commission also has received a late-filed Petition for Clarification and Application for Rehearing filed by Southern Union Gathering Company (Docket No. RM80–47–010), an Application for Reconsideration filed by Samson Resources Company (Docket No. RM80–47–011), and a Petition for Clarification filed by Transcontinental Pipeline Corporation (Docket No. RM80–47–012).

Requests for clarification are mentioned at this time because certain petitioners styled the same contentions alternatively as bases for requests for clarification or rehearing and because late filed applications for rehearing are treated as applications for reconsideration or clarification.

[9] *See* Order No. 94–A, 48 FR 5152, 5157 (February 3, 1983), III FERC Stats. and Regs. ¶ 30,419 at 30,350.

[10] *Id.*, 48 FR at 5153–55 (February 3, 1983), III FERC Stats. and Regs. ¶ 30,419 at 30,345–48.

individual producer rate cases and continuing through the area rate opinions, the national rate opinions, Order No. 94 and Order No. 94–A. Therefore, the regulations established in Order No. 94–A are consistent with, not a reversal of, prior Commission practice.

One petitioner asserts that replacing the generic quality standards in Order No. 94 with direct reference to contracts in Order No. 94–A in order to more accurately reflect changing industry practice is inconsistent with section 110.[11] That petitioner argues that section 110 was not intended to reflect changing industry practices, but rather was intended to permit production-related allowances only in accordance with industry practice at the date of enactment of the NGPA. In support of that argument, the petitioner cites a statement by Congressman Dingell, the House Floor Manager of the NGPA, when introducing the NGPA. In pertinent part, the statement is as follows:

> Thus, if the function performed is not usually performed by the producer without provision being made for compensation mover and above the amount paid for the gas, prevailing industry practice may guide FERC to approve ceiling price adjustments which the Commission determines appropriate and consistent with the purposes of the legislation. * * * [12]

The Commission disagrees with the petitioner's argument for several reasons. First, section 110 on its face contains no such limitation. Second, the legislative history cited in support of the position does not indicate that prevailing industry practice was to be fixed at any particular point in time. Third, such an interpretation does not comport with the importance of private contractual arrangements under the NGPA.[13] Accordingly, the Commission believes that the final regulations issued in Order No. 94–A are consistent with the intent of section 110.

B. Elimination of the Application Procedure

The final rule requires a first seller of gas subject to the Commission's Natural Gas Act jurisdiction to file a blanket affidavit under section 154.94(k) of the final rule in order to collect production-related cost allowances.[14] The final rule also provides that a first seller of natural gas not subject to the Commission's Natural Gas Act jurisdiction may collect production-related allowances without application to the Commission if he meets the other requirements of the rule. In taking these actions, the Commission eliminated unnecessarily burdensome application procedures of the interim regulations and related requirements for supporting data.

Petitioners argue that the Commission has not proven that the application procedure is burdensome, that the application process is needed to ensure compliance with the requirements of the final rule, and that elimination of the application requirement leaves purchasers without regulatory protection.

The Commission disagrees with petitioners' contentions. The final rule is burden reduction initiative which will avoid regulatory delay that would otherwise result from processing a seller's application. If the Commission were to continue to rely on an application mechanism to approve production-related cost adjustments, it would be faced with a burden of reviewing in a timely fashion every gas sales contract submitted through a formal filing in order to avoid delays in the collection of allowances.[15] First sellers also would be burdened with the need to submit detailed applications. Further, the Commission considered the difficulty of determining appropriate and representative costs for compression and delivery on an individual basis. The difficulty would only be compounded if the Commission were required to approve each request for an allowance on a case-by-case application basis. These consequences are inconsistent with the Commission's overall objective to improve the effectiveness of the section 110 program.

Staff's assessment of the anticipated burden reduction indicates that those who are subject to the final rule will be relieved of a significant paperwork burden. The potential number of applicants consists of approximately 200 large producers and 8,000 small producers. These producers will be relieved of the burden of filing with the Commission several thousands of applications to recover production-related costs.

Contrary to petitioners' arguments, the application process is not the exclusive means by which the Commission can prevent abuse of the final rule. The final rule itself contains safeguards to prevent abuse. First, although first sellers no longer need to file applications with the Commission, § 271.1103(b) of the final rule establishes a general record retention requirement on sellers collecting allowances to preserve such records as may be necessary to identify the amount collected and demonstrate the basis for the collection. A first seller is required to retain the same types of information he otherwise would have to submit to the Commission with an application, and he must make this information available at such time as a field audit is conducted. Second, the final rule also requires sellers to provide gas purchasers with a description of charges a reasonable time before charging for the production-related services.[16] Therefore, purchasers have the opportunity to determine whether these charges are consistent with the Commission's rules and are contractually authorized. These safeguards, coupled with the Commission's power to order refunds, conduct field audits, and initiate enforcement actions under the NGPA, will protect purchasers from pricing violations. Moreover, the Production-Related Costs Board ("Board") established by the interim rule on refund procedures (Docket No. RM83–6)[17] affords purchasers a mechanism for obtaining refunds in the event the Board determines that a first seller has collected an amount for production-related costs in excess of the otherwise applicable maximum lawful price.

C. NGPA Objectives and Economic and Environmental Impact

Some petitioners allege that the Commission's regulations are not consistent with what they claim to be the NGPA objectives to secure an orderly and gradual decontrol of wellhead prices and enhance available gas supplies through incentives for increased exploration and development. Petitioners appear to complain that the Congress, in enacting section 110, intended the Commission to implement that section only if the burner tip price of natural gas were less than the comparable price of oil. Petitioners argue that because pricing parity exists in industrial markets in 1983 rather than 1985, when Congress anticipated that parity would occur, Congress did not

[17] *See*, n.6, *supra*.

intend the Commission to implement the final rule at the present time.

Petitioners do not cite any statutory provisions or legislative history to support their assertion that Congress did not intend the Commission to implement section 110 should natural gas prices reach parity with oil prices. To the contrary, the legislative history suggests the Commission's refusal to allow appropriate allowances under section 110 would be an abuse of discretion.[18]

In addition, petitioners' assertion appears to be based on the contention that section 110 is an incentive pricing section, to be implemented only if the price of natural gas is less than the price of alternative fuels. To the contrary, section 110 is a cost recovery, rather than an incentive pricing section. Although Congress sought to provide incentive prices in certain NGPA Title I sections[19] to, among other things, encourage new gas supplies, the plain meaning of section 110 illustrates that Congress intended that section to serve a different purpose, *i.e.*, to permit a first seller to recover appropriate production-related costs. Thus, the Commission's section 110 jurisdiction is not a solution to petitioners' complaint which relates to the operation of NGPA incentive pricing sections in the marketplace.

In a related issue, some petitioners allege that the Commission abused its discretion by issuing the final rules without first providing a detailed assessment of the effect of the rules on gas prices, markets, supplies, and consumers. In support of their view as to the adverse effects of the rules, petitioners submit affidavits of gas industry executives concerned with anticipated loss of load, increases in gas prices above market clearing levels, unemployment, and regional economic decline as a result of the rules.[20]

To the extent that petitioners' expectations of adverse market impacts are based primarily on the fact that the Commission's final rules allow, under certain conditions, first sellers to recover production-related costs in addition to the applicable maximum lawful price, the Commission reiterates that Congress has made the determination that some such allowances are to be permitted. In enacting the NGPA, Congress, therefore, must have considered the effects on consumers of permitting recovery of production-related costs. The legislative history of the NGPA indicates Congress' efforts to balance and accommodate the conflicting needs of the diverse interest groups affected by the pending legislation.[21] Section 110 reflects a Congressional decision to allow a seller to collect allowances in excess of the maximum lawful price.

To the extent that petitioners' expectations of adverse market impact are based upon the Commission's method of implementing the Congressional scheme, we believe that petitioners' misunderstand how the regulations work and are incorrect in their estimates of market inpact. The Commission's section 110 rules do not mandate that first sellers collect allowances for purchasers for production-related services. Instead, they allow a seller and purchaser to negotiate as to what allowances, if any, the producer may charge in return for prividing the services, as long as the negotiated allowance is no greater than the cost-based allowance deteremined in accordance with the rules.[22] If allowances would increase the price of gas beyond its marketability, then it is in the interest of the buyer and seller to reach an agreement which does not jeopardize that marketability.[23]

The final rule, therefore, protects consumers from unnecessarily high prices, and resultant market impact, in two ways. First, by requiring that the allowances be contractually authorized, the rule provides purchasers with the ability to refuse to contract to pay any unnecessary or excessive allowances.[24] Second, in no case may the allowance exceed the amount calculated in accordance with the rule, which the Commission has determined to be cost-based and no more than necessary.[25]

In a related matter, some petitioners assert that the National Enviromental Policy Act of 1969 ("NEPA") and the Commission's regulations implementing NEPA, require that the Commission prepare an assessment of the impact of a Commission action which will or may have a significant effect on the quality of the human environment.[26] Petitioners offer the affidavits discussed above to show that the rules will result in increasingly higher gas prices, which they argue will cause fuel-switching and a concomitant increase in pollution.

The Commission disagrees with petitioners that NEPA requires the performance of an environmental assessment or other NEPA review of this rule. Analysis of federal actions is premised upon the existence of a direct connection between the federal action and an environmental effect. This rule has no such direct connection, both because of the nature of the rule and because of the rule's relationship to the natural gas marketplace.

With respect to the nature of the rule, the rule does no more than satisfy the Commission's statutory responsibility to allow cost-recovery for activities that generally must be performed prior to transportation of natural gas by pipeline. The rule does not impose any obligation on any person to perform these production-related activities, which would be performed without the rule. It does not require or authorize any person to construct facilities for such services. It is not an incentive rule to encourage exploration, development or production-related activities. Thus, the rule by itself does not directly cause any activities having environmental effects.

With respect to the rule's relationship to the natural gas marketplace, the rule is coincident to a variety of economic conditions and activities which themselves may independently have environmental and economic impacts. These intervening conditions and activities include the terms of existing and future natural gas contracts, patterns of industrial, commercial and residential gas consumption, the level of industrial activity, general economic conditions, the price of alternative fuels, the marketability of gas, fuel-switching in relation to conversion costs, and gas conservation efforts. This is not simply a matter of intervening factors obscuring the relationship between the Commission's rules and effects on the environment. It is rather that the rule

[18] *See*, n.12, *supra*.

[19] *See, e.g.*, NGPA sections 102, 103, 107 and 108.

[20] Petitioners also request a stay of the effectiveness of the Commission's Order pending rehearing and further market analysis and opportunity for further comment on the effect of Order No. 94–A on gas markets. In view of the Commission's denial of rehearing and determination that no further market analysis and comment is necessary, the requests for stay are denied.

[21] *See, e.g.*, H.R. Rep. No. 496, pt. IV, 95th Cong., 1st Sess. 101, 110–21 (1977), H.R. Rep. No. 1752, 95th Cong., 2d Sess. 110–11 (1978), and Conference Report, I FERC Stats. and Regs. ¶ 3,101; *See also*, Pennzoil, 645 F.2d at 371, n.37 (5th Cir. 1981), *cert. denied*, 454 U.S. 1142 (1982).

[23] See Order No. 94–B, 48 FR at 5195 (February 3, 1983), III FERC Stats. and Regs. ¶ 30,421 at 30,413, where the Commission noted that the "extent to which sellers and purchasers will amend their contracts so as to collect higher delivery allowances after the effective date of this order will be limited by the inability of producers to sell gas at a price which the pipelines consider unmarketable."

[24] Order No. 94–A, 48 FR at 5155 (February 3, 1983), III FERC Stats. and Regs. ¶ 30,419 at 30,348.

[25] 18 CFR 271.1104(d), II FERC Stats. and Regs. ¶ 24,214 at 14,375–78.

[26] *See* "Request of Associated Gas Distributors for Rehearing of Order Nos. 94–A and 94–B," (Docket No. RM80–47–009) filed Feb. 23, 1983, at 20. Petitioners request a stay of the effectiveness of the Commission's rule pending rehearing and an environmental assessment. In view of the Commission's denial of rehearing and determination that an environmental assessment is not necessary, the petitioner's request for stay is denied.

cannot be said to have any direct environmental effect whatsoever in light of these intervening considerations. In this connection, petitioners' argument, that this rule will affect the environment adversely due to fuel-switching that results from higher gas prices, is inaccurate because it fails to account for the marketability of the gas, the price of alternative fuels, and other intervening conditions that will restrain purchasers from agreeing to unnecessarily high production-related allowances.

For the Commission to undertake a NEPA review in light of these diverse considerations would be an exercise in sheer conjecture. The Commission has long maintained that activities of the kind at issue here do not necessitate environmental review under NEPA in those instances when the number of variables involved render any environmental consequences unforeseeable.[27] The Commission believes in the continued validity of this approach. NEPA does not require agencies to engage in environmental review, particularly environmental impact statements, when the causal relationship between a federal action and certain environmental effects is remote and conjectural.[28] We believe that this principle applies in this case. There is no direct connection between the rule and any changed patterns of consumption or other market effects, much less the environmental effects of any such actions, that would warrant examination of the issue beyond the economic considerations that the Commission has already taken into account.[29]

D. Contractual Authority and Area Rate Clauses

The final rule establishes the requirements that a first seller must satisfy in order to collect production-related allowances, one of which is that the seller be "expressly authorized" to be compensated for bearing that production-related cost. Section 271.1104(c)(4) establishes a two-part test for determining "expressly authorized." First, the seller must agree to provide a specified production-related service. Second, the purchaser must agree to compensate the seller for that service. The rule also requires that the purchaser's obligation to pay a production-related cost allowance be evidenced by a contract provision expressing a purchaser's obligation to pay an amount separate from the cost of gas or by an area rate clause as defined in § 154.93(b–1) only for delivery costs.

Some petitioners argue that § 271.1104(c)(4) of the final rule, defining the types of express contractual provisions which constitute adequate authority to collect section 110 allowances, is arbitrary, capricious, an abuse of discretion and not based on substantial evidence in the record. Citing *Pennzoil Co.* v. *FERC ("Pennzoil I")*,[30] these petitioners also argue that the final rule constitutes undue interference with private contracting practices and is an effort by the Commission to interpret contracts over which it has no Natural Gas Act jurisdiction.

The Commission disagrees with petitioners' allegations and believes that under any standard of review the Commission's actions concerning express contractual authorization are supported by an extensive public record and Commission expertise and experience from individual producer cases and area and national rate opinions.[31]

The requirement of the final rule for express contractual authorization is not new. The new rule continues the emphasis which the interim rules placed on the individual gas sales contract as the instrument for determining whether adequate contractual authority exists to permit the collection of allowances. The final rule defines the kind of contractual authority required to collect production-related costs on the basis of consistent prior Commission practice.

In Natural Gas Act proceedings, the Federal Power Commission (FPC) found that area clauses constituted adequate contractual authority to collect base national rates and gathering and delivery allowances. The FPC did not establish or recognize allowances for recovery of compression, treating or conditioning costs in national rate proceedings;[32] however, the FPC did recognize that the base national rate was a ceiling rate which could be exceeded by an adjustment for gathering, delivery, and other recognized adjustments. Pre-NGPA practice considered treating and conditioning as "other quality adjustments" to be made in accordance with the provisions of particular gas sales contracts.[33] The Federal Power Commission, therefore, did not permit interstate sellers to use an area rate clause as authority to collect adjustments for treating, conditioning, or compression.

The final rule is consistent with pre-NGPA practice by precluding an interstate seller from using area rate clauses as authority to collect non-delivery allowances. Because of the use of area rate clauses in Natural Gas Act practice as discussed above, the final rule requires a contractual provision providing for payment of a separate amount for non-delivery allowances as requisite authority to collect such allowances. The line which the Commission drew in the final rule with respect to the use of area rate clauses and separate contractual provisions mirrors longstanding Commission practice in implementing the Natural Gas Act concerning producer rates and its deference to the intent of the parties to gas sales contracts that were made under that practice.

These considerations guided the Commission's implementation of its statutory authority under section 110 which, in turn, lead to the requirement of express contractual authorization in the final rule. The basis and purpose of the Commission's actions are adequately supported by the record.

The Commission also disagrees with petitioners' contention that the final rule

---

[27] *See* Opinion No. 770, "National rates for Jurisdictional Sales of Natural Gas," RM75–14, issued July 27, 1976, 56 F.P.C. 509 at 596, *reh. denied*. Opinion No. 770–A, 56 F.P.C. 2698 (1976), *aff'd*, American Public Gas Ass'n. v. FPC, 567 F. 2d 1016 (D.C. Cir. 1977), *cert. denied*, 435 U.S. 907 (1978). Opinion No. 770 was the last national rate case prior to enactment of the NGPA. In that opinion, the FPC noted that the existence of numerous market variables made any predictions of the environmental impact of the order on the various energy markets extremely difficult.

[28] *See e.g.*, Sierra Club v. Hodel, 544 F.2d 1036, 1039 (9th Cir. 1976); Save the Bay v. United States, 610 F.2d 322, 326 (5th Cir. 1980). In addition, the regulations of the Council on Environmental Quality, the agency responsible for administering NEPA, also recognizes that there are some federal actions which, by their nature, do not raise the kind of environmental concerns against which NEPA is intended to guard. These are described as actions which do not individually or cumulatively have a significant effect on the human environment. Neither an environmental assessment not an environmental impact statement is required for such actions. *See* 40 CFR 1507.4 (1982).

[29] Petitioners' allegation that the Commission has violated its own regulations by not performing NEPA review is incorrect. The Commission's regulations require the preparation of an environmental impact statement when the Commission determines that the contemplated activity is a "major federal action significantly affecting the quality of the human environment." The regulations do not address the situation at issue in this rule where the Commission believes that no NEPA review is required. *See* 18 CFR 2.80–2.82 (1982).

[30] *See*, Pennzoil, 645 F.2d 360, *cert. denied*, 454 U.S. 1142 (1982).

[31] In issuing rules, an agency may look to other proceedings before it, Moss v. FPC, 502 F.2d 461, 465 (D.C. Cir. 1974), *cert. denied*, 422 U.S. 1020 (1975); or look beyond the record and draw upon its own expertise and experience, General Telephone Co. of Southwest v. United States, 449 F.2d 846, 862 (5th Cir. 1971).

[32] Order No. 94–A 48 FR at 5.184 (February 3, 1983), III FERC Stats. and Regs. ¶ 30,419 at 30,360.

[33] Order No. 94–A, III FERC Stats. and Regs. ¶ 30,419 at 30,348; *see*, also, FPC national rate regulations, I FERC Stats. and Regs. ¶¶ 10,456A and 10,456B.

is inconsistent with *Pennzoil I*. The court in *Pennzoil I* noted that NGPA Section 101(b)(9) allows the contract to operate in the marketplace so long as the contract price for the sale of natural gas under certain NGPA pricing sections is less than the maximum lawful price.[34] Section 271.1104(d) of the final rule incorporates the logic of section 101(b)(9).

Section 271.1104(d) of the final rule authorizes the seller to collect the lesser of an amount expressly authorized under the contract or the generic allowance as the amount necessary to recover production-related costs borne by the seller. The Commission intends that § 271.1104(d) comport with the emphasis which NGPA section 101(b)(9) places on the contract. In so doing, § 271.1104(d) references the requirement of § 271.1104(c)(4) that the gas sales contract expressly authorize collection of production-related allowances by a separate contract provision or by an area rate clause only for delivery allowances. Therefore, the final rule incorporates but does not displace private contractual arrangements.

Section 271.1104(c)(4) of the final rule is consistent with the emphasis which *Pennzoil I* places on the operation of the individual gas sales contract in the marketplace. The requirement for express contractual authorization does not interfere with private contractual practices because the Commission is not requiring parties to amend their contracts or to draft new contracts to conform to the regulations. The final rule encourages private contractual arrangements in a manner consistent with the interpretation of section 101(b)(9) in *Pennzoil I*.

Pennzoil I discussed, among other things, the Commission's authorities with respect to the interpretation of gas sales contracts under pricing sections 102 through 109. That particular aspect of the *Pennzoil I* decision does not have any bearing upon the final rule which does not, either by intent or effect, constitute contract interpretation. The final rule identifies qualifying first sellers on the basis of eligibility criteria which tie the availability of section 110 allowances to the presence of specific contractual provisions governing the purchase and sale of gas and production-related costs. By defining eligibility by reference to the terms of the contracts governing the sale of gas, the final rule establishes criteria which the seller must meet in order to collect allowances under the rule.

[34] Pennzoil, 645 F.2d at 372–76, *cert. denied*, 454 U.S. 1142 (1982).

The requirement of the final rule for express contractual authorization is similar to the requirement of eligibility, through a negotiated contract price requirement, of those tight formations of natural gas which qualify for incentive prices under NGPA section 107(c)(5). Section 107(c)(5) provides, in part, for incentive prices "to the extent that such special price is necessary to provide reasonable incentives for the production of such high-cost gas." In upholding the Commission's use of the negotiated contract price requirement, the Former Fifth Circuit noted that "advertence to the terms of private contracts in delineation of eligibility for price categories is not novel."[35]

E. Retroactivity and Interest

Consistent with basic principles of administrative law, the final rule operates prospectively only.[36] In making the rule prospective, the Commission sought to avoid the substantial burden and inequity that may result by reopening past transactions that developed under the interim rules. Moreover, a retroactive application of the final rule would require a change in practice established under the interim rules without notice in the interim rules of that possibility.

Some petitioners argue that the NGPA requires that the allowances of the final rule should be made retroactively effective to December 1, 1978 because that is the date section 110 became effective. Petitioners also argue that some producers have been harmed by the delay in the Commission's implementation of section 110 because they have invested capital in reliance on the Commission's complete implementation of section 110 on December 1, 1978. They further allege that the Commission has no record to support its view that the class of persons possibly directly harmed by prospective application of the final rule is small.

Contrary to petitioner's contentions on rehearing, neither the legislative history nor section 110 on its face requires that the Commission's final implementing regulations be effective December 1, 1978. The legislative history precludes the denial of appropriate allowances. The Commission's interim and final regulations do not deny appropriate allowances. They establish a method of recovering certain production-related costs consistent with the legislative history.

Some petitioners incorrectly argue that the Commission delayed its implementation of section 110. These petitioners overlook the interim rules in effect since December 1, 1978, and the amendments made to those rules after that date. In essence, petitioners would have the Commission invalidate the rules that have been effective since enactment of the NGPA by applying new rules to old transactions. This we decline to do for the reasons stated in Order No. 94–A and herein.

Some petitioners argue that they have invested capital in reliance on a retroactive application of the final rule. This argument is difficult to follow since sellers had no way of knowing the configuration of the final rules on December 1, 1978, or at any time before issuance of the final rule. Any capital investments made before January 24, 1983 must have been based on the then existing rules. There was no other reference point available. If the final rules result in any hardship, inequity, or an unfair distribution of burdens, a first seller may file for relief under section 502(c) of the NGPA.

In a separate but related issue, § 271.1104(e)(2) of the final rule permits a first seller to collect interest on past costs incurred to deliver or compress natural gas if expressly authorized under the terms of the contract. Petitioners argue that the Commission should not require contractual authorization to collect interest because the Commission is responsible for the delay in issuing rules providing for generic allowances.

There are several difficulties with petitioners' contention that the Commission should permit a charge for interest in the absence of contractual

[35] Pennzoil Co. V. FERC, 671 F.2d 119, 126 (Former 5th Cir. 1982) ("*Pennzoil II*"). The Court affirmed the Commission's Order No. 99, Final Rule High-Cost Natural Gas Produced from Tight Formations, Docket No. RM79–76, (issued Aug. 15, 1980), and Order No. 99–A, Order Denying Rehearing and Clarifying Order No. 99, Docket No. RM79–76 (issued Oct. 21, 1980). Section 271.702(a)(1) of the final rule restricted entitlement of an NGPA section 107 price to a "contract which either specifically references the incentive pricing authority of the Commission under section 107 of the NGPA or contains a fixed rate or a fixed escalator clause. * * *"

[36] Order No. 94–A, 48 FR at 5161 (February 3, 1983), III FERC Stats. and Regs. ¶ 30,419 at 30,355–56.

Order No. 94–A contains a special rule in § 271.1104(e)(1) which permits collections of delivery and compression allowances to the earlier date of an application, or July 25, 1980, the date Order No. 94 was issued. Petitioners argue that this treatment permits first sellers to collect delivery and compression allowances retroactively. To the contrary, Order No. 94 itself suspended applications and stated that the Commission would permit the collection of such generic allowances to the earlier of the dates mentioned when the Commission established such allowances. *See* Order No. 94, FERC Stats. and Regs., Preamble ¶ 30,178 at 31,216 (1977–1981); Order No. 94–A, 48 FR at 5168 (February 3, 1983), III FERC Stats. and Regs. ¶ 30,419 at 30,367.

authorization. First, the requirement of express contractual authorization is a safeguard of the rule to prevent sellers from making unjustified charges, and elimination of that safeguard would expose purchasers to a claim not in the contemplation of the parties. Second, it is logically compelling to conclude that because collection of past costs to deliver and compress gas must be expressly contractually authorized, the collection of interest on such amounts also must be so authorized.

Third, Order No. 94 gave clear notice that the Commission was temporarily suspending applications for compression and delivery allowances pending development of generic allowances.[37] First sellers were, therefore, aware that there would be a delay in the development of generic allowances. Having such notice, the parties could have agreed to provide for the payment of interest under the terms of their gas sales contract. It is inappropriate for the Commission to renegotiate contracts on behalf of sellers who failed to provide for the collection of interest.[38]

F. Inflation Recovery

The final rule establishes defined limits concerning the recovery of allowances for necessary production-related costs. These limits are expressed through a methodology for treating and conditioning which accounts for costs over the next two years and through generic limits in the case of delivery and compression. Petitioners contend these limits should escalate by the annual inflation adjustment factor defined in NGPA section 101(a). In support of this view, they seem to argue that inflation adjustments apply to prices and that allowances under section 110 are prices.

Petitioners confuse the pricing objectives of NGPA sections 102 through 109, which expressly require application of section 101(a) inflation adjustments, with the cost recovery objectives of section 110. Section 110 does not establish a maximum lawful price, but rather authorizes the Commission to permit allowances for recovery of necessary costs. Unlike sections 102 through 109, section 110 does not expressly require application of the annual inflation adjustment factor to production-related allowances.

Petitioners also fail to recognize that the limits of the rule are cost-based and take into account the effect of inflation up to 1985. The methodology for treating and conditioning recognizes anticipated operating and maintenance expenses for 1983 and 1984 on the basis of specific costs. Moreover, the generic allowances for delivery and compression facilities are representative of costs through January 1, 1985 when the Commission may revisit the issue of recovery of the costs of inflation. To the extent these allowances result in special hardship, inequity, or an unfair distribution of burdens, a first seller may file an application for relief under NGPA section 502(c).[39]

G. Double Recovery

Some petitioners are concerned that the NGPA Title I price for section 104 gas already includes compensation for production-related costs and that double recovery would result if the Commission were to permit section 110 allowances to apply to first sales of gas under this section. Petitioners also request that the Commission nullify contractual provisions which result in the collection of costs already recovered in NGPA maximum lawful prices.

Section 110 of Title I provides that a first sale price shall not be considered to exceed the maximum lawful price if such first sale price exceeds the maximum lawful price to the entent necessary to recover production-related costs. In explaining section 110, the Conference Report specifically provides that "all ceiling prices under the Act are are exclusive of state severance taxes borne by the seller and any adjustment which may be allowed by the Commission for specified production-related costs."[40] Neither section 110 nor the Conference Report contains any exception in the case of first sales made under section 104 to preclude the addition of production-related allowances to first sale prices made under that section. Accordingly, petitioners' reliance on earlier phases of the legislative history is misplaced in light of section 110 and the above-cited Conference Report language that NGPA maximum lawful prices are exclusive of Commission-approved allowances under section 110.[41]

Sections 102 through 109 of Title I establish maximum lawful prices for first sales of raw gas at the wellhead or of gas at any other point downstream before commingling in a pipeline's system supply. The fact that the maximum lawful price applies at the wellhead indicates a Congressional intent that the maximum lawful price does not include production-related costs. Congress intended that the maximum lawful price apply to a first sale even if no production-related services are performed. If such costs are incurred, then the first sale price may be exceeded by the amount of the production-related allowance.

Petitioners also cite another section of the NGPA Conference Report explaining section 110 that "in certain cases, the just and reasonable rates under the Natural Gas Act include an allowance for production-related costs. The Conference Report is not intended to alter or change that practice."[42] Contrary to petitioners' contention, the Commission interprets this statement to mean that the Commission in implementing section 110 may continue its prior practice under the Natural Gas Act to recognize adjustments to the national base rate.[43] The final rule continues that practice by recognizing adjustments to the maximum lawful price.

NGPA section 104 incorporates as maximum lawful prices the unadjusted base national rate which the Commission determined to be just and reasonable under the Natural Gas Act. Section 104 escalates the unadjusted base national rate for inflation. In Opinion No. 90, the Commission indicates that the NGPA section 104 maximum lawful price is the base national rate without recognized Natural

---

[37] *See* n. 36, *supra*, for a related discussion in the final rule and Order No. 94.

[38] The Application of Indicated Producers filed February 22, 1982, Docket No. RM80-47-005, at 21, comments that "The Commission has set a rate of interest generally applicable to payments or refunds which it prescribes." The Application for Rehearing of Gulf Oil Corp., filed February 23, 1983 (Docket No. RM80-47-006) at 3 disagrees with Producers' comment "to the extent that their statement could be interpreted as on statement that the Commission's generally applicable interest rates apply to all payments or refunds." Because it is unclear what Indicated Producer's point is, the Commission is unable to clarify Gulf's concern with producers' comment.

The Commission only intends that the interest rate formula stipulated in 18 CFR 154.102 for producer refunds of excessive rates be applicable to determine the rate of interest for allowances for past costs incurred to deliver and compress gas, if the collection of interest was expressly authorized in the gas sales contract.

[39] The Commission's interim rules for delivery and compression acknowledge that inflation has been taken into account in developing the five cents delivery allowance for old delivery systems at least to 1985. The Commission indicated that it may reevaluate the effect of inflation, after 1985, on allowances for gas which is still regulated. 48 FR 5184 (February 3, 1983), III FERC Stats. and Regs. ¶30,420 at 30,395.

[40] Conference Report, I FERC Stats. and Regs. ¶ 3.101 at 3.098

[41] The "Application for Rehearing of Order No. 94-A by the Public Service Commission of the State of New York," filed Feb. 23, 1983, Docket No. RM80-47-006, at 4, cites H. Rept. No. 94-543, Vol. II, 95th Cong., 1st Sess. at 399.

[42] *Id.* I FERC Stats. and Regs. ¶ 3.101 at 3.096.

[43] *See* FPC national rate regulations, I FERC Stats. And Regs. ¶ 10,456A and 10,456B (18 CFR 2.56, 2.56(a) (1982)).

Gas Act adjustments. Opinion No. 90 [44] observed that:

> In our regulations implementing Sections 104 and 106(a) of the NGPA (the provisions of the NGPA covering natural gas which is subject to our area and national rate opinions), the Commission indicated that the base area and national rates, not the adjusted area and national rates, were the rates which should be escalated for inflation in accordance with the provisions of Section 104 and Section 106(a).[7] * * *
>
> [7] The one exception was the Permian area rate which included serverance taxes."

In light of the Conference Report and the language of section 110, the Commission is not persuaded that there is any convincing reason to invalidate provisions of contracts made before the NGPA or to preclude contract amendments in order to avoid alleged double recovery. The solution which petitioners offer is unnecessary.

Petitioner's line of argument would have the Commission examine each gas sales contract to determine what amounts, if any, were actually being collected under various quality adjustment and other production-related cost provisions pursuant to contracts as of April 1977. The petitioner seems to suggest that this procedure is necessary to avoid double recovery of costs to bring gas to minimum quality standards and to determine pre-NGPA industry practices.

The Commission is not persuaded that this suggestion has any merit. First, inquiring into the terms of individual gas sales contracts would be an extremely burdensome and administratively time-consuming effort producing no benefits at the conclusion of the process. Second, inquiry into contracts relating to first sales which took place six or more years ago would be a futile venture into stale transactions and would have remote relationship to current industry practice which is the basis of the final rule. Nothing in the NGPA warrants this type of administratively burdensome investigation.

H. Issues Related to Allowances for Treating and Conditioning

1. *Notice and Comment.* Some petitioners allege that they did not have adequate public notice and opportunity to comment on the cost-of-service methodology for computing the limits of necessary costs to treat and condition gas.

The Commission believes these petitioners are in error if their claim is that notice of every item of the final regulations is required. Notice is adequate when it provides a description of the subjects or issues being considered by the Commission.[45] 5 U.S.C. 553. This the Commission has done.

Concerning the specific issue raised by the commenters, *i.e.*, the methodology for determining allowances for production-related services like treating and conditioning, it is true that no methodology was specifically proposed by the Commission prior to the issuance of Order No. 94–A. However, the issue of the appropriate level of cost recovery has been an issue since the beginning of this proceeding. Throughout the proceeding, many commenters maintained that the Commission should allow recovery of all costs set out in section 110, not merely those costs to exceed minimum quality standards, plus a return on equity.[46] Other commenters echoed this claim urging the Commission to allow the recovery of out-of-pocket costs plus a return on investment.[47]

After considering these comments which fairly discussed the issue of the appropriate level of cost recovery, the Commission adopted a methodology which provides for recovery of no more than an amount necessary to recover production-related costs, *i.e.*, the costs urged by certain commenters.

The methodology set out in Order No. 94–A provides a mechanism which is responsive to the comments regarding recovery of costs to perform production-related services like treating and conditioning. Moreover, it is a methodology which follows very closely the Commission's experience in setting an amount that allows cost recovery plus a reasonable return under the Federal Power Act and the Natural Gas Act. Thus, the methodology is in no way unusual or unique. Because the methodology is based on accepted rate setting principles and responds to comments, we believe that all commenters were on notice that a cost recovery methodology like, or very similar to the one set out in Order No. 94–A could be adopted. We do not believe the Commission is required to provide additional notice and comment when it, in essence, adopts a proposal urged by a commenter.

2. *Direct Taxes and General and Administrative Expenses.* The Commission's regulations include operation and maintenance expenses in the cost-of-service methodology for treating and conditioning without defining the nature of those expenses. The preamble to the regulations explains the Commission's intent to include federal income taxes in the cost of service methodology and to exclude general and administrative expenses allocated to treating and conditioning.[48] petitioners seek clarification of or rehearing on the Commission's treatment of direct taxes which are not specifically discussed in the preamble or the regulations and reconsideration of its treatment of general and administrative expenses under its cost of service methodology for treating and conditioning allowances.

The Commission believes that direct taxes are a legitimate cost of doing business and, therefore, the Commission intends direct taxes to be included in the cost of service methodology. To accomplish this objective, the Commission is designating direct taxes as "taxes other than income taxes". This treatment is consistent with the treatment of direct taxes under the Commission's Uniform System of Accounts for natural gas companies.[49] Section 271.1104(d)(3)(A) is amended, therefore, to clarify that intention by adding a new subsection (5) to include taxes other than income taxes developed for each of the years 1983 and 1984 on the basis of actual taxes paid in 1981 and 1982, as available, and estimates of future taxes. Because this is a clarification of the intent in the final rule, the Commission believes that there is good cause to make the amendment effective on publication in the **Federal Register**.

The Commission properly excluded general and administrative expenses allocated to treating and conditioning because this type of cost typically represents a relatively small part of a company's total costs and because of the difficulty involved in making cost allocations of such expenses. Petitioners have offered no evidence that such expenses constitute a large cost item or that their allocation would not be difficult. Accordingly, administrative and general expenses are excluded from the Commission's cost-of-service

methodology for treating and conditioning allowances. The Commission, however, is aware that some smaller compaines may have substantial treating and conditioning operations. Where exclusion of general and administrative expenses imposes a special hardship, inequity, or an unfair distribution of burdens, a person may seek an adjustment under NGPA section 502(c).

3. *Allocation of treating and conditioning costs when crude oil, liquids or liquefiables are part of the gas stream.* Section 271.1104(d)(3) of the Commission's regulations requires an allocation of treating and conditioning costs when crude oil, liquids, or liquefiables are a part of the gas stream. The regulations provide for the so-called "straight Btu method" of cost allocation.[50] The regulations further provide that this method is to be used only when another method has not already been determined by the Commission as the appropriate method for the particular situation involved or when the Commission has not expressly prohibited the Btu method for the particular services involved.

Some petitioners argue that the Commission has permitted allowances for the costs of treating and conditioning the gas stream before removal of crude oil, liquids, or liquefiables without requiring an allocation of costs. Other petitioners argue that the Mcf basis for allocation is more appropriate than the Btu method because that method reflects the way costs are incurred.

With respect to the first contention, petitioners ignore the fact that the regulations require an allocation of treating and conditioning costs incurred prior to removal of crude oil, liquids or liquefiables from the gas stream. The Commission believes that gas customers should not be charged an allowance for production-related costs associated with crude oil, liquids, or liquefiables unless such costs were incurred to benefit gas customers. The Btu method allocates cost responsibilities in recognition of the possible benefit of the service to gas customers.[51]

With respect to the second contention, the Commission in its discretion decided that section 110 should be implemented using a heating value allocation method which relates the relative cost responsibilities to the various constituents and products based on their respective energy content. The Commission believes that the Btu method makes the difficult process of cost allocation simplier and administratively more manageable. The Commission's regulations do not preclude other approved methodologies, including the Mcf method, with respect to a particular service and seller, as appropriate.

Some petitioners cite the Administrative Law Judge's *Initial Decision on Liquids/Liquefiables Issue, Southern Natural Gas Co.*, Docket Nos. RP80–102–006, *et al.*,[52] as support for the proposition that the Mcf method of allocation is appropriate for purposes of allocating the costs of treating and conditioning the gas stream under section 110 of the NGPA prior to the removal of crude oil, liquids, or liquefiables.

Although that decision did conclude that a volumetric allocation methodology was appropriate for the purpose of allocating costs to liquefiable hydrocarbons,[53] that decision is an initial decision of an Administrative Law Judge and is pending on review before the Commission. Consequently, it is unclear at this time what the outcome of the issues raised will be. Moreover, even if the Commission were to affirm that decision, the decision would have no bearing on the final rule because the relevant issue in *Southern Natural Gas Co.* is the appropriate methodology to allocate transmission costs to liquids and liquefiables in the context of a particular pipeline rate case. The decision does not deal with the allocation of treating and conditioning costs when crude oil, liquids, or liquefiables, are a part of the gas stream.

I. Processing.

Section 271.1104(c)(7) of the final regulations removes "processing"[54] from the list of activities included within the definition of production-related costs. Certain petitioners argue that the Commission erred in removing the term "processing" or at least should clarify its intent to permit an allowance for processing in appropriate circumstances. In support of their position, they point to the language of NGPA section 110 which includes processing as one of the activities for which "production-related costs" can be allowed and to certain situations in which consumers are benefited as a result of removal of high valued products regardless of the technical definition of the removal procedure.

These petitioners overlook the broad discretion which Congress gave the Commission to implement section 110. The Commission has exercised its discretion to preclude collection of allowances for processing because of its conclusion that processing costs generally are not incurred for the benefit of gas customers. Indeed, the revenues from the sale of these products accrue to the owners of the products.[55] Because processing generally does not confer a benefit on gas customers, gas customers should not be responsible for paying for this activity. However, the adjustment procedure of § 271.1106 applies to processing costs in the event of special hardship, inequity, or unfair distribution of burdens.[56]

III. Requests for Clarification of Order No. 94–A

Petitioners have requested clarification of §§ 271.1104(c)(4), 271.1104(f)(1), and 271.1104(g) of the final rules in various respects.[57] The discussion below considers each request for clarification by reference to the related section of the final rule. The following discussion also clarifies the Natural Gas Act filing requirements in § 154.94(k)

A. Effect of Contract Amendments (§ 271.1104(c)(4))

Indicated Producers ("Producers") ask the Commission to clarify the regulations to provide that contracts may be amended prospectively without a seller's being held to have waived any claim that the original contract language was sufficient to authorize collection of the allowances.

---

[50] Order No. 94–A, 48 FR. At 5165 (Febuary 3, 1983), III FERC Stats. and Regs. ¶ 30,419 at 30,362; 18 CFR 271.1104(c)(7)(ii), II FERC Stats. and Regs. ¶ 24,214 at 14,375.

[51] *Id.*, 48 FR at 5165 (February 3, 1983), III FERC Stats. and Regs. ¶ 30,419 at 30,363. The amended definition of "production-related costs" recognizes the point made by commenters and petitioners that the "mere fact that a particular cost is incurred to handle liquids or liquefiable hydrocarbons does not mean that gas customers derive no benefit from the activity that engendered that cost." The first seller and purchaser must be prepared to demonstrate that benefit.

[52] Initial Decision on Liquids/Liquefiables Issue, Southern Natural Gas Co., Docket Nos. RP80–102–008, 22 FERC ¶ 63,026 (issued January 27, 1983).

[53] *Id.*, 22 FERC ¶ 63,026 at 65,116.

[54] Processing refers to the extraction of high-valued natural gas liquids or liquefiable hydrocarbons, including ethane, propane, butane, natural gasoline other hydrocarbon constituents, and non-hydrocarbon products of value such as helium. Usually, their removal is not necessary for safe and efficient handling and transportation of natural gas. Rather, these constituents have a commodity value of their own to the owner of the constituents, independent of the natural gas stream from which they are extracted. See Order No. 94–A, 48 FR at 5153, 5165 (February 3, 1983), III FERC Stats. and Regs., ¶ 30,419 at 30,345 and 30,363.

[55] *Id.*, 48 FR 5165–66 (February 3, 1983), III FERC Stats. and Regs. ¶ 30,419 at 30,363.

[56] *Id.*

[57] Petitions for clarification and reconsideration are listed at n.8, *supra*.

The final rule permits a seller and purchaser of gas to amend their contract to expressly authorize the collection of production-related allowances. Typically, a gas sales contract would be amended to reflect the intent of the parties concerning production-related costs and services. For example, because an area rate clause would not suffice, a contract would have to be amended to expressly authorize treating and conditioning allowances, unless there is express authorization in the contract. In this example, a seller could gain no advantage in relying on the authority of the existing contract.

However, in cases where there is a question whether the existing contract meets the requirements of the rule, producers would have the Commission preserve their rights as first sellers under the existing contract while they seek to amend their contract to meet the requirements of the rule. If the parties determine that an amendment is necessary to provide adequate authority to charge for an allowance, neither the purchaser nor the seller should be permitted by rule to select the most favorable contractual provisions for the payment of production-related services. The parties are bound by their own agreement which reflects their intent as to the authority and applicability of contract provisions. The parties will typically include a provision in the contract concerning the effect of an amendment on existing contract language. If the parties do not provide for this contigency, a court may be asked to decide whether the amendment supersedes the language of the existing contract or precludes reliance on it. The Commission is not convinced that it is appropriate to amend its regulations as petitioners request because such an amendment may modify a purchaser's legal defenses in a way that is inconsistent with the intent of the parties.

B. Conflict Between an Area Rate Clause and a Specific Contract Provision (§ 271.1104(c)(4))

The preamble of the final rule provides that a specific contractual provision expressly authorizing a delivery allowance prevails over an area rate clause unless both clauses operate in the alternative in which case the parties must mutually agree which should control.[58]

Petitioners contend that by virtue of this statement the Commission is requiring additional contract authority for collection of allowances. To the contrary, the Commission is merely referencing a rule of contract construction which it believes reflects reasonable commercial practice. It is expected that if a gas sales contract were amended to add an area rate clause, the parties at that time would have included a provision in their contract expressing their intent as to the applicability of the area rate clause and the specific contract provision. If the parties have not covered this contingency in their agreement, a specific contract clause specifying a delivery allowance prevails over an area rate clause unless the provisions are phrased in the alternative.

C. Side Agreements (§ 271.1104(c)(4))

The final rule is premised on the written gas sales contract and requires that the parties include provisions for express contractual authorization to collect production-related allowances in the gas sales contract.[59] One petitioner complains that the Commission cannot disregard the validity of written side agreements providing for production-related services or a gas sales contract which has no specific contractual provisions with respect to production-related allowances but where it was the intent of the parties to perform and pay for such services.

The Commission has identified the gas sales contract as a commercially practicable, simple, and administratively manageable means to determine whether or not a first seller can collect production-related allowances. As a result of this requirement, a first seller is precluded from collecting such allowances if he has used "side agreements" which by definition are separate and apart from the gas sales contract.[60] If the Commission were to recognize side agreements as express contractual authorization for purposes of section 110, the Commission and purchasers would be unable to monitor compliance with the rules which must be determined by reference to area rate clauses and separate provisions dealing with payment for production-related services. The gas sales contract typically includes such provisions, and it is appropriate to require the parties to place these related clauses together in a single gas sales contract.

Further, the requirement in the final rule for express contractual authorization would be nullified if the Commission were to permit subjective understandings to be the equivalent of express contractual authorization. If there are no corroborative provisions indicating express contractual authorization in the gas sales contract, oral agreements or trade usage do not by themselves meet the requirements of the rule.

D. Seller Sample Contract Provisions (§ 271.1104(c)(4))

The general rule of § 271.1104(a) requires a first seller to be expressly authorized to be compensated for bearing a production-related cost. Section 271.1104(c)(4) of the Commission's regulations defines the term "expressly authorized". First, under the express provisions of the gas sales contract, the seller must agree to provide a specified production-related service. Second, the purchaser must agree to compensate the seller for providing that specified service and pay an amount separate from the amount paid for the gas. Indicated Producers ask the Commission whether certain hypothetical situations encompassed in a contract between a first seller and purchaser reference adequate contractual authority to qualify for collection of production-related allowances under Order No. 94–A.[61]

In summary, the specific situations cited by petitioners provide that if a contract requires that gas be delivered subject to quality standards, or to a delivery point at a specified pressure, or to some point other than a wellhead or lease separator, then the seller is

[58] Order No. 94–A, 48 FR 5164, III FERC Stats. and Regs. ¶ 30,419 at 30,360.

[59] *Id.*, 48 FR 5162, III FERC Stats. and Regs. ¶ 30,419 at 30,358.

[60] *Id.*, 48 FR 5163, III FERC Stats. and Regs. ¶ 30,419 at 30,359.

[61] *See* pages 5 and 6 of Indicated Producers' application for rehearing of Order No. 94–A (RM80–47–005). The relevant text is as follows:

A. A contract between a producer and a pipeline which requires gas to be delivered subject to quality standards which specify the maximum amounts of water vapor, hydrogen sulphide, total sulphur, carbon dioxide, or other impurities which may be contained in the stream delivered to the pipeline, is a specific requirement that the producer install whatever facilities may be needed to treat and condition the gas produced at the wellhead so that it meets with the quality specifications contained in the contract.

B. A contract between a producer and a pipeline which requires the producer to deliver gas at a delivery point at a pressure sufficient to permit the gas to enter buyer's facilities at that point, sets a maximum pressure at which buyer's facilities may be operated at that point, or provides that either party may, but neither is required to, install compression to deliver or receive the gas is a specific provision requiring the producer to install compression which will entitle the producer to the production-related cost allowance for compression, if the producer installs the compression.

C. A contract between a producer and a pipeline which provides that the producer will deliver the gas to the pipeline at some point other than the wellhead or lease separator is a specific requirement that the producer construct the necessary gathering system to deliver the gas to the delivery point.

thereby required to construct the relevant type of production-related facility. Although the submitted factual situations illustrate an agreement to perform a production-related service, they do not illustrate a purchaser's agreement to pay an amount for the service performed separate from the amount paid for the gas. Because the discussed situations do not satisfy both requirements of § 271.1104(c)(4), a first seller would not be entitled to collect production-related allowances.

It is difficult, however, to express a judgment in the abstract without further elaboration of the factual context of the hypothetical situations. An interpretation of the General Counsel under Rule 1901 of the Commission's Rules of Practice and Procedure may be requested to provide further guidance.

E. Description of Charges (§ 271.1104(f))

One petitioner expresses concern that a seller may accrue allowances from the effective date of the final rule, March 7, 1983, and give the purchaser notice at some future date of an intent to collect retroactive to that date for services performed.

The final rule contemplates that a typical transaction under the rule will consist of: the parties' determination of express contractual authorization, performance of the service, submission of a description of charges, billing for the charges, and collection of payment. The final rule provides that as of March 7, 1983 a first seller may charge generic allowances for those production-related services which are contractually authorized. The Commission's regulations also require a seller to notify a purchaser before a seller may charge contractually-authorized production-related allowances to the maximum lawful price. The seller must submit a description of charges to the purchaser a reasonable time prior to the charge. It is implicit in the final rule that the description of charges must be received prior to a seller's collection of allowances because collection would be made after a seller charges or bills for services performed and after a purchaser's receipt of the description of charges.

Current regulations do not preclude a seller's performing production-related services on or after March 7, 1983 and before the description is submitted to the purchaser. This situation may well be a typical one. Because the purchaser would have expressly agreed in the gas sales contract that the seller could perform the service under those circumstances, purchaser's receipt of the description of charges should not take him by surprise.[63] If the purchaser disputes the charges, he may ask the seller to validate the proposed charges before making payment.

In a related matter, Southern Union Gathering Co.[64] recommends that the rule be changed to guarantee a first seller a minimum of 120 days after this order to provide the purchaser with a description of charges applicable to delivery services beginning March 7, 1983.

Order No. 94–A requires first sellers to provide a description of charges a "reasonable time" prior to charging the purchaser for the allowance. The Commission expects a reasonable start-up period during the implementation process. Because of the complexity and diversity of corporate operations, it is not realistic to establish a specific time requirement. The regulations, therefore, contemplate that the parties will agree on a "reasonable" time.

F. Procedures to Contest the Allowance (§ 271.1104(f))

Some petitioners request that the regulations be amended to provide a clearer procedure which will allow purchasers to evaluate the correctnes of the claimed allowance and to contest the amount of the allowance or seller's eligibility to collect the allowance. Specifically, petitioners, citing separate Docket No. RM 83–6,[64] recommend that the Production-Related Costs Board provide expedited review of these issues prior to the time the purchaser begins to pay allowances.

The Commission will consider petitioners' suggestion in connection with Docket No. RM 83–6. The Commission's regulations contemplate, however, that private party disputes concerning the seller's authority to collect an allowance following receipt of a description of charges will be resolved by resort to federal or state courts or third party arbitration rather than by the Commission. Any person can file a complaint with the Commission under Rule No. 206 of the Commission's Rules of Practice and Procedure if he believes that the allowances claimed in the description of charges violate the final rule.

Petitioners express the view that the Commission should amend its interstate pipeline PGA regulations to require all pipelines to identify separately their section 110 allowances paid as part of PGA filings with the Commission. While the Commission recognizes that third parties may wish to identify certain section 110 collections in PGA cases, the Commission also recognizes that not all requests will seek access to the same types of information. Nevertheless, interstate pipelines are required to maintain section 110 information as part of their PGA workpapers which should be sufficient to provide the data needed by petitioners.[65]

One petitioner requests that § 271.1104(f) of the regulations be amended to provide the purchaser with the information necessary to verify the accuracy of a seller's anticipated charges prior to the time the purchaser is billed for the allowances and pays the bill.

The Commission is of the view that an interstate pipeline must be able to explain and justify its section 110 payments. The Commission is also of the opinion that inclusion in the description of charges of the amount per MMBtu to be charged, the specified service for which the charge is to be made, and the contractual provisions expressly authorizing the charges should give the purchaser sufficient information to review the anticipated charge. Should the purchaser need additional data or computations from the seller to justify the charges, the purchaser may request such information from the seller before paying any bill or provide for the right to such information in the gas sales contract. The Commission believes that this approach is less burdensome on both purchasers and sellers than requiring a seller to submit the information in instances when the purchaser does not request it.

---

[63] If, however, the parties have agreed that no services should be performed until after the description is provided, then allowances may accrue only from and after the date of such description.

[64] Southern Union Gathering Company's "Petition for Clarification and Application for Rehearing" (Docket No. RM80–47–010) was recorded as received in the Secretary's office on February 24, 1983 at 8:57 a.m., the day following the deadline for filing petitions for rehearing. On April 20, 1983, petitioner filed a letter with the Commission arguing that its Application for Rehearing was timely filed because it was delivered to the Commission on February 23 shortly after the Secretary's office had closed at 5:00 p.m. Petitioner requests a waiver of 18 CFR 375.101(c) (1982) establishing the office hours of the Commission between 8:30 a.m. and 5:00 p.m. so that its application for rehearing may be treated as timely filed. The Commission rejects these connentions on the authority of Rule of Practice 2001(a)(2) (18 CFR 385.2001(a)(2) (1982)) which provides that "Any document is considered filed on the date stamped by the Secretary. . . . . Any document received after regular business hours is considered filed on the next regular business day." Because petitioner's application was received after regular business hours on the 30th day, the petition is late-filed. However, Southern Union's application will be treated as a request for clarification and is considered in this Order and Order No. 94–D.

[64] *See*, n.8, *supra*.

[65] Order No. 94–A, 48 FR. at 5109 (February 3, 1983), III FERC Stats. and Regs. ¶ 30,419 at 30,369.

The Commission, however, wishes to clarify that § 271.1104(f) requires first sellers to provide a separate description of charges for each type of production-related service from a single well or completion location. No amendment to the rule is necessary because the rule already requires "a" description of charges for each well or completion location for the specified production-related service for which the charge is to be made.

G. Scope of 18 CFR 271.1104(g)

The Commission added paragraph (g) to § 271.1104 of the final regulations to provide an alternative procedure for those first sellers offering unique services not represented by paragrphs (b) through (e) of § 271.1104. Paragaraph (g) provides, among other things, relief to first sellers transporting natural gas through delivery systems where the gas physically flows for distances greater than 20 miles and where construction of the facilities commenced on or after November 9, 1978.

Southern Union Gathering Co. seeks clarification and/or rehearing with respect to the scope of § 271.1104(g) and requests that § 271.1104 be explicitly applicable to it and all similarly situated sellers to permit recovery of delivery allowances by application.

The Commission does not intend that paragraph (g) apply, in general, to delivery systems where construction commenced prior to November 9, 1978 because such systems are addressed in paragraphs (b) through (e) of § 271.1104 and will be adequately compensated by the 5 cent per MMBtu delivery allowances applicable to such pre-NGPA systems.

However, the Commission does intend paragraph (g) to be applicable to first sellers even where construction of the seller's system commenced prior to November 9, 1978, if such first sellers demonstrate that their systems provide services which are not represented by paragraphs (b) through (e) of § 271.1104. This would include systems that the Commission previously has afforded special regulatory treatment. Accordingly, the Commission intends paragraph (g) to apply to petitioner, Southern Union Gathering Company, which company has historically been afforded cost-of-service treatment and would otherwise have been limited to the generic gathering allowance provided other producer-gatherers. The Commission will consider the applicability of subparagraph (g) to other companies on a case-by-case basis.

H. Clarification of Natural Gas Act Filing Requirements (§ 154.94(k))

In Order No. 94–A, the Commission amended 18 CFR 154.94 by introducing a new paragraph (k) requiring that sellers file an affidavit to collect production-related cost allowances for gas still subject to the Commission's Natural Gas Act jurisdiction. [66] The Commission believes that certain conforming changes are necessary to portions of 18 CFR 154.94 (k) to better reflect the Commission's intent in promulgating these rules. First, the Commission amends 18 CFR 154.94(k)(2) to reflect the Commission's intent that sellers must amend the affidavit to reflect any changes in eligibilty to recover production-related costs under new or old contracts. [67] This rule change comports with related language in the preamble of Order No. 94–A. Second, the Commission amends 18 CFR 154.94(k)(4) to eliminate two inaccuracies of the final rule. The final rule provides that an affidavit filed on or after March 7, 1983 and through and including May 6, 1983, shall be effective for deliveries beginning on March 7, 1983. The rule also provides that an affidavit filed after May 6, 1983, is effective on the date of filing, but the final rule does not refer to deliveries under the affidavit filed after May 6, 1983 even though the preamble does. The Commission amends 18 CFR 154.94(k)(4) to clarify that an affidavit filed after May 6, 1983 is to be effective on the date of filing with respect to deliveries beginning on and after the date of filing. In addition, the Commission wishes to delete the duplicative words "becomes effective" from § 154.94(k)(4).

These amendments shall become effective thirty days after publication in the **Federal Register.**

IV. Conclusion

The Petitions for Rehearing, Clarification, and Reconsideration are denied except as explained below in the ordering paragraphs. In denying these petitions, with the one exception noted, the Commission is affirming the final rule concerning the Commission's implementation of NGPA section 110. The final rule relies on the individual gas sales contract to determine quality standards and recoverable costs for treating and conditioning gas and requires express contractual authorization for a first seller to charge for production-related costs. The final rule improves the operation of the interim rules by eliminating a burdensome application process and inflexible generic minimum quality standards.

The Commission Orders that:

(1) For the reasons stated in Order No. 94–A and herein, that the Petitions and Applications for Rehearing, Clarification, and Reconsideration of Order No. 94–A are hereby denied except to the extent that suggestions and clarifications are incorporated into this order and to the extent the Commission hereby grants the Applications for Rehearing of Order No. 94–A of Indicated Producers and Gulf Oil Corp. to amend 18 CFR 271.1104(d)(3)(A) as set forth below; and

(2) For the reasons stated herein, the Commission hereby amends 18 CFR 154.94(k)(2), 154.94(k)(4), and § 271.1104(d)(3)(A), as set forth below; and

(3) For good cause shown in this Order, the requests of UGI Corporation and Associated Gas Distributors for a stay of the final rule are also hereby denied; and

(4) For good cause shown in this Order, the requests of Southern California Gas Company and Pacific Lighting Gas Supply Company for further comment are denied.

BILLING CODE 6717-01-M

---

18 CFR Parts 270 and 271

[Docket No. RM80-47-003, et al.; Order No. 94-D]

Regulations Implementing Section 110 of the Natural Gas Policy Act of 1978 and Establishing Policy Under the Natural Gas Act

Issued: May 24, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Order denying rehearing and denying stay of Order No. 94-B.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is denying four petitions for rehearing of Order No. 94-B (48 FR 5190 (1983)). Order No. 94-B is a final rule that amended the regulations, effective March 7, 1983, to allow recovery of production-related costs under section 110 of the Natural Gas Policy Act of 1978 (NGPA, 15 U.S.C. 3301-3432) by sellers of gas sold pursuant to intrastate contracts subject to section 105 or 106(b) of the NGPA.

Order No. 94-D clarifies that a seller may recoup costs incurred in delivering section 105 or 106(b) gas by collecting section 110 allowances in reliance on an FPC clause in an intrastate contract if he and the purchaser amend their contract to state their mutual agreement that the FPC clause expressly authorizes, as defined in § 271.1104(c)(4), the collection of section 110 delivery allowances or the seller obtains a judicial determination that the FPC clause constitutes such authority. In either case, the seller may collect for deliveries on or after March 7, 1983, the effective date of Order No. 94-B.

The Commission is also responding to a request for clarification as to whether sellers of sections 105 and 106(b) gas may still apply to the Commission under § 271.1105 for recovery under § 271.505(c) and § 271.1104(b)(1) of production-related costs with respect to gas delivered prior to March 7, 1983. Those regulations were eliminated, effective March 7, 1983, by Order Nos. 94-A and 94-B. Accordingly, the Commission will consider an application under those regulations only if it was submitted to the Commission prior to March 7, 1983.

FOR FURTHER INFORMATION CONTACT: Jack Kendall, Office of the General Counsel, Rulemaking and Legislative Analysis Division, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426 (202) 357-8033.

SUPPLEMENTARY INFORMATION:

I. Introduction

In this order, the Federal Energy Regulatory Commission (Commission) is denying four petitions for rehearing or clarification of Order No. 94-B.[1] Order No. 94-B is a final rule that amended 18 CFR 271.1104, effective March 7, 1983, to allow recovery of production-related costs under section 110 of the Natural Gas Policy Act of 1978 (NGPA)[2] by sellers of gas sold pursuant to intrastate contracts subject to section 105 or 106(b) of the NGPA. Order No. 94-B also removed the general prohibition against shifting production-related costs to purchasers (the "no cost-shift rule") by eliminating 18 CFR 271.505 and 271.604.

II. Discussion of Petitions for Rehearing or Clarification

The Commission has received several applications for rehearing or clarification of Order No. 94-B. Those applications were filed by Exxon Company, U.S.A., on behalf of Producers [3] (Docket No. RM80-47-004), by UGI Corporation (UGI) (Docket No. RM80-47-007), Associated Gas Distributors (AGD) (Docket No. RM80-47-009), and Southern Union Gathering Company (Southern Union) (Docket No. RM80-47-010).[4]

The petitions for rehearing and clarification of Order No. 94-B raise several substantive issues. In general, these issues relate to whether the Commission has, in Order Nos. 94-A [5] and 94-B, erroneously permitted allowances for sellers of sections 105 and 106(b) gas or, to the contrary, discriminated against these sellers by imposing certain limitations upon them that were not imposed on sellers of other gas.

Some of the diverse issues raised in the petitions received by the Commission with respect to Order No. 94-A are also relevant to Order No. 94-B. Most of these issues relate to the scope of the Commission's discretion to implement NGPA section 110 and have been considered previously by the Commission. They concern the elimination of minimum quality standards and the application process, section 110 allowances for treating and conditioning costs and the allocation of these costs, the collection of section 110 allowances for prior periods, an annual inflation adjustment factor for computing allowances, and alleged

[2] 15 U.S.C. 3301-3432 (Supp. IV 1980).

[3] "Producers" are the undersigned producers in "Aplication of Producers for Rehearing of Order No. 94-B" [hereinafter cited as Producers' Application], as well as Gulf Oil Corporation which both joined in Producers' comments and individually submitted an "Application for Rehearing of Gulf Oil Corporation of Order No. 94-A."

[4] In order to have sufficient time to consider the applications for rehearing, the Commission granted, by order issued March 11, 1983, rehearing of the regulations solely for purposes of further consideration. That Commission order stated that the Commission would consider the issues raised by the petitioners' requests for reconsideration or clarification at the same time.

[5] Regulations Implementing Section 110 of the Natural Gas Policy Act of 1978, and Establishing Policy Under the Natural Gas Act, Final Rule and Order on Rehearing of Order No. 94 [hereinafter cited as Order No. 94-A], 48 FR 5152 (1983)

double recovery in collecting section 110 allowances in addition to NGPA maximum lawful prices.

The petitions addressing Order No. 94–A also raise several issues for the first time on rehearing that relate to Order No. 94–B. These new issues include allegations that the Commission did not adequately consider the consequences of its section 110 regulations on NGPA objectives, consumers of natural gas, and the environment. Petitioners also complained that the Commission did not provide adequate opportunity for public comment on the cost of service methodology for treating and conditioning natural gas. In addition, petitioners argue that the requirement for express contractual authorization to collect allowances unduly interferes with private contracting practices. Petitioners also raise matters relating to production-related allowances for processing costs, the recovery of direct taxes, and the allocation of general and administrative expenses for treating and conditioning gas. To the extent any of the issues raised in the petitions regarding Order No. 94–A are also relevant to Order No. 94–B, the Commission's reasons set forth in Order No. 94–C[6] for denying those petitions are incorporated by reference.

As indicated above, most of these issues were considered by the Commission prior to issuing Order Nos. 94–A and 94–B, as the regulatory changes effected by those final rules were made in light of an exhaustive public record spanning a four year period.[7] On December 1, 1978, the Commission issued interim regulations under the NGPA which established an application procedure for first sellers to request Commission approval to collect allowances in excess of the applicable maximum lawful prices to recover production-related costs.[8] Those interim regulations contained minimum quality standards for the total content of sulphur, hydrogen sulphide, water, carbon dioxide and other impurities. As a general matter, only sellers that were treating, conditioning or processing the natural gas stream to enable it to exceed the minimum quality standards were eligible to apply for price adjustments, and their applications were limited to only those costs incurred to exceed the standards.[9] Costs for production-related services to meet the minimum quality standards were excluded because, as a matter of prevailing industry practice as represented by gas contracts on file with the Commission, sellers regularly agreed to deliver gas which met the standards.[10]

Section 271.1105(b) of the interim regulations provided that no section 110 production-related cost allowance would be allowed for gas subject to an "existing intrastate contract,"[11] an "intrastate rollover contract,"[12] or a "successor to an existing intrastate contract."[13] This exclusion was deemed necessary because existing contract provisions "reflect the allocation of costs of production as they were contemplated by the parties at the time the contract was negotiated,"[14] and that any change in such provisions would change the "price" actually paid for the gas. These considerations also led to adoption of the "no cost-shift rule" set forth in §§ 271.505 and 271.604 of the interim regulations which prohibited contract amendments that allocated production-related costs to the purchaser in a manner that differed from that under the contract as it existed on November 9, 1978.[15]

In Order No. 94,[16] the Commission amended the interim regulations in significant respects. However, Order No. 94 continued the general exclusion of production-related costs incurred to meet minimum quality standards.[17] In addition, in Order No. 68,[18] which implemented final rules for sections 105 and 106(b), the Commission reaffirmed the "no cost-shift rule" by stating that the term "price", as used in sections 105 and 106(b), meant all proceeds of a sale. Further explanation of the basis for the "no cost-shift rule" was provided by the Commission in Order No. 68–A, in which the Commission stated its view that Congress intended "price" in sections 105 and 106 to have meaning only when related to a specific set of obligations allocated between the parties as of November 9, 1978, the date of enactment of the NGPA.[19] Under this view, the price received under the NGPA by a seller of intrastate gas should be no greater than the price it would have been entitled to receive on November 9, 1978, assuming the same contractual obligations and allocation thereof between the parties that existed on that date. Therefore, so long as the Commission did not permit parties to reallocate their contractual obligations under the contract as it existed on November 9, 1978, the sections 105 and 106(b) ceiling prices would provide, as the Commission concluded, reimbursement for the costs of those production-related services for which a seller was responsible under the terms of its contract that were in effect on November 9, 1978.[20]

In Order No. 68–A the Commission revised the regulations to provide for the first time that a seller of section 105 or 106(b) gas could apply for an allowance for a production-related cost that the seller was not obligated to incur under his "existing intrastate contract."[21] The reason for this change was that it was appropriate to permit allowances for costs of new or different services not bargained for in the contract in existence on the date of enactment of the NGPA. However, if a particular cost, such as that of gathering, was allocated to the seller under the terms of the existing contract (*i.e.*, the contract as it was in effect on November 9, 1978), the rule continued to be that the seller could neither amend the contract to shift that cost to the purchaser nor apply for a price increase under section 110 to recoup that cost.

The December 1978 interim regulations and Order No. 94 gave effect to what the Commission believed to be the prevailing industry practice. These regulations, as well as Order Nos. 68 and 68–A, also reflect the Commission's attempt to preserve the *status quo* on November 9, 1978 with respect to the obligations of the parties to all gas sales contracts by preserving the terms of interstate and intrastate contracts in

[20] *Id.*

[21] Order No. 94–B, *supra* note 1, at 5193.

effect on that date.[22] During the period that these regulations were in effect, the Commission believed such an approach would provide an appropriate means of implementing Congress' intention in the NGPA to minimize further increases in prices for flowing gas.[23] However, the regulations nevertheless had the effect of freezing industry practices at one point in time.[24] As a result, some sellers and purchasers may well have been forced into changing or continuing practices to conform to those prevailing in November 1978, even though market conditions may have changed so that those practices no longer represented an appropriate response to market conditions and could, therefore, actually have contributed to market distortions.[25]

On January 24, 1983, the Commission issued Order No. 94–A [26] which provides that the individual gas sales contract is to determine who is responsible for providing production-related services and whether sellers may collect allowances under section 110 for costs to perform those services. To that end, Order No. 94–A permits parties to amend their contracts to shift any production-related services and the costs thereof from sellers to purchasers.

The Commission's determination in Order No. 94–A that the individual gas sales contract would provide a better mechanism for allowing industry practice to operate was a general finding, applicable to both the interstate and intrastate markets.[27] Further, the Commission also determined that if it were to hold those sellers of sections 105 and 106(b) gas to pre-NGPA agreements respecting obligations to provide production-related services, while permitting those sellers of sections 104 and 106(a) gas to shift these obligations, the result would be to establish a wide variation in treatment between interstate and intrastate gas flowing at the time of enactment of the NGPA.[28]

The Commission, therefore, determined that preservation of the no cost-shift rule would exaggerate differences between interstate and intrastate gas, a problem which led to the passage of the NGPA. [29] In so doing, it would discriminate against the intrastate markets, and frustrate the purpose of the NGPA to eliminate the dual market that had arisen under the Natural Gas Act.[30]

In view of the above considerations, the Commission determined that an interpretation of sections 105 and 106(b) which continued the strict preservation of the specific set of obligations allocated between the parties to gas sales contracts as of November 9, 1978, was no longer viable.[31] Therefore, the Commission issued Order No. 94–B which eliminated the "no cost-shift rule" of §§ 271.505 and 271.604 which theretofore had precluded sellers of sections 105 and 106(b) gas from shifting any production-related costs to their purchasers.[32] For the same reasons, Order No. 94–B amended the regulations of § 271.1104, which had allowed sellers of sections 105 and 106(b) gas to collect an adjustment under section 110 only for costs not allocated to them on November 9, 1978, and then only upon application to the commission.

Thus, by Order No. 94–B, the Commission, with certain specific differences, extended to those selling gas priced under sections 105 and 106(b) the same opportunity to collect adjustments for production-related costs as those selling gas priced under other sections of the NGPA.[33] As a result, these sellers could collect an adjustment under section 110 for production-related costs if the gas sales contract expressly provided that the seller agreed to provide the services and the purchaser agreed to compensate the seller for the cost of providing the services.[34] In addition, these sellers now may prospectively modify their contracts to either collect an allowance for the production-related services or shift to the purchaser the responsibility of providing the services.

A. Petitions Opposing Section 110 Allowances for Sellers of Sections 105 and 106(b) Gas

Gas distributors generally express the view that the Commission erred in Order No. 94–B by permitting section 110 add-ons to the sections 105 and 106(b) ceiling prices without demonstrating a sufficient basis for reversing the previous exclusion of such additions under the December 1, 1978 interim regulations and Order Nos. 94, 68, and 68–A. Distributors generally believe that the Commission was correct in its earlier view that no section 110 add-ons were appropriate for sections 105 and 106(b) gas because, as stated in the preamble to the December 1978 regulations, "existing contract provisions reflect the allocation of production-related costs as they were contemplated by the parties at the time the contracts were negotiated."[35]

Distributors indicate that the Commission gave only one reason in Order No. 94–B for providing section 110 production-related cost allowances for sellers of sections 105 and 106(b) gas, *i.e.*, that it would be unfair not to do so in view of the Commission's decision in Order No. 94–A to eliminate minimum quality standards and replace them with a regulatory mechanism that makes contracts the determinant as to whether it is the seller or purchaser that is obligated to bear all or part of a particular production-related cost. Since distributors believe that the Commission erred in this decision, they assert that there is no justification for providing section 110 production-related cost add-ons for sections 105 and 106(b) gas.

Distributors are correct that an important reason for permitting sellers of sections 105 and 106(b) gas to amend their contracts to permit the seller to collect section 110 allowances was the Commission's action in Order No. 94–A to permit other sellers to amend their contracts to shift production-related obligations. The Commission determined that holding sellers of sections 105 and 106(b) gas to pre-NGPA agreements respecting obligations to provide production-related services while permitting sellers of sections 104 and 106(a) gas to amend their contracts to shift these obligations from sellers to purchasers would establish a wide variation in treatment between interstate and intrastate gas flowing at the time of enactment of the NGPA. However, distributors are incorrect in stating that this was the Commission's only reason for eliminating the no cost-shift rule. The Commission also stated that the individual gas sales contract provides an appropriate mechanism for allowing industry practices to develop.[36] This view was based on the Commission's recognition that changes in contractual provisions may become necessary to respond to changing market conditions. That is, the

Commission determined that industry should be allowed to determine what is "industry practice." This general finding is applicable to all gas contracts, not just those for interstate gas, and is in and of itself an important reason underlying the Commission's actions in Order No. 94–B.

Furthermore, even if distributors were correct in stating that the Commission's only reason for permitting intrastate gas sellers to amend their contracts was to provide them the same treatment as other sellers, the Commission would still disagree with their position that there is no justification for section 110 add-ons for sections 105 and 106(b) gas. Distributors' position is based on the premise that the Commission was not justified in Order No. 94–A in permitting interstate sellers to amend their contracts and making section 110 allowances more available generally. However, in Order No. 94–C, which the Commission is issuing today in conjunction with this order,[37] the Commission has affirmed its findings and regulations issued in Order No. 94–A. It remains the Commission's belief that the regulatory changes implemented by Order No. 94–A made it more imperative that the Commission eliminate the no cost-shift rule and permit contract amendments to provide section 110 allowances for sellers of sections 105 and 106(b) gas in order to prevent even greater differences between the interstate and intrastate markets than those that existed prior to issuance of Order No. 94–A.

As explained in Order No. 94–B,[38] in determining to issue Order Nos. 94–A and 94–B, the Commission first had to reevaluate the difficult issues that, due to lack of clarity in the NGPA, have confronted the Commission in its efforts to implement section 110 allowances. In Order No. 94–B, the Commission changed its position that a balanced weighing of NGPA objectives called for sellers of sections 105 and 106(b) gas to be precluded from recovering any production-related costs under section 110 of the NGPA. This original view was an inevitable outgrowth of the Commission's initial, closely related view that a prohibition against any shifting of production-related costs from producers to purchasers was appropriate in view of Congress' intention in the NGPA, as expressed by its establishment of ceiling rates, to minimize further increases in prices paid for flowing gas—particularly previously unregulated intrastate gas.[39] In Order No. 94–B, the Commission concluded that its initial view failed over time to give appropriate recognition to another major, competing objective of the NGPA—Congressional intent in the NGPA to eventually eliminate the distinctions between the intrastate and the interstate markets.[40] The Commission further concluded that, in view of its actions in Order No. 94–A to increase the availability of section 110 add-ons with respect to interstate gas, continuing to preclude sellers of sections 105 and 106(b) gas from collecting section 110 allowances would further dichotomize the interstate and intrastate gas markets.

B. Petitions Favoring Increased Section 110 Allowances for Sellers of Sections 105 and 106(b) Gas

Representatives of the producing segment of the natural gas industry basically approve of the direction taken in Order No. 94–B to permit first sellers of intrastate gas priced under sections 105 and 106(b) generally to collect section 110 adjustments in the same manner as other sellers. However, producers argued that in Order No. 94–B the Commission is, in certain respects, in contravention of the NGPA and acting arbitrarily and capriciously by discriminating against sellers of sections 105 and 106(b) gas. They urge the Commission to eliminate this alleged discrimination by (1) providing that an area rate clause in an intrastate contract constitutes contractual authority to collect section 110 delivery allowances; (2) making the generic delivery allowance available to intrastate sellers in sales where construction of the delivery system commenced prior to November 9, 1978 ("old" gathering system);[41] and (3) allowing sellers of sections 105 and 106(b) gas to retroactively collect amounts for delivering and compressing gas.[42] Finally, producers assert that the Commission erred in not allowing intrastate sellers to retroactively amend their contracts to recover all production-related costs.

1. *Area Rate or FPC Clause in Intrastate Contracts.* In Order No. 94–B the Commission determined that, with respect to sections 105 and 106(b) gas, an area rate clause shall not be considered to meet the "expressly authorized" contract requirement in § 271.1104(c)(4) for the collection of a section 110 delivery allowance, even though such a clause is deemed to constitute such express authorization in sales under all other maximum lawful prices. Producers argued that the Commission's decision in this regard is inconsistent with the Commission's administrative view expressed in Order No. 23[43] with respect to "FPC clauses," a type of area rate clause used in intrastate contracts. In Order No. 23, the Commission found that an FPC clause in an intrastate contract is "the functional equivalent" of an area rate clause in an interstate contract and, therefore, provided justification for permitting a seller of sections 105 and 106(b) gas to collect NGPA maximum lawful prices.

Producers stated that the purpose of FPC clauses was to ensure the seller a minimum sales price at least equal to the price it would get if it sold the gas in interstate commerce. That is, as indicated in producers' comments, parties included FPC clauses in their contracts in the expectation of receiving at least the same total contract price to which an interstate seller would be entitled under an area rate clause. Producers further argue that failure by the Commission to treat FPC clauses as area rate clauses for purposes of the section 110 rules amounts to an interpretation of FPC clauses in a manner inconsistent with its responsibilities and in excess of its authority under the NGPA.

As stated in Order No. 94–B, the Commission believes that an area rate clause does not constitute evidence that the purchaser specifically provided that an express amount be paid to the seller of sections 105 and 106(b) gas for the delivery of gas, even though such a clause is considered to have met the "expressly authorized" requirement applicable to other categories of gas sales. This decision was based on recognition that there is a long-standing Commission practice in setting and implementing Natural Gas Act producer rates to consider this type of clause as sufficient authority to permit interstate sellers to adjust their rates by adding on delivery allowances. Therefore, interstate producers and purchasers that included area rate clauses in their contracts reasonably had the expectation of receiving delivery allowances that the Commission

[41] Southern Union also requests that intrastate sellers be permitted the generic delivery allowance in sales where an old delivery system is used. *See* "Petition for Clarification and Application for Rehearing of Southern Union Gathering Company", Docket No. RM80–47–010, at 29.

[42] Southern Union requests clarification of the Commission's decision that intrastate sellers should not be permitted to collect delivery costs for any past periods. *Id.* at 22–23.

[43] Order Amending and Clarifying Regulations Under the Natural Gas Policy Act and the Natural Gas Act [hereinafter cited as Order No. 23], 44 FR 16,895 (1979).

allowed. On the other hand, it is the Commission's position that sellers of intrastate gas did not necessarily have this same expectation when they came under the Commission's jurisdiction.[44] There was no historical Commission practice with respect to permitting delivery allowances for sellers of intrastate gas, since the prices they collected for gas were not regulated by the Commission prior to enactment of the NGPA. As stated by producers, FPC clauses were used prior to enactment of the NGPA to ensure sellers minimum sales prices at least equal to the prices to which they would be entitled if their gas were sold in interstate commerce and, therefore, subject to Natural Gas Act area rates and, later, national rates. The Commission believes that this was the only significant purpose served by FPC clauses.

It is true that in Order No. 23 the Commission found that an FPC clause is the functional equivalent of an area rate clause for purposes of determining whether to permit an intrastate seller to collect Congressionally established NGPA maximum lawful prices. However, the Commission does not believe that the rationale underlying its finding in Order No. 23 affords any support for the proposition that area rate clauses provide an appropriate basis for finding "express authorization" for a seller of section 105 or 106(b) gas to collect Commission established section 110 add-ons.

In Order No. 23, the Commission found that escalation to NGPA ceiling prices in reliance on an area rate clause was not one of the four instances in which the NGPA specifically limits the operation of escalation clauses.[45] The Commission found further that a Congressionally approved rate must be deemed to be in the public interest.[46] In view of these findings, the Commission concluded that area rate clauses in intrastate contracts should be permitted to trigger NGPA prices.

In contrast to the issue in Order No. 23, Congress left determinations as to when allowances for production-related costs under section 110 should be permitted to the Commission's discretion.[47] Section 110 provides that no production-related costs can be recovered unless "allowed for, by rule or order, by the Commission." Therefore, it was Congress' intent that the Commission determine when a section 110 would be in the public interest, which is the "touchstone" for deciding whether an indefinite price escalator should be permitted effect.[48]

The Commission still believes, for the reasons discussed above, that prior to enactment of the NGPA parties to intrastate contracts could not have reasonably relied on any expectation that in the event they should come under the Commission's jurisdiction they, like sellers of interstate gas, would receive any delivery allowances that the Commission allowed. Furthermore, there has been no indication since enactment of the NGPA that the Commission would necessarily permit interstate gas sellers to add on any delivery allowance that it might establish for sellers of interstate gas. Indeed, the Commission's actions have been to the contrary. For example, the Commission's determinations in Order Nos. 68 and 68–A regarding Congress' intended meaning of the term "price" in sections 105 and 106(b) of the NGPA indicated that the Commission intended to continue to rely on intrastate contract provisions in effect on November 9, 1978, rather than Commission established allowances, to provide for recoupment of delivery costs by a seller of intrastate gas. Furthermore, when the Commission announced in Order No. 94 its intention to establish generic allowances for production-related costs to deliver natural gas,[49] it also stated that, when implemented, the generic adjustments could be recovered by interstate sellers.[50] At the time, sellers were precluded from collecting any section 110 allowances for sections 105 and 106(b) gas. The fact that the Commission did not state any intention to permit retroactive recovery by sellers of sections 105 and 106(b) gas reflected the Commission's continuing reliance on intrastate contract provisions in effect on November 9, 1978, to provide for recoupment of production-related costs by sellers to deliver intrastate gas.

As indicated by the above discussion, the Commission can find no basis in its own historical practices, in the reasonable expectations of parties to intrastate gas contracts, or under any other rationale for a determination that an FPC clause should be viewed as evidence that a purchaser specifically provided that an express amount be paid to sellers of sections 105 and 106(b) gas for delivery. Therefore, it remains the Commission's conclusion that an FPC clause should not be deemed to satisfy the "expressly authorized" requirement with respect to sellers that deliver sections 105 and 106(b) gas. The Commission does not agree with producers' assertion that this conclusion constitutes and inappropriate attempt by the Commission at interpreting the intent of parties to intrastrate contracts. Indeed, in the absence of any clear basis for any different conclusion, the Commission believes that it would be abusing its discretion if it were to find, as producers' would have the Commission, that FPC clauses constitute express authorization for sellers of sections 105 and 106(b) gas to collect section 110 delivery allowances.[51]

While the Commission cannot find a sufficient basis for determining that FPC clauses in intrastate contracts generally constitute express authorization for sellers to collect section 110 allowances, it recognizes there may be specific instances where the intent of the parties in including an FPC or other type of area rate clause in an intrastate gas contract did extend so far. The Commission contemplates that these buyers and sellers generally will take advantage of those provisions of Order No. 94–A that permit them to amend their contract for section 105 or 106(b) gas so that the seller may collect section 110 allowances. Such an amendment must expressly provide for the payment of an amount directly tied to the performance of the activity that results in the incurrence of the production-related cost. The amount itself need not be specified. It can, for example, be based on a reference to the Commission's regulations implementing section 110 or on a general reference, such as one to the effect that the seller may collect the "highest amount" permitted by the Commission for the activity concerned.[52]

The Commission understands that there may be instances where the parties have reason to frame an amendment to indicate that its purpose is to permit the collection of section 110 delivery allowances by the seller in reliance on contractual authority that the parties originally intended the seller to have and exercise under an FPC clause in the event federal regulatory impediments were removed. Furthermore, the Commission recognizes that there may be instances where the original intent of the parties in including an FPC clause in a contract for the sale of section 105 or 106(b) gas did

encompass the collection of section 110 delivery allowances by the seller but the purchaser now refutes any obligation to pay such costs.

It is still the Commission's position that it would be infeasible and inappropriate for it to undertake to determine whether an area rate clause in an intrastate contract constitutes express authorization for the collection of section 110 delivery allowances. However, in view of the above considerations, the Commission has determined that a seller may collect section 110 delivery allowances for delivering section 105 or 106(b) gas if (1) the seller and the purchaser amend their contract to state their mutual agreement that the FPC clause expressly authorizes, as defined in § 271.1104(c)(4), the collection of section 110 delivery allowances or (2) the seller obtains a judicial determination that the FPC clause expressly authorizes, as defined in § 271.1104(c)(4), the collection of section 110 delivery allowances. In either of these cases, it is the Commission's decision that the seller may collect section 110 delivery allowances for deliveries on or after March 7, 1983, the effective date of Order Nos. 94–A and 94–B. The Commission believes this decision is appropriate since those final rules generally removed regulatory prohibitions that theretofore had prevented sellers from fully exercising their contractual authority to collect section 110 allowances. Furthermore, this policy decision will result in more consistent treatment under the regulations of sellers and buyers of intrastate gas as compared with sellers and buyers of interstate gas. The Commission wishes to make clear, however, that this decision does not alter its determination in Order No. 94–A regarding contractual amendments that give sellers contractual authority to collect section 110 delivery allowances for delivering section 105 or 106(b) gas. Accordingly, if a contractual amendment merely provides that the seller may collect a section 110 delivery allowance, he may collect delivery allowances only for deliveries made after the date of execution of the amendment. In order to collect delivery allowances back to March 7, 1983, the amendment or judicial determination must state that the FPC clause expressly authorizes, as defined in § 271.1104(c)(4), the collection of section 110 delivery allowances.

2. *Generic Delivery Allowances for Old Intrastate Gathering Systems.* Under the Interim Rule issued by the Commission on January 24, 1983 [53] to establish generic allowances for delivering gas, there is a 5 cents per MMBtu limit for delivering gas by systems the construction of which commenced prior to November 9, 1978. However, the Commission did not extend this generic delivery allowance to sections 105 and 106(b) gas that is delivered by means of old delivery systems, *i.e.*, delivery systems for which construction commenced prior to November 9, 1978. The Commission determined that it could not establish such a generic allowance because, due to its lack of jurisdiction over these types of sales prior to passage of the NGPA, it did not have sufficient data indicating precisely how gathering allowances were established in the intrastate market.

In lieu of a specific allowance, and in light of the determination in Order No. 94–A that the contract is the best mechanism for determining who, as between the seller and purchaser, is to provide production-related services and incur the resulting costs, the Commission provided in § 271.1104(d)(2) that those selling gas under NGPA sections 105 and 106(b) may amend their contract prospectively for the recovery of delivery costs so long as the amended contract expressly authorizes the seller to make such recovery and the amount does not exceed an amount "reasonably comparable" to amounts collected under section 110 for gas delivery by similarly situated sellers. In the absence of such an amendment to the contract, the amount that an intrastate seller may recover with respect to production-related costs for delivering natural gas through an old delivery system may not exceed the amount that the seller is expressly authorized to collect under the existing terms of the contract.

Producers assert that the Commission erred in failing to set a generic delivery allowance for sections 105 and 106(b) gas delivered by old delivery systems. Producers argued that this omission constitutes an abuse of discretion. In support of this contention, these petitioners argued that there is no indication in the NGPA or its legislative history that section 110 is not applicable to old intrastate gathering systems. They further argued that, to the contrary, the best expression of Congressional intent clearly indicates that existing intrastate contracts are to be eligible for section 110 relief, and that no distinction was intended between old intrastate and old interstate gas gathering systems. The purported support for producers' position is a statement in the Joint Explanatory Statement of the Committee on Conference:

> The Conference Agreement provides authority for the Commission by rule or order, to make adjustments in ceiling prices for production-related costs which include the cost of compressing, gathering, processing, treating, liquefying or transporting natural gas. *The authority is available for making adjustments to all ceiling prices.*" [54]

The Commission believes this Conference Report language indicates only that the Commission has the authority to establish a generic section 110 delivery allowance for old intrastate gas gathering systems. However, the reason the Commission did not extend the generic delivery allowance to pre-NGPA intrastate delivery systems was a lack of sufficient data to support providing sellers of sections 105 and 106(b) gas with the 5 cents per MMBtu delivery allowance.[55]

The Commission stated that its lack of data concerning old intrastate delivery systems and knowledge as to how delivery allowances were established in the intrastate market were due to the Commission's lack of jurisdiction over intrastate sales prior to enactment of the NGPA. Producers argued that the Commission's lack of jurisdiction over intrastate sales in the past is irrelevant to whether it should set a generic allowance after the effective date of the NGPA. However, even if producers' contention were correct, the comments and other information submitted by that group do not provide a sufficient basis or adequate record for extending the generic 5 cents per MMBtu delivery allowance to sales of sections 105 and 106(b) gas which use old intrastate delivery systems. Moreover, even if the Commission had been able to collect the necessary data, there is no certainty that the data would support the establishment of a generic delivery allowance for old intrastate gathering systems.

Although the Commission was not able to set a generic delivery allowance for old intrastate delivery systems, it believes the regulations it adopted in Order No. 94–B to permit sellers to collect a delivery allowance for such systems are appropriate. Section

[53] Delivery Allowances Under Section 110 of the Natural Gas Policy Act of 1978 and Compression Allowances Under Section 110 of the Natural Gas Policy Act of 1978 [hereinafter cited as Interim Rule], 48 FR 5160 (1983).

[54] Producers' Application, *supra* note 3, at 12, *citing* Joint Explanatory Statement of the Committee on Conference, H.R. Rep. No. 1752, 95th Cong., 2d Sess. 91 (1978) (emphasis added in Producers' Application).

[55] Order No. 94–B, *supra* note 1, at 5 194–95.

271.1104(d)(2) provides that the amount collected by a seller of sections 105 and 106(b) gas to recover a production-related cost for delivering gas through an old delivery system shall not exceed the amount that the seller is expressly authorized to collect under the terms of his contract, unless the seller and purchaser agree to amend the terms of the contract. If there is an amendment, the amount still may not exceed an amount "reasonably comparable" to amounts collected under section 110 for gas delivery by similarly situated sellers. In determining its "reasonably comparable" delivery allowance, a seller certainly may find the 5 cents per MMBtu generic allowance to be a useful guideline, since it was chosen by the Commission because it believed that such an amount was representative of delivery costs.

3. *The Reasonably Comparable Delivery Allowance for Sales of Intrastate Gas by Old Delivery Systems.* Southern Union seeks rehearing as to the "reasonably comparable" test applicable under § 271.1104(d)(2) to sellers of sections 105 and 106(b) gas. Southern Union argues that the Commission has not given any guidance as to the appropriate accounting procedures for determining such a cost of service and that an intrastate first seller does not have a readily available means of determining whether such cost of service is "reasonably comparable" to the section 110 allowance for such delivery costs collected by similarly situated intrastate sellers. Consequently, Southern Union stated, first sellers entitled to recover production-related costs under § 271.1104(d)(2) are subjected to substantial uncertainty and being second guessed when audited by the Commission. Moreover, Southern Union does not believe that the Commission has articulated a reason for imposing a "reasonably comparable" test on sellers of sections 105 and 106(b) gas or that there are any reasons that justify such a limitation. In view of these considerations, Southern Union requested that the Commission amend § 271.1104(d) to extend to sellers of sections 105 and 106(b) gas the 5 cents per MMBtu generic delivery allowance currently available under that section to sellers of other NGPA categories of gas with respect to sales by means of old delivery systems.

For the above-stated reasons given in response to the same request by producers, the Commission must also deny Southern Union's request. The reasons discussed above also explain what we believe to be an adequate basis for requiring that intrastate sellers determine "reasonably comparable" delivery allowances for themselves with respect to similarly situated sellers.[56] Furthermore, the Commission cannot accept the proposition that an intrastate seller cannot without undue burden determine its "reasonably comparable" rate, when the Commission has explained that it should be an amount necessary to recover costs borne by the seller, which includes a reasonable profit level.[57]

4. *Costs Incurred Prior to the Effective Date of Order No. 94–B.* Producers allege that the Commission's decision not to permit allowances for delivering and compressing sections 105 and 106(b) gas for periods prior to March 7, 1983, the effective date of Order No. 94–B, is discriminatory. Sellers of gas other than sections 105 and 106(b) gas may collect delivery and compression allowances from the earlier of the date on which an application was filed with the Commission on July 25, 1980, the effective date of Order No. 94.[58] Producers advanced the proposition that delivery and compression allowances for all sellers should be effective December 1, 1978, the effective date of the NGPA, but in any event the same for all sellers. Producers asserted that the regulations in effect prior to the effective date of Order Nos. 94–A and 94–B unlawfully denied "retroactive" collection of contractually authorized compression and delivery allowances. They claimed that this failure on the Commission's part has created the need for retroactive collection of these costs.

Generally, an agency has broad discretion to deny retroactive effect to its rules. That general rule is of particular importance in the implementation of any section 110 rule that relies on the Commission's discretion. The Commission has the requisite discretion under section 110(a)(2) to make a determination that retroactive application of the new regulations implementing section 110 would not be appropriate and reasonable. In Order Nos. 94–A and 94–B, the Commission made such a determination and, therefore, generally declined to give retroactive effect to the regulations implemented by those final rules.[59]

The elimination of the no cost-shift rule and our decision to permit sellers of sections 105 and 106(b) gas to collect section 110 allowances are changes from Commission-established rules in place from December 1, 1978, until the effective date of Order Nos. 94–A and 94–B. As discussed above, sellers of intrastate gas had no justifiable expectation that they would be permitted section 110 add-ons for services that they were obligated to perform under the terms of their contracts in existence on November 9, 1978. Therefore, a decision to permit the sellers to collect section 110 allowances for delivery and compression with respect to periods prior to the effective date of Order No. 94–B would be contrary to purchasers' reasonable expectations and cause market disruption. Because the Commission seeks to minimize such impacts, it believes it would be ill-advised to make these amendments retroactively effective. In view of these considerations, we repeat here our finding in Order No. 94–B that good reasons exist not to permit retroactively effective contract amendments or any retroactive collections.[60]

In Order No. 94–A, the Commission generally did not allow section 110 allowances to be collected retroactively either. The only exception is for delivery and compression allowances collected by sellers of gas other than sections 105 and 106(b) gas. In Order No. 94, when the Commission announced its intention to establish generic allowances for production-related costs to deliver and compress natural gas, it suspended applications for these types of allowances for sellers of interstate gas during the development of the generic allowances. In doing so, the Commission stated that, when implemented, the generic adjustments could be incurred from the earlier of the date of an application or July 25, 1980, the effective date of Order No. 94.[61] Moreover, it is our continued belief that the burden of a retroactive order in this instance could be substantial, especially since it might lead to or necessitate a recomputation of maximum lawful prices in some cases.[62]

5. *Request for Clarification Regarding Retroactive Collection of Delivery and Compression Costs.* Southern Union requests clarification with respect to

[60] *Id.* at 5.195. As stated in Order No. 94–B, *Id.* n. 38, in those instances when sellers of sections 105 and 106(b) gas relied on the Commission's rules in Order No. 68–A and submitted an application to the Commission under § 271.1105 to recover production-related costs not allocated to them in the contract as in effect on November 9, 1978, the Commission will permit collection of the appropriate section 110 allowance from the later of the date such application was filed with the Commission or the date on which service from the production-related facility commenced.

[61] *Id.* at 5196. *See also.* Order No. 94, *supra* note 10, at 53107 n. 78; Order No. 94–A, *supra* note 5, at 5168.

[62] Order No. 94–B, *supra* note 1, at 5196.

sellers of intrastate gas retroactively collecting delivery and compression charges for periods prior to the effective date of Order No. 94–B. Southern Union makes first sales pursuant to several intrastate contracts which were in effect on November 9, 1978. These contracts specifically provide for the payment by the purchaser of gathering charges in addition to the wellhead costs of gas delivered. Since passage of the NGPA, these rates, and in some instances the method of calculating such rates, have been modified in order to reflect changes in the service being provided to the purchaser by Southern Union. In Order No. 68–A the Commission revised § 271.505(c) and § 271.1104(b)(1) of the regulations to permit sellers of sections 105 and 106(b) gas to apply under § 271.1105 for recovery of production-related costs which were not allocated to the seller under existing intrastate contracts in effect on November 9, 1978 ("Order No. 68–A regulations").[63]

Southern Union did not make an application under the Order No. 68–A regulations while they were in effect to recover any production-related expenses. Southern Union states that it has been precluded from increasing certain gathering charges except through relief granted by the Commission under section 502(c) of the NGPA. Southern Union believes, however, that under the provisions of Order Nos. 94–A and 94–B it may be entitled to recover certain previously denied production-related expenses for past delivery periods which exceed the amounts allowed in its prior adjustment proceedings. Southern Union requests a determination as to whether it may recover such previously incurred production-related costs under its existing intrastate contracts which provide for the recovery of such costs by the seller. If not, Southern Union seeks clarification as to whether it may still apply to the Commission under the Order No. 68–A regulations to recover such costs.

While the Commission has generally affirmed those regulations established pursuant to Order No. 68–A,[64] those regulations regarding sellers of sections 105 and 106(b) gas were amended by Order No. 94–B to the extent they involved adjustments for production-related costs. Therefore, Southern Union cannot now apply under those regulatory provisions for recovery of its production-related costs. Furthermore, since Southern Union never applied under the Order No. 68–A regulations while they were in effect, it does not come within the narrow exception from the general prohibition of Order Nos. 94–A and 94–B that applies only to sellers of sections 105 and 106(b) gas who relied on the Order No. 68–A regulations and submitted an application to the Commission to recover production-related costs not allocated to them in the contract as in effect on November 9, 1978.[65]

In view of the general prohibition of Order Nos. 94–A and 94–B against collecting amounts for delivering and compressing sections 105 and 106(b) gas prior to the effective date of those rules, Southern Union's express contractual authority to collect those costs is not relevant. Southern Union's only avenue for relief is to submit an application under section 502(c) of the NGPA. However, it does not appear from Southern Union's petition that it would have been eligible to recover its production-related costs under the Order No. 68–A regulations even if it had applied for recovery while those regulations were still in effect. The Commission is unlikely to allow a seller to recover costs with respect to a past period if the seller had no basis for recovery at that time.

6. *Retroactive Amendments to Intrastate Contracts.* Except for the retroactive recovery of generic delivery and compression allowances by interstate sellers with express contractual authorization, in Order Nos. 94–A and 94–B the Commission followed the basic principle of administrative procedure that rules should operate prospectively only. Furthermore, as stated by the Commission in Order No. 94–B, even with respect to that one exception,

> [p]arties may not, however, execute retroactively effective contract amendments and thereby collect a section 110 allowance for a period in which the contract did not, at that time, authorize collection of such an amount. The Commission believes this is consistent with the general view developed under the Natural Gas Act in Opinion No. 135, Transcontinental Gas Pipe Line Corporation, * * * 17 FERC ¶ 61,232 * * *.[66]

Producers argue that during the period between enactment of the NGPA and issuance of Order No. 94, the Commission acted arbitrarily and capricously and, therefore, unlawfully in not giving intrastate sellers at least as much oppurtunity as interstate sellers had to obtain section 110 allowances under the regulations in effect during that period.

The Commission believes that its rationale supports these regulations and is consistent with the Commission's legal obligations. As discussed above, the December 1978 interim NGPA regulations excluded sellers of sections 105 and 106(b) gas from the provisions permitting interstate sellers to apply for section 110 production-related cost allowances.[67] This exclusion with respect to intrastate gas was reinforced by the no cost-shift rule of §§ 271.505 and 271.604 which generally prohibited contract amendments allocating production-related costs from the seller to the purchaser in a manner that differed from the contract as it existed on November 9, 1978. This exclusion, as well as the no cost-shift rule, was justified on the basis that existing provisions in contracts reflect the allocation of costs as they were contemplated by the parties at the time the contract was negotiated,[68] and that any change in such provisions would change the "price" actually paid for the gas. At that time, the Commission believed it would be contrary to the intent of Congress to permit a change in such prices and terms if that change would have the effect of increasing the total costs the purchaser paid for acquiring the very same commodity he was acquiring at a lower price before the date of enactment.[69]

On November 10, 1980, the Commission issued Order No. 68–A, in which it concluded that the sections 105 and 106(b) ceiling prices "provide reimbursement for production-related costs borne by the seller according to the terms of contracts." [70] In addition, the Commission concluded that the term "price" when used in the context of "contract price" should be interpreted to mean all the money paid for the gas, even amounts labeled as severance tax reimbursement, gathering allowances, and so forth. These conclusions led to reaffirmance by the Commission of the no cost-shift rule of §§ 271.505 and 271.604 as well as the rules implementing section 110 for production-related costs borne be sellers of sections 105 and 106(b) gas.

However, in Order No. 68–A, the Commission did revise § 271.1104(b)(1) to provide, for the first time, that a seller of sections 105 and 106(b) gas could apply for a production-related cost allowance if the seller was not obligated to incur the cost under his existing contract.[71] The reason for this change

[63] Order 68–A, *supra* note 19, at 76678.

was that allowances for costs of new or different services not bargained for in the contract in existence on the date of enactment of the NGPA were appropriate.

The Commission's views as to how to best implement section 110 in light of the NGPA's competing objectives have changed since those regulations were adopted. This does not make the regulations issued prior to Order No. 94–B unlawful, even if it is recognized in hindsight that different policy decisions were possible.

Since the Commission does not accept producers' initial premise that the regulations in effect prior to Order No. 94–B were arbitrary and capricious, neither do we find any merit to producers' further argument built upon that premise—*i.e.*, that Order No. 94–B is also arbitrary and capricious (and therefore unlawful) because it fails to permit retroactively effective contract amendments for recovery of section 110 allowances that were withheld from intrastate sellers by the Commission in past periods.

Producers discussed Opinion No. 135 [72] in support of their position. In Opinion No. 135, which was issued after enactment of the NGPA, the Commission refused to approve retroactively effective contract modifications designed to permit sellers to collect NGPA prices for gas subject to the Natural Gas Act for periods before the requisite contractual authority existed. One of the Commission's reasons for this decision, as noted by the petitioners, was the filed rate doctrine which is a bar under the Natural Gas Act to retroactive, as opposed to prospective, price changes. Producers stated the filed rate doctrine is inapplicable to gas subject to sections 105 and 106(b) because such gas was never subject to the Commission's Natural Gas Act jurisdiction. Accordingly, the petitioners argued, there is no bar to retroactive price changes for sections 105 and 106(b) gas.

In their analysis of Opinion No. 135, the petitioners failed to note that the Commission also gave as a reason for that decision the view that public policy considerations generally mitigate against giving retroactive effect to contract amendments.[73] Indeed, the public policy considerations against retroactively effective contract amendments, although arising under the NGA, should apply to intrastate sellers even if the filed rate doctrine itself may not. In view of these considerations, producers' attempt to limit the policy enunciated in Opinion No. 135 only to gas subject to the Commission's Natural Gas Act jurisdiction is rejected.

In regard to permitting intrastate sellers to recover section 110 allowances for prior periods, we would like to reemphasize that, while Order Nos. 94–A and 94–B reflect our efforts to give effect to the NGPA objective of eliminating regulatory-created distinctions between the intrastate and interstate markets, the Commission has not abandoned its responsibility with respect to the sometimes conflicting NGPA policy to minimize further price increases in gas sold in the previously unregulated intrastate market. It is our belief that an appropriate balancing of the objectives is found in our decision that intrastate sellers be permitted section 110 allowances, but only on a prospective basis.

III. Petitions for Further Economic and Environmental Analysis and Stay of Order No. 94–B.

Several petitioners allege the Commission failed to adequately assess and consider the potential economic and enviromental impacts of Order Nos. 94–A and 94–B as part of its decisionmaking process in determining to issue those orders. These petitioners requested that the effectiveness of those orders be stayed to permit further consideration of matters relating to the economic and environmental effects of the orders and other matters raised in their petitions. These requests for further consideration and stay pending rehearing, as well as any such requests that have been raised specifically only with respect to Order No. 94–A but which may relate to Order No. 94–B, are denied with respect to Order No. 94–B for the same reasons stated by the Commission in Order No. 94–C.[74]

For the foregoing reasons, the Commission orders that:

(A) The Petitions for Rehearing in Docket Nos. RM80–47–003, RM80–47–004, RM80–47–007, RM80–47–009, and RM80–47–010 are hereby denied; and

(B) The requests for a stay of the final rule are also hereby denied.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 81

[Docket No. 76N–0366]

Provisional Listing of D&C Red No. 33; Postponement of Closing Date

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is postponing the closing date for the provisional listing of D&C Red No. 33 for use as a color additive in drugs and cosmetics. The new closing date will be July 29, 1983. This brief postponement will provide time for the agency to complete its review and to consider the scientific and legal aspects of the results of the toxicological studies submitted by several petitioners. Additionally, during this brief postponement, the agency will prepare the appropriate Federal Register document(s) upon completion of its review.

DATES: Effective May 31, 1983, the new closing date for D&C Red No. 33 will be July 29, 1983.

FOR FURTHER INFORMATION CONTACT: Patricia J. McLaughlin, Bureau of Foods (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: FDA established the current closing date of May 31, 1983, by a rule published in the Federal Register of April 1, 1983 (48 FR 13975). The agency extended the closing date to provide time for the agency to complete its review and to consider the scientific and legal aspects of the resuts of the toxicological studies submitted by several petitioners. Previously in the Federal Register of March 27, 1981 (46 FR 18954), FDA had published a rule establishing the March 31, 1983 closing date for the provisional listing of D&C Red No. 33 to provide time for the completion of toxicity studies, submission of the data to FDA, review and evaluation of the data concerning the drug and cosmetic uses of D&C Red No. 33 by FDA, and publication of a regulation in the Federal Register regarding the agency's final decision on

the petition for the permanant listing of this color additive. The regulation set forth below will postpone the May 31, 1983 closing date for the provisional listing of the color additive until July 29, 1983.

As noted in the **Federal Register** of November 20, 1968 (33 FR 17205) and of August 6, 1973 (38 FR 21200), D&C Red No. 33 is the subject of a petition (CAP 8C0086) submitted by the Toilet Goods Association, Inc. (now the Cosmetic, Toiletry and Fragrance Association, Inc.), the Pharmaceutical Manufacturers Association, and the Certified Color Industry Committee (now the Certified Color Manufacturers Association, Inc.) and of a petition (CAP 7C0059) submitted by the Procter & Gamble Co. The petitions requested that D&C Red No. 33 be permanently listed for use in ingested drugs, all types of cosmetics subject to ingestion, including lipsticks, externally applied drugs and cosmetics, and for use in the area of the eye.

The review and evaluation of the data relevant to the use of D&C Red No. 33 have required more time than anticipated. FDA concludes that the brief postponement will provide time for the agency to complete its review and to prepare the appropriate **Federal Register** document(s). Therefore, FDA concludes that the brief extension of the closing date to July 29, 1983, is necessary. The agency has also concluded that no harm to the public health will result from this extension.

Because of the short time until the May 31, 1983 closing date, FDA concludes that notice and public procedure on this regulation are impracticable, and that good cause exists for issuing this postponement as a final rule. This regulation will permit the uninterrupted use of this color additive until July 29, 1983. To prevent any interruption in the provisional listing of D&C Red No. 33, and in accordance with 5 U.S.C. 553(d) (1) and (3), this postponement is issued as a final regulation, effective on May 31, 1983.

List of Subjects in 21 CFR Part 81

Color additives, Color additives provisional list, Cosmetics, Drugs.

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 701, 706 (b), (c), and (d), 52 Stat. 1055–1056 as amended, 74 Stat. 399–403 (21 U.S.C. 371, 376 (b), (c), and (d))) and under the transitional provisions of the Color Additive Amendments of 1960 (Title II, Pub. L. 86–618, sec. 203, 74 Stat. 404–407 (21 U.S.C. 376 note)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), Part 81 is amended as follows:

§ 81.1 [Amended]

1. In § 81.1 *Provisional lists of color additives* by revising the closing date for "D&C Red No. 33" in paragraph (b) to read "July 29, 1983."

§ 81.27 [Amended]

2. In § 81.27 *Conditions of provisional listing* by revising the closing date for "D&C Red No. 33" in paragraphs (d) and (e) to read "July 29, 1983."

Effective date. This final rule shall be effective May 31, 1983.

(Secs. 701, 706 (b), (c), and (d), 52 Stat. 1055–1056 as amended, 74 Stat. 399–403 (21 U.S.C. 371, 376 (b), (c), and (d)); sec. 203, 74 Stat. 404–407 (21 U.S.C. 376 note))

Dated: May 17, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Part 81

[Docket No. 76N-0366]

Provisional Listing of D&C Orange No. 17 for Use in Externally Applied Drugs and Cosmetics; Postponement of Closing Date

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is postponing the closing date for the provisional listing of D&C Orange No. 17 for use as a color additive in externally applied drugs and cosmetics. The new closing date will be July 29, 1983. This brief postponement will provide time for the agency to determine the applicability of the statutory standard for the listing of noningested color additives to the results of the scientific investigatons of D&C Orange No. 17.

DATES: Effective May 31, 1983, the new closing date for D&C Orange No. 17 will be July 29, 1983.

FOR FURTHER INFORMATION CONTACT: Julia L. Ho, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: FDA established the current closing date of May 31, 1983, for the provisional listing of the use of D&C Orange No. 17 in externally applied drugs and cosmetics in a rule published in the **Federal Register** of April 1, 1983 (48 FR 13975). The agency extended the closing date until May 31, 1983, to provide time for the uninterrupted use of this color additive in externally applied drugs and cosmetics while FDA considered the scientific and legal aspects of the recent skin penetration studies submitted by the Cosmetic, Toiletry and Fragrance Association, Inc. (CTFA). Previously, in the **Federal Register** of March 27, 1981 (46 FR 18954), FDA had published a rule establishing March 31, 1983, as the closing date for the provisional listing of D&C Orange No. 17 for cosmetic and general drug uses. The agency had extended the closing date until March 31, 1983, to provide time for the completion of chronic toxicity studies and to allow time for the agency to review and evaluate these studies. In the **Federal Register** of April 1, 1983 (48 FR 13976), FDA announced that the provisional listing of D&C Orange No. 17 for coloring ingested drugs and cosmetic had expired. In that issue of the **Federal Register** (48 FR 14045), FDA also published a final rule denying those portions of the color additive petition for D&C Orange No. 17 that requested permanent listing of the color additive for use in drugs and cosmetics intended for ingestion and in cosmetics intended for use in the area of the eye.

As noted in the **Federal Register** of August 6, 1973 (38 FR 21199), D&C Orange No. 17 is the subject of a petition (CAP 9C0090) submitted by the Toilet Goods Association, Inc. (now CTFA), for use in coloring drugs and cosmetics. The agency has concluded that D&C Orange No. 17 is an animal carcinogen when administered in the diet, based on the increased incidence of hepatocellular neoplasms in two mammalian species (48 FR 13977 and 14046–7). Therefore, FDA has denied that portion of the petition for this color additive that relates to ingested uses. However, under 21 U.S.C. 376(b)(5)(B)(ii), the agency must determine whether the ingestion studies that show D&C Orange No. 17 to be a carcinogen are appropriate for the evaluation of the safety of the external uses of this color additive. To assist the agency in making this determination, the petitioner has submitted the recent skin penetration studies on D&C Orange No. 17.

The agency is now considering the scientific and legal aspects of the CTFA submissions in support of the external uses of D&C Orange No. 17. Although D&C Orange No. 17 has been shown to be an animal carcinogen upon ingestion, the agency believes that somewhat different questions are raised by the

request to list these color additives for noningested use. Thus, FDA finds that a brief extension of the closing date to July 29, 1983, is necessary to provide sufficient time for the agency to determine the applicability of the statutory standard for listing color additives for noningested use to D&C Orange No. 17. It has taken FDA more time to evaluate the data involved in making this decision than the agency anticipated. This postponement will also provide time for the agency to prepare and to publish a **Federal Register** document setting forth its final decision on the petition for the permanent listing of this color additive. The continued use of this color additive in externally applied products for the short time needed for adequate evaluation of the data and for preparation of the **Federal Register** document will not pose a hazard to the public health.

Because of the short time until the May 31, 1983 closing date, FDA concludes that notice and public procedure on this regulation are impracticable. This regulation will permit the uninterrupted use of this color additive until July 29, 1983. To prevent any interruption in the provisional listing of D&C Orange No. 17 and in accordance with 5 U.S.C. 553(d) (1) and (3), this final rule is being made effective May 31, 1983.

List of Subjects in 21 CFR Part 81

Color additives, Color additives provisional list, Cosmetics, Drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 701, 706 (b), (c), and (d), 52 Stat. 1055–1056 as amended, 74 Stat. 399–403 (21 U.S.C. 371, 376 (b), (c), and (d))) and under the transitional provisions of the Color Additive Amendments of 1960 (Title II, Pub. L. 86–618; sec. 203, 74 Stat. 404–407 (21 U.S.C. 376 note)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), Part 81 is amended as follows:

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

§ 81.1 [Amended]

1. In § 81.1 *Provisional lists of color additives* by revising the closing date for "D&C Orange No. 17" in paragraph (b) to read "July 29, 1983."

§ 81.27 [Amended]

2. In § 81.27 *Conditions of provisional listing* by revising the closing date for "D&C Orange No. 17" in paragraph (d) to read "July 29, 1983."

Effective date. This final rule shall be effective May 31, 1983.

(Secs. 701, 706(b), (c), and (d), 52 Stat. 1055–1056 as amended, 74 Stat. 399–403 (21 U.S.C. 371, 376(b), (c), and (d)); sec. 203, 74 Stat. 404–407 (21 U.S.C. 376 note))

Dated: May 13, 1983.

21 CFR Part 81

[Docket Nos. 76N-0366 and 82N-0378]

Provisional Listing of D&C Red No. 6 and D&C Red No. 7; Postponement of Closing Date

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is postponing the closing date for the provisional listing of D&C Red No. 6 and D&C Red No. 7 for general use as color additives in drugs and cosmetics, except for use in the area of the eye. The new closing date will be July 29, 1983. This brief postponement will provide time for the agency to complete its evaluation of an objection received in response to the final regulation approving the petition for the permanent listing of D&C Red No. 6 and D&C Red No. 7 for these uses.

DATES: Effective May 31, 1983, the new closing date for D&C Red No. 6 and D&C Red No. 7 will be July 29, 1983.

FOR FURTHER INFORMATION CONTACT: John L. Herrman, Bureau of Foods (HFF-334), Food and Drug Administration, 200 C St. SW., Washington, D.C. 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: FDA stayed the effective date of the final rule permanently listing D&C Red No. 6 and D&C Red No. 7 and established the current closing date of May 31, 1983, for the provisional listing of D&C Red No. 6 and D&C Red No. 7 by a rule published in the **Federal Register** of March 29, 1983 (48 FR 13022). The agency extended the closing date until May 31, 1983, to provide time for the completion of its evaluation of an objection received in response to the final rule published in the **Federal Register** of December 28, 1982 (47 FR 57681), approving the petition for the permanent listing of D&C Red No. 6 and D&C Red No. 7 for general use in drugs and cosmetics except for use in the area of the eye. Also in the **Federal Register** of December 28, 1982 (47 FR 57691), FDA had published a final rule establishing a closing date of March 29, 1983, for the provisional listing of D&C Red No. 6 and D&C Red No. 7 to provide time for receipt and evaluation of any objections to the final regulation approving the petition for permanent listing of these color additives. The regulations set forth below will postpone the May 31, 1983 closing date for the provisional listing of these color additives until July 29, 1983.

The review and evaluation of the objection received in response to the final rule permanently listing these color additives have required more time than anticipated. Therefore, FDA concludes that a brief postponement of the closing date for provisional listing until July 29, 1983, is necessary. This brief postponement will provide time for the agency to complete its evaluation of the objection and publish a final decision concerning it in the **Federal Register**. The agency has also concluded that no harm to the public health will result from this extension because the agency has previously concluded that D&C Red No. 6 and D&C Red No. 7 are safe for their intended use under the Color Additive Amendments of 1960.

Because of the short time until the May 31, 1983 closing date, FDA concludes that notice and public procedure on this regulation are impracticable, and that good cause exists for issuing this postponement as a final rule. This regulation will permit the uninterrupted use of these color additives until July 29, 1983. To prevent any interruption in the provisional listing of D&C Red No. 6 and D&C Red No. 7 and in accordance with 5 U.S.C. 553(d) (1) and (3), these regulations are being made effective on May 31, 1983.

List of Subjects in 21 CFR Part 81

Color additives, Color additives provisional list, Cosmetics, Drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 701, 706 (b), (c) and (d), 52 Stat. 1055–1056 as amended, 74 Stat. 399–403 (21 U.S.C. 371, 376 (b), (c), and (d))) and under the transitional provisions of the Color Additive Amendments of 1960 (Title II, Pub. L. 86–618, sec. 203, 74 Stat. 404–407 (21 U.S.C. note)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), Part 81 is amended as follows:

PART 81—GENERAL SPECIFICATIONS AND GENERAL RESTRICTIONS FOR PROVISIONAL COLOR ADDITIVES FOR USE IN FOODS, DRUGS, AND COSMETICS

§ 81.1 [Amended]

1. In § 81.1 *Provisional lists of color additives* by revising the closing date for "D&C Red No. 6" and "D&C Red No. 7" in paragraph (b) to read "July 29, 1983."

§ 81.27 [Amended]

2. In § 81.27 *Conditions of provisional listing* by revising the closing date for "D&C Red No. 6" and "D&C Red No. 7" in paragraph (d) to read "July 29, 1983."

Effective date. This final rule shall be effective May 31, 1983.

(Secs. 701, 706 (b), (c), and (d), 52 Stat. 1055–1056 as amended, 74 Stat. 399–403 (21 U.S.C. 371, 376 (b), (c), and (d)); sec. 203, 74 Stat. 404–407 (21 U.S.C. 376 note))

[Docket No. 82N-0160]

Canned Fruits; Repeal of Standards of Identity for Canned Fruits With Rum; Confirmation of Effective Date

AGENCY: Food and Drug Administration.

ACTION: Final rule; confirmation of effective date.

SUMMARY: The Food and Drug Administration (FDA) confirms the effective date for repealing standards of identity for canned apricots with rum, canned cherries with rum, canned peaches with rum, and canned pears with rum.

DATES: Effective April 15, 1983, for all affected products.

FOR FURTHER INFORMATION CONTACT: F. Leo Kauffman, Bureau of Foods (HFF–214), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–245–1164.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of March 15, 1983 (48 FR 10812), FDA issued a final regulation repealing the standards of identity for canned apricots with rum (21 CFR 145.118), canned cherries with rum (21 CFR 145.128), canned peaches with rum (21 CFR 145.173), and canned pears with rum (21 CFR 145.178) because they are no longer necessary to protect the interest of consumers. Any person adversely affected by the regulation could have, at any time on or before April 14, 1983, filed written objections to the final regulation and requested a public hearing on the specific provisions to which there were objections. No objections or requests for a hearing were received.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 207

[Docket No. R-83-710]

Multifamily Housing Mortgage Insurance; Special Eligibility Provisions for Existing Projects in Target Preservation Areas

AGENCY: Office of Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: On October 3, 1979, HUD published an interim rule (44 FR 56927) which established the Target Area Preservation Demonstration Program for mortgages insured pursuant to section 223(f) of the National Housing Act covering existing multifamily housing projects in older, declining urban areas. The rule provided more favorable insured financing terms in order to ascertain the feasibility of encouraging FHA mortgage insurance for existing projects in these areas, while meeting the requirement that insured projects be economically sound. This rule makes the interim rule final, with changes designed to provide more flexible limitations on secondary financing by project sponsors and to clarify the Demonstration Program's purpose.

EFFECTIVE DATE: July 15, 1983.

FOR FURTHER INFORMATION CONTACT: Michael Wells, Office of Policy and Budget, Housing, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410. (202) 755–6454. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Section 223(f) of the National Housing Act ("the Act") authorizes the Secretary of HUD to provide mortgage insurance, under any appropriate section of that Act, for the purchase or refinancing of existing multifamily housing projects. This authority was added to the Act in 1974.

Regulations implementing the authority were promulgated in March of 1975 at 24 CFR 207.32a. Under these regulations, insurance pursuant to

section 223(f) is written under section 207 of the Act, the Multifamily Housing Mortgage Insurance Program. Experience under the Section 223(f) Program demonstrated that many or most dwellings in older and declining urban areas were ineligible for insurance, since they could not meet the economic soundness underwriting standard required under section 207. Further, the regulations made 223(f) insurance available on a generally more restrictive basis than insurance under the basic Section 207 Program. For example, the maximum allowable repayment term for section 207 mortgage insurance is the lesser of 40 years or 100 percent of the economic life of the property. The maximum term generally permitted for the Section 223(f) Program was the lesser of 35 years or 75 percent of economic life. The maximum allowable ratio of the mortgage amount to the estimated value of the project is 90 percent in section 207, but generally was 85 percent for the Section 223(f) Program.

In order to ascertain the feasibility and desirability of encourging FHA mortgage insurance for existing multifamily projects in older, declining urban areas, while meeting the test of economic soundness, HUD published an interim rule in the **Federal Register** on October 3, 1979 (44 FR 56927, effective October 29, 1979), amending the regulations for the Section 223(f) Mortgage Insurance Program. The interim rule added a new provision, 24 CFR 207.32a(1), authorizing a demonstration Target Area Preservation Program for older declining urban areas. The terms of the Program are as follows:

(1) A maximum allowable mortgage term that is the lesser of 40 years or 100 percent of economic life;

(2) A 90 percent maximum allowable ratio of the mortgage amount to the Secretary's estimate of the value of the project;

(3) A 90 percent maximum allowable ratio of the mortgage amount to the cost of acquisition as determined by the Secretary.

In order to be eligible for Section 223(f) financing on these more favorable terms, multifamily properties must be in areas designated by the Secretary (a) in which concentrated housing, physical development or public service activities are being or are to be carried out in a coordinated manner to serve a common objective or purpose pursuant to a locally developed plan or strategy for neighborhood improvement, conservation, or preservation and (b) that are either older, declining urban areas or were so before the concentrated activities referred to began. The Secretary has designated certain areas meeting the foregoing criteria which are eligible to receive the favorable financing as Target Preservation Areas.

The 1979 interim rule also set limits on the amount of secondary financing that can be used in connection with section 223(f) mortgage insurance. Thus, when a loan is made to finance the purchase of an existing multifamily project, secondary financing cannot exceed the lesser of 5 percent of HUD's estimate of value or 5 percent of HUD's determination of the cost of acquisition. When a loan is made to refinance an existing multifamily project, secondary financing cannot exceed the lesser of 5 percent of HUD's estimate of value or 50 percent of the difference between the cost of refinancing and the maximum insurable mortgage amount. The maximum amount of secondary financing permitted for projects in the Target Preservation Areas is less than the secondary financing amount generally permitted in the Section 223(f) Program—7.5 percent of value or acquisition cost, as appropriate.

After promulgation of the 1979 interim rule, interested persons were given an opportunity to participate in the rulemaking through the submission of written comments. During the comment period (through December 31, 1979), the Department received two comments on the interim rule. Neither comment objected to the rule but the commenters did make recommendations for certain program changes with which the Department agreed and has been able to effect without a change in the regulations. Among the nonregulatory changes suggested by the comments and accommodated are: (1) Changing the section 223(f) insurance claims payment from debentures to cash so that projects will have access to the tax-exempt bond market; (2) allowing rehabilitation that exceeds the existing repair limits of the Section 223(f) Program; and (3) combining section 223(f) financing with GNMA Targeted Tandem Program subsidies in accordance with amendments to section 223(f) contained in the Housing and Community Development Act of 1980. These changes permitted the Demonstration Program to finance moderate rehabilitation in projects where: (a) A neighborhood program has firmed up the rental housing market sufficiently so that tenants who have incomes which are adequate for continued maintenance of the projects will live there for the indefinite future; (b) the more favorable section 223(f) financing assures that the incomes of the present occupants are adequate for the continued maintenance of the projects; and (c) shallow subsidies, through GNMA Targeted Tandem, support repair and rehabilitation which otherwise cannot be supported by project revenues.

Because of the GNMA Targeted Tandem Program's impact on the Federal budget, the Department is not seeking authority to fund additional GNMA Targeted Tandem projects. Partially in lieu of the assistance provided by Targeted Tandem under the interim rule, this final rule revises the interim rule to provide for more flexible limitations on secondary financing by a project sponsor. Currently, as noted above, secondary financing in Target Preservation Areas cannot exceed 5 percent of HUD's estimate of a property's value. The final rule provides that, where the interest rate on secondary financing does not exceed the applicable HUD-established interest rate, the total secondary financing cannot exceed: (a) In the case of the purchase of a project, the difference between the insured mortgage amount and 95 percent of HUD's estimate of value or cost of acquisition, whichever is lower, and (b) in the case of a refinancing, the difference between the insured mortgage and 95 percent of HUD's estimate of value or the refinancing costs, whichever is lower. With this revision, a more effective level of repair or moderate rehabilitation should be possible, based on subsidized secondary financing provided by State or local governments, with either no rent change, or only modest rent increases. For example, under this final rule, a property may be covered by a 223(f) first mortgage to the amount of 80 percent of value, and by a second mortgage securing a State or local subsidized loan, for further amount of up to 15 percent of value.

This final rule also revises the last paragraph of 207.32a(1)(3) to clarify and make more comprehensive the stated objective of the TAP Demonstration Program. The interim rule states the Program's objective is "* * * to determine whether a sufficient number of multifamily property owners in the Target Preservation Areas avail themselves of section 223(f) insurance that meets the economic soundness test, and whether section 223(f) financing can make sufficient contributions to the preservation, conservation or revitalization of the Target Preservation Areas to justify making the demonstration's approach to providing financing to multifamily properties in older, declining urban areas a permanent part of the section 223(f) program." This rule restates this

objective as "to test the feasibility of mortgage insurance in upgrading and maintaining older, declining urban areas and multifamily rental housing in these areas.".

Findings and Certification

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations in 24 CFR Part 50, which implement section 102(2)(c) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours at the Office of the Rules Docket Clerk, Room 10278, 451 Seventh Street, SW., Washington, D.C. 20410.

This rule does not constitute a "major rule" as that term is defined in section 1(b) of the Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in cost or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Pursuant to the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. The changes made by this rule can be considered technical adjustments to the existing Target Area Preservation Demonstration Program. They do not change the goals toward which program activities are directed and any effect on small entities should be minor and positive.

This program is cited in the Catalog of Federal Domestic Assistance as: 14.155, Mortgage Insurance for the Purchase or Refinancing of Existing Multifamily Housing Projects.

This rule was listed as item H–82–78 under the Office of Housing in the Department's Semiannual Agenda of Regulations published on April 25, 1982 (48 FR 18054) pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

List of Subjects in 24 CFR Part 207

Mortgage insurance, Rental housing, Mobile home parks.

PART 207—[AMENDED]

Accordingly, paragraphs (b), (c), (e) and (k) of § 207.32a, promulgated as interim rules at 44 FR 56927, October 3, 1979, are hereby adopted as final rules and 24 CFR Part 207 is further revised to read as follows:

1. In § 207.32a, paragraph (j)(4) is revised to read as follows:

§ 207.32a Eligibility of mortgages on existing projects.

* * * * *

(j) *Secondary financing.*

* * * * *

(4) For those projects which meet the eligibility requirements contained in paragraph (k) or paragraph (l) of this section, any additional obligations on the project in connection with the insured transaction shall be in an amount approved by the Commissioner and represented by such credit and security instruments as are approved by the Commissioner. In the case of projects which meet the eligibility requirements contained in paragraph (l) of this section, the additional obligations shall in no event exceed:

(i) When a loan is made to finance the purchase of an existing multifamily housing project and the interest rate of the additional obligations does not exceed the current maximum interest rate permitted under § 207.7, the difference between the amount of the insured mortgage and the lesser of 95 percent of the Commissioner's estimate of value or 95 percent of the cost of acquisition as defined in paragraph (c) of this section.

(ii) When a loan is made to finance the purchase of an existing multifamily housing project, and the interest rate of the additional obligations exceeds the current maximum interest rate permitted under § 207.7, the lesser of:

(A) Five percent of the Commissioner's estimate of value, or

(B) Five percent of the cost of acquisition as defined in paragraph (c) of this section.

(iii) When a loan is made to refinance an existing multifamily housing project and the interest rate of the additional obligations does not exceed the current maximum interest rate permitted under § 207.7, the lesser of:

(A) The difference between the amount of the insured mortgage and 95 percent of the Commissioner's estimate of value, or

(B) The difference between the amount of the insured mortgage and the cost to refinance as defined in paragraph (d)(2) of this section.

(iv) When a loan is made to refinance an existing multifamily housing project, and the interest rate of the additional obligations exceeds the current maximum interest rate permitted under § 207.7, the lesser of:

(A) Five percent of the Commissioner's estimate of value, or

(B) Fifty percent of the difference between the cost to refinance as defined in paragraph (d)(2) of this section and the maximum mortgage amount as determined by the Commissioner."

2. In § 207.32a, paragraph (l)(3) is revised to read as follows:

§ 207.32a Eligibility of mortgage on existing projects.

* * * * *

(l) *Additional eligibility requirements for a mortgage financing a project in a Target Preservation Area.*

* * * * *

(3) The area has unique qualities that make it suitable for inclusion as one of the demonstration areas in the Target Area Preservation Demonstration Program. The Target Area Preservation Demonstration Program makes section 223(f) financing available on a limited, carefully controlled demonstration basis to areas that meet the requirements given above, and such additional Target Preservation Area eligibility criteria as the Secretary may announce in the future. The objective of the Target Area Preservation Demonstration Program is to test the feasibility of mortgage insurance in upgrading and maintaining older, declining urban areas and multifamily rental housing in these areas. An area approved as a Neighborhood Strategy Area under the provisions of 24 CFR Part 881, Subpart C, shall be considered to have met the criteria in paragraphs (l) (1) and (2) of this section.

(Sec. 223(f), National Housing Act (12 U.S.C. 1715n); section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)))

Dated: May 23, 1983.

Philip Abrams,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210–27–M

---

24 CFR Part 867

[Docket No. R–83–1057]

Costs of Certification of Housing Managers and Related Training in Projects Owned by Public Housing Authorities

AGENCY: Office of Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This rule amends the regulations governing certification of housing managers for projects owned by a Public Housing Agency (PHA). The amendment removes several restrictions relating to payment by a PHA of the costs of certification of an employee as a housing manager or assistant housing manager, including costs of training to qualify for such certification.

EFFECTIVE DATE: July 15, 1983.

FOR FURTHER INFORMATION CONTACT: Wayne Hunter, Office of Public Housing, Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410, telephone number (202) 472–4703. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Subpart C of 24 CFR Part 867 governs the certification of Housing Managers and Assistant Housing Managers for projects owned by a Public Housing Agency (PHA). Section 867.307, which deals with costs of certification and related training, currently provides that costs of specialized training directly related to qualifying for certification and costs of general education necessary for certification shall be includible as eligible expenditures in PHA operating budgets. Under the existing regulation, such training must be approved in writing by an Approved Certifying Organization or by HUD and be designed to enhance the skills of the trainee for the purpose of qualifying for certification. However, such certification and training costs are includible as eligible expenditures in the PHA budgets submitted to HUD only with respect to persons employed on the date of issuance of the regulation (September 29, 1976).

On January 6, 1983, the Department published a proposed amendment to § 867.307 which would afford PHAs more discretion regarding payment of certification and training costs. The following changes were proposed:

(1) To replace the detailed descriptions of types of eligible costs with the basic standard of "reasonable costs";

(2) To remove the restrictions against payment of certification costs for employees hired after September 29, 1976;

(3) To remove the requirement that training must be approved by HUD or an Approved Certifying Organization; and

(4) To give each PHA discretion as to whether to pay costs of certification and of training to enable an employee to qualify for certification out of PHA funds. However, the rule proposed that such costs incurred by a PHA must be paid within its existing operating subsidy availability under 24 CFR Part 890 and that no additional subsidy will be paid to cover such costs.

The Department received three public comments on the proposed rule. All three comments were generally in favor of the amendment as proposed and made no specific recommendations for changes. While we have revised the proposed language of the new § 867.307 to make it clearer, we have not made any changes in substance from the proposed amendment.

A Finding of No Significant Impact with respect to the environment has been made in accordance with HUD regulations at 24 CFR Part 50 which implement Section 102(2)(C) of the National Environmental Policy Act of 1969. The Finding of No Significant Impact is available for public inspection during regular business hours in the Office of the Rules Docket Clerk, Office of the General Counsel, Counsel Room 10278, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410.

This rule does not constitute a "major rule" as that term is defined in Section 1(b) of Executive Order 12291 on Federal Regulation issued on February 17, 1981. Analysis of the rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers individual industries, Federal, State, or local government agencies, or geographic regions; or (3) have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Pursuant to the provisions of 5 U.S.C. 605(b) (the Regulatory Flexibility Act), the Undersigned hereby certifies that this rule does not have a significant economic impact on a substantial number of small entities. While this rule will affect a substantial number of small governmental entities, it is not expected to have a significant economic impact on any of them.

This rule is listed at 48 FR 18074 as item H–77–82 in the Department's Semiannual Agenda of Regulations published on April 25, 1983 (48 FR 18054), pursuant to Executive Order 12291 and the Regulatory Flexibility Act.

(The Catalog of Federal Domestic Assistance program number is 14.156 (Lower Income Housing Assistance Program))

List of Subjects in 24 CFR Part 867

Public housing.

PART 867—[AMENDED]

Accordingly, 24 CFR Part 867 is amended by revising § 867.307 to read as follows:

§ 867.307 Costs of certification and related training.

The reasonable costs incurred by a PHA for Certification of a PHA employee as a Housing Manager or Assistant Housing Manager (whether or not the Certification is required under this part), including training to enable a PHA employee to qualify for such Certification, shall be allowable as eligible expenditures for a PHA. The PHA may, at its discretion, include a provision for payment of such costs in its operating budget. However, such expenditures must be within the PHA's existing operating subsidy availability under 24 CFR Part 890, since no additional operating subsidy will be provided to cover them.

(Sec. 6(c)(4), U.S. Housing Act of 1937; Sec. 7(d) Department of HUD Act; 42 U.S.C. 1437d, 3535(d))

Dated: May 23, 1983.

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF) Treasury.

ACTION: Final rule, Treasury decision.

SUMMARY: This final rule establishes a three year firearms license for manufacturers, importers, dealers, and collectors instead of an annual firearms license. This regulation change will reduce paperwork and other administrative costs to the firearms industry and to the Government.

EFFECTIVE DATE: August 1, 1983.

FOR FURTHER INFORMATION CONTACT: James A. Hunt, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue, NW, Washington, DC 20226, (202–566–7626).

SUPPLEMENTARY INFORMATION:

Background

On November 30, 1982, ATF published a notice of proposed rulemaking, Notice No. 437, in the **Federal Register** (47 FR 53929) proposing a three year firearms license for manufacturers, importers, dealers, and collectors. The license period of an original license and for a license renewal has been one year since implementation of the Gun Control Act of 1968. A review of the law and legislative history indicated that a firearms license could be issued for more than a one year period provided the total fee was based on a "per year" rate. Since there are over 200,000 firearms licensees, a change in the license period from one to three years would result in a significant reduction in paperwork and other administrative costs for the firearms industry and the Government.

Comments

During the 60 day comment period 46 written comments were received. Forty-four of the commenters favored an increase in the licensing period and two were opposed.

Most of the commenters in favor were in agreement with the three year licensing period and stated there would definitely be a reduction in paperwork burden. One particular administrative cost savings noted was the elimination of the need to furnish a license copy to firearms suppliers annually. Four commenters favored an increase in the licensing period to five years and two commenters wanted a substantial increase in the license fees. Two organizations, National Rifle Association and Handgun Control Inc, commented in favor of the three year license.

One of the two comments opposed to the proposal was from an individual opposed to firearms. The other commenter opposed a three year firearms license because he is 75 years old and since he has two licenses, the licenses would cost him $60 for three years. He expressed a concern that he might not remain in business for three years. This commenter correctly stated that there is no refund provision for a license used less than three years and that the paperwork for any refund would make such a provision too costly.

ATF considered a five year license period before proposing a three year license. We believe a five year period might impose a financial hardship on some licensees and would present a problem for ATF by causing the Bureau to maintain an active status for a longer period of time for licensees who have gone out of business and who have failed to notify ATF. Any change in the license fee would require a change in the law by Congress. A refund procedure was considered and rejected because the administrative costs would be higher than the license fee in most cases. A provision to allow for an optional annual license was considered and rejected because this would require and expensive special handling.

Implementing the Three Year License

The three year firearms license will become effective August 1, 1983. Because there are over 200,000 licensees with an annual license, a phase-in period will be required for the first year the licenses are renewed. If all licenses were renewed on a three year period, the work load for ATF would be very low for two years and very high during the third year. Therefore, for the first year the license renewals issued by ATF during a month will be selected at random for one, two or three years and indicated on the license renewal form sent to the licensees. The one year phase-in of the three year license will be discussed in more detail in an Industry Circular to be sent to all licensees. All original firearms licenses issued will be for a three year period.

The amendments made in this final rule are basically those proposed in the notice of proposed rulemaking except for the following technical and conforming amendments:

(1) In accordance with the establishment of three year firearms licenses, a technical and conforming amendment is made to §§ 178.52 and 178.95. These provisions currently provide for the furnishing of a copy of the license to licensees for their certification and use in accordance with § 178.94. Section 178.94 requires that a licensee furnish a certified copy of his firearm's license to a licensee from whom he acquires firearms. The three year firearms license will contain a purchasing certification statement which a transferee may execute in order to furnish a certified copy of his license to a transferor in accordance with § 178.94. Since licensees may simply reproduce their licenses and then certify the reproduction, they will not need a certified copy of their licenses in order to comply with § 178.94. The provision set forth in §§ 178.52 and 178.95 that licensees be furnished a copy of their license for certification and use pursuant to § 178.94 is, therefore, unnecessary. (A reference to the license copy was also removed from § 178.47.) This technical change will further reduce paperwork and other administrative costs for firearms licensees and the Government.

(2) Regulations in Part 178 state that license applications and fees are sent to the District Director. However, most license applications and fees are sent for processing to the Service Center Director for the internal revenue district in which the applicant is to do business. This final rule makes reference to the Service Center Director and the District Director.

(3) The firearms license used to consist of three parts: Original license, ATF Form 8 (5310.11) Part 1; copy, ATF Form 8 (5310.11) Part 2; and a Renewal, AFT Form 8 (5310.11) Part 3. Since a purchasing copy, Part 2, is no longer necessary, the renewal will be changed to ATF Form 8 (5310.11) Part II. The sections referring to the renewal form, ATF Form 8 Part 3, have been changed to ATF Form 8 (5310.11) Part II.

Drafting Information

The principal author of this document is James A. Hunt, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

List of Subjects in 27 CFR Part 178

Administrative practice and procedure, Arms and munitions, Authority delegations, Customs delegations, Customs duties and inspection, Exports, Imports, Military personnel, Penalties, Reporting requirements, Research, Seizures and forfeitures, Transportation.

Executive Order 12291

It has been determined that this final rule is not a "major rule" within the meaning of Executive Order 12291 of February 17, 1981, because it will not have an annual effect on the economy of $100 million or more; it will not result in a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographical regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

The provisions of the Regulatory Flexibility Act relating to a final regulatory flexibility analysis (5 U.S.C. 604) are not applicable to this final rule because it will not have a significant economic impact on a substantial number of small entities. The final rule is expected to have a significant secondary or incidental effect on a substantial number of small entities in

reducing the paperwork and other administrative costs associated with obtaining a firearms license. The final rule will not impose, or otherwise cause, a significant increase in reporting, recordkeeping, or other compliance burdens on a substantial number of small entities.

Accordingly, it is hereby certified under the provisions of Section 3 of the Regulatory Flexibility Act (5 U.S.C. 605(b)), that this final rule will not have a significant economic impact on a substantial number of small entities.

PART 178—COMMERCE IN FIREARMS AND AMMUNITION

Accordingly, under the authority in 18 U.S.C. 926 (82 Stat. 1226), 27 CFR Part 178 is amended as follows:

Paragraph 1. The table of sections in 27 CFR Part 178, Subpart D, is amended by revising the section heading of § 178.46 to add the Service Center Director.

Subpart D—Licensees

Sec.

* * * * *

178.46 Procedure by Service Center Director or District Director.

* * * * *

Par. 2. The meaning of terms, § 178.11, is amended by adding in alphabetical order the following definition:

§ 178.11 Meaning of terms.

* * * * *

Service Center Director. A director of an Internal Revenue Service Center.

* * * * *

Par. 3. The Service Center Director is added to two subparagraphs in Section 178.41. § 178.41 is amended by revising the first sentence of paragraphs (b) and (c) to read as follows:

§ 178.41 General.

* * * * *

(b) Each person intending to engage in business as a firearms or ammunition importer, manufacturer, or dealer shall file an application with the required fee (See § 178.42), with the Service Center Director or District Director for the internal revenue district in which his premises are to be located, and, pursuant to § 178.47, receive the license required for such business from the Regional regulatory administrator.

(c) Each person seeking the privileges of a collector licensed under this part shall file an application, with the required fee (see § 178.42), with the Service Center Director or District Director for the internal revenue district in which his collection premises are to be located, and pursuant to § 178.47, receive from the Regional regulatory administrator the license covering the collection of curios and relics.

* * * * *

Par. 4. Section 178.42 is amended to provide for a three year firearms license. Section 178.42 is amended by revising the introductory text of the section to read as follows:

§ 178.42 License fees.

Each applicant shall pay a fee at a yearly rate for obtaining a firearms license, a separate fee being required for each business or collecting activity at each place of such business or activity, as follows:

* * * * *

Par. 5. Section 178.44 is amended to reflect a three year firearms license. Section 178.44 is amended by revising paragraphs (a) and (b) to read as follows:

§ 178.44 Original license.

(a) Any person who intends to engage in business as a firearms or ammunition importer, manufacturer, or dealer on or after the effective date of this part, or who has not previously been licensed under the provisions of this part to so engage in business, or who has not timely submitted application for renewal of his previous license issued under this part, shall, except as provided in paragraph (c) of this section, file with the Service Center Director or District Director for the internal revenue district in which the applicant is to do business, an application, ATF Form 7 (5310.12). The application, ATF Form 7 (5310.12), shall include information as to the ownership of the business, the type of firearms or ammunition to be dealt in, the business hours, the business history, and the identity of the responsible persons in the business. The application must be executed under the penalties of perjury and the penalties imposed by 18 U.S.C. 924. The application shall be accompanied by the appropriate fee in the form of: (1) Cash, or (2) money order or check made payable to the Internal Revenue Service. ATF Forms 7 (5310.12), may be obtained from any Regional regulatory administrator or District Director.

(b) Any person who desires to obtain the privileges granted to a licensed collector under the Act and this part on or after the effective date of this part, or who has not timely submitted application for renewal of his previous license issued under this part, shall file with the Service Center Director or District Director for the internal revenue district in which the applicant is to maintain his collection premises an application, ATF Form 7 (5310.12). The application, ATF Form 7 (5310.12), shall include information as to the ownership of the activity, and the identity of the responsible persons in the activity. The application must be executed under the penalties of perjury and the penalties imposed by 18 U.S.C. 924. The application shall be accompanied by the appropriate fee in the form of: (1) Cash, or (2) money order or check made payable to the Internal Revenue Service. ATF Forms 7 (5310.12) may be obtained from any Regional regulatory administrator or District Director.

* * * * *

Par. 6. Section 178.45 is amended to provide for renewing a firearms license for one, two, or three years. Section 178.45 is revised to read as follows:

§ 178.45 Renewal of license.

If a licensee intends to continue the business or activity described on a license issued under this part during any portion of the ensuing year, he shall, unless otherwise notified in writing by the Regional regulatory administrator, execute and file prior to the expiration of his license an application for a license renewal, ATF Form 8 (5310.11) Part II, accompanied by the required fee, with the Service Center Director or District Director for the internal revenue district in which the business or activity is operated. The Regional regulatory administrator may, in writing, require an applicant for license renewal to also file completed ATF Form 7 (5310.12) in the manner required by § 178.44. In the event the licensee does not timely file an ATF Form 8 (5310.11) Part II, he must file an ATF Form 7 (5310.12) as required by § 178.44, and obtain the required license before continuing business or collecting activity. If an ATF Form 8 (5310.11) Part II is not timely received through the mails, the licensee should so notify his Regional regulatory administrator.

Par. 7. Section 178.46 is amended to add the Service Center Director and change ATF Form 8 Part 3 to Part II. Section 178.46 is revised to read as follows:

§ 178.46 Procedure by Service Center Director or District Director.

Upon receipt of an application for an original license on ATF Form 7 (5310.12) or an application for renewal of a license on ATF Form 8 (5310.11) Part II or a required ATF Form 7 (5310.12), the Service Center Director or District Director shall deposit the fee accompanying the license application and forward the application to the Regional regulatory administrator. Where an application is filed with an

insufficient fee, the application and any fee submitted shall be returned.

Par. 8. Section 178.47 is amended to provide for a firearms license for one, two, or three years and to remove reference to a copy of the license. Section 178.47 is amended by revising paragraph (a), introductory text of paragraph (b), and paragraph (c) to read as follows:

§ 178.47 Issuance of license.

(a) Upon receipt of a properly executed application for a license on ATF Form 7 (5310.12), or ATF Form 8 (5310.11) Part II, the Regional regulatory administrator may, upon finding through further inquiry or investigation, or otherwise, that the applicant is entitled thereto, issue the appropriate license. Each license shall bear a serial number and such number may be assigned to the licensee to whom issued for so long as he maintains continuity of renewal in the same internal revenue district.

(b) The Regional regulatory administrator shall approve a properly executed application for license on ATF Form 7 (5310.12), or ATF Form 8 (5310.11) Part II, if:

* * * * *

(c) The Regional regulatory administrator shall approve or deny an application for license within the 45-day period beginning on the date the application was received by the Service Center Director or District Director: Provided, That when an applicant for license renewal is a person who is, pursuant to the provisions of §§ 178.82, 178.143, or 178.144, conducting business or collecting activity under a previously issued license, action regarding the application will be held in abeyance pending the completion of the proceedings against the applicant's existing license or license application, final determination of the applicant's criminal case, or final action by the Director on an application for relief submitted pursuant to § 178.144, as the case may be.

* * * * *

Par. 9. Section 178.49 is amended to provide for a firearms license for three years. Section 178.49 is revised to read as follows:

§ 178.49 Duration of license.

The license entitles the person to whom issued to engage in the business or activity specified on the license, within the limitations of the Act and the regulations contained in this part, for the period stated on the license, unless sooner terminated. Original licenses issued August 1, 1983, and thereafter will be for a three year period unless terminated sooner. Licenses renewed August 1, 1983, through July 31, 1984, will be for a one, two or three year period. Licenses renewed August 1, 1984 and thereafter will be for a three year period unless terminated sooner.

Par. 10. Section 178.52 is amended to remove reference to a copy of the license. Section 178.52 is revised to read as follows:

§ 178.52 Change of address.

A licensee may during the term of his current license remove his business or activity to a new location at which he intends regularly to carry on such business or activity, without procuring a new license. However, in every case, whether or not the removal is from one region to another, notification of the new location of the business or activity must be given not less than 10 days prior to such removal to the Regional regulatory administrator for the region from which or within which the removal is to be made, and the Regional regulatory administrator for the region to which the removal is to be made. In each instance, the license must be submitted for endorsement to the Regional regulatory administrator having jurisdication over the region to which or within which removal is to be made. After endorsement of the license to show the new address and the new license number, if any, the Regional regulatory administrator will return same to the licensee.

Par. 11. Section 178.59 is amended to change ATF Form 8 Part 3 to Part II. Section 178.59 is revised to read as follows:

§ 178.59 Abandoned application.

Upon receipt of an incomplete or improperly executed application on ATF form 7 (5310.12), or ATF Form 8 (5310.11) Part II, the applicant shall be notified of the deficiency in the application. If the application is not corrected and returned within 30 days following the date of notification, the application shall be considered as having been abandoned and the license fee returned.

Par. 12. Section 178.95 is amended to remove reference to a copy of the license being furnished with the original license. Section 178.95 is revised to read as follows:

§ 178.95 Certified copy of license.

The license furnished to each person licensed under the provisions of this part contains a purchasing certification statement. This original license may be reproduced and the reproduction then certified by the licensee for use pursuant to § 178.94. If the licensee desires an additional copy of the license for certification (instead of making a reproduction of the original license), the licensee may submit a request, in writing, for a certified copy of the license to the Regional regulatory administrator for the region in which the license was issued. The request must set forth the name, trade name (if any) and address of the licensee, and the number of license copies desired. There is a charge of $1 for each copy. The fee paid for copies of the license must accompany the request for copies. The fee may be paid by (1) cash, or (2) money order or check made payable to the Internal Revenue Service.

Signed: April 18, 1983.

Stephen E. Higgins,

Director.

Approved: May 6, 1983.

John M. Walker, Jr.,

Assistant Secretary, Enforcement and Operations.

BILLING CODE 4810-31-M

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

Occupational Exposure to Inorganic Arsenic; Supplemental Statement of Reasons for Rule; Corrections

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Supplemental statement of reasons for final rule; corrections.

SUMMARY: This notice announces corrections to the Supplemental Statement of Reasons for the Final Rule for Occupational Exposure to Inorganic Arsenic which appeared in the **Federal Register** on January 14, 1983 (48 FR 1864).

EFFECTIVE DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. James F. Foster, OSHA, Office of Public Affairs, U.S. Department of Labor, Rm. N3637, 200 Constitution Ave., N.W., Washington, D.C. 20210. Telephone: (202) 523-8148.

SUPPLEMENTARY INFORMATION: On January 14, 1983 (48 FR 1864) OSHA published a document titled "Occupational Exposure to Inorganic Arsenic; Supplemental Statement of Reasons for Final Rule." There were a number of typographical errors. This document corrects only those typographical errors where correction is necessary to make the meaning clear, to correct citations or to correct numbers.

Accordingly, 48 FR 1864–1903 are corrected as follows:

1. On page 1864, first column, the address and telephone number of the OSHA Office of Publications, U.S. Department of Labor, is corrected to read, "Room S1212, 200 Constitution Ave., N.W. Washington, D.C. 20210. Telephone: (202) 523–6138."

2. On page 1866, third column, lines 13 and 14 are corrected to read, "Consultants in Epidemiology and Occupational Health (CEOH) presented".

3. On page 1867, first column, lines 13–15 are corrected to read, "significant health risk . . ." (*ASARCO et al.* v. *OSHA*, 647 F.2d 1, 2 (9th Cir., 1981)".

4. On page 1872, Tables 1 and 2 are corrected to read as follows:

BILLING CODE 4510-26-M

Table 1

		Ceiling							
		Low		Medium		High		Very High

5. On page 1875, column one, line one is corrected to read, "500 $\mu g/m^3$ was very small and that".

6. On page 1875, column one, line 3 of the note is corrected to read, "equivalent to an SMR of 150 or a relative risk".

7. On page 1875, column one, fifth line from the bottom is corrected to read, "did find non-significant excesses below a 500 $\mu g/m^3$".

8. On page 1875, column three, the bottom line is corrected to read, "exposure or average exposure stemmed".

9. On page 1876, column two, line 40 is corrected to read, "were receiving pensions (Ex. 29B; Ex.".

10. On page 1876, column two, line 55 is corrected to read "exposure in micrograms of arsenic per liter of urine-years (μg As/1-years) and average".

Note.—In a number of places in the document the abbreviation for liter in the abbreviations μg As/1 and μg As/1-years is incorrectly printed as "1" rather than the correct abbreciation of "l".

11. On page 1877, column one, the bottom line is corrected to read, "expressed in micrograms of arsenic per".

12. On page 1880, column three, the Note is corrected to read, "This large a difference in smoking habits seems a reasonable upper bound".

13. On page 1883, column three, Table 3 is corrected to read as follows:

Kansas Permanent Regulatory Program; Informal Conference on Status

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Notice of informal conference.

SUMMARY: On January 21, 1981, the Secretary of the Interior approved the Kansas program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). On March 11, 1983, the Director, OSM, notified the Governor of Kansas that OSM had reason to believe that serious problems exist which are adversely affecting the effective implementation, administration, maintenance and enforcement of Kansas' approved regulatory program.

Under the provisions of OSM's regulations at 30 CFR 733.12(c), the Director may hold an informal conference to discuss the facts surrounding the Director's notification if such an informal conference is requested by the State. By letter dated May 6, 1983, the Governor of Kansas requested that the Director hold an informal conference. Accordingly, the Director hereby notifies Kansas and the public that OSM will hold an informal conference on June 16, 1983, at the address shown below under "ADDRESSES." All interested persons may attend the informal conference.

DATE: OSM has scheduled an informal conference on June 16, 1983, to be held at the address below.

ADDRESSES: The informal conference will be held on June 16, 1983, beginning at 1:30 p.m. at the Holiday Inn, 4020 Parkview Drive, Pittsburg, Kansas 66762

Copies of Administrative Record documents referenced in this notice are available for public inspection and copying during normal business hours at: Office of Surface Mining, Scarritt Building, 818 Grant Avenue, Kansas City, Missouri 64106; Telephone: (816) 374–5527.

FOR FURTHER INFORMATION CONTACT: Mr. Richard Rieke, Kansas City Field Office Director, Office of Surface Mining Reclamation and Enforcement, Scarritt Building, 818 Grand Avenue, Kansas City, Missouri 64106; Telephone: (816) 374–5527.

SUPPLEMENTARY INFORMATION: The Secretary of the Interior conditionally approved the Kansas program on January 21, 1981 (46 FR 5892).

On March 11, 1983, the Director, OSM, notified the Governor of Kansas that OSM had reason to believe that serious problems exist which are adversel affecting the effective implementation, administration, maintenance, and enforcement of Kansas' approved permanent regulatory program under SMCRA.

Since the approval of Kansas' program, and in keeping with its policy of working closely with the State, OSM has had numerous discussions with officials from the Kansas Mined Land Conservation and Reclamation Board (the Board) about the State's performance. Recent discussions and investigations have centered on inadequacies of the Board's implementation of the approved program in the areas set forth below.

1. *Permitting:* OSM has conducted a review of five Board approved permanent program permits. Although the State was able to process and approve, within eight months following primacy, 26 of the 28 permit applications received, OSM's review of five of the permits disclose major deficiencies. For example, OSM has reason to believe that:

(a) The Board is not conducting adequate completeness reviews of permit applications prior to issuance. As a result, certain required categories of information have been omitted.

(b) Technical review of permit applications is inadequate. OSM has found what appear to be major technical deficiencies in every permit reviewed. Inadequate analyses of the hydrologic balance, sediment ponds, prime farmland and revegetation success, and fish and wildlife protection are leading problems.

(c) The Board has not been making written findings on the critical categories of information required in the permit application. Therefore, the Board will not have the necessary documentation to support its decisions.

(d) The Board's approved program staffing plan is not being followed and may be a contributing factor to the problems with permit review. The Board does not have all technical positions filled, particularly in the fields of geology, engineering and agronomy.

2. *Inspection and Enforcement:* OSM has identified the following issues with respect to inspection and enforcement actions:

(a) OSM oversight inspections have resulted in the discovery of an inordinate number of significant violations which should have been cited previously by MLCRB inspectors.

(b) MLCRB inspection records indicate that State inspections are not adequately documented, evidence is not gathered, and the inspections rarely include a complete review of all applicable performance standards.

(c) While the State appears to be meeting or even exceeding the required frequency standards for complete and partial inspections, these numbers are misleading. OSM's review of State records shows that as many as six "complete" inspections were conducted by a single inspector in a single day. OSM questions that this frequency is possible while still observing and documenting all applicable performance standards.

(d) The MLCRB staff generally failed to take enforcement action when violations were observed.

(e) The civil penalty assessment procedures required in the approved State program are not being followed. Continuing analysis indicates that the Board consistently fails to properly consider assessment criteria (the operator's previous history of violations, seriousness, negligence, and good faith compliance), generally waive penalty points, and assesses no penalty.

(f) OSM believes that the Board's inspection staff is not receiving adequate guidance and training. Specific areas of concern include lack of training for blasting, seismograph operation, penalty assessment procedures, hydrology, report writing and evidence gathering.

(g) The Board's staff is deficient in its handling of citizen complaints. While it generally responds to a complaint by making an inspection, the Board rarely provides to the citizen the required written response detailing the disposition of the complaint, nor does it take appropriate enforcement action.

3. *Bond Release*: The State is releasing performance bonds for surface coal mining operations that do not meet the State's required performance standards.

4. *General Board Procedures and Administrative Maintenance*: A general area of concern is the apparent failure of the Board to create or maintain administrative record procedures or tracking systems for such matters as permit reviews, citizen complaints, ten-day notices from OSM, enforcement actions and civil penalty assessments and bonding.

Pursuant to 30 CFR 733.12(b)(3), the Director requested that the Board take certain actions by April 15, 1983, to correct the deficiencies in its program. The Director also advised the State of its opportunity to request an informal conference, pursuant to 30 CFR 733.12(c). On May 6, 1983, the Chairman of the Board requested that the Director hold an informal conference.

The Director has agreed to Kansas' request, and hereby gives public notice of the informal conference for all persons wishing to attend. The date, time and location of the informal conference are identified above under the "Date" and "Addresses" sections of this notice.

The informal conference will pertain to the facts or the time period for accomplishing remedial actions as specified in the Director's notification.

Conference Rules

The informal conference is an opportunity for the Director to discuss the status of the implementation of the Kansas program with Kansas officials.

Because the conference will be informal, no testimony from the public will be taken, but a verbatim transcript of the meeting will be kept. Persons wishing to attend the informal conference will be permitted to do so.

Dated: May 25, 1983.

Arthur W. Abbs,

Acting Assistant Director, Program Operations and Inspection.

BILLING CODE 4310-05-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[CGD8-81-801]

Safety Zone; Mississippi River Gulf Outlet

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is amending its Safety Zone Regulations, 33 CFR 165, by establishing a safety zone in the Mississippi River Gulf Outlet (MRGO), the Michoud Canal and the Inner Harbor Navigation Canal (IHNC). As the number and size of the vessels utilizing the MRGO increases, so does the need to coordinate their movements to minimize the possibility of environmental or economic harm befalling the Port of New Orleans as a result of a collision. The Safety Zone is being established to prevent larger vessels from having dangerous meeting and overtaking situations between the seaward entrance and LT 62 of the MRGO.

EFFECTIVE DATE: This final rule became effective on July 1 1983.

FOR FURTHER INFORMATION CONTACT: LCDR R. E. FORD, Port Safety Officer, or LTJG S. EVANS, Waterways Safety Officer, c/o U.S. Coast Guard, Captain of the Port, 4640 Urquhart Street, New

Orleans, Louisiana 70117, telephone: (504) 589–7108.

SUPPLEMENTARY INFORMATION: On June 4, 1981, the Coast Guard published interim final rules in the **Federal Register** for the regulations (46 FR 29933). Interested persons were requested to submit comments and seven comments were received. The publishing of timely responses to these seven comments in Final Rule making action was delayed by the subsequent unanticipated closure of the New Orleans Vessel Traffic Service (VTS) in March 1982. Inasmuch as the Interim Final Rules assigned to the VTS the vital function of coordinating vessel movements within the Safety Zone, its closure curtailed the ability of the Coast Guard to carry out this vital function and essentially rendered the regulations establishing the Safety Zone moot. In the aftermath of the closure of VTS, further action to amend the Interim Final Rules to reflect the loss of the VTS, or to withdraw them in their entirety, was purposely postponed until a final resolution of the future status of VTS was made.

In August 1982, funding was restored for the VTS and the system was partially reactivated shortly thereafter. This partial reactivation did not include coverage of the MRGO which, at the time, was preliminarily scheduled for coverage sometime during the period of mid to late 1983. However, the continued existence of the VTS remained somewhat in doubt, resulting in the further postponement of Final Rules on the MRGO Safety Zone pending a final resolution of the matter.

Regardless of the long term status of the VTS, the system's immediate operational plans are to reactivate coverage on the MRGO on July 1, 1983. In response to these plans, a decision was made that a continued delay in publishing Final Rules was not in the public's best interest because of the confusion that could arise as to the status of the regulations upon the reactivation of coverage on the MRGO.

Drafting Information

The principal persons involved in drafting this rule were LCDR G. J. E. THORNTON, Port Safety Officer, or LTJG M. R. BESKEEN, Waterways Safety Officer, U.S. Coast Guard, Captain of the Port, 4640 Urquhart Street, New Orleans, Louisiana 70117, Telephone (504) 589–7108. The project attorney is LCDR R. A. BRUNELL, c/o Commander, Eighth Coast Guard District (dl), Hale Boggs Federal Building, 500 Camp Street, New Orleans, Louisiana 70130, Telephone (504) 589–5185.

Discussion of Comments

Comments were received from persons with and/or representing the following organizations: Transworld Drilling Company, Oklahoma City, Oklahoma: Associated Branch Pilots, New Orleans, Louisiana; Crescent River Port Pilots Association, New Orleans, Louisiana; New Orleans Steamship Association; American Waterways Operators, Inc., New Orleans, Louisiana, Thomas and James Harrison Ltd., Liverpool, England; Vessel Traffic Service, New Orleans, Louisiana.

One commentor suggested that the proposed rule be amended to exclude all vessels, including mobile offshore drilling units (MODUs), from the requirement to notify Vessel Traffic Service (VTS) when crossing the MRGO normal to the canal axis. The Coast Guard designed the MRGO Safety Zone to prevent meeting and/or overtaking situations in the open water section of the MRGO between vessels, including tows over 600 feet long or over 80 feet abeam, or over 30 feet in draft. Crossing situations were not anticipated in a channel 600 feet wide and therefore were not specifically addressed in the rulemaking. Also, the hydrodynamic interaction between ships that make meeting and overtaking situations potentially hazardous are not present in a crossing situation. The crossing of the axis of the safety zone by a MODU, or any vessel meeting one or more of the size criterion, is so rare that it need not be addressed by regulations if prudent seamanship is conscientiously applied and the rules of the road adhered to.

Another commentor's suggestions concerns the definition of regulated vessels. Since the actual depth of the MRGO changes due to shoaling and dredging, he felt the regulation should be rewritten so that the thirty foot draft criterion could be changed accordingly, consistent with the needs of safety and the recommendations of the pilots. He further writes that the regulation should be writen so that if, and when, the current project dimensions of the channel are increased, the length/beam/draft criteria in the regulations will increase accordingly. The Coast Guard believes that changes to the depth in the MRGO are not sudden and any future changes to the controlling depths of the MRGO which would warrant changing the criteria for a regulated vessel would be more appropriately handled with future rulemaking. A system that would link the size criteria for the regulated vessels to the width and depth of the MRGO would be too complex and would not vary enough to warrant inclusion in the rulemaking.

This commentor also suggested that since vessels are already, by another regulation, required to give a 24-hour advance notice of arrival to the Captain of the Port, that this requirement suffice for the two hour notice. Another commentor also thought that the two hour advance of intended movement needs more study because arriving vessels will not be able to contact the VTS two hours before they enter the Safety Zone due to the distance involved. He felt that this problem could be resolved if the system of contact with the VTS by the vessel was broadened. Coast Guard experience has shown that the advance notice of arrival required by 33 CFR 161.7 is not accurate enough to allow for the scheduling of vessels in the Safety Zone. Regulations in 33 CFR 161.7 allow a vessel to arrive up to six hours before or after the time given in the advance notice before the Captain of the Port needs to be notified of any changes. Small and infrequent delays of two hours have been encountered and are considered acceptable compared to the delays that would result if the Coast Guard tried to coordinate vessel movements based on inaccurate 24-hour advance notice of arrival. Some vessels have experienced problems contacting VTS on Channel 12 VHF–FM as was anticipated by one commentor. These vessels with the problem have been able to reach VTS via the marine operator, or by relaying the needed information through another vessel or the Assocated Branch Pilots.

One commentor presented the opinion that the pilots should share in the responsibility for making vessel position reports. The Coast Guard believes that the pilots have a professional, but not legal, obligation within the realm of providing "local knowledge" to advise masters of the local regulations. Finally, he recommended that outbound vessels be required to give their estimated times of arrival at the regulated area. He contended that this information is necessary to adequately schedule transits of the regulated area. Coast Guard Vessel Traffic Service experience has shown that if departing vessels comply with the reporting procedures outlined in the final rule, they can accurately compute the vessel's arrival time at LT 62.

In this regard, one pilot association suggested that two reporting points be added above the regulated area to provide the VTS with a more accurate speed plot of transiting vessels. This suggestion is adopted and reporting

points at MRGO LT 96 and LT 114 are added accordingly.

Two commentors pointed out that tows were included in the discussion but omitted from the regulation. One of these commentors felt that tows should not be included as regulated vessels for two reasons. First, their ability to maneuver outside of the channel allows tows to give way to a larger vessel more easily. Secondly, the time required for most tows to move through the regulated area is substantial and the inclusion of tows as regulated vessels based on their dimension is an unnecessarily broad circumscription. The Coast Guard acknowledges that tows were not specifically mentioned in the regulatipn itself. Tows meeting criteria for regulated vessels were addressed in the original discussion and are intended to be included among the regulated vessels. The regulation has been amended accordingly. In the first four months that this regulation has been in effect, only three tows known to meet the criteria for regulated vessels have transited the length of the MRGO. One of these regulated tows has made several transits of the MRGO since commencement of the Safety Zone but has traveled outside the dredged channel and entered the MRGO just before LT 62. This tow while outside the channel is not subject to the regulation, however, it must still give the proper two hour notification before entering the MRGO south of LT 62. The Coast Guard believes that the relative infrequency of large tows transiting the MRGO will make their delaying impact insignificant. One commentor suggested that attainment of the goals of this program could be achieved by cooperation among the users of the MRGO and intervention by the Captain of the Port only when cooperation was not forthcoming and safety was jeopardized. He stated that the cross-currents below LT 62 are very similar to those encountered at the junctions of bayous with the MRGO and do not warrant special consideration as their presence can be anticipated. He contended that there are several factors, including currents, which cause a ship to be positioned improperly in a channel. It was his recommendation that larger vessels, more likely to run into problems, be restricted to daylight transit and one-way traffic only. He felt the present regulation is unnecessarily restrictive. A combination of the daylight and one-way transits along with pilot discretion and judgment would allow a free flow of traffic during daylight hours with transit by large vessels restricted to one-way scheduling only at night. The intermittent Coast Guard involvement suggested is considered unacceptable. By the time the Coast Guard intervention is requested it would be too late. This regulation was developed to present "in extremis" situations, not to provide for emergency response. Although the commentor contended the present regulations are unnecessarily restrictive, one-way traffic during daylight hours is far more restrictive than the present regulation. However, the Coast Guard does recognize thaty the absolute prohibition against regulated vessels meeting or overtaking each other within the regulated area is unnecessarly restrictive and, accordingly, has relaxed the regulation to permit such passing when in the opinion of the pilots and/or operators on both vessels it can be accomplished safely.

One commentor faulted the Coast Guard for using Vessel Traffic Service as its method of regulating traffic based on what he perceives as unqualified, inexperienced personnel manning the Vessel Traffic Service and making the decisions on regulating traffic. VTS has communications capability and computer enhanced tracking capabilities that simplify the coordination and decision making processes. It will therefore not require persons with years of seagoing experience to schedule these regulated vessels effectively.

One commentor requested a public hearing. He stated, "In light of the fact that there have been no collisions in the area being considered and the present relatively light flow of large vessels, the subject should be left open to public discussion and study before final rulemaking." Of the seven letters received commenting on the Safety Zone, only this one requests a public hearing. The Captain of the Port feels that oral presentations in this case would not aid the rulemaking process, only delay it. The Coast Guard acknowledges that while the number of vessels using the MRGO is not large, the percentage of regulated vessels encompasses a significant portion of the total and is expected to increase with expanded coal exports from the bulk terminal and completion of the Jourdan Road Facility.

One commentor described an incident between his vessel, a regulated vessel, and another vessel which was not regulated. The letter described the effects that take place between vessels as they meet or overtake one another in this narrow channel. In this case, his vessel almost struck the other vessel as his vessel was being passed due to the hydrodynamic interaction between the two ships. He concluded by suggesting that the regulations be amended to prohibit any vessel from overtaking a regulated vessel in the MRGO. The Coast Guard presently believes this comment is too restrictive, but paragraph (e) of the regulation allows for the Coast Guard to include non-regulated vessels when necessary.

Due to an editorial error, the Michoud Slip was used in paragraph (2) to define a safety zone boundary. The Michoud Canal was the intended boundary and the rule has been changed accordingly. To eliminate confusion stemming from the requirements for all vessels being located in paragraph (c) of the regulation, the Coast Guard has divided old paragraph (c) into new paragraphs (c) and (d) and changed paragraph (d) to paragraph (e). Segregation of the requirements for inbound and outbound vessels into separate paragraphs with no indication of requirements for all vessels, as a category, will serve to simplify the information necessary for a proper transit to be made. Further, several descriptive phrases and alternative actions are added for ease of operation.

Summary of Final Evaluation

These regulations are considered to be insignificant in accordance with guidelines set out in the Policies and Procedures for Simplification, Analysis and Review of Regulations (DOT Order Z100.5 of 5–22–80). An evaluation under the Regulatory Flexibility Act of 1980 has been conducted. With proper notification procedures followed, delays in excess of two hours are extremely rare. This delay is relatively minor in the shipping industry and minimal compared to what it would be if there was a collision. For these reasons, it has been determined that this action will not have a significant economic effect on a substantial number of small entities.

Harbors, Marine safety, Waterways.

Final Regulations

PART 165—[AMENDED]

In consideration of the foregoing, the Coast Guard amends Part 165 of Title 33 Code of Federal Regulations by revising § 165.801 to read as follows:

§ 165.801 Mississippi River Gulf Outlet.

(a) The area enclosed by the following boundary is a Safety Zone—The Mississippi River Gulf Outlet from Lighted Buoy 1 (LLNR 2014) northwesterly to its junction with the Gulf Intracoastal Waterway and then

westerly to, and including, the Inner Harbor Navigation Canal and easterly to and including the Michoud Canal.

(b) Vessels including tows over 600 feet in length, or over 80 feet in beam, or with a draft in excess of 30 feet, and intending to transit that portion of the Safety Zone from its seaward entrance at Lighted Buoy 1 to the jetty at Light 62 (LLNR 2068) must receive permission to enter or move within the Safety Zone. Vessels meeting this criteria will not meet or overtake each other in this seaward portion of the Safety Zone unless the pilots and/or operators of both vessels consider such passage to be safe and agree to it. Such an agreement must be reported beforehand to the VTS.

(c) All inbound vessels meeting the criteria of paragraph (b) of this section shall notify New Orleans Vessel Traffic Service (VTS) two hours prior to intended entry into the Safety Zone (in order to be scheduled), and immediately prior to entry (in order to obtain permission to enter), and upon passing MRGO Lighted Buoy 1, and MRGO Light 33 (LLNR 2046.50), MRGO Light 62, MRGO Light 96 (LLNR 2084), and MRGO Light 114 (LLNR 2092). Notification shall be made on Channel 12 VHF–FM. Notification prior to intended entry which cannot be accomplished on Channel 12 VHF–FM due to extreme range, shall be made by telephone to the VTS at (504) 589–2772 or 589–2773 by the vessel's agent or via the marine operator.

(d) All outbound vessels meeting the criteria of paragraph (b) of this section shall notify VTS two hours prior to intended movement within the Safety Zone (in order to be scheduled), and immediately prior to movement (in order to obtain permission to move), and immediately after heading fair in the outbound direction, and as the vessel passes the junction of the MRGO and Gulf Intracoastal Waterway (mile 60.0 MRGO), MRGO Light 114, MRGO Light 96, and MRGO Light 62, and MRGO Light 33 and MRGO Lighted Buoy 1. Notification two hours prior to movement shall be made by telephone to the VTS at (504) 589–2772 or 589–2773. Other notification shall be made on Channel 12 VHF–FM. Channel 11 VHF–FM may be used in lieu of Channel 12 by vessels above the Paris Road Bridge (mile 60.9 MRGO).

(e) Movement within this Safety Zone is normally unrestricted for vessels that do not meet the criteria of paragraph (b) of this section. The Captain of the Port may require other vessels within this defined zone to comply with the general regulations governing safety zones as contained in 33 CFR 165.20 whenever necessary for the protection of vessels, structures and water and shore areas.

(33 U.S.C. 1225, 1231; 49 CFR 1.46(n)(4))

Dated: March 28, 1983.

John L. Bailey,

Captain of the Port, Coast Guard, New Orleans, LA.

BILLING CODE 4910–14–M

DEPARTMENT OF DEFENSE

Corps of Engineers; Department of the Army

33 CFR Parts 204 and 207

Danger Zone, Key West, Florida and Navigation Regulation; Cape Fear River, North Carolina

AGENCY: Army Corps of Engineers, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Army is deleting a regulation which establishes a danger zone in the waters surrounding Woman Key and Ballast Key, Florida. The Army is also deleting a regulation which establishes schedules of operation for the three locks on the Cape Fear River, North Carolina. The danger zone is no longer used for its intended purpose and the locks schedules are an unnecessary restriction which prevents changes at the local level.

EFFECTIVE DATE: June 30, 1983.

ADDRESS: HQDA, DAEN–CWO–N, Washington, D.C. 20314.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph T. Eppard at (202) 272–0200.

SUPPLEMENTARY INFORMATION: The U.S. Navy has requested that the regulations in 33 CFR 204.90 Straits of Florida; Navy restricted area surrounding Woman Key and Ballast Key, be revoked as the government is no longer using the area. This revocation will remove a restriction from a waterway and return the area to the public.

33 CFR 207.161 establishes schedules for operation of the three locks on the Cape Fear River, North Carolina. The Corps of Engineers has determined that operating schedules are properly established at the district level through local notices to navigation interests. Continued promulgation of these rules in the CFR unnecessarily restricts the authority of the district engineer to make changes consistent with changes in local conditions and in response to available resources.

The Department of the Army has determined that notice of proposed rulemaking and public procedures thereto are unnecessary since the revocation of these two regulations will remove an unnecessary restriction on a waterway and return operating controls to the local level in the spirit of regulatory reforms. Local public notices announcing the revocation of these regulations are also being distributed by the district engineers.

Note.—The Department of the Army has determined that this document does not contain a major rule requiring a regulatory impact analysis under Executive Order 12291 because it will not result in an annual effect on the economy of $100 million or more and it will not result in a major increase in costs or prices. The Army has also determined that this rule will not have s significant economic impact on a substantial number of entities and thus does not require the preparation of a regulatory flexibility analysis.

Correction

In FR Doc. 83–12578, beginning on page 21121, in the issue of Wednesday May 11, 1983, make the following changes:

1. On page 21124, in the first column, in the seventh line, "will" should read "will be".

2. In the third column, the fourth paragraph should begin "(d)"; in the fifth paragraph, in the first line "or" should read "of".

3. On page 21126, in the first column, in the third complete paragraph, in the seventh line "projection" should read "protection".

4. On page 21127, in the first column, in the third line from the bottom, "NPA" should read "NPS"; in the second column in the third line from the top "Faimly" should read "Family".

5. On page 21128, in the first column in the eighth line from the bottom, "acquire or" should read "acquire fee or"; in the second column, in the first paragraph under "Emergencies and Hardships", in the ninth line "revised" should read "reviewed".

BILLING CODE 1505-01-M

VETERANS ADMINISTRATION

38 CFR Part 3

Veterans Benefits; Persons Included as Having Served on Active Duty

AGENCY: Veterans Administration.

ACTION: Final regulation amendment.

SUMMARY: We have amended our regulation concerning persons who are included as having served on active duty. The need for this action results from a recent decision of the Secretary of the Air Force that the service of the members of the group known as Civilian Personnel Assigned to the Secret Intelligence Element of the Office of Strategic Services (OSS) constitutes active military service in the Armed Forces of the United States for purposes of all laws administrated by the Veterans Administration. The effect of this action is to confer veteran status for Veterans Administration benefit purposes on former members of this group who were discharged under honorable conditions.

EFFECTIVE DATE: This section is effective December 27, 1982, the date that the Secretary of the Air Force held that service in the group constitutes active duty.

FOR FURTHER INFORMATION CONTACT: Robert M. White (202) 389–3005.

SUPPLEMENTARY INFORMATION: Pursuant to 38 CFR 1.12(b) the Veterans Administration finds that prior publication of this change for public notice and comment is impracticable and unnecessary. The Veterans Administration has no discretion in this matter. The decision of the Secretary of the Air Force concerning active duty status is binding on the Veterans Administration. Consequently, a proposed notice will not be published. For this reason, these changes are also not subject to the Regulatory Flexibility Act, 5 U.S.C. 601–612, since they do not come within the term "rule"as defined in that act.

In accordance with Executive Order 12291, Federal Regulation, we have determined that this regulation change is nonmajor for the following reasons:

(1) It will not have an effect on the economy of $100 million or more.

(2) It will not cause a major increase in costs or prices.

(3) It will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 38 CFR Part 3

Administrative practice and procedure, Claims, Handicapped, Health Care, Pensions, Veterans.

There is no affected catalog of Federal Domestic Assistance Program number.

Approved: May 13, 1983.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 3—ADJUDICATION

The Veterans Administration is amending 38 CFR Part 3 as follows:

In § 3.7 paragraph (x)(10) is added to read as follows:

§ 3.7 Persons included.

* * * * *

(x) *Active military service certified as such under section 401 of Pub. L. 95–202.*

* * *

(10) Civilian Personnel Assigned to the Secret Intelligence Element of the OSS.

BILLING CODE 8320–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

45 CFR Part 4

Service of Process

AGENCY: Office of the Secretary, HHS.

ACTION: Final rule with request for comments.

SUMMARY: The regulation concerning service of process on Department officials is being revised to reflect recent statutory changes and reorganization in the Department's Office of the General Counsel. The regulation revises the method for serving legal process on the Department and its officials.

DATES: The regulation is effective June 30, 1983. Comments must be received by August 1, 1983.

ADDRESS: Send comments on the regulation to: Office of the General Counsel, Department of Health and Human Services, 200 Independence Avenue, S.W., Washington, D.C. 20201.

FOR FURTHER INFORMATION CONTACT: Beverly Dennis, (202) 245–6733.

SUPPLEMENTARY INFORMATION: On January 12, 1983, the President signed into law Pub. L. 97–462, which amended Rule 4 of the Federal Rules of Civil Procedure. The amendments took effect February 26, 1983, and changed various requirements related to service of process in civil litigation in federal courts, including service on federal agencies and officials.

A principal form of process is the summons and complaint initiating a lawsuit. Prior to the recent amendments, the method of service prescribed in Rule 4 for initiating a lawsuit against a federal agency or officer was delivering a copy of the summons and complaint to the United States Attorney for the district in which the action is brought (or designated subordinates), sending a copy by registered or certified mail to the Attorney General, and delivering a copy to the agency or officer being sued. Under 28 U.S.C. 1391(e) delivery of the summons and complaint to the agency or officer may be made by certified mail beyond the territorial limits of the district in which the action is brought. Thus, under these provisions, service on a federal agency or officer could be made by delivery under Rule 4(d)(5) or by certified mail under 28 U.S.C. 1391(e).

Public Law 97–462 has changed the method for service of the summons and complaint. As revised, Rule 4(d)(5) specifies that service on a federal agency or officer is to be made by sending a copy of the summons and complaint to the officer or agency by registered or certified mail (in addition to service on the United States Attorney and Attorney General). The option for service by personal delivery no longer exists.

HHS regulations (45 CFR 4.1) currently require that summonses, complaints, subpoenas, and other process that are required to be served on or delivered to the Secretary of

Health and Human Services shall be delivered or sent by mail to certain employees in the Department's Office of the General Counsel. In light of the amendments to Rule 4 and reorganization of the Office of the General Counsel, we are revising the Department's regulation on service of process.

Under the regulation being adopted, service of a summons and complaint on the Department or on any Department official sued in his offical capacity may be made by mailing a copy to the Department's General Counsel. Such service will constitute service on the Department or the official, as required by Rule 4. Process mailed directly to the General Counsel will avoid the delays encountered when the documents must be transferred from other offices.

Under the regulation, the Office of the General Counsel will also accept service of subpoenas and other process required to be served on the Department or on the Secretary. The regulation specifies certain employees in the Office who are authorized to accept such process when it is delivered. Subpoenas and other process directed at other officials of the Department would not be subject to this general rule and would have to be served on the individual official unless different arrangements for acceptance of process are made in a particular case.

The current regulation does not address the issue of suits against Department officials in their individual capacities. Under the amended regulation the Office of the General Counsel is authorized but not required to accept service of summonses and complaints initiating lawsuits against a Department employee when the employee is sued in his individual capacity and the suit relates to the employee's official duties. Such service must nevertheless be accomplished in accordance with the provisions of Rule 4 applicable to service on individual defendants or, in the case of suits brought in State courts, in accordance with the applicable requirements. This change simply clarifies existing policy, except that, for the first time, the Office of the General Counsel is authorized by regulation to accept certain process on behalf of Department employees sued as individuals.

The regulation is also being amended to state that the Department will not ordinarily provide a receipt or other acknowledgment of process received. Plaintiffs mailing a summons and complaint to the Department sometimes enclose a form by which they seek acknowledgment of receipt of the process, and in the past such forms have sometimes been completed and returned by the Department. Since completion of such forms is not required or contemplated by Rule 4 and therefore creates unnecessary work for Department employees, the regulation states the Department's current policy of not returning such forms. Where a Department official is sued in his individual capacity, however, and service is accomplished pursuant to the new Rule 4(c)(2)(C), the Department may return the acknowledgment form required under that rule.

This regulation is not being published for public comment prior to its taking effect since it simply changes the existing regulation to reflect statutory changes and reorganization within the Office of the General Counsel, and assigns certain responsibilities within the Department. Accordingly, notice and comment procedures are unnecessary. Nevertheless, we are soliciting comments on the changes, and any revisions in the regulation shown by the comments to be appropriate will be made.

This is not a major rule within the meaning of Executive Order 12291 and thus does not require a regulatory impact analysis. Also, since the regulation does not have any significant impact on a substantial number of small entities, a regulatory flexibility analysis is not required under the Regulatory Flexibility Act (5 U.S.C. Ch. 6).

List of Subjects in 45 CFR Part 4

Courts.

Therefore, 45 CFR Part 4 is amended by revising it to read as follows:

PART 4—SERVICE OF PROCESS

Sec.

4.1 Suits against the Department and its employees in their official capacities.
4.2 Other process directed at the Department or Secretary.
4.3 Process against Department employees in their individual capacities.
4.4 Acknowledgment of mailed process.
4.5 Effect of regulations.

Authority: 5 U.S.C. 301.

§ 4.1 Suits against the Department and its employees in their official capacities.

Summonses and complaints to be served by mail on the Department of Health and Human Services, the Secretary of Health and Human Services, or other employees of the Department in their official capacities should be sent to the General Counsel, Department of Health and Human Services, 200 Independence Avenue, S.W., Washington, D.C. 20201.

§ 4.2 Other process directed to the Department or Secretary.

Subpoenas and other process (other than summonses and complaints) that are required to be served on the Department of Health and Human Services or the Secretary of Health and Human Services in his official capacity should be served as follows:

(a) If authorized by law to be served by mail, any mailed process should be sent to the General Counsel, Department of Health and Human Services, 200 Independence, S.W., Washington, D.C. 20201.

(b) If served by an individual, the process should be delivered to the staff of the correspondence control unit in the Office of the General Counsel, Room 711–E, 200 Independence Avenue, S.W., Washington, D.C., or, in the absence of that staff, to any Deputy General Counsel or secretary to any Deputy General Counsel of the Department.

§ 4.3 Process against Department officials in their individual capacities.

Process to be served on Department officials in their individual capacities must be served in compliance with the requirements for service of process on individuals who are not governmental officials. The Office of the General Counsel is authorized but not required to accept process to be served on Departmental officials in their individual capacities if the suit relates to an employee's official duties.

§ 4.4 Acknowledgement of mailed process.

The Department will not provide a receipt or other acknowledgement of process received, except for a return receipt associated with certified mail and, where required, the acknowledgement specified by Rule 4(c)(2)(C) of the Federal Rules of Civil Procedure.

§ 4.5 Effect of regulations.

The regulations in this part are intended solely to identify Department officials who are authorized to accept service of process. Litigants must comply with all requirements pertaining to service of process that are established by statute and court rule even though they are not repeated in these regulations.

Dated: May 19, 1983.

Margaret M. Heckler,

Secretary.

BILLING CODE 4150–04–M

DEPARTMENT OF TRANSPORTATION

Maritime Administration

46 CFR Part 310

Merchant Marine Training

AGENCY: Maritime Administration, DOT.

ACTION: Final rulemaking.

SUMMARY: The Maritime Administration (MARAD) is amending its merchant marine training regulations to implement a 10 percent reduction in the entering classes at the U.S. Merchant Marine Academy. There are some minor amendments to ease administration, both for MARAD and for the state maritime academies. To eliminate a duplication in numbering, we are renumbering § 310.13, in Subpart A, as § 310.12–1. Subpart D—Regulations for Receipt of Donation for Chapel and Library at U.S. Merchant Marine Academy, Kings Point, New York is being revoked as obsolete, since its purpose has been accomplished.

EFFECTIVE DATE: May 31, 1983.

FOR FURTHER INFORMATION CONTACT: Mr. Arthur W. Friedberg, Director, Office of Maritime Labor and Training, Maritime Administration—DOT, 400 7th Street, SW., Room 7302, Washington, DC 20590, Telephone: (202) 426–5755.

SUPPLEMENTARY INFORMATION: Following is a summary of the content of this final rulemaking.

Subpart C—Admission and Training of Midshipmen at the U.S. Merchant Marine Academy.

Section 310.53 Nominations and vacancies—Indicates lower quotas for geographical areas eligible to send students to the U.S. Merchant Marine Academy.

Subpart A—Regulations and Minimum Standards for State Maritime Academies and Colleges.

Section 310.6 Entrance requirements—Provides that students enrolled on or after April 1, 1982, and receiving Federal assistance, shall be obligated before enrollment to complete the Naval Science curriculum.

Section 310.7 Federal student subsistence allowances and student incentive payments—Requires (1) the state maritime academies to inform MARAD annually no later than February 1, of those students who have been selected to receive the student incentive payments; and (2) removal of students from the MARAD assistance rolls upon either loss of midshipman status or enrollment in the ROTC program.

Section 310.8 Leave—Provides clarification of the leave policy for students enrolled after April 1, 1982.

EO 12291, Statutory Requirements and DOT Procedure—The Maritime Administrator has made a determination that this rulemaking meets none of the criteria in Executive Order 12291 for a major rule. Since this rulemaking affects only students and applicants to the USMMA and state academies, the Maritime Administrator certifies that the regulation would have no significant economic impact on a substantial number of small entities that would require preparation of a regulatory flexibility analysis, pursuant to the Regulatory Flexibility Act of 1980 (Pub. L. 96–354). The regulation contains no new or amended reporting requirement within the scope of the Paperwork Reduction Act of 1980 (Pub. L 96–511). Pursuant to DOT Order 2100.5, this rulemaking is considered to be significant because there is substantial public interest, as well as Congressional interest in Federal assistance provided to state maritime academies and in the selection process for and allocation of appointments to the United States Merchant Marine Academy. A Regulatory Evaluation has been prepared and placed in the rulemaking docket. A copy of this document will be made available upon request in writing addressed to the Secretary, Maritime Administration, Department of Transportation, 400 7th Street, SW., Room 7300, Washington, D.C. 20590; phone—(202) 426–5746.

Inasmuch as the Congressional nomination process for the class entering July 1983 is complete, it is imperative that the amendment to Subpart C be published as a final rule. Delay would seriously affect the selection process at the Admissions Office of the U.S. Merchant Marine Academy, where the number of appointments are awarded based on precise knowledge of freshman vacancies available.

Pursuant to provisions of 5 U.S.C. 553, good cause exists for finding that notice and public procedure is impracticable and unnecessary. Accordingly, we are publishing these regulations as final rulemaking, effective immediately.

List of Subjects in 46 CFR Part 310

Grants programs, Education, Schools, Seamen.

Accordingly, 46 CFR Part 310 is amended in Subparts A and C, and existing Subpart D is removed and reserved as follows:

PART 310—MERCHANT MARINE TRAINING

Subpart A—Regulations and Minimum Standards for State Maritime Academies and Colleges

§ 310.6 [Amended]

1. Section 310.6 *Entrance requirements*, is amended:

a. By revising the introductory words of the first sentence of (a)(2) preceding subdivision "(i)" to read:

Be obligated to . . .

b. By revising the first sentence of (a)(3) to read:

(a) * * *

(3) Be obligated to sit for the appropriate licensing examination of the United States Coast Guard.* * *

* * * * *

c. By adding paragraph (b)(4) to § 310.6 to read:

* * * * *

(b) * * *

(4) Be obligated to complete the naval science curriculum.

§ 310.7 [Amended]

2. Section 310.7 *Federal student subsistence allowances and student incentive payments*, is amended:

a. By revising paragraph (a)(4) to read:

(a) * * *

(4) *ROTC enrollment.* Subsidized cadets who make a commitment to an Armed Force Reserve Officer Training Corps will be removed from the Administration subsidy rolls effective on the date they receive funds from a U.S. military service. Should they leave the program for any reason they may not reclaim the Administration subsidy as a cadet.

* * * * *

b. By revising the first sentence of paragraph (b)(1) to read:

* * * * *

(b) * * *

(1) *General provisions.* In accordance with the Administration's established subsidy quotas for classes entering after April 1982, each school shall identify to the Administration, no later than February 1 annually, those students who have been selected to receive the student incentive payment authorized by the Act. * * *

* * * * *

c. By revising the last sentence of paragraph (b)(1) to read:

* * * * *

(b) * * *

(1) * * * The School shall submit a quarterly certified Daily Attendance Report listing the names of all

designated midshipmen who are entitled to student incentive payments.

* * * * *

d. By adding the following sentence at the end of paragraph (b)(1):

* * * * *

(b) * * *

(1) * * * Midshipmen who do not take all necessary steps to maintain their midshipman status, who lose their midshipman status due to action by the U.S. Navy, or who make the commitment identified in paragraph (a)(4) of this section will have their student incentive payment terminated.

3. Section 310.8 is revised to read:

§ 310.8 Leave.

(a) *Enrolled before April 1, 1982.* Limitations on cadet leave, without loss of Federal student subsistence, with the specific limits to be set at the discretion of the Superintendent on an academic year basis, are:

(1) If hospitalized, sick at home, or confined in the sick bay, leave shall not exceed four (4) months.

(2) For an emergency due to the serious illness, injury or death of a very near relative, leave shall not exceed seven (7) days.

(3) Annual leave shall not exceed thirty (30) days.

(4) Christmas and Easter leave shall not exceed a total of twelve (12) days, and leave may be granted for all legal holidays—Federal and state. This leave is in addition to that granted in paragraph (a)(3) of this section.

(5) Leave in addition to that provided in paragraphs (a)(3) and (a)(4) of this section may be granted only if approved in advance by the Supervisor, upon direct request by the Superintendent.

(b) *Enrolled on or after April 1, 1982.* Midshipmen will be granted leave without loss of incentive payments as follows:

(1) Medical leave, as authorized by the school, not to exceed four (4) months.

(2) Christmas and Easter leave and all legal holidays—Federal and state—as authorized by the school. This leave is in addition to that granted in paragraph (b)(3) of this section.

(3) Excused absences, as authorized by the school, not to exceed thirty (30) days per academic year. All unauthorized leave and all excused absences in excess of thirty (30) days will result in loss of incentive payments. Midshipmen receiving student incentive payments may be granted leaves of absence without pay, as approved by the Superintendent, for periods not to exceed one (1) academic year at a time. Midshipmen in a pay status will only be granted a leave of absence if they continue to meet all requirements for graduation in this part, including age requirements.

§ 310.9 [Amended]

4. Section 310.9, *Medical attention and injury claims,* is amended by revising paragraph (b) to read:

* * * * *

(b) *Compensation claims of Cadets or Midshipmen.* Compensation claims for personal injuries or death sustained by a federally-assisted cadet or midshipman in the performance of official duty shall be forwarded to the Supervisor for transmission to the Office of Workers' Compensation Programs. The Supervisor shall furnish necessary forms.

* * * * *

§ 310.13 [Redesignated as § 310.12-1]

5. Section 310.13 is renumbered as § 310.12–1, *Form of agreement.*

Subpart C—Admission and Training of Midshipmen at the U.S. Merchant Marine Academy

§ 310.53 [Amended]

6. Section 310.53, *Nominations and vacancies,* is amended by revising paragraph (b)(5) to read:

* * * * *

(b) * * *

(5) The distribution of each entering class by State is:

Alabama	5

BILLING CODE 4910–81–M

Research and Special Programs Administration

49 CFR Part 173

[Docket No. HM–188A, Amdt. No. 164]

Transportation of Hazardous Substances Between Canada and the United States

AGENCY: Materials Transportation Bureau (MTB), Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: Section 173.8 of the Department's Hazardous Materials Regulations (HMR) does not currently allow shipments of hazardous materials designated as hazardous substances to be tranported by railroad into or through the United States in conformance with the regulations of the Canadian Transport Commission (CTC). The purpose of this final rule is to amend § 173.8 to allow hazardous substances (other than hazardous wastes) that are subject to the CTC Regulations to be transported into or through the United States in accordance with CTC Regulations. This action is being taken in recognition of recent amendments to the CTC Regulations which provide for the proper identification of hazardous substances during transport.

EFFECTIVE DATE: This amendment is effective May 26, 1983.

FOR FURTHER INFORMATION CONTACT: Edward A. Altemos, International Standards Coordinator, Materials Transportation Bureau, Department of Transportation, 400 Seventh Street, S.W., Washington, D.C. 20590. Telephone (202) 426–0656.

SUPPLEMENTARY INFORMATION: Section 173.8 of the HMR allows, with certain exceptions, shipments of hazardous materials to be transported by railroad into or through the United States in conformance with the CTC Regulations. One of the exceptions to this provision pertains to hazardous substances. Therefore, no (so-called) reciprocity is granted with respect to the transport of these materials and they must be transported fully in accordance with HMR. It was not intended by MTB that this exception should apply to all of the transport requirements for hazardous substances (e.g., packaging and, when required labeling requirements). The original intent in including this exception in § 173.8 was to insure that shipments of hazardous substances entering the United States from Canada conformed to the additional description and marking requirements in the HMR applying to hazardous sustances. However, the manner in which the text of § 173.8 was drafted results in a totol exclusion of hazardous substances from the provisions of § 173.8.

Problems have been encountered in the transport of hazardous substances from Canada to the United States as a result of this exception. Many materials designated as hazardous substances in the HMR, which also meet the definition of another hazard class, have classifications and labeling, placarding and description requirements under the CTC Regulations that are different from those under the HMR. Because these materials are excluded from the reciprocity provisions of § 173.8, they are required to be replacarded and relabeled, and to have shipping papers prepared in accordance with the HMR, before they enter the United States. Many of these materials are of very considerable commercial importance and the requirement to replacard, relabel and redescribe them imposes a serious burden on industry and results in an unnecessary delay in the movement of these materials.

On May 10, 1983, the CTC adopted changes to its regulations that define and designate hazardous substances in the same manner as they are defined and designated in the HMR. These changes also prescribe Reportable Quantities (RQ) for the designated hazardous substances that are consistent with those prescribed in the HMR. Furthermore, these amendments require the identification of hazardous substances on shipping papers and in package marking in the same manner required in the HMR. Consequently, the MTB believes there is no need to maintain the exception for hazardous substances in § 173.8 in order to insure the adequate identification of hazardous substances transported into the United States from Canada, and is deleting the reference to hazardous substances in this section.

It must be noted that not all of the materials designated as hazardous substances in the HMR have also been designated as such in the CTC Regulations. Under the amended CTC Regulations, only those materials designated as hazardous substances in the HMR and which also meet the definition of another hazard class in the CTC Regulations, have been designated as hazardous substances. However, as explained in Docket No. HM–188 (48 FR 20255), the MTB has determined that reciprocity exists with the CTC Regulations under § 173.8 only in regard to the transport of hazardous materials that are subject to both CTC and DOT regulations. That is, unless a CTC Regulation applies to a material considered a hazardous material under the HMR, the provisions of § 173.8 do not apply and the material must be transported in conformance with the HMR. Therefore, although the reference to hazardous substances is being deleted in § 173.8, those hazardous substances that are not subject to the CTC Regulations must still be transported in conformance with the HMR.

I. Classification of Rule; Reporting Requirements; and Impact on Small Entities

A. *Non-Major Rule.* The Materials Transportation Bureau has determined that this regulatory amendment is not a major rule under terms of Executive Order 12291 or significant under DOT's regulatory procedures (44 FR 11034), and does not require a Regulatory Impact Analysis, nor does it require an environmental impact statement under the National Environmental Policy Act (42 U.S.C. 4321 et.seq.) A regulatory evaluation is not warranted since the anticipated impact is minimal.

B. *Impact on Small Entities.* Based on information available concerning size and nature of entities likely to be affected, I certify that this amendment will not as promulgated, have a significant economic impact on a substantial number of small entities.

II. *Final Rule Without Notice and Without Usual Delay in Effective Date*

The MTB considers this action to constitute an emergency final rule due to the potential for serious economic impact on trans-border shipments if MTB does not take expedited action and since this rule changes does not impose additional requirements, notice and procedure thereon are considered unnecessary. For the same reason, it is considered necessary to make the rule effective immediately.

BILLING CODE 4910–60–M

Federal Railroad Administration

49 CFR Part 223

[Docket No. RSGM–1, Notice No. 6]

Safety Glazing Standards—Locomotives, Passenger Cars and Cabooses

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Final rule; extension of compliance date.

SUMMARY: This document amends the final rule published on December 31, 1979 (44 FR 77348) which established a compliance date of June 30, 1983 for retrofitting existing locomotives, passenger cars and cabooses with improved safety glazing materials. It extends the compliance date six months until December 31, 1983. This action is being taken in response to a petition by the Association of American Railroads (AAR) and multiple individual requests from railroads for additional time to complete the retrofit program.

EFFECTIVE DATE: This final rule becomes effective on June 30, 1983.

FOR FURTHER INFORMATION CONTACT:
Principal Program Person: Philip Olekszyk; Office of Safety, Federal Railroad Administration, Washington, D.C. 20590, Telephone (202) 426–0897.
Principal Attorney: Lawrence I. Wagner; Office of Chief Counsel, Federal Railroad Administration, Washington, D.C. 20590, Telephone (202) 426–8836.

SUPPLEMENTARY INFORMATION: In response to a joint petition from the AAR and the Railway Labor Executives Association (RLEA), the FRA adopted regulations in 1979 that require the installation of improved safety glazing materials for all new railroad locomotives, passenger cars and cabooses. That regulation also required the retrofitting of most existing locomotives, passenger cars and cabooses. The regulation required that the retrofit program be accomplished by June 30, 1983.

The AAR has petitioned the FRA to amend the regulation to provide at least a six month extention of the compliance date. This extension request from the AAR was concurred in by the RLEA. In support of their request the AAR points out that the start up of the retrofit program was severely hampered by the lack of sufficient materials and that the depressed economic conditions of recent years have further impeded the progress of the program. By AAR estimates, there are approximately 7,800 locomotives and 4,800 cabooses that still require installation of improved glazing. In addition to the AAR request the FRA has received 20 individual requests from railroads or commuter agencies for extension of the compliance date. After considering the AAR petition for extension, the RLEA concurrence in that request, the individual requests, and FRA's independent data base, FRA has decided to extend the current compliance date six months to December 31, 1983. This timeframe should provide a sufficient period for completion of most retrofit programs.

Notice and Public Procedure

Since this final rule merely extends for six months the compliance date for a regulation that is already in effect and imposes no additional burden on any person, notice and public procedure are not necessary and because of the imminent June 30, 1983 compliance date, are also impractical. This final rule will avoid the disruption of rail service and public inconvenience that would result if all non-complying locomotives, passenger cars and cabooses were removed from service on the current compliance date of June 30, 1983.

List of Subjects in 49 CFR Part 223

Railroad safety.

Regulatory Impact

This final rule has been evaluated in accordance with existing regulatory policies. It will not have an adverse or significant economic impact on any entity, including small entities, because it does not place any new requirements or burdens on the public. Accordingly, it is certified that the proposal will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (Pub. L. 95–354, 94 Stat. 1164, September 13, 1980). It does not constitute a major Federal action significantly affecting the quality of the human environment and, therefore, an environmental impact statement is not required. The amendment does not constitute a major rule under the terms of Executive Order 12291 and does not constitute a significant rule under the Department of Transportation regulatory policies and procedures. Moreover, since there are no costs associated with this amendment, a further regulatory evaluation is not warranted.

PART 223—[AMENDED]

In consideration of the foregoing, Part 223 of Title 49, Code of Federal Regulations is amended effective June 30, 1983 as follows:

1. Paragraph (c) of § 223.11 is revised to read as follows:

§ 223.11 [Amended]

* * * * *

(c) Except for yard locomotives and locomotives equipped as described in paragraphs (a) and (b), of this section, locomotives built or rebuilt prior to July 1, 1980, shall be equipped with certified glazing in all locomotive cab windows after December 31, 1983.

* * * * *

2. Paragraph (c) of § 223.13 is revised to read as follows:

§ 223.13 Requirement for existing cabooses.

* * * * *

(c) Except for yard cabooses and cabooses equipped as described in paragraphs (a) and (b), cabooses built or rebuilt prior to July 1, 1980, shall be equipped with certified glazing in all windows after December 31, 1983.

* * * * *

3. Paragraph (c) of § 223.15 is revised to read as follows:

§ 223.15 Requirement for existing passenger cars.

* * * * *

(c) Except for passenger cars described in paragraphs (a) and (b), passenger cars built or rebuilt prior to July 1, 1980, shall be equipped with certified glazing in all windows and a minimum of four emergency windows after December 31, 1983.

* * * * *

(Sec. 209 of the Federal Railroad Safety Act (94 Stat. 957, 45 U.S.C. 438); Section 1.49(m) of the Regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(m))

Issued in Washington, D.C., on May 24, 1983.

Thomas A. Till,
Acting Administrator.

[FRA Docket No. SA–3, Notice No. 7]

Safety Appliance Standards

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Final rule; extension of compliance date.

SUMMARY: This document amends the final rule published on December 30, 1982 (47 FR 58272), which extended the compliance date for the removal of roof running boards from box and other house cars from December 31, 1982 to June 30, 1983. It extends the compliance date six months until December 31, 1983. This action is being taken in response to a petition of the Association of American Railroads.

EFFECTIVE DATE: This final rule becomes effective on June 30, 1983.

FOR FURTHER INFORMATION CONTACT:

Principal Program Person: Philip Olekszyk; Office of Safety, Federal Railroad Administration, Washington, D.C. 20590, Telephone (202) 426–0897.
Principal Attorney: Lawrence I. Wagner, Office of Chief Counsel, Federal Railroad Administration, Washington, D.C. 20590; Telephone (202) 426–8836.

SUPPLEMENTARY INFORMATION: The Association of American Railroads (AAR) has filed a petition requesting that the Federal Railroad Administration (FRA) delete the first sentence of the Note in § 231.1 of the Safety Appliance Standards (49 CFR 231.1). This would eliminate in its entirety the requirement for the removal of roof running boards and the

completion of the related changes in associated ladders and handholds on all box and other house cars built on or before April 1, 1966, or under construction prior to that date and placed in service on or before October 1, 1966. The present compliance date for this requirement is June 30, 1983. The petition also requests that this compliance date be extended to permit completion of rulemaking to delete this requirement.

In its petition, the AAR states that this requirement now "has less than a tenuous relationship to the safety of railroad employees". Railroad operating rules prohibit engine and train crews from going on the roof of a freight car. Railroad rules also prohibit other employees such as maintenance and repair personnel from going on the roof of a moving freight car.

On the basis of a recent survey, AAR estimates that approximately 30,000 cars are still in service that have not been so modified. The survey also indicates that almost one-half of these cars will be retired within the next three years.

After considering this petition, FRA has decided to extend the current compliance date six months to December 31, 1983. This will provide sufficient time for FRA to complete a rulemaking proceeding concerning the AAR request that this requirement be deleted in its entirety.

Notice and Public Procedure

Since this final rule merely extends for six months the compliance date of a regulation that is already in effect and imposes no additional burden on any person, FRA finds that notice and public procedure are not necessary and, because of the imminent June 30, 1983 compliance date, are also impractical.

Railroad safety.

Regulatory Impact

This final rule has been evaluated in accordance with existing regulatory policies. It will not have an adverse or significant economic impact on any entity, including small entities, because it does not place any new requirements or burdens on the public. Accordingly, it is certified that the proposal will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (Pub. L. 95–354, 94 Stat. 1164, September 13, 1980). It does not constitute a major Federal action significantly affecting the quality of the human environment and, therefore, an environmental impact statement is not required. The amendment does not constitute a major rule under the terms of Executive Order 12291 and does not constitute a significant rule under the Department of Transportation regulatory policies and procedures. Moreover, since there are no costs associated with this amendment, a regulatory evaluation is not warranted.

The Final Rule

PART 231—[AMENDED]

In consideration of the foregoing, § 231.1 of Part 231 of Title 49, Code of Federal Regulations, is amended, effective June 30, 1983, by amending the Note in that section to read as follows:

§ 231.1 Box and other house cars.

* * * * *

Note.—After December 31, 1983, cars of this type built on or before April 1, 1966, or under construction prior to that date and placed in service before October 1, 1966, must be equipped as nearly as possible with the same complement of safety appliances, depending upon type, as specified in § 231.27 for box and other house cars without roof hatches, or in § 231.28 for box and other house cars with roof hatches.

* * * * *

(Secs. 2, 4, and 6, 27 Stat. 531, as amended, secs. 1 and 3, 32 Stat. 943, as amended, sec. 6 (e) and (f), 80 Stat. 939; 45 U.S.C. 2, 4, 6, 8, 10, 11–16, 49 U.S.C. 1655; and § 1.49(c) of the Regulations of the Office of the Secretary of Transportation, 49 CFR 1.49(c))

Issued in Washington, D.C., on May 24, 1983.

Thomas A. Till,

Acting Administrator.

Proposed Rules

Federal Register
Vol. 48, No. 105
Tuesday, May 31, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1430

1982–83 and 1983–84 Milk Price Support Program

AGENCY: Commodity Credit Corporation.

ACTION: Notice of proposed determination.

SUMMARY: As part of the milk price support program, the Commodity Credit Corporation (CCC) proposes that for the period August 1, 1983, through September 30, 1983, 50 cents per hundredweight, in addition to the 50 cents per hundredweight deduction implemented as of April 16, 1983, be deducted from the proceeds of sale of all milk marketed commercially by producers. CCC further proposes that for the period October 1, 1983, through September 30, 1984, the price of milk be supported at $13.10 per hundredweight and that two 50-cent per hundredweight deductions totaling $1.00 be made from the proceeds of sale of all milk marketed commercially by producers. The price support and the deductions are authorized by the Agricultural Act of 1949, as amended by section 101 of the Omnibus Budget Reconciliation Act of 1982 (Pub. L. 97–253, 96 Stat. 763, approved September 8, 1982).

DATE: Comments should be received by June 30, 1983 in order to be assured of consideration.

ADDRESS: Written comments should be sent to the Director, Analysis Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT: Charles N. Shaw, Leader, Dairy and Sweeteners Group, Analysis Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013, (202) 447–7601. The Preliminary Regulatory Impact Analysis describing the proposed action and its impact is available from Dr. Shaw.

SUPPLEMENTARY INFORMATION: This proposed determination has been reviewed in accordance with Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified as a "major" action since the determination would result in an annual effect on the economy of $100 million or more.

While the Regulatory Flexibility Act (Pub. L. 96–354) is not applicable to this notice of proposed determination, an Initial Regulatory Flexibility Analysis has been prepared. A summary of the analysis is included in this notice and copies of the analysis have been sent to the Chief Counsel for Advocacy of the Small Business Administration. Additional copies are available to the public from Director, Analysis Dividison, Agricultural Stabilization and Conservation Service, USDA, P.O. Box 2415, Washington, D.C. 20013.

This action will not have any significant impact on the quality of the human environment, health, and safety. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is required.

The title and number of the Federal assistance program to which this proposed determination applies are: Title—Commodity Loans and Purchases; Number—10.051, as found in the Catalog of Federal Domestic Assistance.

Statutory Authority for Proposed Determination

Section 201(c) of the Agricultural Act of 1949 (the "1949 Act") provides that the price of milk shall be supported at a level not in excess of 90 percent nor less than 75 percent of parity as the Secretary determines necessary in order to assure an adequate supply of pure and wholesome milk to meet current needs, reflect changes in the cost of production, and assure a level of farm income adequate to maintain productive capacity sufficient to meet anticipated future needs. Section 201(d) of the 1949 Act, as added by the Omnibus Budget Reconciliation Act of 1982, provides that notwithstanding any other provision of law, for the period beginning October 1, 1982, and ending September 30, 1984, the price of milk shall be supported at not less than $13.10 per hundredwight for milk containing 3.67 percent milkfat.

Section 201(d) of the 1949 Act also provides that during the period October 1, 1982 through September 30, 1985, the Secretary of Agriculture is authorized to require the deduction of 50 cents per hundredweight from the proceeds of the sale of all milk marketed commercially by producers. These deductions are to be remitted to the Commodity Credit Corporation to offset a portion of the cost of the milk price support program.This authority does not apply for any fiscal year for which the Secretary estimates that the net price support purchases will be less than 5 billion pounds milk equivalent. If, at any time during a fiscal year, the Secretary estimates that the net price support purchases during that year will be less than 5 billion pounds, the authority for making deductions does not apply for the balance of the year.

Section 201(d) of the 1949 Act further provides that during the period April 1, 1983, through September 30, 1985, the Secretary of Agriculture may provide for an additional deduction of 50 cents per hundredweight from the proceeds of sale of all milk marketed commercially by producers if a program is established under which the second 50-cent deduction is refunded to producers who reduce their milk marketings by a specified amount. This authority does not apply to any fiscal year or portion of a fiscal year for which the Secretary estimates that price support purchases of dairy products will be less than 7.5 billion pounds milk equivalent during the fiscal year.

Background

The price support level for milk is $13.10 per hundredweight for the period October 1, 1982 through September 30, 1983, pursuant to a determination of the Secretary published in the **Federal Register** on September 24, 1982 (47 FR 42128). A determination to impose a deduction of 50 cents per hundredweight from the proceeds of sale of all milk marketed commercially, beginning on April 16, 1983, was published in the **Federal Register** on March 17, 1983 (48 FR 11253).

Proposed regulations establishing procedures for collecting an additional deduction of 50 cents per hundredweight from the proceeds of the sale of milk and establishing a program under which the additional deduction would be refunded were published in the **Federal Register** on December 17, 1982 (47 FR 56500).

Price Support Program

The price of milk is supported by the Commodity Credit Corporation through purchases of butter, cheese and nonfat dry milk at prices which are calculated to enable plant operators to pay dairy farmers, on average, a price equal to the support price. The effectiveness of the program depends on competition by manufacturers for available supplies of milk so that the average price received by farmers will equal the announced support price. At times of significant price support purchases, the purchase prices for these products tend to become the floor for the market prices of such products. Since most of the fluid milk prices are based on prices paid for manufacturing milk, the price support program undergirds all milk and dairy product prices.

Summary of Proposed Determination

It is proposed that a 50 cents per hundredweight deduction, in addition to the 50 cents per hundredweight deduction implemented as of April 16, 1983, be made from the proceeds of sale of all milk sold commercially by producers during the period August 1, 1983, through September 30, 1983. In addition, it is proposed that for the period October 1, 1983, through September 30, 1984, the price of milk be supported at $13.10 per hundredweight and two 50-cent deductions, totaling $1.00 per hundredweight, be made from the proceeds of sale of all milk sold commercially by producers. The second 50 cents per hundredweight deduction would operate in conjunction with a program under which the deduction would be refunded to those producers who reduce their commercial milk marketings by 11.6 percent during August and September 1983 and by 8.4 percent during October 1983 through September 1984, in comparison to marketings during an established base period.

Summary of Preliminary Regulatory Impact Analysis

The level of price support for the 1982–83 marketing year has been established at $13.10 per hundredweight for milk of national average fat content (3.67 percent). (47 FR 42128, September 24, 1982). A 50-cent per hundredweight deduction has been imposed for the period April 16 through September 30, 1983. (48 FR 11253, March 17, 1983).

Milk production continues to increase, and is projected to be 138.7 billion pounds for the 1982–83 marketing year, assuming a support price of $13.10 per hundredweight, and a 50-cent per hundredweight deduction for the last 5 and one-half months of the year. This represents a projected increase of 3.7 billion pounds milk equivalent over milk production in the 1981–82 marketing year and is .5 billion pounds greater than the estimate in March. Even though feed prices have increased, the milk-feed price relationships are expected to remain favorable and to result in increased milk production. Commercial consumption is projected to increase only 0.5 billion pounds to 122.5 billion pounds, partly because of the displacement of commercial sales by domestic donations of CCC-owned dairy products. CCC removals of dairy products are projected to be 16.3 billion pounds, an increase of 2.5 billion pounds from the 1981–82 level.

Implementation of the second 50-cent per hundredweight deduction on August 1 would result in a projected milk production level in the marketing year of 138.5 billion pounds, commercial consumption of 122.5 billion pounds, and CCC removals of dairy products of 16.1 billion pounds milk equivalents.

With a price support level of $13.10 per hundredweight and a 50-cent per hundredweight deduction beginning April 16, 1983, the net price support purchases during fiscal year 1983 are projected to be $2,637 million. The new outlay, before taking the deductions into consideration, is projected to be $2,695 million. The deduction will likely total $325 million. Implementation of the second 50-cent per hundredweight deduction on August 1 would result in projected CCC net price support purchases during fiscal year 1983, which corresponds to the 1982–83 milk marketing year, of $2,606 million. The new outlay, before taking the deductions into consideration, is projected to be $2,664 million. Total deductions during the year would likely total $437 million. Therefore, the net outlays for the marketing year, after taking the amount of the deductions into consideration, are projected to be $2,370 million if only the first deduction is implemented or $2,227 million if both deductions are implemented. These figures compare with an estimated CCC purchase cost of $2,282 million and a net outlay of $2,182 million for fiscal year 1982, and an estimated CCC purchase cost of $2,717 million and a net outlay of $2,775 million for fiscal year 1983 with support at $13.10 per hundredweight and no deductions implemented.

Several options were examined for the 1983–84 marketing year. A support price of $13.10 per hundredweight was compared to a support price established at 75 percent of parity. In addition, the deduction programs in conjunction with a $13.10 support level were examined on the basis of: (1) No deduction, (2) a 50-cent per hundredweight deduction and (3) a $1.00 per hundredweight deduction.

With a support price of $13.10 per hundredweight without any deductions, milk production is projected to 139.1 billion poinds, commercial consumption is projected to be 125.4 billion pounds and CCC net price support purchases of dairy products are projected to total 13.2 billion pounds milk equivalent. CCC purchase costs are estimated to total $2,179 million with net outlays of $2,348 million.

A support price of 75 percent of parity (currently estimated at $15.23 per hundredweight) would result in even greater milk production, porjected to be 141.9 billion pounds, with commercial consumption projected to be 123.0 billion pounds—2.4 billion pounds less than with support at $13.10—and CCC purchases are projected to total 18.4 billion pounds milk equivalent. CCC purchase costs are estimated to total $3,427 million with net outlays of $3,596 million.

With a support price of $13.10, a 50-cent deduction would result in a reduction in CCC's annual net outlays of $804 million and milk production at 138.3 billion pounds, 800 million pounds less than without the deduction. CCC purchases are projected to total 12.4 billion pounds milk equivalent. CCC purchase costs are estimated to total $2,056 million, net outlays before deductions $2,225 million, deductions $681 million, and net outlays after deductions $1,544 million.

With a support price of $13.10, a $1.00 deduction would result in a reduction in CCC's annual net outlays of $1,601 million and milk production at 137.5 billion pounds, 1.6 billion pounds less than without any deduction. CCC purchases are projected to total 11.6 billion pounds milk equivalent. CCC purchase costs are estimated to total $1,932 million, net outlays before deductions $2,101 million, deductions $1,354 million, and net outlays after deductions $747 million. However, the refund provisions of the second 50-cent deduction would reduce net deductions and increase CCC net otlays after deduction by $65 million to $70 million for each 10 percent of average producers who participate in the milk reduction and refund program.

With a support price higher than $13.10 and below 75 percent of parity ($15.23), each 50 cent per hundredweight incremental deduction is estimated to reduce milk production and CCC price support purchases by about .7 billion to .8 billion pounds milk equivalent from

the level which would occur at that respective price support level in the absence of the deduction. However, commercial use would decline if the support price were increased and CCC purchases would increase as a result of the lower commercial use. Per unit CCC purchase costs would also increase with a respective increase in the support price level.

Under section 201(d) of the 1949 Act, a refund of 50 cents per hundreweight must be made when a $1.00 per hundredweight deduction is in effect if the producer reduces commercial marketings by a specified level from the producer's marketings during the base period. The proposed regulations of December 17, 1982, provide for a base period of 24 months from October 1, 1980, through September 30, 1982. The maximum reduction which may be required under section 201(d) is estimated surplus as a percent of the estimated total milk production. Assuming that a $1.00 per hundredweight deduction were to be implemented effective August 1, 1983, the estimated total milk production would be 138.5 billion pounds and the estimated surplus (*i.e.*, CCC net price support purchases) would be 16.1 billion pounds. The proposed reduction of 11.6 percent is the maximum which could be required during August and September 1983 on the basis of these estimates. Assuming that a $1.00 per hundredweight deduction were to be implemented effective October 1, 1983, the estimated total milk production for fiscal year 1984 would be 137.5 billion pounds and the estimated surplus would be 11.6 billion pounds. The proposed reduction of 8.4 percent is the maximum which could be required during fiscal year 1984 on the basis of these estimates.

In deciding whether to propose these deductions, consideration has been given to the statutory standards prescribed by section 201(c) of the 1949 Act. Consideration has also been given to the Congressional policy statement with respect to dairy production which is set forth in section 204 of the Agricultural Act of 1954. The general non-binding policy of section 204 is, of course, subject to the specific statutory standards of section 201(c). The proposal will not affect the promotion of increased use of dairy products. The proposal will assure an adequate supply of milk and dairy products and will encourage efficient production units consisting of high-grade, disease-free cattle and modern sanitary equipment. It also will assure diary farmers as a whole of a fair return for their labor and investment while assuring an adequate supply of pure and wholesome milk to meet current needs. The proposal will assure a level of farm income adequate to maintain productive capacity sufficient to meet anticipated future needs. The proposal also reflects the recent increase in the cost of feed and increased efficiency in production.

Some margimal operators may not be able to profit under the proposal (some in fact may go out of business) but the statute which authorizes the milk price support program does not guarantee each and every dairy farmer a profit. A long-term trend shows that the number of operations with milk cows has declined steadily, while the average number of cows per operation has increased each year. In fiscal year 1984, even with a support price established at 75 percent of parity, there would be some 10,000 fewer operations with milk cows than in fiscal 1983. With a $13.10 per hundredweight support level and no deductions implemented, some 16,000 operations would cease to operate. This decline is about equal to the average annual decline from 1977 through 1982. Each 50-cent per hundredweight incremental deduction is estimated to result in an additional 1,600 fewer operations with milk cows in fiscal 1984. Thus, a full $1.00 deduction at a $13.10 support price would result in some 19,000 fewer operations than in fiscal 1983. This decline is less than the average annual decline of nearly 21,000 which occurred from 1973 through 1982, and well below the annual average decline of 28,000 which has occurred since 1970. This analysis is based on long-term trends and estimated aggregate cow numbers. Thus, no inference should be drawn as to size of operation impacted.

The implementation of the deductions would principally affect farm income in the areas of greatest production. More than 60 percent of the nation's milk production is concentrated in eight States: Wisconsin, California, New York, Minnesota, Pennsylvania, Michigan, Ohio and Iowa. However, every milk producer in the United States who markets milk commercially will be affected by the program. The 50-cent deduction represents less than 4 percent of producer gross income from milk and the one dollar deduction represents less than 8 percent of producer gross income from milk. Those producers who comply with the specified reduction will receive a refund of 50 cents per hundredweight of the $1.00 per hundredweight deduction.

The price support program operates nationally on a gross dollar basis (currently $13.10 per hundredweight) without regard to net income or individual producer costs. Individual producer costs vary widely depending on efficiency of the operation, accounting methods, and what is included in costs. Thus, using such cost data to arrive at net income figures can lead to distorted conclusions about individual dairy farmer's financial conditions.

Summary of Initial Regulatory Flexibility Analysis

Milk production exceeds milk consumption in the United States by about 10 percent. CCC has been, and is expected to continue, purchasing about 10 percent of the annual milk production at a net purchase cost in excess of $2 billion per year.

The objectives of this proposal are to defray part of the cost of the milk price support program, slow the rate of increase in milk production, and bring milk production into balance with commercial consumption.

The Statistical Reporting Service, United States Department of Agriculture, reports that in 1982 there were 311,800 operations with one or more dairy cows. Of the operations with dairy cows in 1981, 5.7 percent had 100 or more cows. The Small Business Administration (SBA) has defined the size standard for small farms as those for which average annual receipts for the preceding three fiscal years do not exceed $1 million. Using the average production per cow of 12,800 pounds per year and the average price of all milk at $13.78 per hundredweight, the break point with respect to cow numbers for defining small farms in accordance with the SBA size standard would be over 550 cows. Thus, well over 95 percent of all farms with dairy cows may be classified as small businesses. The total number of "responsible persons," those who will be required to deduct and remit funds to CCC, is estimated to be 2,500. While the Department does not maintain any size data regarding such entities, the vast majority come within the SBA's definition of "small business."

Small organizations and small governmental jurisdictions will not be substantially affected by this proposed determination.

Those defined as "responsible persons" will have the responsibility of providing documentation upon which deductions will be assessed. Since those entities purchase milk from producers and maintain records of individual producer marketings in the normal course of business, the additional paperwork and recordkeeping costs

involved with remitting deducted amounts are negligible.

Farmers who wish to reduce their production and apply for a refund would be required to verify at their local county ASC office their milk marketings for the base period, October 1, 1980, through September 30, 1982, in addition to marketings for the months that the additional 50-cent deduction and the refund program are in effect. The records required for verification of marketings should already be in the hands of farmers, since handlers presently provide this information to farmers with their milk checks. In some States, this information is available from State agencies.

No additional professional skills are required in order to comply with the requirements of this proposal.

This rule does not duplicate, overlap or conflict with the provisions or requirements of any other rules promulgated by the Federal Government. Any duplication of State or local government rules will be minimal.

CCC has considered two alternative programs for the current 1982–83 marketing year. These alternatives are: (1) Maintaining the 50-cent per hundredweight deduction which began April 16, 1983 and (2) imposing an additional 50-cent per hundredweight deduction in conjuction with a refund program effective August 1, 1983, through September 30, 1983.

CCC has considered alternative programs for the 1983–84 marketing year. These alternatives are: a support price of 75 percent of parity ($15.23 per hundredweight) or a support price of $13.10 per hundredweight in conjuction with: (1) No deduction, (2) a 50-cent per hundredweight deduction effective October 1, 1983 (without any refund program), or (3) a $1.00 per hundredweight deduction (two 50-cent deductions) in conjunction with a 50-cent per hundredweight refund program, effective October 1, 1983.

These alternatives are more fully discussed in the Preliminary Regulatory Impact Analysis.

Failure to implement any deduction would fail to accomplish CCC's stated objectives and would result in a continuation of the present situation where milk production exceeds commercial consumption and CCC purchases large amounts of dairy products under the milk price support program at great expense.

A refund will only be available if the $1.00 deduction is in effect. Only those farmers who wish to receive a refund will be required to establish their production during the base period or their production for the months during which the refund program is available. Information necessary to comply with these requirements normally accompanies a farmer's milkcheck and may also be readily available from other sources.

CCC believes that the compliance and reporting requirements are as simple as the purpose of this proposal permits.

No performance or design standards are involved in any of the proposals under consideration.

Since more than 95 percent of all dairy farms are small businesses under SBA size standards, all classes of dairy farms must be included under any proposal in order to make a program work.

Cash flow will be reduced for dairy farmers but, in most cases, not to an extent which threatens the continued viability of dairy enterprises. The deductions could have a significant impact upon individual farmers, large or small, depending upon a given farmer's financial condition.

Large and small businesses will be affected in direct relations to the volume of output, and their competitive positions relative to each other will not be affected as the per unit effect of this proposal will be the same for both small and large enterprises.

The information collection requirements for implementation of this notice have been approved by the Office of Management and Budget under OMB Number 0581–0132 pursuant to the requirements of the Paper Work Reduction Act.

List of Subjects in 7 CFR Part 1430

Milk, Agriculture, Price support programs, Dairy products.

Proposed Determinations

It is estimated that net price support purchases by the CCC of milk and the products of milk will exceed 7.5 billion pounds milk equivalent during both the 1982–83 and the 1983–84 marketing years. After consideration of the impact of the alternative programs set forth herein, it is proposed that the following action be taken to slow the rate of increase in milk production, bring milk production into balance with commercial consumption, and reduce the cost of the dairy price support program. The price support level shall be established at $13.10 per hundredweight for manufacturing grade milk of national average milk fat content (3.67 percent) for the 1983–84 milk marketing year. Deductions totaling $1.00 per hundredweight shall be made from the proceeds of sale of all milk marketed commercially by producers during the period August 1, 1983, through September 30, 1983, and for the period October 1, 1983, through September 30, 1984. The deduction shall be remitted to the Commodity Credit Corporation to offset a portion of the cost of the milk price support program. Refunds of 50 cents per hundredweight shall be made to producers who reduce their commercial marketings by 11.6 percent during August and September 1983 and by 8.4 percent during October 1, 1983, through September 30, 1984, from marketings during the base period. The collection of the deductions and the making of the refunds shall be conducted in accordance with the final rule to be published pursuant to the rulemaking that began with the publication of a notice of proposed rulemaking on December 17, 1982 (47 FR 56500).

Comments are requested on these proposed determinations.

(Sec. 201 (c) and (d) of the Agricultural Act of 949, as amended 7 U.S.C. 1146); and secs. 4 and 5 of the Commodity Credit Corporation Charter Act, as amended (15 U.S.C. 714b and 714c))

Signed at Washington, D.C. on May 26, 1983.

ACTION: Notice of withdrawal of proposed rule.

SUMMARY: The Comptroller has decided to withdraw a proposed rulemaking regarding the validation and enforcement of due-on-sale clauses in real estate loans made by national banks. This proposed regulation was published on September 23, 1981, at 46 FR 46964. See "Supplementary Information" for a discussion of reasons for withdrawing the proposed rule.

FOR FURTHER INFORMATION CONTACT: Francis S. Rath, Attorney, Legal Advisory Services Division, (202) 447-1880, Office of the Comptroller of the Currency, Washington, D.C. 20219.

SUPPLEMENTARY INFORMATION:

Drafting Information

The principal drafter of this document was Francis S. Rath, Attorney, Legal Advisory Services Division, Office of the Comptroller of the Currency, Washington, D.C. 20219.

Background and Analysis

On September 23, 1981, the Office of the Comptroller of the Currency ("Office") published a proposed regulation concerning the validation and enforcement of due-on-sale clauses in real estate loans made by national banks.

The proposed regulation was described in the Notice as follows:

> This proposed regulation would validate the inclusion of due-on-sale clauses in real estate loans made by national banks and make such clauses fully enforceable. The regulation would also revalidate due-on-sale clauses in loans made prior to the rendering of any state court decision or passage of any state statute impairing the enforceability of such clauses, unless the property subject to the mortgage lien containing such a clause was transferred prior to the final promulgation of this regulation. This regulation is intended to make fixed-rate mortgage loans more viable financing vehicles for national banks by effectively permitting the shortening of the average life of such loans. It would also prevent national banks from being deprived, by court decisions impairing the enforceability of due-on-sale clauses, of the opportunity to invest at market rates of interest funds they reasonably expected would be available, given the average turnover rate for real property.

The Office received numerous comments regarding the proposed rulemaking. The Office has decided to withdraw the proposed regulation for the following reasons.

First, due to the time that has passed since the proposal was published and comments were solicited, various changes have occurred which may have an impact on the enforceability of due-on-sale clauses in general and the proposed regulation in particular. Since the publication of the proposal, there has been much discussion and numerous legislative debates and proposals at both the state and federal levels concerning the validation of due-on-sale clauses. At the federal level, this has resulted in the passage of Section 341 of the Garn-St Germain Depository Institutions Act of 1982 (Pub. L. 97-320) ("the Act"), which established a broad preemptive rule concerning due-on-sale clauses. The Act also reserves to the Office specific rulemaking authority regarding "window-period" loans—*i.e.*, those made or assumed after a state, by statute, constitutional provision or judicial decision of statewide applicability, restricts the enforceability of due-on-sale clauses and before enactment of the Act. In addition, there have also been significant changes in the housing markets, interest rates, and other market and financial conditions during this time period. These occurrences moot some of the provisions of the proposal and raise questions about the continuing validity of the comments received.

Secondly, the Act authorizes state legislatures to enact laws affecting window-period loans as to lenders other than national banks, Federal savings and loan associations, Federal savings banks and Federal credit unions. The Office has determined that, prior to the issuance of a regulation, it would be desirable to provide reasonable time for state legislatures to enact laws pursuant to this authority regarding the enforceability of due-on-sale clauses in window-period loans. Some legislatures are presently considering such measures. This provides the Office with the opportunity to review and consider state legislative actions regarding due-on-sale clauses prior to a decision to issue a pre-emptive regulation.

Finally, the degree of controversy aroused by the subject of due-on-sale clauses since the passage of the Act has raised questions within the Office as to the completeness and currency of the administrative record. The Office desires to give full consideration to the views of all interested parties in all rulemakings. Any future rulemaking on due-on-sale clauses will provide a new opportunity for written comments focused on those issues not laid to rest by the Act the Office encourages written comments and gives careful consideration to those received in response to notices of proposed rulemaking.

For these reasons, the Office is withdrawing the proposed regulation published on September 23, 1981, and may consider publishing a new proposal concerning the enforceability of due-on-sale clauses by national banks.

Dated: May 4, 1983.

C. T. Conover,

Comptroller of the Currency.

BILLING CODE 4810-33-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83-CE-53-AD]

Airworthiness Directives; Pilatus Britten-Norman Ltd. Models BN-2, BN-2A, and BN-2B Islander Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt a new Airworthiness Directive (AD), applicable to certain Pilatus Britten-Norman Ltd., Models BN-2, BN-2A, and BN-2B Islander Series Airplanes equipped with wing tip tanks (Mod NB/M/364) which would require changes to the fuel tip tank selector switches, placarding and indicator lamps. Two accidents involving fuel mismanagement have occurred. The modifications of the switches, placarding and indicators will reduce the possibility of mismanagement of the tip tank fuel system.

DATES: Comments must be received on or before August 2, 1983.

COMPLIANCE: Within 100 hours time-in-service, but no later than December 31, 1983.

ADDRESSES: Pilatus Britten-Norman Ltd. Service Bulletin No. BN-2/SB.157, dated March 14, 1983, applicable to this AD may be obtained from Pilatus Britten-Norman Ltd., Bembridge, Isle of Wight, England or the Rules Docket at the address below.

Send comments on the proposal in duplicate to Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 83-CE-53-AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: A. Astorga, Aircraft Certification Staff, AEU-100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium. Telephone 513.38.30; or L. Werth, Foreign FAR 23 Section, ACE-109, 601 East 12th Street, Kansas City, Missouri. Telephone (816) 374-6932.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Central Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 83-CE-53-AD, Room 1558, 601 East 12th Street, Kansas City, Missouri 64106.

Discussion

Based upon findings of two accident investigations involving the affected model Pilatus Britten-Norman Islander Series airplanes which indicated the pilots may not have understood proper operation of the fuel system, the manufacturer has initiated changes in the wing tip fuel tank selector switches, system placarding and selection indicator lamps, on aircraft currently in production. Also, a kit for incorporating these changes on airplanes in service with wing tip tanks (Mod NB/M/364) installed is now available. As a result, Pilatus Britten-Norman Ltd. has issued Service Bulletin No BN-2/SB.157, dated March 14, 1983, containing instructions for incorporating these modifications which simplify and clarify wing tip fuel tank operational procedures. The United Kingdom Civil Aviation Authority (UKCAA), who has the responsibility and authority to maintain the continuing airworthiness of these airplanes in the United Kingdom, has classified this Service Bulletin and the actions recommended therein by the manufacturer as mandatory to assure the continued airworthiness of the affected airplanes. On airplanes operated under United Kingdom registration, this action has the same effect as an AD on airplanes certified for operation in the United States. The FAA relies upon the certification of the UKCAA combined with FAA review of pertinent documentation in finding compliance of the design of these airplanes with the applicable United States airworthiness requirements and the airworthiness and conformity of products of this design certificated for operation in the United States.

The FAA has examined the available information related to the issuance of Service Bulletin No. BN-2/SB.157, dated March 14, 1983, and the mandatory classification of this Service Bulletin by the UKCAA.

Based on the foregoing, the FAA believes that the condition addressed by Service Bulletin No. BN-2/SB.157, dated March 14, 1983, is an unsafe condition that may exist on other products of this type design certificated for operation in the United States. Consequently, the proposed AD would require modification of the wing tip tank fuel management system on certain Pilatus Britten-Norman Ltd. Models BN-2, BN-2A, and BN-2B Islander Series Airplanes equipped with wing tip tanks (Mod NB/M/364).

There are approximately 130 airplanes which could have Mod NB/M/364 and which may be affected by the proposed AD. The cost of complying with the proposed AD is estimated to be minimal to the private sector.

Aviation safety, Aircraft.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, the Federal Aviation Administration proposes to amend 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

Pilatus Britten-Norman Ltd: Applies to Model BN-2, BN-2A, and BN-2B Islander Series Airplanes equipped with wing tip tanks (Mod NB/M/364— certificated in any category except BN-2 MKIII Series Trislander airplanes.

Compliance: Required within 100 hour time-in-service, but no later than December 31, 1983.

To preclude fuel mismanagement and possible fuel starvation, accomplish the following:

(a) Modify the wing tip tank fuel management system in accordance with steps 1. through 12. of the ACTION section of Pilatus Britten-Norman Ltd. Service Bulletin No. BN-2/SB.157, dated 14, 1983.

(b) Aircraft may be flown in accordance with Federal Aviation Regulations 21.197 to a location where this AD can be accomplished.

(c) An equivalent method of compliance with this AD, if used, must be approved by the Manager, Aircraft Certification Staff, AEU-100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium.

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a) 1421 and 1423; Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and § 11.85 of the Federal Aviation Regulations (14 CFR 11.85).

Note. For reasons discussed earlier in the preamble: the FAA has determined that this document: (1) Involves a proposed regulation that is not major under the provisions of Executive Order 12291, (2) is not significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979), and (3) certifies under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. A draft regulatory evaluation has been prepared and has been placed in the public docket. A copy of it may be obtained by contacting the Rules Docket at the location identified under the caption "Addresses."

Issued in Kansas City, Missouri, on May 19, 1983.

John E. Shaw,

Acting Director, Central Region.

[FR Doc. 83-14504 Filed 5-27-83; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 83-AGL-4]

Proposed Designation of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate controlled airspace near Motley, Minnesota, to accommodate a new instrument approach procedure into Morey Fish House Airport, Motley, Minnesota, established on the basis of a request from the Morey Fish House Airport officials to provide that facility with instrument approach capability utilizing the Brainerd, Minnesota VORTAC.

The intended effect of this action is to insure segregation of the aircraft using approach procedures in instrument weather conditions from other aircraft operating under visual weather conditions in controlled airspace.

DATE: Comments must be received on or before June 30, 1983.

ADDRESS: Send comments on the proposal in triplicate to FAA Office of Regional Counsel, AGL-7, Attention: Rules Docket Clerk, Docket No. 83-AGL-4, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

The official docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

An informal docket will also be available for examination during normal business hours in the Airspace Procedures, and Automation Branch, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Airspace, Procedures, and Automation Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION: The floor of the controlled airspace in this area will be lowered from 1200' above ground to 700' above ground. The development of the proposed instrument procedures requires that the FAA lower the floor of the controlled airspace to insure that the procedure will be contained within controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700-foot controlled airspace.

Aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-adressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83-AGL-4." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2, which describes the application procedures.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish a new 700-foot controlled airspace transition area near Motley, Minnesota.

Section 71.181 of Part 71 of the Federal Aviation Regulations was published in Advisory Circular AC 70-3A dated January 3, 1983.

List of Subjects in 14 CFR Part 71

Transition areas, Aviation safety.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

Motley, MN

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the Morey Fish House Airport (latitude 46°19'30" N., longitude 94°38'25" W.) within 4.75 miles each side of the 267° radial from the Brainerd VOR, extending from the 5-mile radius to 16.5 miles west of the Airport, excluding that portion within the Staples Minnesota, transition area.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, it is certified that this—(1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Des Plaines, Illinois, on May 10, 1983.

Kenneth C. Patterson,

Acting Director, Great Lakes Region.

Top-Heavy Plans; Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to top-heavy pension, profit-sharing, and stock bonus plans. The proposed regulations also contain proposed amendments to regulations relating to retroactive plan amendments.

DATES: The public hearing will be held on Friday, August 5, 1983, beginning at 10:00 a.m. Outlines of oral comments must be delivered or mailed by Friday, July 22, 1983.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (EE–140–82), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Lou Ann Craner of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, N.W., Washington, D.C. 20224, 202–566–3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 416 of the Internal Revenue Code of 1954. The proposed regulations appeared in the **Federal Register** for Tuesday, March 15, 1983, (48 FR 10868).

The rules of § 601.601 (a) (3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit, not later than Friday, July 22, 1983, an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

Peter K. Scott,

Director, Employee Plans and Exempt Organizational Division.

BILLING CODE 4830-01-M

Fiscal Service

31 CFR Part 240

Extension of Treasury's Reclamations Authority

AGENCY: Bureau of Govenment Financial Operations, Fiscal Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: Under 31 CFR 240.4 and 240.5, Treasury has the right to refunds from banks and other indorsers receiving payment on Treasury checks bearing forged or unauthorized indorsements or any other material defects or alterations. The United States has a common law right to offset amounts owed to it against amounts in its possession belonging to its debtors. United States V. Munsey Trust Co., 332 U.S. 234, 239 (1947). On March 17, 1983, Treasury issued a temporary regulation implementing the Federal Claims Collection Act of 1966, *as amended*. The temporary regulation authorized Treasury to recover amounts of delinquent reclamations and accrued interest thereon by offsetting those amounts against amounts in the possession of the United States that are owed to presenting banks. This proposed rule requests comments on whether procedures similar to those contained in that temporary rule should be adopted as final. This proposed rule should result in more effective debt collection

DATE: Comments on this proposed rule must be received on or before August 1, 1983.

ADDRESS: Submit comments to the address shown under "FOR FURTHER INFORMATION CONTACT."

FOR FURTHER INFORMATION CONTACT: Mr. Michael D. Serlin, Assistant Commissioner, Governmentwide Accounting, Room 416, Treasury Annex, Pennsylvania Avenue and Madison Place NW, Washington, D.C. 20226 (202–566–5594).

SUPPLEMENTARY INFORMATION: The purpose of the proposed rule is more effective debt collection. Under the Federal Claims Collection Act of 1966, as amended by Pub. L. 97–365, section 10, the Secretary of the Treasury has the duty to attempt colleciton of all claims of the United States for money or property arising out of the activities of, or referred to Treasury. *See*, section 1, Pub. L. 97–258, 96 Stat. 877 at 971, Sept. 13, 1982 (Revised 31 U.S.C.A. section 3711 (1982)) and 4 CFR 102.3. Treasury's claims against indorsers of, and banks that present for payment, Treasury checks bearing forged or unauthorized indorsements are within the scope of this duty. Historically, many presenting banks have declined to pay these legitimate claims (reclamations), forcing Treasury to either litigate its claims, a procedure which is rarely cost-effective, or absorb the loss.

Treasury first advised the public that it was considering collecting the amounts owed it because of check claims by offset against amounts owed a presenting bank by a Federal Reserve bank in an Advance Notice of Proposed Rulemaking (ANPRM) published in the **Federal Register** on April 25, 1979 (44 F.R. 24306). (Although the term "setoff" was used in the ANPRM and in the

Notice of Proposed Rulemaking (NPRM) discussed below, the term "offset" will be used uniformly here because the debt collection methods described are substantially the same.) Because of substantial questions raised by several commenters, Treasury withheld further action on the proposal pending additional consideration of 44 FR 53090. Sept. 12, 1979.

After further consideration, Treasury again invited comments from the public concerning a proposed change in the regulations that would allow Treasury to recover delinquent reclamations through offset. *See*, NPRM published November 4, 1981 (46 FR 54762). Unlike the ANPRM, the NPRM provided specific regulatory language for comment. Although the NPRM also provided for recovery from banks' reserve account balances, the Supplementary Information portion of the document referred both to offset authorized by contract between Treasury and presenting banks and to offset authorized at common law. This latter type of offset is referred to by regulations implementing the Federal Claims Collection Act. 4 CFR 102.3.

Treasury received 35 comments on the NPRM. Most of the comments concerned Treasury's lack of statutory authority to offset and certain due process considerations in connection with the procedure for offset against reserve account balances. upon review of the comments received. Treasury considered several alternatives and found that the most feasible was offset against other amounts owed debtor banks by government agencies under the common law offset theory. Although this re-evaluation resulted in a shift of targets of offset, Treasury considered its action to be close enough to the action proposed by the ANPRM and the NPRM that it was unnecessary to obtain further comments before taking definitive action. In addition, Treasury found that certain facts warranted the taking of immediate action to implement an offset mechanism. Therefore, Treasury issued a Temporary Rule, 48 FR 11261 (March 17, 1983), implementing its offset procedure. However, in publishing that Temporary Rule, Treasury indicated that it would request comments on whether the procedures in the Temporary Rule should be adopted as a final rule.

It has been determined that this amendment is not a "major rule" as defined in Executive Order 12291, dated February 17, 1981. This determination is based on the fact that the rule's only purpose and effect will be to increase the efficiency and effectiveness of the United States' efforts to collect debts which arise under existing law and for the collection of which the Secretary is responsible under existing law. In addition, the only significant alternative collection device, litigation, has not been sufficiently effective. For the same reasons, this proposed rule will not have a significant economic impact on a substantial number of small entities. Therefore, the regulatory flexibility analysis referred to in Pub. L. 96–354, 94 Stat. 1168 (Sept. 19, 1980) is not required and has not been conducted.

Banks, banking, Forgery, Treasury checks.

PART 240—INDORSEMENT AND PAYMENT OR CHECKS DRAWN ON THE UNITED STATES TREASURY

Accordingly, it is proposed that 31 CFR Part 240 be amended as follows:

1. By revising the authority citations to read as follows:

Authority: 5 U.S.C. 301; 12 U.S.C. 391; section 1, Pub. L. 97–258, 96 Stat. 877 at 955, Sept. 13, 1982 (Revised 31 U.S.C.A. 3331 (1982)); section 1, Pub. L. 97–258, 96 Stat. 877 at 957, Sept. 13, 1982 (Revised 31 U.S.C.A. 3343; section 1, Pub. L. 97–258. 96 Stat. 877 at 971, Sept. 13, 1982 (Revised 31 U.S.C.A. 3711 (1982)), *as amended* by Pub. L. 97–365. sections 10 and 11.

2. By revising section 240.1 to read as follows:

§ 240.2 Scope of regulations

The regulations in this part prescribe the requirements for indorsement and the conditions for payment of checks drawn on the United States Treasury. These regulations also establish procedures for collection of amounts due the United States Treasury because of payments on checks bearing forged or other unauthorized indorsements, or other material defects or alterations.

3. By revising § 240.2 to read as follows:

§ 240.2 Definitions

(a) "Check" or "checks" means a check or checks drawn on the United States Treasury.

(b) "Check payments" means the amount paid to a presenting bank in accordance with section 240.8(a)(3) of this Part.

(c) "Days" means calendar days.

(d) "Financial organization" means any bank, savings bank, savings and loan association, Federal or State chartered credit union, or similar institution.

(e) "Item" means a reference in a monthly interest billing statement to a check for the amount of which Treasury has demanded refund from a presenting bank.

(f) "Monthly interest billing statement" means a statement prepared by Treasury and sent to a presenting bank which includes the following information regarding each outstanding demand for refund:

(1) The reclamation date;

(2) The reclamation number;

(3) Check identifying information; and

(4) The balance due, including interest.

(g) "Person" or "persons" means an individual or individuals, or an organization or organizations, including all forms of financial organizations.

(h) "Presenting bank" means: (1) A financial organization which, either directly or through a correspondent banking relationship, presents checks to and receives credit from a Federal Reserve Bank, or (2) a depositary which is authorized to charge checks directly to the General Account of the United States Treasury and present them directly to Treasury for payment.

(i) "Protest" means a presenting bank's written statement and any supporting documentation tending to prove that it is not liable for refund of the reclamation balance.

(j) "Reclamation" means a demand by Treasury for refund of the amount of a check payment.

(k) "Reclamation date" means the date on which a demand for refund was prepared. Normally, demands are sent to presenting banks within two working days of the reclamation date.

(l) "Treasury" means the United States Treasury.

(m) "U.S. securities" means securities of the United States and securities of Federal agencies and wholly or partially Government-owned corporations for which the Treasury acts as transfer agent.

(n) "Unauthorized indorsement" means: (1) An indorsement made by a person other than the payee, except as authorized by an in accordance with sections 240.4 and 240.10 through 240.14 of this part, (2) an indorsement by a financial organization under circumstances in which the financial organization breaches the guaranty required of it by 31 CFR 209.10(a) (*see* 31 CFR 209.9), or (3) a missing indorsement where the depositary bank had no authority to supply the indorsement.

4. By revising section 240.5 to read as follows:

§ 240.5 Collection of amounts of paid checks

(a) If, after a check has been paid by Treasury, it is found to:

(1) Bear an unauthorized indorsement, or

(2) Contain any other material defect or alteration which was not discovered upon first examination,

Othen, upon demand by the Treasury in accordance with the procedures specified in section 240.6 of this Part, the presenting bank or other indorser shall refund the amount of the check payment.

(b) Interest on any unpaid item shall commence to accrue on the sixty-first day after the reclamation date. Interest shall be calculated at the rate set from time to time for purposes of section 1, Pub. L. 97–258, 96 Stat. 877 at 882 (Revised 31 U.S.C.A. 323 (1982)). Interest shall continue to accrue until the amount demanded is paid or the reclamation is abandoned.

(c) In addition to its right to recover interest, Treasury shall have the right to recover such other applicable charges (e.g., administrative collection costs, late payment penalties) as may be authorized or required by law.

5. By redesignating sections 240.6 through 240.12 as sections 240.8 through 240.14, respectively, and by adding new sections 240.6 and 240.7 as follows:

§ 240.6 Demand and protest.

(a) For all reclamations an initial demand for refund of the amount of a check payment will be made by sending a "Request for Refund (Reclamation)." to the presenting bank. This Request shall advise the presenting bank of the amount demanded and the reason for the demand. Treasury will make follow-up demands by including each unpaid item on at least three monthly interest billing statements sent to the presenting bank. Monthly interest billing statements will identify any unpaid reclamation demands and will also show the amount of any accrued interest for each outstanding reclamation. Monthly interest billing statements will contain or be accompanied by notice to the bank:

(1) That Treasury intends to collect the debt through administrative offset if the reclamation is not paid within 120 days of the reclamation date,

(2) That the bank has an opportunity to inspect and copy Treasury's records with respect to the reclamation,

(3) That the bank may, by filing a protest, request Treasury to review its decision that the bank is liable for the reclamation, and

(4) That the bank has an opportunity to enter into a written agreement with Treasury for the repayment of the amount of the reclamation. A request for a repayment agreement must be accompanied by proof that satisfies the Treasury that the requesting bank is unable to repay the entire amount owed at the time that it is due.

(b) Requests for an appointment to inspect and copy Treasury's records with respect to a reclamation and requests to enter into repayment agreements should be sent in writing to: Department of the Treasury, Division of Check Claims, Reclamation Policy and Collection Section, 401 14th Street, Washington, D.C. 20227.

(c)(1) If a presenting bank wishes to contest its liability for the principal amount demanded, it shall send a protest, *i.e.*, a written statement and all documentary evidence (*e.g.*, affidavits, account agreements, signature cards) and other written information raising a question of law or fact which, if resolved in the bank's favor, would disprove its liability for the reclamation, to: Department of The Treasury, Division of Check Claims, Reclamation Policy and Collection Section, 401 14th Street, Washington, D.C. 20227.

The Assistant Director (Support Services), Division of Check Claims, who has supervisory authority over the Reclamation Policy and Collection Section, or his authorized subordinate, shall consider and decide any protest properly submitted under this paragraph. Neither the Assistant Director (Support Services), Division of Check Claims, nor any of his subordinates, shall have any involvement in the process of making findings or demands under section 240.5(a). In order to be considered, and to be timely, a protest must be received not later than 90 days after the reclamation date. Treasury will refrain from collection in accordance with section 240.7 while a timely protest is being considered.

(2) If Treasury accepts the protest, the presenting bank shall be notified in writing that efforts to collect the item and any accrued interest have been abandoned.

(3) If the evidence sent by the presenting bank does not satisfy Treasury that refund of the amount demanded is not required under section 240.5(a), Treasury will notify the presenting bank in writing of its decision that the bank is liable for the amount demanded. If the presenting bank fails to send the amount demanded within 30 days of the date of Treasury's decision, Treasury shall proceed to collect the amount owed in accordance with section 240.7.

§ 240.7 Offset.

(a) If an item, and/or accrued interest relating to that item remains unpaid for 120 days after the reclamation date and the presenting bank has been sent at least one monthly interest billing statement informing it that Treasury intends to collect that item by offset, Treasury may refer the matter to any federal agency and request that agency to offset the indebtedness and other applicable charges against amounts owed by the federal agency to the presenting bank. Monthly interest billing statements will identify those items that are to be referred to an agency for offset. If an agency to which an indebtedness is referred in accordance with this paragraph is unable to effect offset in whole or in part within 30 days of the date that the matter is referred to it, it shall so inform Treasury and terminate its efforts to offset. Treasury may then refer the debt to any other agency and request offset in accordance with this paragraph as its designee for the sole purpose of effecting offset. No such designee shall be liable to any party for any loss resulting from its action under this paragraph.

(b) If Treasury is unable to collect an amount owed by use of the offset described in paragraph (a), Treasury shall take such action against the presenting bank as may be necessary to protect the interests of the United States, including referral to the Department of Justice.

(c) The procedures provided for in section 240.5, 240.6(b), and this section shall apply to demands for refund bearing reclamation dates on or after May 26, 1981.

(d) If Treasury effects offset under this section and it is later determined that the presenting bank paid the amount of the reclamation and accrued interest thereon, or that a presenting bank which had timely filed a protest was not liable for the amount of the reclamation, Treasury shall promptly refund to the presenting bank the amount of its payment.

Date May 23, 1983.

Michael D. Serlin,

Acting Commissioner, Bureau of Government Financial Operations.

BILLING CODE 4810–35–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD 82–025]

Drawbridge Regulations; Navigable Waterways of the United States

AGENCY: Coast Guard, DOT.

ACTION: Supplementary notice of proposed rulemaking.

SUMMARY: The Coast Guard published a notice of proposed rulemaking in the July 12, 1982 **Federal Register** revising its regulations for drawbridges across the navigable waters of the United States. As a result of many changes based upon comments received, the Coast Guard is issuing a second notice of proposed rulemaking for additional public comment. The proposed revision is intended to improve the organization and clarity of the initial proposal and to facilitate the use of these regulations by drawbridge owners, drawtenders, boaters, and other interested parties.

DATE: Comments must be received on or before July 29, 1983.

ADDRESS: Comments should be submitted to and are available for examination at the Marine Safety Council (G-CMC), Room 4402, Coast Guard Headquarters, 2100 Second Street, S.W., Washington, D.C. 20593. Between the hours of 7:00 a.m. and 5:00 p.m., Monday through Friday, comments may be delivered to, and are availabe for inspection and copying at the Marine Safety Council (G-CMC).

FOR FURTHER INFORMATION CONTACT: Frank L. Teuton, Jr., 202–426–0942.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their name and address, idenify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgement that their comments have been received should enclose a self-address stamped postcard or envelope.

The Chief, Office of Navigation, U.S. Coast Guard Headquarters, Washington, D.C., will evaluate all communications received before taking final action on this proposal. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. The proposed regulations may be changed in light of comments received. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

In addition to publication in the **Federal Register**, copies of the printed proposal will be mailed to a list of persons and organizations who have expressed a continued interest in drawbridge operation regulations and have requested that copies of proposed changes in the regulations be furnished them. After the supply of copies of this printed document is exhausted, copies will be available for reading of copying in Room 1420, Coast Guard Headquarters, and at the offices of the Coast Guard District Commanders.

Drafting Information

The principal persons involved in drafting this proposal are: Mr. Frank L. Teuton, Jr., Project Manager, and Stephen H. Barber, Project Attorney.

Discussion of the Proposed Regulations

On July 12, 1982, the Coast Guard published a Notice of Proposed Rulemaking ("original proposal") in the **Federal Register** (47 FR 30176) proposing to revise 33 CFR Part 117 concerning drawbridge requirements. Fifty-nene comments were received from various Coast Guard Districts, bridge owners, marine, highway; and railroad interests, and individuals. Based on the comments received, the Coast Guard has revised its original proposal and is now soliciting comments on the changes made.

The initial reasons for revising Part 117 were twofold. The first was to consolidate into a separate subpart (proposed Subpart A) all of the requirements which are common to most drawbridges. Presently, these requirements are repeated throughout Part 117. For example, the requirement that drawdridge operation regulations be posted on the waterway for the benefit of boaters (proposed § 117.55) appears in 145 section of the existing regulations.

The second initial reason for revising Part 117 was to reorganize all of the regulations relating to particular drawbridges (proposed Subpart B). The present and the original proposals list the bridges by State and waterway, rather than by bridge or waterway as in the existing regulations. Under both proposals, one could locate the specific regulations, if any, for a particular bridge by referring to the alphabetical listing of States and waterways, rather than by having to scan the entire index.

However, as result of the many comments received, the Coast Guard now has decided to revise the original proposal for further clarification and consolidation. The scope ofthis revision is limited to the subjects already addressed in one manner or another in the existing regulations but is not intended to amend the provisions specifying the opening and closing times of particular bridges now listed in proposed Subpart. B. Comments recommending changes to the specific requirements applicable to a particular bridge, for example, a provision which permits a bridge to remain closed from 6 a.m. to 8 a.m., should be submitted to the Commander of the Coast Guard District in which the bridge is located for consideration under a separate rulemaking project.

Changes to the Original Proposal

(a) *Subpart A.* Proposed Subpart A combines into a single subpart all of the general requirements relating to drawbridges. Specific requirements for a particular bridge which are in addition to, or differ from, the general requirements in proposed Subpart A are placed in proposed Subpart B.

Proposed Subpart A has been extensively revised since the date of the original proposal to eliminate minor inconsistencies and to organize the material into a more logical progression.

Certain provisions which appeared in Subpart A of the original proposal actually apply only to the bridges in Subpart B. These provisions, concerning posting of requirements (§ 117.55) and advance notice (§ 117.57), have been transferred to proposed Subpart B.

Three recently promulgated regulations have been included in proposed Subpart A. Section 117.9 (Delaying opening of a draw), § 117.11 (Appurtenances unessential to navigation), and § 117.45 (Process of violations) came into effect on January 3, 1983 (47 FR 54297; December 2, 1982). These provisions have been renumbered and added to Subpart A without further change.

Several final rules amending the specific requirements for certain drawbridges in the existing regulations have been published since the date of the original proposal and are now in effect. All of the amendments as of April 30, 1983 have been included in this proposal for the benefit of the reader. When the final rule is published under the present rulemaking, that rule will contain all amendments of this nature which are in effect on the date of final publication.

Section 117.7 in the original proposal concerning the expedited passage of public vessels, commercial vessels, and vessels in distress has been deleted from Subpart A. Expedited passage is addressed in the existing regulations in the list of requirements applicable to particular bridges. Those provisions were deleted in the original proposal and summarized in its Subpart A. However, because of the controversy surrounding this issue, this proposal deletes the summary and restores the expedited passage provisions to the bridges to which they now apply. This

matter will be considered under a separate rulemaking in the future.

Proposed § 117.23, concerning the installation of radiotelephones on drawbridges, is basically the same provision that appeared in § 117.15 of the original proposal. Both of these proposed sections place the authority to require the installation of a radiotelephone in the Coast Guard District Commanders. The existing regulations specify the Commandant of the Coast Guard (33 CFR 117.1(e)). However, the general authority of the Commandant to regulate the operation of drawbridges has been delegated to the District Commanders under 33 CFR 1.05–1(g)(3). Therefore, the proposed change from Commandant to District Commander is commensurate with this general delegation.

(b) *Subpart B.* This subpart prescribes specific requirements applicable to the drawbridges listed in this subpart. These provisions are in addition to, or differ from, the general requirements in Subpart A. Proposed Subpart B has been changed as follows since the original proposal was published.

As mentioned above, several provisions in Subpart A of the original proposal apply only to the bridges in Subpart B. These provisions have been placed at the beginning of Subpart B in this proposal.

The drawbridges with specific requirements listed in proposed Subpart B have been renumbered without substantive change. The proposed index to Part 117 now lists the waterways alphabetically, as well as the states. To locate the specific requirements for a particular bridge, look up in the index to proposed Part 117 the state and waterway where the bridge is located. Then refer to the section indicated. The bridges in that section are listed in order from the mouth of the waterway moving upstream. Bridges on the Altantic Intracoastal Waterway are listed north to south and on the Gulf Intracoastal Waterway, east to west.

Regulatory Evaluation

This regulatory action is considered to be "non-major" under Executive Order 12291 (46 FR 13193; February 19, 1982) and "nonsignificant" under the Department of Transportation Order 2100.5, "Policies and Procedures for Simplification, Analysis, and Review of Regulations," dated May 22, 1980. These orders require an evaluation of the estimated costs of the proposed regulations to the private sector, consumers, and governments, as well as the anticipated benefits and impacts of the proposals.

This regulatory action proposes a reorganization of the existing drawbridge operation regulations without, for the most part, adding new requirements. The only additional cost this proposal may impose would be in the area of posting of requirements. Proposed § 117.55 would require the owners of drawbridges listed in Subpart B, other than removable span bridges, to post a sign upstream and downstream of the bridge. The signs would summarize the specific requirements in Subpart B applicable to the bridge in question. These signs need not list the requirements in Subpart A or those in §§ 117.55 through 117.59 of Subpart B. Many bridges are already required to post this information under the existing regulations. The existing regulations contain 145 references to posting. Still other bridges currently post signs as a benefit to vessel operators and as a measure to provide for the safety of the bridge. Nevertheless, this provision would affect bridges in proposed Subpart B not already posting this information. It is estimated that 25 bridges would have to install signs at a cost of $200 per bridge (two signs) for a total of $5,000 nationwide.

Because the impact of this proposal, as discussed above, is considered to be minimal, a full Regulatory Evaluation is not considered necessary and none has been prepared.

Regulatory Flexibility Act

The proposed reorganization of Part 117 is intended primarily to simplify and clarify the existing regulations without substantive change. The only change which would impose new costs would be the posting requirement discussed in the Regulatory Evaluation section above. The cost per bridge for bridges not already required to post or not already doing so voluntarily would be approximately $200. These bridges are owned by railroads or governmental entities and the costs imposed for each would be relatively minimal. Therefore, for the above reasons, it is certified, in accordance with section 605(d) of the Regulatory Flexibility Act (94 Stat. 1164; 5 U.S.C. 601), that these rules will not, if promulgated, have a significant economic impact on a substantial number of small entities.

Reporting and Recordkeeping Requirements

There are no reporting or recordkeeping requirements in the proposed regulations which fall under the Paperwork Reduction Act of 1980 (Pub. L. 96–511; 94 Stat. 2812; December 11, 1980). The signs required to be posted under proposed § 117.55 merely summarize the specific regulations for the bridge listed in proposed Subpart B and, therefore, do not qualify as the type of disclosure addressed by the Act.

Environmental Assessment

The Coast Guard has considered the environmental impact of the proposed regulation and concluded that preparation of an environmental impact statement does not appear necessary. An environmental assessment with a proposed finding of no significant impact has been prepared and is on file in the rulemaking docket.

List of Subjects in 33 CFR Part 117

Bridges.

In consideration of the foregoing, it is proposed that Part 117 of Title 33 of the Code of Federal Regulations be amended to read as follows:

PART 117—DRAWBRIDGE REQUIREMENTS

Subpart A—General Requirements

Sec.
117.1 Purpose.
117.3 Applicability.
117.5 When the draw must open.
117.7 General duties of drawbridge owners and tenders.
117.9 Delaying opening of a draw.
117.11 Appurtenances unessential to navigation.
117.15 Signals.
117.17 Signalling for contiguous drawbridges.
117.19 Signalling when two or more vessels are approaching a drawbridge.
117.21 Signalling for opened drawbridge.
117.23 Installation of radiotelephones.
117.31 Closure of draw for emergency vehicles.
117.33 Closure of draw for natural disasters or civil disorders.
117.35 Operations during repair or maintenance.
117.37 Opening or closure of draw for public interest concerns.
117.41 Discontinuance of drawtender service.
117.43 Changes in draw operation requirements for regulatory purposes.
117.45 Process of violations.

Subpart B—Specific Requirements

117.51 Purpose.
117.53 Applicability.
117.55 Posting of requirements.
117.57 Advance notice.
117.59 Special requirements due to hazards.

Alabama

117.101 Alabama River.
117.103 Bayou Labatre.
117.105 Bayou Sara.
117.107 Chattahoochee River.
117.109 Coosa River.
117.111 Mobile River and Chickasaw Creek.
117.113 Tensaw River.

Sec.
117.115 Three Mile Creek.

Arkansas

117.121 Arkansas River.
117.123 Arkansas and White Rivers—Automated Railroad Bridges.
117.125 Black River.
117.127 Current River.
117.129 Little Red River.
117.131 Little River.
117.133 Ouachita River.
117.135 Red River.
117.137 St. Francis River.
117.139 White River.

California

117.140 General.
117.141 American River.
117.143 Burns Cutoff.
117.145 Cerritos Channel.
117.147 China Basin, Mission Creek.
117.149 Cordelia Slough (a tributary of Suisun Bay).
117.151 Corte Madera Creek.
117.153 Eureka Slough.
117.155 Georgiana Slough.
117.157 Grant Line Canal.
117.159 Honker Cut.
117.161 Islais Creek (Channel).
117.163 King Island Cut.
117.165 Lindsey Slough.
117.167 Little Potato Slough.
117.169 Mare Island Strait, Napa River, and their tributaries.
117.171 Middle River.
117.173 Miner Slough.
117.175 Mokelumne River.
117.177 Mud Slough.
117.179 Newark Slough.
117.181 Oakland Inner Harbor Tidal Canal.
117.183 Old River.
117.185 Pacheco Creek.
117.187 Petaluma River.
117.189 Sacramento River.
117.191 San Joaquin River.
117.193 San Leandro Bay.
117.195 Snodgrass Slough.
117.197 Sonoma Creek.
117.199 Steamboat Slough.
117.201 Sutter Slough.

Connecticut

117.207 Housatonic River.
117.209 Mianus River.
117.211 Mystic River.
117.213 New Haven Harbor, Quinnipiac and Mill Rivers.
117.215 Niantic River.
117.217 Norwalk River.
117.219 Pequonnock River.
117.221 Saugatuck River.
117.223 Shaws Cove.
117.225 Yellow Mill Channel.

Delaware

117.231 Brandywine River.
117.233 Broad Creek (River).
117.235 Chesapeake and Delaware Canal.
117.237 Christina River.
117.239 Lewes and Rehoboth Canal.
117.241 Mispillion River.
117.243 Nanticoke River.
117.245 Smyrna River.
117.247 St. Johns River.

District of Columbia

117.253 Anacostia River.
117.255 Potomac River.

Florida

117.261 Atlantic Intracoastal Waterway from Jacksonville to Miami.
117.263 Banana River.
117.265 Bayou Chico.
117.267 Big Carlos Pass.
117.269 Biscayne Bay.
117.271 Blackwater River.
117.273 Canaveral Harbor Barge Canal.
117.275 Choctawhatchee River.
117.277 Clearwater Pass.
117.279 Coffee Pot Bayou.
117.281 Dead River.
117.283 Dunns Creek.
117.285 Garrison Channel.
117.287 Gulf Intracoastal Waterway, Caloosahatchee River to Perdido River.
117.289 Hillsboro Inlet.
117.291 Hillsborough River.
117.293 Indian Creek.
117.295 Kissimmee River.
117.297 Little Manatee River.
117.299 Longboat Pass.
117.301 Manatee River.
117.303 Matlacha Pass.
117.305 Miami River.
117.307 Miami River, North Fork.
117.309 Nassau Sound.
117.311 New Pass.
117.313 New River.
117.315 New River, South Fork.
117.317 Okeechobee Waterway.
117.319 Oklawaha River.
117.321 Orange River.
117.323 Peace River.
117.325 St. Johns River.
117.327 St. Marks River.
117.329 St. Marys River.
117.331 Steinhatchee River.
117.333 Suwanee River.
117.335 Taylor Creek.
117.337 Trout River.
117.339 West Palm Beach Canal.
117.341 Whitcomb Bayou.

Georgia

117.351 Altamaha River.
117.353 Atlantic Intracoastal Waterway, Savannah River to St. Marys River.
117.355 Back River.
117.357 Black River.
117.359 Chattahoochee River.
117.361 Fling River.
117.363 Ocmulgee River.
117.365 Oconee River.

Subpart A—General Requirements

§ 117.1 Purpose.

This subpart prescribes general requirements relating to the use and operation of drawbridges across the navigable waters of the United States.

Note.—The primary jurisdiction to regulate drawbridges across the navigable waters of the United States is vested in the Federal Government. Laws, ordinances, regulations, and rules which purport to regulate these bridges and which are not promulgated by the Federal Government have no force and effect.

§ 117.3 Applicability.

The provisions of this subpart not in conflict with the provisions of Subpart B apply to each drawbridge.

Note.—For all of the requirements applicable to a drawbridge listed in Subpart B, one must review the requirements in Subpart A and §§ 117.51 through 117.99 of Subpart B, as well as the requirements in Subpart B applicable to the particular drawbridge in question.

§ 117.5 When the draw must open.

Except as otherwise required by this subpart, drawbridges must open promptly and fully for the passage of vessels when a request to open is given in accordance with this subpart.

§ 117.7 General duties of drawbridge owners and tenders.

(a) Drawbridge owners and tenders shall operate the draw in accordance with the requirements in this part.

(b) Except for drawbridges not required to open for the passage of vessels, owners of drawbridges shall ensure that:

(1) The necessary drawtenders are provided for the safe and prompt opening of the draw;

(2) The operating machinery of the draw is maintained in a serviceable condition; and

(3) The draws are operated at sufficient intervals to assure their satisfactory operation.

§ 117.9 Delaying opening of a draw.

No person shall unreasonably delay the opening of a draw after the signals required by § 117.15 have been given.

Note.—Trains are usually controlled by the block method. That is, the track is divided into blocks or segments of a mile or more in length. When a train is in a block with a drawbridge, the draw may not be able to open until the train has passed out of the block and the yardmaster of other manager has "unlocked" the drawbridge controls.

§ 117.11 Appurtenances unessential to navigation.

No vessel owner or operator shall signal a drawbridge to open for any nonstructural vessel appurtenance which is not essential to navigation, or which is easily lowered.

§ 117.15 Signals

(a) *General.* (1) The operator of each vessel requesting a drawbridge to open must signal the drawtender and the drawtender must acknowledge that signal.

(2) The signals used to request the opening of the draw and to acknowledge that request must be sound signals, visual signals, or radiotelephone communications described in this subpart.

(3) The means of signalling used depends upon whichever means is sufficient to alert the party being signalled.

(b) *Sound signals.* (1) Sound signals must be made by whistle, horn, megaphone, hailer, or other device capable of producing the described signals loud enough to be heard by the drawtender.

(2) As used in this section, "prolonged blast" means a blast of four to six seconds duration and "short blast" means a blast of approximately one second duration.

(3) The sound signal to request the opening of a draw is one prolonged blast followed by one short blast sounded not more than three seconds after the prolonged blast.

(4) When the draw can be opened immediately, the sound signal to acknowledge a request to open the draw is one prolonged blast followed by one short blast sounded not more than 30 seconds after the requesting signal.

(5) When the draw cannot be opened immediately, or is open and must be closed promptly, the sound signal to acknowledge a request to open the draw is five short blasts sounded in rapid succession not more than 30 seconds after the vessel's opening signal. The signal must be repeated until acknowledged in some manner by the requesting vessel.

(c) *Visual signals.* (1) The visual signal to request the opening of a draw is—

(i) A white flag raised and lowered vertically; or

(ii) A white, amber, or green light raised and lowered vertically.

(2) When the draw can be opened immediately, the visual signal to acknowledge a request to open the draw, given not more than 30 seconds after the vessel's opening signal, is—

(i) A white flag raised and lowered vertically;

(ii) A white, amber, or green light raised and lowered vertically; or

(iii) A fixed or flashing white, amber, or green light or lights.

(3) When the draw cannot be opened immediately, or is open and must be closed promptly, the visual signal to acknowledge a request to open the draw is—

(i) A red flag or red light swung back and forth horizontally in full sight of the vessel given not more than 30 seconds after the vessel's opening signal; or

(ii) a fixed or flashing red light or lights given not more than 30 seconds after the vessel's opening signal.

(4) The acknowledging signal when the draw cannot open immediately or is open and must be closed promptly must be repeated until acknowledged in some manner by the requesting vessel.

(d) *Radiotelephone communications.* (1) Radiotelephones may be used to communicate the same information provided by sound and visual signals.

(2) The vessel and the drawtender shall monitor the frequency used until the vessel has cleared the draw.

(3) When radiotelephone contact cannot be initiated or maintained, sound or visual signals under this section must be used.

§ 117.17 Signalling for contiguous drawbridges.

When a vessel must pass two or more drawbridges close together, the opening signal is given for the first bridge. After acknowledgment from the first bridge that it will promptly open, the opening signal is given for the second bridge, and so on until all bridges that the vessel must pass have been given the opening signal and have acknowledged that they will open promptly.

§ 117.19 Signalling when two or more vessels are approaching a drawbridge.

When two or more vessels are approaching the same drawbridge at the same, or nearly the same time, and from the same or opposite directions, each vessel must signal independently for the opening of the draw and the drawtender shall reply in turn to the signal of each vessel.

§ 117.21 Signalling for an opened drawbridge.

When a vessel approaches a drawbridge with the draw in the open position, the vessel must give the opening signal. If no acknowledgment is received within 30 seconds, the vessel may proceed, with caution, through the open draw.

§ 117.23 Installation of radiotelephones.

(a) When the District Commander deems it necessary for reasons of safety or navigation, the District Commander may require the installation and operation of a radiotelephone on or near a drawbridge.

(b) The District Commander gives written notice of the proposed requirement to the bridge owner.

(c) All comments the owner wishes to submit must be submitted to the District Commander within 30 days of receipt of the notice under paragraph (b) of this section.

(d) If, upon consideration of the comments received, the District Commander determines that a radiotelephone is necessary, the District Commander notifies the bridge owner that a radiotelephone must be installed and gives a reasonable time, not to exceed six months, to install the radiotelephone and commence operation.

§ 117.31 Closure of draw for emergency vehicles.

When a drawtender is informed by a reliable source that an emergency vehicle is due to cross the draw, the drawtender shall take all reasonable measures to have the draw closed at the time the emergency vehicle arrives at the bridge.

§ 117.33 Closure of draw for natural disasters or civil disorders.

Drawbridges need not open for the passage of vessels during periods of natural disasters or civil disorders declared by the appropriate authorities unless otherwise provided for in Subpart B or directed to do so by the District Commander.

§ 117.35 Operations during repair or maintenance.

(a) When operation of the draw must deviate from the regulations in this part for scheduled repair or maintenance work, the drawbridge owner must request approval from the District Commander at least 30 days before the date of the intended change. The request must include a brief description of the nature of the work to be performed and the times and dates of requested changes. The District Commander's decision is forwarded to the applicant within five working days of the receipt of the request. If the request is denied, the reasons for the denial are forwarded with the decision.

(b) When the draw is rendered inoperative because of damage to the structure or when vital, unscheduled repair or maintenance work must be performed without delay, the drawbridge owner shall immediately notify the District Commander and give the reasons why the draw is or should be rendered inoperative and the expected date of completion of the repair or maintenance work.

(c) All repair or maintenance work under this section must be performed with all due speed in order to return the draw to operation as soon as possible.

(d) If the operation of the draw will be affected for periods of less than 60 days, the regulations in this part will not be amended. Where practicable, the District Commander publishes notice of the temporary deviations from the regulations in this part in the **Federal Register** and Local Notices to Mariners. If operation of the draw is expected to be affected for more than 60 days, the District Commander publishes temporary regulations covering the repair period.

§ 117.37 Opening or closure of draw for public interest concerns.

(a) For reasons of public health or safety or for public functions, such as street parades and marine regattas, the District Commander may authorize the opening or closure of a drawbridge for a specified period of time.

(b) Requests for opening or closure of a draw must be submitted to the District Commander at least 30 days before the proposed opening or closure and include a brief description of the proposed event or other reason for the request, the reason why the opening or closure is required, and the times and dates of the period the draw is to remain open or closed.

(c) Approval by the District Commander depends on the necessity for the opening or closure, the reasonableness of the times and dates, and the overall effect on navigation and users of the bridge.

§ 117.41 Discontinuance of drawtender service.

(a) Upon written request by the owner or operator of a drawbridge, the District Commander may permit the draw to be closed and untended due to infrequency of use of the draw by vessels. The

District Commander may condition approval on the continued maintenance of the operating machinery.

(b) Authorization under paragraph (a) of this section is not required if the draw is maintained in the fully open position to permit the passage of vessels and the District Commander is notified in advance. The draw must remain in the fully open position until drawtender service is restored or the authorization is given under paragraph (a) of this section for the draw to remain closed and untended.

§ 117.43 Changes in draw operation requirements for regulatory purposes.

In order to evaluate suggested changes to the drawbridge operation requirements, the District Commander may authorize temporary deviations from the regulations in this part for periods not to exceed 60 days. Notice of these deviations will be disseminated in the Local Notices to Mariners and published in the **Federal Register**.

§ 117.45 Process of violations.

(a) Complaints of alleged violations under this part are submitted to the District Commander of the Coast Guard District in which the drawbridge is located.

(b) Penalties for violations under this part are assessed and collected under Subpart 1.07 of Part 1 of this chapter.

Subpart B—Specific Requirements

§ 117.51 Purpose.

This subpart prescribes specific requirements relating to the operation of certain drawbridges.

Note.—The drawbridges under this subpart are listed by the waterway the cross and by the state in which they are located. Waterways are arranged alphabetically by state. The drawbridges listed under a waterway are generally arranged in order from the mouth of the waterway moving upstream. The drawbridges on the Atlantic Intracoastal Waterway are listed from north to south and on the Gulf Intracoastal Waterway from east to west.

§ 117.53 Applicability.

(a) The requirements in this subpart apply to the bridges listed and are in addition to, or vary from, the general requirements in Subpart A.

(b) A requirement in this subpart which varys from a general requirement in Subpart A supersedes the general requirement.

(c) All other requirements in Subpart A not at variance apply to the bridges listed in this subpart.

§ 117.55 Posting of requirements.

(a) The owner of each drawbridge under this subpart, other than removable span bridges, shall ensure that a sign summarizing the requirements in this subpart applicable to the bridge is posted both upstream and downstream of the bridge. The requirements to be posted need not include those in Subpart A or §§ 117.51 through 117.99.

(b) The signs must be of sufficient size and so located as to be easily read at any time from an approaching vessel.

(c) If advance notice is required to open the draw, the signs must also state the name, address, and telephone number of the person to be notified.

§ 117.57 Advance notice.

Owners and tenders of drawbridges requiring advance notice to open shall use all reasonable means to open the draw at the requested time and give due regard to the possibility that a brief delay may be experienced by the vessel giving the advance notice.

§ 117.59 Special requirements due to hazards.

For the duration of occurrences hazardous to safety or navigation, such as floods, freshets, and damage to the bridge or fender system, the district Commander may require the owner of an operations drawbridge listed in this subpart to have the bridge attended full time and open on signal.

Alabama

§ 117.101 Alabama River.

(a) The draw of the St. Louis and San Francisco railroad bridge, mile 105.3 at Coy, shall open on signal if at least 48 hours notice is given.

(b) The draw of the Illinois Central Gulf railroad bridge, mile 277.8 near Montgomery, shall open on signal if at least 24 hours notice is given.

(c) The draw of the US31 and 82 bridge, mile 278.2 near Montgomery, shall open on signal if at least 24 hours notice is given.

(d) The draw of the Seaboard System Railroad bridge, mile 293.3 near Montgomery, shall open on signal if at least 24 hours notice is given.

§ 117.103 Bayou La Batre.

The draw of the S188 bridge, mile 2.3 at Bayou La Batre, shall open on signal, except that the draw need not open from 7:30 a.m. to 8:30 a.m., and 3 p.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

§ 117.105 Bayou Sara.

The draw of the Seaboard System Railroad bridge, mile 0.1 at Saraland, shall open on signal except that from 6 a.m. to 10 p.m. From 10 p.m. to 6 a.m., the draw shall open on signal if at least four hours notice is given. During periods of severe storms or hurricanes, from the time the National Weather Service sounds an "alert" for the area until the "all clear" is sounded, the draw shall open on signal.

§ 117.107 Chattahoochee River.

The draws of the Seaboard System Railroad bridge, mile 117.1 near Omaha, GA, shall open on signal if at least six hours notice is given.

§ 117.109 Coosa River.

The draw of the Seaboard System Railroad bridge, mile 175.0 at Gadsden, shall open on signal if at least six hours notice is given.

§ 117.111 Mobile River and Chickasaw Creek.

The draws of the US90 bridge, mile 2.9 Mobile River, and the Seaboard System Railroad bridge, mile 0.0 Chickasaw Creek, both at Mobile, shall open on signal, however, the following special signals shall be used to request openings:

(a) Vessels proceeding either up or down the Mobile River and desiring the US90 bridge to open shall sound three prolonged blasts.

(b) Vessels proceeding down the Mobile River and desiring to proceed up Chickasaw Creek, requiring an opening of the railroad bridge, shall sound one prolonged blast, wait one minute, and then sound three prolonged blasts.

(c) Vessels proceeding up the Mobile River and desiring to proceed up Chickasaw Creek, requiring an opening of both bridges, shall sound three prolonged blasts, wait one minute, and then sound one prolonged blast followed by three prolonged blasts.

§ 117.113 Tensaw River.

The draw of the Seaboard System Railroad bridge, mile 15.0, at Hurricane, shall open on signal from 8 a.m. to midnight. The draw need not open from midnight to 8 a.m. During periods of severe storms or hurricanes, from the time the National Weather Service sounds an "alert" for the area until the "all clear" is sounded, the draw shall open on signal.

§ 117.115 Three Mile Creek.

(a) The draw of the US90 bridge, mile 1.0, at Mobile, need not open from 7 a.m. to 9 a.m. and from 4:30 p.m. to 6:30 p.m. daily. At all other times the draw shall open on signal if at least 12 hours notice is given.

(b) The draw of the Southern Railway bridge, mile 1.1, at Mobile, shall open on signal if at least five days notice is given.

Arkansas

§ 117.121 Arkansas River.

The draw of the Missouri Pacific Railroad bridge, mile 23.1 near Yancopin, shall open on signal if at least 96 hours notice is given.

§ 117.123 Arkansas and White Rivers—Automated Railroad Bridges.

(a) The draws of the St. Louis and San Francisco railroad bridge, mile 300.8, Arkansas River, at Van Buren, and the Missouri Pacific railroad bridge, mile 7.5, White River, at Benzal, are maintained in the open position with a minimum vertical clearance of 52 feet, except as follows:

(1) When a train approaches either bridge, amber lights attached to the bridge begin to flash and an audible signal on the bridge sounds. At the end of six minutes the amber light continues to flash, however, the audible signal stops and the draw lowers and locks, if the photoelectric boat detection system detects no obstruction under the span. If there is an obstruction, the draw will raise to its full height until the obstruction is cleared.

(2) After the train clears the bridge, the draw will raise to its full height, the amber flashing light will stop, and the midchannel lights will change from red to green indicating the navigation channel is open for the passage of vessels.

(b) Across the Arkansas River the draws of the Cotton Belt railroad (Rob Roy) bridge, mile 67.4, the Chicago, Rock Island, and Pacific railroad (Junction) bridge, mile 118.2, at Little Rock, and the Missouri Pacific railroad (Baring Crossing) bridge, mile 118.7, at Little Rock, are maintained in the closed position. The following signals are used:

(1) The opening signal from the vessel for each of these bridges is three short blasts.

(2) The acknowledging signal is flashing white lights visible upstream and downstream. When the operator of the vessel sights the acknowledging signal, one prolonged blast shall be sounded.

(3) This signal is acknowledged by the bridge controller when the draw is to open by changing the flashing white lights to continuous white lights, and sounding one blast on a horn. When the span is fully raised to a maximum clearance of 52 feet, the navigation lights at midchannel shall be changed from red to green, indicating that the draw is ready for passage.

(4) If the draw cannot open, flashing amber warning lights shall start and four blasts will sound, indicating that a train is approaching or that maintenance work is in progress.

(5) The vessel shall acknowledge that there will be a delay by sounding five blasts.

(6) When the draw will open (after the train crosses or when maintenance work permits), the amber lights are turned off, the continuous white lights turned on, and one blast sounded, to indicate the draw is ready for passage.

(7) The vessel acknowledges with one blast and, after the draw is fully open, shall proceed through the draw.

(8) When the vessel clears the draw, the midchannel navigation light will change from green to red, the amber warning lights will flash, and, after one minute the draw will lower and lock.

§ 117.125 Black River.

The following draws need not open for the passage of vessels:

(a) Missouri Pacific railroad bridge, mile 3.4 at Paroquet.

(b) St. Louis and San Francisco railroad bridge, mile 68.4 at Black Rock.

(c) Arkansas State Highway Department bridge, mile 90.1 at Pocahontas.

(d) St. Louis and San Francisco railroad bridge, mile 90.4 at Pocahontas.

(e) Missouri Pacific railroad bridge, mile 144.4 at Corning.

(f) Arkansas State Highway Department bridge, mile 152.2 at Corning.

§ 117.127 Current River.

The draws of the Arkansas highway bridge, mile 10.2, and the St. Louis and San Francisco railroad bridge, mile 12.2, both at Biggers, need not open for the passage of vessels.

§ 117.129 Little Red River.

The draws of the St. Louis and San Francisco railroad bridge, mile 25.0, and Arkansas highway bridge, mile 25.2, both at Judsonia, need not open for the passage of vessels.

§ 117.131 Little River.

The draw of the St. Louis and San Francisco railroad bridge, mile 7.1 near Fulton, need not open for the passage of vessels.

§ 117.133 Ouachita River.

(a) The draw of the Chicago, Rock Island and Pacific railroad bridge, mile 291.7 at Calion, shall open on signal if at least 24 hours notice is given, except as follows:

(1) Any vessel that requires the opening of the draw and that intends to return within 24 hours shall inform the drawtender of the probable time of return. The draw shall open for the returning vessel without further notice.

(2) When the pool stage is above 21 feet on the upper gauge at Lock and Dam No. 8, the Commander, Second Coast Guard District will notify the bridge owner, who will then have one day in which to place a drawtender in constant attendance and open the draw on signal.

(b) The draw of the St. Louis Southwestern railroad bridge, mile 331.4, near Camden, shall open on signal if at least 48 hours notice is given.

§ 117.135 Red River.

The draws of the bridges from mile 66.0 through mile 283.1 shall open on signal if at least 48 hours notice is given. The draws of any of these bridges need not open for a vessel that arrives later than two hours after the time specified in the notice, unless a second notice of at least 48 hours is given. The draws of the bridges above mile 283.1 need not open for the passage of vessels.

§ 117.137 St. Francis River.

(a) The draw of the Arkansas highway bridge, mile 29.6 at Cody, shall open on signal if at least 72 hours notice is given. Any vessel that requires the opening of the draw and that intends to return within 72 hours shall inform the drawtender of the probable time of return. The draw shall open for the returning vessel without further notice.

(b) The draws of the Chicago, Rock Island and Pacific railroad bridge, mile 59.7 at Madison, and all drawbridges above that point, need not open for the passage of vessels.

§ 117.139 White River.

(a) The draws of the St. Louis Southwestern railroad bridge, mile 98.9 at Clarendon, the US70 highway bridge, mile 121.7 at Duvalls Bluff, the Chicago, Rock Island and Pacific Railroad bridge, mile 122.0 at Duvalls Bluff, the Missouri Pacific railroad bridge, mile 196.3, at Augusta, and the Missouri Pacific railroad bridge, mile 254.8 at Newport, shall open on signal if at least eight hours notice is given. When a vessel has failed to arrive within two hours after the time specified in the notice, at any of these bridges, a second eight hour notice is required.

(b) The draws of the Arkansas highway bridge, mile 300.1 at Batesville, and Missouri Pacific Railroad Company bridge, mile 401.9 at Cotter, need not open for the passage of vessels.

California

§ 117.140 General.

In California, when fog prevails by day or night the drawtender, after sounding the opening signal, shall toll a bell continuously during the approach and passage of a vessel.

§ 117.141 American River.

The draws of the Jiboom Street bridge, mile 0.1 at Sacramento, need not open for the passage of vessels.

§ 117.143 Burns Cutoff.

The draw of the Daggett Road bridge, mile 3.0 at Stockton, shall open on signal if at least 48 hours notice is given to the U.S. Naval Communications Station at Stockton.

§ 117.145 Cerritos Channel.

(a) The draw of the Commodore Schuyler F. Heim highway bridge, mile 4.5 at Long Beach, shall open on signal, except that from 6:30 a.m. to 8 a.m. and 3:30 p.m. to 6 p.m., Monday through Friday, except Federal holidays, the draws need not open for the passage of vessels. The opening signal for the Commodore Schuyler Heim bridge is three prolonged blasts. The acknowledging signal is two prolonged blasts followed by one short blast when the draw will open immediately, and five short blasts when the draw cannot open immediately. Channel 13 (156.65 MHZ) or other assigned frequencies may be used.

(b) The draw of the Henry Ford Avenue railroad bridge, mile 4.4 at Long Beach, shall be maintained in the open to navigation position except when a train is crossing or when maintenance work is being performed.

(c) If the draw of the Henry Ford Avenue railroad bridge is in the closed position, the opening signal is two short blasts followed by one prolonged blast. The acknowledging signal is two prolonged blasts followed by one short blast when the draw will open immediately, and five short blasts when the draw cannot open immediately. Channel 13 (156.65 MHZ) or other assigned frequencies may be used.

§ 117.147 China Basin, Mission Creek.

The draws of the 3rd Street bridge, mile 0.0, and the 4th Street bridge, mile 0.2, both at San Francisco, shall open on signal if at least one hour notice is given.

§ 117.149 Cordelia Slough (a tributary of Suisun Bay)

The draws of the Southern Pacific railroad bridge, mile 1.5 at Suisun, shall open on signal if at least 24 hours notice is given.

§ 117.151 Corte Madera Creek.

The draw of the Northwestern Pacific railroad bridge, mile 0.5 near Greenbrae, shall be maintained in the fully open position except for the passage of trains or for rail maintenance equipment.

§ 117.153 Eureka Slough.

The draws of the Northwestern Pacific railroad bridge, mile 0.5 at Eureka, shall open on signal if at least 24 hours notice is given.

§ 117.155 Georgiana Slough.

The draws of the Sacramento County highway bridges, mile 4.5 near Isleton, and mile 12.4 near Walnut Grove, shall open on signal from 6 a.m. to 10 p.m. from May 1 through October 31. The draws shall open on signal from November 1 through April 30 from 9 a.m. to 5 p.m. At all other times, the draws of these bridges shall open on signal if at least four hours notice is given to the drawtender at the Rio Vista bridge.

§ 117.157 Grant Line Canal.

The draw of the San Joaquin County highway bridge, mile 5.5 at Tracy, shall open on signal if at least 12 hours notice is given to the San Joaquin County Department of Public Works at Stockton.

§ 117.159 Honker Cut.

The draw of the San Joaquin County bridge, mile 0.3 between Empire Tract and King Island at Stockton, shall open on signal if at least 12 hours notice is given to the San Joaquin County Department of Public Works at Stockton.

§ 117.161 Islais Creek (Channel).

The draw of the 3rd Street bridge, mile 0.4 at San Francisco, shall open on signal if at least one hour notice is given.

§ 117.163 King Island Cut.

The draw of the San Joaquin County highway bridge, mile 1.0 between King Island and Bishop Tract, shall open on signal if at least 12 hours notice is given to the San Joaquin County Department of Public Works at Stockton.

§ 117.165 Lindsey Slough.

The center span of the Hastings Farms highway bridge, mile 2.0 between Egbert and Lower Hastings Tracts, shall be removed for the passage of maintenance vessels if at least 72 hours notice is given to the Hastings Farms Office at San Francisco.

§ 117.167 Little Potato Slough.

The draw of the California highway bridge, mile 0.1 at Terminous, shall open on signal from May 1 through October 31 from 6 a.m. to 10 p.m. At all other times the draw shall open on signal if at least four hours notice is given to the drawtender at the Rio Vista bridge.

§ 117.169 Mare Island Strait, Napa River, and their tributaries.

(a) The draw of the U.S. Navy bridge (Mare Island Causeway), mile 2.8, at Vallejo:

(1) Shall open on signal from 7:30 a.m. to 3:45 p.m., and 4:45 p.m. to 10 p.m., Monday through Friday, except Federal holidays, and from 6:30 a.m. to 10 p.m. on Saturdays, Sundays, and holidays.

(2) Need not open for the passage of vessels, other than public vessels of the United States, from 6:30 a.m. to 7:30 a.m and 3:45 p.m. to 4:45 p.m., except Saturdays, Sundays, and Federal holidays.

(3) Shall open on signal from 10 p.m. to 6:30 a.m. daily, if at least two hours notice is given, and as soon as possible for public vessels of the United States.

(b) The draw of the Southern Pacific railroad bridge, mile 7.8 at Brazos, shall be maintained in the fully open position except for the passage of trains or for maintenance. When the draw is closed and visibility at the drawtender's station is less than one mile, up or down the channel, the drawtender shall sound two prolonged blasts every minute. When the draw is to be opened the drawtender shall sound three short blasts.

(c) The draw of the Maxwell highway bridge, mile 14.8 near Imola, shall open on signal if at least 72 hours notice is given to the California Department of Transportation office at Napa.

§ 117.171 Middle River.

(a) The draw of the San Joaquin County highway bridge, mile 8.6, between Bacon Island and Lower Jones Tract, shall open on signal from May 15 through September 15 from 9 a.m. to 5 p.m. From September 16 through May 14 the draw shall open on signal from 9 a.m. to 5 p.m. from Thursday through Monday. At all other times the draw shall open on signal if at least 12 hours notice is given to the San Joaquin County Department Public Works at Stockton.

(b) The draw of the Atchison, Topeka and Santa Fe railroad bridge, mile 9.8 near Middle River Station, shall open on signal if at least 12 hours notice is given the Atchison, Topeka and Santa Fe Railway Yardmaster at Stockton.

§ 117.173 Miner Slough.

The draw of the California highway bridge, mile 5.5 between the northerly end of Ryer Island and Holland Tract, shall open on signal if at least 12 hours

notice is given to the drawtender at the Rio Vista bridge.

§ 117.175 Mokelumne River.

(a) The draw of the California highway bridge, mile 3.0, at East Isleton, shall open on signal from May 1 through October 31 from 6 a.m. to 10 p.m., and from November 1 through April 30 from 9 a.m. to 5 p.m. At all other times, the draw shall open on signal if at least four hours notice is given to the drawtender at the Rio Vista bridge. Emergency vessels of the United States, state or commercial vessels engaged in rescue or emergency salvage operations, or vessels in distress shall be passed as soon as possible but no longer than one hour after notice is given.

(b) The draw of the Sacramento and San Joaquin Counties highway bridge, mile 12.1 over the North Fork of the Mokelumne River near Walnut Grove, shall open on signal from May 1 through October 31, from 9 a.m. to 5 p.m. At all other times the draw shall open on signal if at least 12 hours notice is given to the San Joaquin County Department of Public Works at Stockton.

(c) The removable span of the San Joaquin County highway bridge over the South Fork of the Mokelumne River, mile 18.0 at New Hope Landing, shall be operated as provided for in Section 117.61.

(d) The draws of the bridges above New Hope Landing need not open for the passage of vessels.

§ 117.177 Mud Slough.

The draw of the Southern Pacific railroad bridge, mile 0.7 near Alviso, shall open on signal if at least 24 hours notice is given.

§ 117.179 Newark Slough.

The draw of the Southern Pacific railroad bridge, mile 0.5 near Newark, shall open on signal if at least 24 hours notice is given to the Superintendent, Southern Pacific Transportation Company, at Oakland.

§ 117.181 Oakland Inner Harbor Tidal Canal.

The draws of the Alameda County highway bridges at Park Street, mile 7.3; Fruitvale Avenue, mile 7.7; and High Street, mile 8.1; and the U.S. Army Corps of Engineers railroad bridge, mile 7.7, at Fruitvale Avenue, shall open on signal, except that from 7:30 a.m. to 8:30 a.m. and 3:45 p.m. to 5:45 p.m., Monday through Friday, except Federal holidays, the draws need not open for the passage of vessels. However, the draw shall open during the above closed periods for vessels which must, for reasons of safety, move on a tide or slack water, if at least two hours notice is given. The draw shall open as soon as possible for vessels in distress, and emergency vessels, including commercial vessels engaged in rescue or emergency salvage operations.

§ 117.183 Old River.

The draw of the California highway bridge, mile 14.8 between Victoria Island and Byron Tract, shall open on signal from May 1 through October 31 from 6 a.m. to 10 p.m., and from November 1 through April 30 from 9 a.m. to 5 p.m. At all other times, the draw shall open on signal if at least four hours is given to the drawtender at the Rio Vista bridge.

§ 117.185 Pacheco Creek.

The draw of the Contra Costa County highway bridge, mile 0.5, and Southern Pacific railroad bridge, mile 0.5, both near Martinez, shall open on signal if at least 24 hours notice is given.

§ 117.187 Petaluma River.

(a) The draws of the Northwestern Pacific railroad bridges, mile 0.8 at Blackpoint, and mile 12.4 at Haystack Landing, shall be maintained in the fully open position except for the passage of trains or for maintenance. When the draw is closed and visibility from the drawtender's station is less than one mile, up or down the channel, the drawtender shall sound two long blasts every minute. When the draw is reopened, the drawtender shall sound three short blasts.

(b) The draw of the Petaluma highway bridge at "D" Street, mile 13.7 at Petaluma, shall open on signal if at least four hours notice is given.

§ 117.189 Sacramento River.

(a) The draws of each bridge from Isleton to American River junction shall open on signal from May 1 through October 31 from 6 a.m. to 10 p.m., and from November 1 through April 30 from 9 a.m. to 5 p.m. At all other times, the draws shall open on signal if at least four hours notice is given to the drawtender at the Rio Vista bridge.

(b) The draw of the S20 bridge, mile 135.5 at Meridian shall open on signal if at least 12 hours notice is given to the State Division of Highways Office at Marysville.

(c) The draws of the bridges above Chico Landing need not open for the passage of vessels.

§ 117.191 San Joaquin River.

(a) The draw of the Port Director railroad bridge, mile 39.7 at Stockton, shall open on signal if at least 12 hours notice is given to the Port Director.

(b) The draws of all other bridges across the San Joaquin River, including those above the Old River Junction, need not open for the passage of vessels.

§ 117.193 San Leandro Bay.

The draw of the California highway bridge, mile 0.0 between Alameda and Bay Farm Island, shall open on signal except that from 5 a.m. to 8 a.m. and 5 p.m. to 9 p.m. the draw shall open on signal if at least 12 hours notice is given. Notice shall be given to the drawtender of the Bayfarm Island bridge from 8 a.m. to 5 p.m., and to the drawtender of the Park Street bridge at Alameda at all other times. The draw need not open for the passage of vessels from 9 p.m. to 5 a.m.

§ 117.195 Snodgrass Slough.

(a) The draw of the Southern Pacific railroad bridge, mile 3.5 at Walnut Grove, shall be maintained in the fully open position except for the passage of trains or for maintenance. When the draw is closed, a drawtender shall be present and the draw shall open on signal.

(b) The draw of the Sacramento County bridge, mile 4.4 at Walnut Grove, shall open on signal if at least 24 hours notice is given to the Sacramento County Highway Office at Sacramento.

§ 117.197 Sonoma Creek.

The draw of the Northwestern Pacific railroad bridge, mile 5.4 at Wingo, shall open on signal if at least 24 hours notice is given.

§ 117.199 Steamboat Slough.

The draw of the California highway bridge, mile 11.2 at the head of Grand Island, shall open on signal from May 1 through October 31 from 6 a.m. to 10 p.m. At all other times the draw shall open on signal if at least four hours notice is given to the drawtender at the Rio Vista bridge.

§ 117.201 Sutter Slough.

The draw of the Sacramento County highway bridge, mile 6.4 near Courtland, need not open for the passage of vessels.

Connecticut

§ 117.207 Housatonic River.

(a) The draw of the US 1 bridge, mile 3.5 at Stratford, shall open on signal except that from 7 a.m. to 9 a.m. and 4 p.m. to 5:45 p.m., Monday through Friday, the draw need not open for the passage of vessels.

(b) The draw of the CONRAIL bridge, mile 3.9 at Stratford, shall open on signal from 5 a.m. to 9 p.m. except that:

(1) The draw need not open from 7 a.m. to 9 a.m.; and from 4 p.m. to 5:45

p.m., Monday through Friday, except Federal holidays or an emergency.

(2) The draw need not open more than once in any 60-minute period from 5:30 a.m. to 7 a.m.; and from 5:45 p.m. to 8:15 p.m., except on Saturdays, Sundays, and Federal holidays.

(3) The draw shall open on signal from 9 p.m. to 5 a.m. if notice is given before 4 p.m. on the day of the intended passage.

§ 117.209 Mianus River.

The draw of the CONRAIL bridge, mile 1.0 at Greenwich, shall open on signal from 5 a.m. to 9 p.m. The draw need not open from 9 p.m. to 5 a.m., however, public vessels of the United States and foreign vessels shall be passed as soon as possible during this period.

§ 117.211 Mystic River.

(a) The draw of the AMTRAK railroad bridge, mile 2.4 at Mystic, shall open on signal from April 1 through October 31 and November 1 through March 31 from 5 a.m. to 9 p.m. The draw shall open on signal from November 1 through March 31 from 9 p.m. to 5 a.m. if at least eight hours notice is given.

(b) The draw of the US 1 bridge, mile 2.8 at Mystic, shall open on signal on the quarter hour from 8:15 a.m. to 7:15 p.m., and the draw shall open on signal from May 1 through October 31 from 7:15 p.m. to 8:15 a.m. The draw shall open on signal from November 1 through April 30 from 7:15 p.m. to 8:15 a.m. if at least one hours notice is given.

(c) Public vessels of the United States, state and local vessels used for public safety and in an emergency, the draws of each bridge shall open as soon as possible.

§ 117.213 New Haven Harbor, Quinnipiac and Mill Rivers.

(a) The draws of the Tomlinson bridge, mile 0.0, the Ferry Street bridge, mile 0.7, and the Grand Avenue bridge, mile 1.3, across Quinnipiac River and the Chapel Street bridge, mile 0.4, across Mill River shall open on signal except that:

(1) From 7:30 to 8:30 a.m., noon to 12:15 p.m., 12:45 to 1 p.m. and 4:45 to 5:45 p.m., the draws need not open.

(2) From 9 p.m. to 5 a.m. from October 1 through April 30, the draws of the Ferry Street bridge, Quinnipiac River, shall open on signal unless the drawtender is at the Grand Avenue or Chapel Street bridges, in this event a delay of one hour can be expected.

(3) From 11 p.m. to 7 a.m., the draw of the Grand Avenue bridge, Quinnipiac River, shall open on signal if at least one hour notice is given to the drawtender at the Ferry Street bridge. In the event that the drawtender is at the Chapel Street bridge, an additional hour delay can be expected.

(4) From 9 p.m. to 5 a.m., the draw of the Chapel Street bridge, Mill River, shall open on signal if at least one hour notice is given to the drawtender at Ferry Street bridge. In the event that the drawtender is at the Grand Avenue bridge, an additional hour delay can be expected.

(b) The sound signals for requesting the opening of each bridge are:

(1) The Tomlinson bridge, two short blasts of a whistle or horn.

(2) The Ferry Street bridge, one short blast of a whistle or horn.

(3) The Grand Avenue bridge, one prolonged blast of a whistle or horn.

(4) The Chapel Street bridge, three short blasts of a whistle or horn.

(c) The drawtender shall acknowledge sound signals in the following manner:

(1) When the draw will open immediately, with the same signal as the requesting signal.

(2) When the draw cannot open immediately, or is open and must close, with four short blasts of a whistle or horn, to be repeated until acknowledged by the vessel by the same signal.

(3) When the draw can be reopened, the drawtender shall sound the opening signal and open the draw if any vessels are waiting to pass.

(d) The following visual signals may be used in addition to sound signals for requesting the opening of each bridge when sound signals may not be heard. A white flag by day or a white light by night shall be swung in full circles at arm's length in full sight of the bridge and facing the draw.

(e) The drawtender shall acknowledge visual signals in the following manner:

(1) When the draw will open immediately, a white flag by day or a green light by night swung up and down vertically a number of times in full sight of the vessel.

(2) When the draw cannot open immediately, or is open and must close, a red flag by day or a red light by night, swung back and forth horizontally in full sight of the vessel, to be repeated until acknowledged by the vessel by the same signal.

(f) Public vessels of the United States, state or local vessels used for public safety, commercial vessels and vessels in distress, shall notify the operator of the Ferry Street bridge, and shall be passed as soon as possible.

§ 117.215 Niantic River.

(A) The draw of the AMTRAK bridge, mile 0.0 at Niantic, shall open on signal, except that from April 1 through October 31 from 8 p.m. to 4 a.m., and from November 1 through March 31 from 6 p.m. to 6 a.m., the draw shall open on signal if at least one hours notice is given.

(b) The draw of the S156, mile 0.1 at Niantic, shall open on signal, except that from 7 a.m. to 8 a.m., and from 4 p.m. to 5 p.m., Monday through Friday, except holidays, the draw shall open only for the passage of commercial vessels.

§ 117.217 Norwalk River.

(a) The draw of the Washington Street S136 bridge, mile 0.0 at Norwalk, shall open on signal, except that from 7 a.m. to 8:45 a.m., 11:45 a.m. to 1:15 p.m., and 4 p.m. to 6 p.m., Monday through Friday, except holidays, the draw need not open for the passage of vessels that draw less than 14 feet of water. The opening signal is three short blasts. Vessels drawing 14 feet of water or more shall add one prolonged blast after the three short blasts.

(b) The draw of the CONRAIL bridge, mile 0.1 at Norwalk, shall open on signal:

(1) From 5 a.m. to 9 p.m., except that from Monday through Friday, excluding holidays or an emergency, the draw need not open from 7 a.m. to 8:45 a.m. and 4 p.m. to 6 p.m.

(2) Only once in any 60-minute period from 5:45 a.m. to 7 a.m. and 6 p.m. to 7:45 p.m.

(3) From 9 p.m. to 5 a.m. if at least four hours notice is given.

§ 117.219 Pequonnock River.

(a) The draws of the Stratford Avenue bridge, mile 0.1, and the Congress Street bridge, mile 0.4, both at Bridgeport, shall open on signal, except that the draws of these bridges need not open for passage of vessels from 6:45 a.m. to 7:15 a.m., 7:45 a.m. to 8:15 a.m., 11:45 a.m. to 1:15 p.m., and 4:30 p.m. to 6:10 p.m. Public vessels of the United States and vessels in distress shall be passed through each draw at any time.

(1) The opening signal for the Stratford Avenue bridge is one prolonged blast followed by one short blast.

(2) The opening signal for the Congress Street bridge is two prolonged blasts followed by two short blasts.

(b) The draw of the CONRAIL bridge, mile 0.3 at Bridgeport, shall open on the signal of three short blasts from 5:45 a.m. to 9 p.m., except that:

(1) From Monday through Friday, excluding holidays, or an emergency, the draws need not open from 6:45 a.m. to 7:15 a.m., 7:45 a.m. to 8:15 a.m., and 4:30 p.m. to 6:10 p.m.

(2) From Monday through Friday, excluding holidays, or an emergency, the

draws need not open more than once during the periods 5:45 a.m. to 6:45 a.m., 7:15 a.m. to 7:45 a.m., 8:15 a.m. to 9 a.m., and 6:10 p.m. to 8:15 p.m.

(3) From 9 p.m. to 5:45 a.m. the draws shall open on signal if at least eight hours notice is given.

(c) The draw of the East Washington Street bridge shall open on the signal of one prolonged blast followed by two short blast if at least 24 hours notice is given.

(d) The draw of the Grand Street bridge, mile 0.9 at Bridgeport, need not open for the passage of vessels.

§ 117.221 Saugatuck River.

The draw of the CONRAIL bridge, mile 1.1 at Saugatuck, shall open on signal from June 1 through September 30 from 5 a.m. to 9 p.m. and from October 1 through May 31 from 8 a.m. to 4 p.m. The draw shall open on signal from October 1 through May 31 from 5 a.m. to 8 a.m., and from 4 p.m. to 9 p.m., if at least eight hours notice is given. The draw need not open at all other times.

§ 117.223 Shaws Cove.

The draw of the AMTRAK bridge, mile 0.0 at New London, shall open on signal from December 1 through March 31 from 8 a.m. to 5 p.m., Monday through Friday. From December 1 through March 31 from 5 p.m. to 8 a.m. and on Saturdays and Sundays, the draw shall open on signal if at least eight hours notice is given. From April 1 through November 30, from 5 a.m. to 10 p.m., the draw shall open on signal, and from 10 p.m. to 5 a.m. the draw shall open on signal if at least one hours notice is given. When a vessel is in an emergency that may endanger life or property, the draw shall open as soon as possible.

§ 117.225 Yellow Mill Channel.

The draw of the Stratford Avenue bridge, mile 0.3 at Bridgeport, shall open on signal if at least 24 hours notice is given. Public vessels of the United States and vessels in distress shall be passed as soon as possible.

Delaware

§ 117.231 Brandywine River.

(a) The draw of the Seventh Street bridge, mile 0.1 at Wilmington, shall be maintained in the open to navigation position at all times.

(b) The draws of the CONRAIL bridge, mile 1.1, the Church Street bridge, mile 1.3, and the Sixteenth Street bridge, mile 1.7, all at Wilmington, need not open for the passage of vessels.

§ 117.233 Broad Creek (River).

The draws of the CONRAIL bridge, mile 8.0, the Poplar Street bridge, mile 8.2, and the US13A bridge, mile 8.2, all at Laurel, shall open on signal if at least four hours notice is given.

§ 117.235 Chesapeake and Delaware Canal.

(a) The draw of the CONRAIL bridge, mile 7.7, shall open on signal.

(b) The signals listed in § 117.15 shall be supplemented by the following light signals in the center of the drawspan on both sides of the bridge.

(1) When the drawspan is to be opened immediately; one fixed amber light.

(2) When the drawspan is not ready to be opened; one flashing red light.

§ 117.237 Christina River.

(a) The draws of the CONRAIL bridge, mile 1.4, the CONRAIL bridge, mile 4.1, the CONRAIL railroad bridge, mile 4.2, and the CONRAIL bridge, mile 5.4, all at Wilmington, shall open on signal from 6 a.m. to 8 p.m., if at least 24 hours notice is given. From 8 p.m. to 6 a.m. the draws need not open for the passage of vessels.

(b) The draws of the Third Street bridge, mile 2.3, the Walnut Street bridge, mile 2.8, and the Market Street bridge, mile 3.0, all at Wilmington, shall open on signal except that from 7 a.m. to 8 a.m. and 4:30 p.m. to 5:30 p.m., Monday through Saturday, except legal holidays, the draws need not open for the passage of vessels. Any vessel which has passed through one or more of these three bridges immediately prior to a closed period and which requires passage through the other bridge or bridges in order to continue to its destination shall be passed through the draw or draws of such bridge or bridges without delay.

(c) The draw of the SH141 bridge, mile 7.5, at Wilmington, shall open on signal if at least 24 hours notice is given.

§ 117.239 Lewes and Rehoboth Canal.

The draw of the Delaware highway bridge, mile 7.0 at Rehoboth, shall open on signal from May 1 through October 31 from 7 a.m. to 8 p.m. and from 8 p.m. to 7 a.m. if at least two hours notice is given. From November 1 through April 30 the draw shall open on signal if at least 24 hours notice is given.

§ 117.241 Mispillion River.

The draw of the S14 bridge, mile 11.0 at Milford, shall open on signal if at least two hours notice is given.

§ 117.243 Nanticoke River.

The draw of the CONRAIL bridge, mile 39.4 at Seaford, shall open on signal from May 1 through September 30 from 8 a.m. to 8 p.m., and need not open from 8 p.m. to 8 a.m. From October 1 through April 30 the draw shall open on signal if at least four hours notice is given.

§ 117.245 Smyrna River.

The draw of the Delaware highway bridge, mile 4.0 at Fleming Landing, shall open on signal if at least 24 hours notice is given.

§ 117.247 St. Jones River.

The draw of the Delaware highway bridge, mile 4.5 at Barkers Landing, shall open on signal if at least 24 hours notice is given.

District of Columbia

§ 117.253 Anacostia River.

(a) The draw of the Frederick Douglas Memorial (South Capitol Street) bridge, mile 1.2, shall open on signal if at least 24 hours notice is given. The draw will be closed on each Presidential Inauguration Day and may occasionally be closed to the passage of vessels, without advance notice, to permit uninterrupted transit of dignitaries across the bridge.

(b) The draw of the CONRAIL bridge, mile 3.4 shall:

(1) Open on signal on Saturdays, Sundays and Federal holidays, and on weekdays from 10 a.m. to 6 p.m. from April 1 through September 30.

(2) Open on signal on the hour from April 1 through September 30, Monday through Friday, except Federal holidays, from 8 p.m. to 10 a.m. and from October 1 through March 31, on Saturdays, Sundays, and Federal holidays, from 10 a.m. to 6 p.m.

(3) At all other times, the draw shall open on signal if at least two hours notice is given.

(4) Public vessels of the United States and vessels of Maryland or the District of Columbia used for public safety, shall be passed as soon as possible.

§ 117.255 Potomac River.

(a) The draw of the Woodrow Wilson (I–495) bridge, mile 103.8, shall open on signal except that from 6:30 a.m. to 9 a.m. and 4 p.m. to 6:30 p.m., Monday through Friday, except Federal holidays, the draw need not open for the passage of vessels.

(b) Public vessels of the United States, vessels in distress, and vessels engaged exclusively in the tourist trade on the Potomac River from Washington, D.C., when the vertical clearance is less than 50 feet, shall be passed at any time.

(c) The draws of all other bridges need not open for the passage of vessels.

Florida

§ 117.261 Atlantic Intracoastal Waterway from Jacksonville to Miami.

(a) The draw of the Bridge of Lions (SR A–1–A) bridge, mile 777.9, at St.

Augustine, shall open on signal, except that:

(1) From 7 a.m. to 6 p.m., Monday through Friday, except legal holidays, the draw need open only on the hour and half hour, however, the draw need not open at 8 a.m., 12 noon, and 5 p.m.

(2) From 7 a.m. to 6 p.m. on Saturdays, Sundays and legal holidays, the draw need open only on the hour and half hour.

(3) Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

(b) The draws of the Seabreeze Boulevard bridge, mile 829.1 at Daytona Beach, and the SR A–1–A bridge, mile 835.5 at Port Orange, shall open on signal, except that from 7:30 a.m. to 8:30 a.m. and 4:30 p.m. to 5:30 p.m., Monday through Saturday, except Federal and Florida State holidays, the draws need not open for the passage of vessels. However, the draws shall open at 8 a.m. and 5 p.m. if any vessels are waiting to pass. During periods when storm signals are displayed in the Daytona Beach area, the draws of these bridges shall open on signal. Storm signals are displayed upon notification by the National Weather Service that winds of up to 33 knots or more and/or sea conditions considered dangerous to small craft are expected. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

(c) The draw of the Memorial bridge, mile 830.6 Halifax River at Daytona Beach, shall open on signal, except that from 7:45 a.m. to 8:45 a.m. and 4:45 p.m. to 5:45 p.m., Monday through Saturday, except Federal and Florida State holidays, the draw need not open for the passage of vessels. However, the draw shall open at 8:15 a.m. and 5:15 p.m. if any vessels are waiting to pass. During periods when storm signals are displayed in the Daytona Beach area, the draws of these bridges shall open on signal. Storm signals are displayed upon notification by the National Weather Service that winds of up to 33 knots or more and/or sea conditions considered dangerous to small craft are expected. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

(d) The draw of the Harris Saxon bridge, mile 846.5 at New Smyrna Beach, shall open on signal, except that from March 15 through October 15 on Saturdays, Sundays, and Federal holidays from 3 p.m. to 6 p.m., the draw need open only on the hour and half hour. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

(e) The draw of the Florida East Coast railroad bridge, mile 876.6 near Jay Jay, shall open as follows:

(1) The bridge will not be manned by a regular attendant.

(2) The bascule span will normally be in the open position, displaying flashing green signals, to allow the movement of water traffic.

(3) When a train approaches the bridge, the navigation signals will go to flashing red, and a horn starts four blasts, pauses and then continues four blasts, etc.

(4) After an eight-minute time delay, the bridge will lower and lock providing the scanning equipment reveals nothing under the bridge. Train crews can hold the bridge down by pushing a hold button, and the bridge will remain down for a period of eight minutes or while the approach track circuit is occupied.

(5) After the train has cleared, the bridge will raise and the signals will return to flashing green for navigation.

(f) The draw of the SR402 bridge, mile 878.9 at Titusville, shall open on signal except that from 6:45 a.m. to 7:45 a.m. and 4:15 p.m. to 5:45 p.m., Monday through Friday, the draw need not open for the passage of vessels. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

(g) The draw of the John F. Kennedy Space Center (SR405), bridge, mile 885.0 at Addison Point, shall open on signal except that from 6:45 a.m. to 8 a.m. and 4:15 p.m. to 5:45 p.m., Monday through Friday, the draw need not open for the passage of vessels.

(h) The draw of the SR518 bridge, mile 914.4 at Eau Gallie, shall open on signal, except that from 6:45 a.m. to 8:15 a.m. and 4:15 p.m. to 5:45 p.m., Monday through Friday, except legal holidays, the draw need not open for the passage of vessels. However, the draws shall open at 8:15 a.m. and 4:15 p.m. if any vessels are waiting to pass. From 8:15 a.m. to 4:15 p.m., Monday through Friday, except legal holidays, the draw need open only on the quarter and three-quarter hour. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

(i) The draw of the SR60 bridge, mile 951.9 at Vero Beach shall open on signal, except that from 7:45 a.m. to 9 a.m., 12 noon to 1:15 p.m. and 4 p.m. to 5:15 p.m., Monday through Friday, except Federal holidays, the draw need not open for the passage of vessels; however, the draw shall open at 8:30 a.m., 12:30 p.m., and 4:30 p.m. if any vessels are waiting to pass. During periods when storm signals are displayed in the Vero Beach area, the draw shall open on signal. Storm signals are displayed upon notification by the National Weather Service that winds of up to 33 knots or more and/or sea conditions considered dangerous to small craft are expected. Public vessels of the United States, state or local vessels used for public safety, tugs with tows, and vessels in distress, shall be passed at any time.

(j) The draw of the Parker (US1) bridge, mile 1013.7 at North Palm Beach, shall open on signal except that from November 15 through April 15, from 7 a.m. to 7 p.m., the draw need open only on the hour and half hour. From April 16 through November 14, from 9 a.m. to 5 p.m. the draw need open only on the hour, 20 minutes after the hour and 40 minutes after the hour on Saturdays, Sundays, and legal holidays to pass accumulated vessels. Public vessels of the United States, tugs with tows, regularly scheduled cruise boats, and vessels in distress shall be passed at any time.

(k) The draw of the Flagler Memorial (SRA–1–A) bridge, mile 1021.9 at Palm Beach, shall open on signal, except that from November 1 to May 31, Monday through Friday, except Federal holidays, the draw need not open from 6 a.m. to 9:30 a.m. and from 4 p.m. to 5:45 p.m.; however, the draw shall open at 8:30 a.m. and 4:45 p.m., if any vessels are waiting to pass. From 9:30 a.m. to 4 p.m., the draw need open only on the hour and half hour. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

(l) The draw of the Royal Park (SR704) bridge, mile 1022.6 at Palm Beach, shall open on signal, except that from November 1 through May 31, Monday through Friday, except Federal holidays, the draw need not open from 8 a.m. to 9:30 a.m. and from 3:30 p.m. to 5:45 p.m.; however, the draw shall open at 8:45 a.m., at 4:15 p.m. and 5 p.m., if any vessels are waiting to pass. From 9:30 a.m. to 3:30 p.m., the draw need open only on the quarter and three-quarter hour. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

(m) The draw of the Southern Boulevard (SR700/80) bridge, mile 1024.7 at Palm Beach, shall open on signal, except that from November 1 through May 31, Monday through Friday, except Federal holidays, the draw need not open from 7:30 a.m. to 9:00 a.m. and from 4:30 p.m. to 6:30 p.m.; however, the draw shall open at 8:15 a.m. and 5:30 p.m. if any vessels are waiting to pass. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

(n) The draw of the Lantana Avenue bridge, mile 1031.0 at Lantana, shall open on signal except that from 1 December to 30 April, on Saturdays, Sundays, and legal holidays, from 10 a.m. to 6 p.m., the bridge need open only on the hour, quarter hour, half hour, and three-quarter hour to allow all accumulated vessels to pass. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

(o) The draw of the Atlantic Avenue (SR806) bridge, mile 1039.6 at Delray Beach, shall open on signal except that from November 1 to May 31 from 10 a.m. to 6 p.m., Monday through Friday, the draw need open only on the hour and half hour. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

(p) The draw of the SR810 bridge, mile 1050.0 at Deerfield Beach, shall open on signal except that from November 1 through May 31 from 11 a.m. to 5 p.m. on Saturdays, Sundays and legal holidays, the draw need not open except on the hour, quarter hour, half hour, and three-quarter hour. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

(q) The draw of the N.E. 14th Street bridge, mile 1055.0 at Pompano, shall open on signal, except that from 7 a.m. to 6 p.m. the draw need open only on the quarter and three-quarter hour. Public vessels of the United States, tugs with tows and vessels in distress shall be passed at any time.

(r) The draw of the Atlantic Boulevard (SR814) bridge, mile 1056.0 at Pompano, shall open on signal, except that from 7 a.m. to 6 p.m. the draw need open only on the hour and half hour. Public vessels of the United States, tugs with tows, regularly scheduled cruise vessels and vessels in distress, shall be passed at any time.

(s) The draw of the Commercial Boulevard bridge, mile 1059.0 at Lauderdale-by-the-Sea, shall open on signal, except that from November 1 through May 15 from 12 noon to 6 p.m., Monday through Saturday, and from 9 a.m. to 6 p.m. on Sunday, the draw need open only on the hour, quarter hour, half hour, and three-quarter hour. Public vessels of the United States, tugs with tows and vessels in distress, shall be passed at any time.

(t) The draws of the Sunrise Boulevard (SR838) bridge, mile 1062.6, and the Las Olas Boulevard bridge, mile 1063.2, both at Fort Lauderdale, shall open on signal, except that from November 15 through May 15 from 7:15 a.m. to 6:15 p.m., the draws need open only on the quarter and three-quarter hour.

(u) The draw of the Brooks Memorial (S.E. 17th Street) bridge, mile 1065.9 at Fort Lauderdale, shall open on signal, except that from 7 a.m. to 7 p.m. the draw need not reopen for a period of 15 minutes after each closure. The owner of or agency controlling the bridge will display on both sides thereof a time clock acceptable to the District Commander, which will indicate to approaching vessels the number of minutes remaining before the draw will be available for opening. Public vessels of the United States, tugs with tows, sailing vessels, regularly scheduled cruise boats and vessels in distress shall be passed at any time.

(v) The draw of the Hollywood Beach Boulevard (SR820) bridge, mile 1072.2 at Hollywood, shall open on signal except that:

(1) From November 15 through May 15 from 10 a.m. to 6 p.m. the draw need open only on the hour and half hour and;

(2) From May 16 through November 14 on Saturdays, Sundays, Memorial day, Independence Day, Labor Day and Veterans Day from 9 a.m. to 7 p.m., the draw need open only on the hour and half hour.

(3) Public vessels of the United States, tows, sailing vessels, regularly scheduled cruise boats and vessels in distress, shall be passed at any time.

(w) The draw of the Hallandale Beach Boulevard (SR834) bridge, mile 1074.0 at Hallandale, shall open on signal, except that from 7:15 a.m. to 6:15 p.m. the draw need open only on the quarter and three-quarter hour. Public vessels of the United States, tugs with tows, regularly scheduled cruise vessels and vessels in distress, shall be passed at any time.

(x) The draw of the N.E. 163rd Street (SR826) bridge, mile 1078.0 at Sunny Isles, shall open on signal, except that from 7 a.m. to 6 p.m., Monday through Friday, and 10 a.m. to 6 p.m., Saturdays, Sundays, and holidays the draw need open only on the quarter and three-quarter hour. Public vessels of the United States, tugs with tows, regularly scheduled cruise vessels and vessels in distress shall be passed at any time.

(y) Biscayne Bay. (1) The draw of the Broad Causeway bridge, mile 1081.4 Bay Harbor Islands, shall open on signal, except that from 8 a.m. to 6 p.m. the draw need open only on the hour and half hour.

(2) The draw of the West Span of the Venetian Causeway, mile 1088.6 at Miami, shall open on signal, except that from November 1 through April 30 from 7 a.m. to 9 a.m. and 4:30 p.m. to 6:30 p.m. the draw need open only on the hour and half hour. The draw shall open on signal at any time on Thanksgiving, Christmas, New Year's Day, and Washington's birthday.

(3) The draw of the MacArthur Causeway bridge, mile 1088.8 at Miami, shall open on signal, except that from November 1 through April 30 from 7 a.m. to 9 a.m. and 4:30 p.m. to 6:30 the draw need open only on the hour and half hour.

(4) The draws of the Dodge Island bridges, mile 1089.4 at Miami, shall open on signal, except that from 7:15 a.m. to 5:45 p.m., Monday through Saturday, except legal holidays, the draws need open only on the quarter and three-quarter hour.

(5) The draw of the Rickenbacker Causeway bridge, mile 1091.6 at Miami, shall open on signal except, that from 7:30 a.m. to 9 a.m. and 4:30 p.m. to 6 p.m., Monday through Friday, except legal holidays, and 11 a.m. to 6 p.m. on Saturdays, Sundays, and legal holidays the draw need open only on the hour and half hour. However, during the display of small craft warnings or warnings for winds of greater force by the National Weather Service affecting the area, the draw shall open for the passage of vessels at any time.

(6) The draws of each Biscayne Bay bridge shall open at any time for the passage of public vessels of the United States, tugs with tows, regularly scheduled cruise boats and vessels in distress.

§ 117.263 Banana River.

From 4 p.m. to 9 a.m., Monday through Friday, and from 6 p.m. to 8 a.m., Saturdays, Sundays and Federal holidays, the draws of the bridges listed in paragraph (a) of this section shall open on signal as soon as possible but not longer than one hour after a request by a public vessel of the United states, vessels owned and operated by the state, county, or local governments used for public safety purposes, or any vessels in distress. The opening signal from such vessels is five short blasts of a whistle, horn or other similar sound producing device, or by shouting.

§ 117.293 Indian Creek.

The draw of the 63rd Street bridge, mile 4.0 at Miami Beach, shall open on signal except that from December 1 through April 15 from 11 a.m. to 6 p.m. the draw need open only on the hour. Public vessels of the United States, regularly scheduled cruise boats, and vessels in an emergency involving life or property shall be passed at any time.

§ 117.295 Kissimmee River.

(a) The removable span of the SR78 bridge, mile 0.5, and the removable span of the SR70 bridge, mile 19.5, both at or near Okeechobee, shall be removed if at least 72 hours notice is given.

(b) The draw of the Seaboard System Railroad bridge, mile 37.0 at Fort Bassinger, shall open, if at least 72 hours notice is given, for passage of floating equipment employed in flood control work under the jurisdiction of the Central and South Florida Water Management District or the U.S. Army Corps of Engineers. The draw need not open for other vessels.

(c) The removable span of the SR98 bridge, mile 39.0 at Fort Bassinger, shall be removed if at least 96 hours notice is given.

§ 117.297 Little Manatee River.

The draw of the Seaboard System Railroad bridge, mile 2.4 at Ruskin, shall open on signal if at least three hours notice is given.

§ 117.299 Longboat Pass.

The draw of the SR 789 bridge, mile 0.0 between Longboat Key and Anna Maria Key, shall open on signal except that from 6 p.m. to 6 a.m., the draw shall open on signal if at least three hours notice is given.

§ 117.301 Manatee River.

The draw of the US 41 bridge, mile 4.3 at Manatee, shall open on signal from 6 a.m. to 7 a.m. and 9 a.m. to 4 p.m. the draw need not open for the passage of vessels from 7 a.m. to 9 a.m. and 4 p.m. to 6 p.m. The draw shall open at 6 p.m. if any vessels are waiting to pass. From 6 p.m. to 6 a.m. the draw shall open on signal if at least three hours notice is given. Public vessesl of the United States, tugs with tows, and vessels in distress, shall be passed as soon as possible. During a hurricane alert issued by the National Weather Service, the draw shall open on signal.

§ 117.303 Matlacha Pass.

The draw of the SR 78 bridge, mile 6.0 at Fort Myers, shall open on signal, except that from 7 p.m. to 8 a.m. the draw need not open for the passage of vessels.

§ 117.305 Miami River.

The draw of each bridge from the mouth to and including the bridge at N.W. 27th Avenue, shall open on signal except that from 7:30 a.m. to 9 a.m. and 4:30 p.m. to 6 p.m., Monday through Friday, except New Year's Day, Independence Day, Labor Day, Veteran's Day, Thanksgiving and Christmas, the draws need not open for the passage of vessels. During the period of a hurricane alert issued by the National Weather Bureau all bridges shall open on signal. Public vessels of the United States, tugs with tows, and a vessel in an emergency involving danger to life or property, shall be passed at any time.

§ 117.307 Miami River, North Fork.

The draw of the Seaboard System Railroad bridge, mile 5.3 at Hialeah, shall open on signal from 8:30 a.m. to 5:30 p.m., Monday through Friday. At all other times the draw shall open on signal if at least three hours notice is given.

§ 117.309 Nassau Sound.

The draw of the Fernandina Port Authority bridge, SR A-1-A, mile 0.4 between Amelia Island and Talbot Island, shall open on signal from 6 a.m. to 6 p.m. if at least six hours notice is given. The draw need not open from 6 p.m. to 6 a.m.

§ 117.311 New Pass.

The draw of the SR 789 bridge, Sarasota County, shall open on signal except that from 7:30 a.m. to 6 p.m. the draw need open only on the hour, quarter hour, half hour and three-quarter hour. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

§ 117.313 New River.

(a) The draw of the S.E. Third Avenue bridge, mile 1.4 at Fort Lauderdale, shall open on signal except that from 7:30 a.m. to 8:30 a.m. and 4:30 p.m. to 5:30 p.m., Monday through Friday, the draw need not open for the passage of vessels. Public vessels of the United States, regularly scheduled cruise boats, tugs with tows, and vessels in distress shall be passed at any time.

(b) The draw of the Andrews Avenue bridge, mile 2.3 at Fort Lauderdale, shall open on signal, however, the draw need not open for an upbound vessel when the draws of the Florida East Coast railroad bridge, mile 2.5, are in the closed to navigation position to allow the passage of a train.

§ 117.315 New River, South Fork.

(a) The draw of the Southwest 12th Street bridge, mile 0.9 at Fort Lauderdale, shall open on signal, except that from 7:30 a.m. to 8:30 a.m. and 4:30 p.m. to 5:30 p.m., Monday through Friday, the draws need not open for the passage of vessels.

(b) The draw of the SR 84 bridge, mile 4.4 at Fort Lauderdale, shall open on signal if at least 24 hours notice is given.

(c) Public vessels of the United States, regularly scheduled cruise boats, tugs with tows, and vessels in distress, shall be passed through each draw as soon as possible.

§ 117.317 Okeechobee Waterway.

(a) The draws of the Roosevelt (US1) bridge, mile 7.5 at Stuart, shall open on signal, except that from 7:30 a.m. to 9 a.m., 12 noon to 2 p.m., and 4:30 p.m. to 6 p.m., Monday through Friday, the draw need open only on the hour and half hour. Public vessels of the United States, state or local vessels used for public safety, tugs with tows, and vessels in distress, shall be passed at any time.

(1) When the adjacent Florida East Coast Railway bridge is in a closed position on the hour or half hour, during the restricted periods, the draw need not open for eastbound vessels. When the railway bridge opens, the draw shall open upon signal to pass all accumulated vessels.

(b) The draws of the Florida East Coast railroad bridges across the Loxahatchee River, mile 1.2 at Jupiter; the St. Lucie River, mile 7.5 at Stuart; and the St. Lucie Canal, mile 38.0 at Port Mayaca, shall open as follows:

(1) The bridges will not be manned by a regular attendant.

(2) The spans will normally be in the open to navigation position, displaying flashing green signals, to allow the movement of water traffic.

(3) When a train approaches one of the bridges, the navigation signals will go to flashing red, and a horn starts four blasts, pauses and then continues four blasts.

(4) After an eight-minute time delay, the bridge will lower and lock, providing the scanning equipment reveals nothing under the bridge. Train crews can hold the bridge down by pushing a hold button, and the bridge will remain down for a period of eight minutes or while the approach track circuit is occupied.

(5) After the train has cleared, the bridge will raise and the signals will return to flashing green for navigation.

(c) The draw of the Seaboard System Railroad bridge, mile 28.5 at Indiantown, shall open on signal except that from 10 p.m. to 6 a.m. the draw shall open on signal if at least three hours notice is given.

(d) The draw of the Belle Glade Dike (SR71) bridge, mile 60.7 between Torry Island and Lake Shore, shall open on signal from 7 a.m. to 6 p.m., Monday through Thursday, and from 7 a.m. to 7 p.m., Friday through Sunday. At all other times the draw need not open for the passage of vessels.

(e) The draws of the Seaboard System Railroad bridge, mile 78.3 at Moorehaven, shall open on signal except that from 10 p.m. to 6 a.m. the draw need not open for the passage of vessels.

(f) The draw of the US 27 bridge, mile 78.4 at Moorehaven, the SR29 bridge, mile 103.0 at LaBelle, the SR78A bridge, mile 108.2 at Denaud, the SR78A bridge, mile 116.0 at Alva, and the SR78A bridge, mile 126.3 near Olga, all across the Caloosahatchee Canal and River, shall open on signal except that from 10 p.m. to 6 a.m. the draws shall open on signal if at least three hours notice is given.

(g) The draw of the Edison Memorial (US41) bridge, mile 134.5 at Fort Myers, shall open on signal, except that from 7:30 a.m. to 8:30 a.m. and from 5 p.m. to 6 p.m., Monday through Friday, except Federal holidays, the draw need not open for the passage of vessels. However, public vessels of the United States, tugs with tows, and vessels in distress shall be passed at any time.

§ 117.319 Oklawaha River.

The draws of the Sharpes Ferry (SR40) bridge, mile 55.1, Muclan Farms bridge, Southwest Florida Water Management District, mile 63.9, Moss Bluff (SR46) bridge, mile 66.0, and the Starkes Ferry (SR42) bridge, mile 73.0, shall open on signal if at least three hours notice is given.

§ 117.321 Orange River.

The draw of the SR80 bridge, mile 0.9 between Fort Myers Shores and Tice, shall open on signal if at least 24 hours notice is given. During a hurricane alert for the Caloosahatchee and Orange Rivers area issued by the National Weather Service the draw shall open at any time.

§ 117.323 Peace River.

The draw of the Barron Collier (US41) bridge, mile 2.0 at Punta Gorda, shall open on signal except that from 10 p.m. to 6 a.m. the draws shall open on signal if at least two hours notice is given.

§ 117.325 St. Johns River.

(a) The draws of the Main Street (US17) bridge, mile 24.7, the Acosta bridge, mile 24.9, and the Fuller Warren (I95–I10) bridge, mile 25.4, all at Jacksonville, shall open on signal, except that from 7:30 a.m. to 9 a.m. and 4:30 p.m. to 6 p.m., Monday through Saturday, except legal holidays, the draw need not open for the passage of vessels. The draws shall open at any time for vessels in an emergency involving life or property.

(b) The draw of the Florida East Coast automated railroad bridge, mile 24.9, shall be operated as follows:

(1) The bridge shall be constantly manned by a bridge supervisor who has a mechanical override capability for the automated operation.

(2) The bridge will normally be in the open position displaying flashing green lights to indicate that water traffic may pass.

(3) When a train approaches the bridge, large signs on both the upstream and downstream sides of the bridge will flash "bridge coming down," the navigational lights will go to flashing red, and the siren signals will sound.

(4) After an eight-minute delay, the bridge will lower and lock if there are no vessels under the bridge. Train crews can hold the bridge down by pushing a hold button, and the bridge will remain down for a period of eight minutes or while the approach track circuit is occupied.

(5) After the train has cleared, the bridge will open and the light signals will retrun to flashing green.

(6) A radiotelephone will be maintained at the bridge for the safety of navigation.

§ 117.327 St. Marks River.

The draw of the US98 bridge, mile 9.0 at St. Marks, shall open on signal if at least 48 hours notice is given to the State Road Department Maintenance Office, Tallahassee, Florida.

§ 117.329 St. Marys River.

The draws of the US17 bridge, mile 23.0, and the Seaboard System Railroad bridge, mile 23.1, both at Kingsland, shall open on signal if at least 48 hours notice is given.

§ 117.331 Steinhatchee River.

The draw of the SR358 bridge, mile 2.3 at Stevensville, shall open on signal if at least three hours notice is given.

§ 117.333 Suwanee River.

The draw of the Seaboard System Railroad bridge, mile 35.0 at Old Town, shall open on signal if at least five days notice is given.

§ 117.335 Taylor Creek.

The draw of US441 bridge, mile 0.3 at Okeechobee, shall open on signal if at least two hours notice is given.

§ 117.337 Trout River.

The draw of the Seaboard System Railroad bridge, mile 0.9 at Panama Park, shall open on signal from 6 a.m. to 10 p.m. to 10 p.m. to 6 a.m. the draw shall open on signal if at least 12 hours notice is given.

§ 117.339 West Palm Beach Canal.

The draw of the US 1 bridge, mile 0.1 at West Palm Beach, shall open on signal if at least 24 hours notice is given.

§ 117.341 Whitcomb Bayou.

The draw of the highway bridge, mile 0.5 at Tarpon Springs, shall open on signal from 9 a.m. to 6 p.m. on Saturdays and Sundays. The draw shall open on signal if at least two hours notice is given at all other times.

Georgia

§ 117.351 Altamaha River.

The draws of all bridges, except the Seaboard System Railroad bridge at Doctortown, shall open on signal if at least 24 hours notice is given. The draw of the Seaboard System Railroad bridge, mile 59.4 at Doctortown, shall open on signal if at least seven days notice is given.

§ 117.353 Atlantic Intracoastal Waterway, Savannah River to St. Marys River.

(a) The draw of the Causton Bluff (SR26) bridge across the Wilmington River, mile 579.9 near Causton Bluff, shall open on signal, however, from 7:30 a.m. to 9 a.m. and 4:30 p.m. to 6 p.m., Monday through Friday, except legal holidays, the draw need not open, except at 8:10 a.m. and 5:20 p.m., if any vessels are waiting to pass. Public vessels of the United States, tugs with tows, regularly scheduled cruise boats, and vessels in distress, shall be passed through the draw at any time.

(b) The draw of the SR 80 bridge across the Wilmington River, mile 582.8 at Thunderbolt, shall open on signal, however, from 7:45 a.m. to 9:15 a.m. and 5 p.m. to 6:30 p.m., Monday through Friday, except legal holidays, the draw need not open, except at 8:30 a.m. and 5:45 p.m., if any vessels are waiting to pass. Public vessels of the United States, tugs with tows, regularly scheduled cruise boats, and vessels in distress, shall be passed through the draw at any time.

(c) The draw of the Torres Causeway bridge across the Frederica River, mile 675.5, near St. Simons, shall open on signal, except that from 7:30 a.m. to 9:30 a.m. and 4:30 p.m., to 6:30 p.m. Monday through Friday, except holidays, the draw need open only on the hour and half hour. Public vessels of the United

States, tugs with tows, and vessels in distress, shall be passed at any time.

§ 117.355 Back River.

The draw of the St. Simon's Island causeway bridge, mile 1.5 between Brunswick and St. Simon's Island, shall open on signal except that from 6 a.m. to 9 a.m. and from 4 p.m. to 6 p.m. the draw need open only on the hour. Public vessels of the United States, tugs with tows, and vessels in distress, shall be passed at any time.

§ 117.357 Black River.

The draw of the Torres Causeway ridge, mile 1.5 near Brunswick, shall open on signal, except that from 6 a.m. to 9 a.m. and 4 p.m. to 6 p.m. the draw need not open for the passage of vessels; however, the draw shall open at 7 a.m., 8 a.m., and 5 p.m., if any vessels are waiting to pass.

§ 117.359 Chattahoochee River.

The draw of the Central of Georgia railroad bridge, mile 117.1 at Omaha, shall open on signal if at least six hours notice is given.

§ 117.361 Flint River.

The draws of the Seaboard System Railroad bridges, miles 28.0 and 28.7, both at Bainbridge, shall open on signal if at least 15 days notice is given.

§ 117.363 Ocmulgee River.

The draws of each bridge shall open on signal if at least 24 hours notice is given.

§ 117.365 Oconee River.

(a) The draw of the SR 46 bridge, mile 44.3 near Soperton, shall open on signal if at least 24 hours notice is given.

(b) The draw of the Central of Georgia railroad bridge, mile 106.6 at Oconee, shall open on signal if at least seven days notice is given.

§ 117.367 Ogeechee River.

(a) The draw of the Seaboard System Railroad bridge, mile 30.7 at Richmond Hill, shall open on signal if at least 15 days notice is given.

(b) The draw of the highway bridge, mile 37.8 near Richmond Hill, need not open for the passage of vessels.

§ 117.369 Satilla River.

The draw of the Seaboard System Railroad bridge, mile 25.7 at Woodbine, shall open on signal if at least 24 hours notice is given.

§ 117.371 Savannah River.

(a) The draw of the Seaboard System Railroad bridge, mile 60.9 at Clyo, shall open on signal from 6 a.m. to 11 a.m. and from 12 noon to 3 p.m. At all other times the draw shall open on signal if at least three hours notice is given. Contact may be made by VHF radiotelephone maintained at the bridge tender's house and the dispatcher's office in Savannah.

(b) The draw of the Seaboard System Railroad bridge, mile 135.4, near Augusta shall open on signal if at least three hours notice is given.

§ 117.373 St. Marys River.

The draws of the US 17 bridge, mile 23.0, and the Seaboard System Railroad bridge, mile 23.1, both at Kingsland, shall open on signal if at least 48 hours notice is given.

Hawaii

§ 117.377 Honolulu Harbor, Sand Island.

(a) The draw of the Slattery (Kalihi Channel) bridge, mile 1.8, shall open on signal from 5 a.m. to 6 a.m. and 6 p.m. to 7 p.m., Monday through Friday, except Federal holidays. On Saturdays, Sundays, and legal holidays from 5 a.m. on Saturdays through 5 a.m. on Mondays or on Federal holidays, the draw shall open on signal if at least six hours notice is given to the Honolulu Harbor Control Unit at Aloha Tower. In the event of emergencies during the closed periods specified above, the Control Unit will be called for clearance. In the event that a seismic sea-wave (tidal wave) is imminent, the bridge shall be opened to full horizontal and vertical clearances upon orders of the Harbor Master, Port of Honolulu. Emergency ship movements or imminence of wave arrival may require the bridge to be opened even though all persons have not evacuated the Sand Island area. Every effort shall be made to keep the bridge in the down position as long as reasonably possible; however, the Harbor Master may open the bridge within thirty (30) minutes of estimated time of wave arrival if he deems it necessary to protect life and property.

(b) The following visual signals shall be mounted on the bridge control tower:

(1) A flashing green light to indicate that the draw can be opened immediately. The light shall be exhibited during the time the draw is opening and until the draw is to be closed.

(2) A flashing red light to indicate that the draw cannot be opened immediately, or being opened, is to be closed immediately. The light shall be exhibited during the time the draw is closing.

(3) Two amber lights in a vertical line, one over the other, six feet apart with the uppermost six feet below the flashing red light. The uppermost amber light shall be flashing and when exhibited, shall indicate incoming traffic only. The lowermost amber light shall be fixed and, when exhibited, shall indicate outgoing traffic only. When both lights are exhibited, the harbor is closed to all traffic.

(4) The flashing red and green lights shall be mounted on a mast on the bridge control tower at a height of six feet above the water plan at mean lower low water datum, shall be visible between 50 degrees and 245 degrees true from seaward and visible for a distance of approximately three miles. The fixed and flashing amber lights shall conform to the bearings and visibility as prescribed for the red and green lights.

(5) In addition, two shapes shall be exhibited from a yardarm on the mast at a distance of 60 feet above the water plane at mean lower low water datum. One shape shall be an orange ball two feet in diameter. The other shape shall be an orange cone two feet in diameter across the base.

(c) When a vessel requires an opening of the draw, two prolonged blasts followed immediately by two short blasts shall be sounded.

(1) If the draw can be opened immediately, the bridge tender shall exhibit the flashing green light. The orange ball will be exhibited to indicate an inbound vessel; the cone will be exhibited to indicate an outbound vessel.

(2) During daylight hours when the drawbridge cannot be opened immediately, the bridge tender shall exhibit the flashing red light and hoist the ball and cone simultaneously to the yardarm. If for some reason the drawbridge cannot be opened after the tender has signified immediate opening by the flashing green light and either the ball or cone, he shall immediately exhibit the rescinding signal of the flashing red light and hoist the ball and cone simultaneously to the yardarm.

(3) As soon as the exigency which prevented opening has been removed, the tender shall promptly exhibit the flashing green light and either the ball or cone as the case may require to advise vessels that the drawbridge can be opened at once and he shall thereupon proceed to open the drawbridge if there is a vessel waiting to pass through. No vessel shall attempt to navigate the drawbridge when the visual signals indicate the bridge cannot be opened.

(4) During the period of darkness when the drawbridge cannot be opened immediately, the bridge tender shall exhibit the flashing red light and the fixed and flashing amber lights simultaneously. If for any reason the draw cannot be opened after the tender has signified immediately opening by the flashing green light and either the

flashing amber light or fixed amber light, he shall immediately exhibit the rescinding signal of the flashing amber lights simultaneously.

(5) As soon as the exigency which prevented opening has been removed, the tender shall promptly exhibit the flashing green light and either the flashing or fixed amber lights as the case may require to advise vessels that the drawbridge can be opened at once. He shall thereupon proceed to open the drawbridge if there is a vessel waiting to pass through. No vessel shall attempt to navigate through the drawbridge when the visual signals indicate that the bridge cannot be opened.

Idaho

§ 117.381 Clearwater River.

The draws of the Union Pacific (Camas Prairie) railroad bridge, mile 0.6 at Lewiston, shall open on signal if at least three hours notice is given to the Camas Prairie Railroad in Lewiston.

§ 117.383 Pend Oreille River.

The draw of the Burlington Northern railroad bridge, mile 111.3 near Sandpoint, need not open for the passage of vessels.

§ 117.383 Snake River.

(a) The draw of the US12 bridge, mile 140.0, between Lewiston, Idaho and Clarkston, Washington, shall open at the following times if at least two hours notice is given to the Washington State Department of Transportation.

(1) From March 15 through November 15—6 a.m., 10 a.m., 3 p.m., 7 p.m., and 9 p.m.

(2) From November 16 through March 14—9 a.m., 10 a.m., 2 p.m., and 3 p.m.

(3) The draw need not open at all other times.

Illinois

§ 117.389 Calumet River.

(a) The draws of the CONRAIL bridges, miles 1.4 and 1.5 at Chicago, shall open on signal. However, the draws need not open if either one of the bridges is inoperable because of equipment breakdown.

(b) In addition to the signals prescribed in § 117.13, the following special visual signals shall be used:

(1) When draw cannot open promptly or when draw is open and is to be closed for any reason. Two red lights will be flashed alternately.

(2) When draw will open promptly. Two amber lights will be flashed alternately.

(3) When draw is open for passage. Two green lights will be flashed alternately.

The two red, amber and green light units will be arranged in horizontal planes approximately 48 inches apart; flashed for about two seconds duration; provided with candlepower sufficient to be readily visible at least one-half mile; placed on the upstream and downstream sides of each bridge, except at the five railroad bridges, where one unit will be placed on the upstream (lakeward) side of the Baltimore & Ohio railroad bridge and the other on the downstream side of the southernmost CONRAIL bridge; and located so as to be readily visible to approaching navigation as will be determined by the District Commander.

§ 117.391 Chicago River.

(a) The draws of the bridges across the Chicago River from its mouth to the junction of the North and South Branches; the South Branch from the junction to and including the West Roosevelt Road; and the North Branch to and including North Kinzie Street and the Northwest Expressway Feeder bridge; shall open on signal from April 1 through December 31, except that from Monday through Friday, 7:30 a.m. to 10 a.m. and 4 p.m. to 6:30 p.m. the draws need not open for the passage of vessels.

(b) The draws of the bridges across the North Branch of the Chicago River at Grand Avenue and all bridges north of the Northwest Expressway Feeder bridge to and including North Halsted Street; and the bridges across the South Branch of the Chicago River south of South Halsted Street; shall open on signal, except that from 7 a.m. to 8 a.m., and 5:30 p.m. to 6:30 p.m. the draws need not open for the passage of vessels.

(c) From January 1 through March 31, the draws of the highway bridges across the Chicago River, the North Branch of the Chicago River, North Branch Canal and the South Branch of the Chicago River shall open on signal if at least 12 hours notice is given.

(d) The Randolph Street, Cermak Road, Throop Street and Loomis Street bridges across the South Branch of the Chicago River, the North Halsted Street bridge across the North Branch Canal and the West Kinzie Street bridge across the North Branch of the Chicago River shall open on signal from April 1 through December 31.

(e) The draw of the Milwaukee Line railroad bridge across the North Branch Canal need not open for the passage of vessels.

(f) Constant attendance is not required at the following City of Chicago bridges:

Chicago River, South Branch

Washington Street
Madison Street
Monroe Street
Adams Street
Jackson Street
Van Buren Street
Congress Street (Eisenhower Expressway)
Harrison Street
Roosevelt Road
Eighteenth Street
Canal Street
South Halsted Street

West Fork of the South Branch

South Ashland Avenue
South Damen Avenue

Chicago River, North Branch

Grand Avenue
Chicago Avenue
North Halsted Street
Ogden Avenue
Division Street

North Branch Canal

Ogden Avenue
Division Street

Roving drawtenders shall open these bridges not more than 30 minutes after notification to the Port Director's Office.

(g) The draws of bridges across the North Branch Canal that have a vertical clearance of less than 17 feet above Low Water Datum for Lake Michigan shall open at any time to permit the passage of tugs and tugboats.

(h) The draws of any of the bridges listed in this section shall be open as soon as possible for the passage of emergency vessels of the City of Chicago or public vessels of the United States.

(i) The draw of the Lake Shore Drive bridge across Ogden Slip need not open for the passage of vessels.

(j) The draws of the North Avenue, Cortland Street, Webster Avenue, North Ashland Avenue, Chicago and Northwestern railroad, North Damen Avenue, and Belmont Avenue bridges across the North Branch of the Chicago River need not open for the passage of vessels.

(k) The opening signal for all Chicago River bridges is three short blasts or by shouting, except that four short blasts is the opening signal for the Chicago and Northwestern railroad bridge near West Kinzie Street and the Milwaukee Road bridge near West North Avenue and five short blasts is the opening signal when approaching the Lake Short bridge from the north.

§ 117.393 Illinois River.

(a) The draw of the automated Burlington Northern railroad bridge, mile 88.8 at Beardstown, Illinois will normally be maintained in the open position, providing a minimum vertical clearance of 68.4 feet above normal pool.

(b) When a vessel is approaching, and the liftspan is in the open position, contact shall be established by radiotelephone to assure that the liftspan will remain open until passage has been completed.

(c) When a vessel is approaching and the liftspan is in the closed position, contact shall be established by radiotelephone with the remote operator. If the liftspan CANNOT open promptly, alternate flashing red lights shall be displayed. If the liftspan will open promptly, flashing amber lights shall be displayed.

(d) When a train approaches the bridge and the liftspan is in the open position, alternate flashing red lights on top of the drawspan shall commence flashing and a horn shall sound four short blasts. The remote operator shall scan the river on radar to determine whether any vessels are approaching the bridge. The remote operator shall also broadcast his intentions to lower the liftspan. If a vessel or vessels are approaching the bridge within one mile, as determined by radar scanning, response to radio broadcast, or electronic detector, the flashing red lights shall be changed to flashing amber and the liftspan remain in the fully open position until such vessel or vessels have cleared the bridge. If no vessels are approaching the bridge or are beneath the liftspan, the alternate flashing red lights shall continue to flash and the liftspan shall be lowered and locked in place.

(e) After the train has cleared the bridge, the draw shall be raised to its full height and locked in place; the red flashing lights will stop and drawspan lights changed from red to green indicating the navigation channel is clear for the passage of vessels.

§ 117.395 Illinois Waterway.

The draws of the highway bridges in Joliet listed below shall open on signal except that they need not open from 7:30 a.m. to 8:30 a.m. and from 4:15 p.m. to 5:15 p.m., Monday through Saturday:

McDonough Street, Mile 287.3
Jefferson Street, Mile 287.9
Cass Street, Mile 288.1
Jackson Street, Mile 288.4
Ruby Street, Mile 288.7

§ 117.397 Wabash River.

The draws of each bridge across the Wabash River shall open on signal if at least 72 hours notice is given.

Indiana

§ 117.401 Trail Creek.

The draw of the CONRAIL bridge, mile 0.9 at Michigan City, shall open on signal from 6:30 a.m. to 2:30 p.m. daily, except Sunday, from February 16 through December 14. The draw will not be manned at all other times. If passage is desired, the Chief Dispatcher, CONRAIL at Chicago shall be notified by collect telephone and he shall arrange to have the draw open within 20 minutes.

§ 117.403 Wabash River.

The draws of each bridge shall open on signal if at least 72 hours notice is given.

Iowa

§ 117.407 Missouri River.

The draws of the bridges across the Missouri River from the mouth to Sioux City, shall open on signal except that from December 16 through the last day of February, the draws shall open on signal if at least 24 hours notice is given.

Kansas

§ 117.411 Missouri River.

The draws of the bridges across the Missouri River from the mouth to Sioux City, Iowa, shall open on signal except that from December 16 through the last day of February, the draws shall open on signal if at least 24 hours notice is given.

Kentucky

§ 117.415 Green River.

(a) The draw of the Seaboard System Railroad bridge, mile 8.3 at Spottsville, shall open on signal when there is 40 feet or less of vertical clearance beneath the draw. When the vertical clearance is more than 40 feet at least four hours notice shall be given. During this period if a vessel Captain informs the drawtender during his passage through the draw that the vessel will return within four hours, the drawtender shall remain on duty until the vessel returns but shall not be required to remain for longer than four hours.

(b) The draws of the Seaboard System Railroad bridges, miles 71.2 and 79.6, at Livermore and Smallhouse, are normally maintained in the fully open position and a vessel may pass through the draw without further signals. When the draws are in the closed position they shall open on signal.

(c) The owners of or agencies controlling the Seaboard System Railroad bridges at miles 8.3, 71.2, and 79.6, shall arrange for ready telephone communication with the authorized representative at any time from the bridges or their immediate vicinity. Brief resumes of these regulations shall be conspicuously posted at Green River Navigation Locks Nos. 1, 2, 3, and 4.

(d) The Illinois Central Gulf railroad bridge, mile 95.8 at Rockport, is operated as follows:

(1) When the stage of the river permits a vertical clearance of 34 feet or more under the closed draw, as determined from gauges suitably marked to indicate the minimum clearance and attached to the upstream and downstream sides of the bridge, the draw shall open on signal if at least eight hours notice is given. If for any reason the vessel is delayed and cannot arrive for passage at the time specified, the authorized representative shall be promptly notified of the estimated delay for opening the draw.

(2) When the stage of the river does not permit a vertical clearance of 34 feet or more under the closed draw, the draw will normally be maintained in the open to navigation position. Automatic closing for passing of trains will be in effect. The owner of the bridge shall arrange for ready telephone communication with the authorized representative at any time from the bridge or its immediate vicinity. A brief resume of these regulations and the automatic operating procedure shall be conspicuously posted at Green River Navigation Locks Nos. 1, 2, 3 and 4.

§ 117.417 Ohio River.

The draw of the Southern Railway railroad bridge, mile 607.4 at New Albany, Indiana, need not be open for the passage of vessels.

Louisiana

§ 117.421 Algers Alternate Route.

The draw of the S23 bridge, mile 3.8 at Belle Chasse, shall open on signal, except that from 3:30 p.m. to 5:30 p.m., Monday through Friday, except Federal holidays, the draw need not open for the passage of vessels.

§ 117.423 Amite River.

(a) The draw of the S22 bridge, mile 6.0 at Clio, shall open on signal except that from 5 p.m. to 9 a.m., the draw shall open on signal if at least 12 hours notice is given.

(b) The draws of the S16 bridge, mile 21.4 near French Settlement, and the S42 bridge, mile 32.0 at Port Vincent, shall open on signal if at least 48 hours notice is given.

§ 117.425 Black Bayou.

The draws of the US90–S20 bridge, mile 7.0 near Gibson, and Terrebonne Parish Police Jury bridges, miles 7.5, 15.0, 18.7, and 22.5, between Gibson and Houma, shall open on signal if at least 24 hours notice is given.

§ 117.427 Black River.

The draw of the US84 bridge, mile 41.0 at Jonesville, shall open on signal if at least a one hour notice is given.

§ 117.429 Boeuf Bayou.

The draw of the S307 bridge, mile 1.3 at Kraemer, shall open on signal except that from 9 p.m. to 5 a.m., the draw shall open on signal if at least 12 hours notice is given.

§ 117.431 Boeuf River.

The draw of the S4 bridge, mile 32.3 near Mason, shall open on signal if at least 48 hours notice is given.

§ 117.433 Bonfouca Bayou.

The draw of the S433 bridge, mile 7.0 at Slidell, shall open on signal except that from 9 p.m. to 5 a.m., the draw shall open on signal if at least 12 hours notice is given.

§ 117.435 Caddo Lake.

The draw of the Kansas City Southern railroad bridge, mile 26.4 near Mooringsport, shall open on signal if at least 24 hours notice is given.

§ 117.437 Colyell Bayou.

The Louisiana highway removable span bridge, mile 1.0 near Port Vincent, shall be removed for the passage of a vessel if at least 48 hours notice is given.

§ 117.439 Des Allemands Bayou.

The draws of the S631 bridge, mile 13.9 at Des Allemands, shall open on signal except that from 9 p.m. to 5 a.m., the draw shall open on signal if at least 12 hours notice is given.

§ 117.441 D'Inde Bayou.

The draw of the Southern Pacific railroad bridge, mile 4.3 Defense Plant Corporation, Cities Service Refining Corporation Agent, shall open on signal if at least 72 hours notice is given.

§ 117.443 DuLarge Bayou.

The draw of the Terrebonne Parish bridge, mile 23.2 near Theriot, shall open on signal except that from 9 p.m. to 5 a.m., the draw shall open on signal if at least 12 hours notice is given.

§ 117.445 Franklin Canal.

The draw of the Chatsworth bridge, mile 4.8 at Franklin, shall open on signal from 5 a.m. to 9 p.m. From October 1 through January 31 from 9 p.m. to 5 a.m., the draw shall open on signal if at least three hours notice is given. From February 1 through September 30 from 9 p.m. to 5 a.m., the draw shall open on signal if at least 12 hours notice is given.

§ 117.447 Grand Cabahanosse Bayou.

The draw of the S70 bridge, mile 7.6 near Paincourtville, shall open on signal if at least 24 hours notice is given.

§ 117.449 Grosse Tete Bayou.

(a) The draw of the Texas and Pacific railroad bridge, mile 14.7 at Grosse Tete, need not open for the passage of vessels.

(b) The removable span of the S377 bridge, mile 15.3 near Rosedale, shall be removed for the passage of a vessel if at least 48 hours notice is given.

§ 117.451 Gulf Intracoastal Waterway.

(a) The draw of the Harvey Canal Route, mile 2.8 at Harvey, shall open on signal except that from 6:30 a.m. to 8:30 a.m. and from 3:45 p.m. to 5:45 p.m., Monday through Friday excluding holidays, the draw need not open for the passage of vessels.

(b) The draw of the Louisiana highway bridge, mile 243.8 west of Harvey Canal Locks, shall open on signal when more than 50 feet vertical clearance is required, if at least four hours notice is given to the Louisiana Department of Highways, District Maintenance Engineer at Lake Charles.

§ 117.453 Gulf Intracoastal Waterway, Houma Navigation Canal, Bayou La Carpe, and Bayou Terrebonne, Houma.

The draws of the bridges across the Gulf Intracoastal Waterway at East Part Avenue, mile 57.6, East Main Street, mile 57.7, and Bayou Dularge, mile 59.9, the Houma Navigation Canal at State Highway 661, mile 36.0, Bayou La Carpe at State Highway 661, mile 7.5, and Bayou Terrebonne, mile 35.5 at Daigleville, shall open on signal, except that the draw need not open for the passage of vessels, Monday through Friday, except holidays, from 7 a.m. to 8:30 a.m. and 4:30 p.m. to 6 p.m.

§ 117.455 Houma Canal.

The draw of the S3197 bridge, mile 1.7 at Houma, shall open on signal except that from 9 p.m. to 5 a.m., the draw shall open on signal if at least 12 hours notice is given.

§ 117.457 Houston River.

The draw of the Kansas City Southern Railroad bridge, mile 5.2 near Lake Charles, shall open on signal if at least 24 hours notice is given.

§ 117.459 Inner Harbor Navigation Canal, New Orleans.

The draws of the New Seabrook bridge, mile 3.4 and the Danziger bridge, mile 5.4, at Chef Menteur Highway (US90) shall open on signal except that from 7 a.m. to 8:30 a.m. and 5 p.m. to 6:30 p.m., Monday through Friday, the draws need not open.

§ 117.461 Lacassine Bayou.

The draws of S14 bridge, mile 17.0, and the Southern Pacific railroad bridge, mile 20.4, both near Hayes, shall open on signal if at least 24 hours notice is give.

§ 117.463 Lacombe Bayou.

The draw of the US190 bridge, mile 6.8 at Lacombe, shall open on signal if at least 48 hours notice it given.

§ 117.465 Lafourche Bayou.

(a) The draws of the US90–S1 bridge, mile 58.2, Lafourche Parish bridge, mile 58.7, all at Raceland; and the S649 bridge, mile 66.1 at Lafourche, shall open on signal if at least six hours notice is given.

(b) The draws of the Southern Pacific railroad bridge, mile 69.0 at Lafourche, shall open on signal if at least 48 hours notice is given.

(c) The draws of the S20 bridge, mile 73.4 at Thibodaux, and all bridges upstream thereof need not open for the passage of vessels.

§ 117.467 Lake Pontchartrain.

(a) The south draws of the S11 and the Southern Railway bridges near New Orleans, shall open on signal if at least 48 hours notice it given. In case of emergency, the draws shall open within 12 hours and shall be kept in condition for immediate operation until the emergency is over.

(b) The draws of the Greater New Orleans Expressway Commission causeway, north bascule spans, shall open on signal if at least three hours notice it given.

§ 117.469 Liberty Bayou.

The draw of the S433 bridge, mile 2.0 at Slidell, shall open on signal except that from 9 p.m. to 5 a.m. the draw shall open on signal if at least 12 hours notice is given.

§ 117.471 Little Black Bayou.

The draw of the Southern Pacific railroad bridge, mile 1.3 at Southdown, need not open for the passage of vessels.

§ 117.473 Little River.

The draw of the Louisiana and Arkansas railroad bridge, mile 12.1 at Archie, shall open on signal if at least 12 hours notice is given.

§ 117.475 Little (Petit) Caillou Bayou.

The draws of the S58 bridge, mile 25.7 at Sarah, the Terrebonne Parish (Smith River) bridge, mile 26.6 near Montegut, the Terrebonne Parish (Duplantis) bridge, mile 29.9 near Bourg, and the S24 bridge, mile 33.7 at Petit Caillou, shall open on signal except that from 9 p.m. to

5 a.m., the draws shall open on signal if at least 12 hours notice is given.

§ 117.477 Lower Atchafalaya River.

The draw of the St. Mary Parish bridge, mile 26.8 at Patterson, shall open on signal from 5 a.m. to 9 p.m., and from October 1 through January 31 from 9 p.m. to 5 a.m., if at least three hours notice is given, and from February 1 through September 30 from 9 p.m. to 5 a.m., the draw shall open on signal if at least 12 hours notice is given.

§ 117.479 Macon Bayou.

The draw of the S4 bridge, mile 44.8 near Winnsboro, shall open on signal if at least 24 hours notice is given.

§ 117.481 Nezpique Bayou.

The draw of the S97 bridge, mile 7.0 near Jennings, shall open on signal if at least 48 hours notice is given.

§ 117.483 Ouachita River.

The draws of the S8 bridge, mile 57.5 at Harrisonburg, and the US165 bridge, mile 110.1 at Columbia, shall open on signal if at least a one-hour notice is given.

§ 117.485 Patout Bayou.

The draw of the S83 bridge, mile 0.4 at Weeks, shall open on signal except that from 9 p.m., to 5 a.m., the draw shall open on signal if at least 12 hours notice is given.

§ 117.487 Plaquemine Bayou.

The draws of the Texas and Pacific railroad bridge, mile 10.5 at Plaquemine, and S1 bridge, mile 10.5 at Plaquemine, need not open for the passage of vessels.

§ 117.489 Bruie Bayou.

(a) The draw of the Southern Pacific railroad bridge, mile 5.1 near Midland, shall open on signal if at least 24 hours notice is given.

(b) The draw of the S91 bridge, mile 8.0 at Estherwood, shall open on signal from 5 a.m. to 9 p.m., if at least four hour notice is given. From 9 p.m. to 5 a.m., the draw shall open on signal if at least 12 hours notice is given.

§ 117.491 Red River.

The draws of all bridges from mile 66.0 through mile 283.1 shall open on signal if at least 48 hours notice is given. The draws of the bridges need not open for a vessel that arrives at any of these bridges more than two hours after the time specified in the notice, unless a second notice of at least 48 hours is given. The draws of the bridges above mile 283.1 need not open for the pasage of vessels.

§ 117.493 Sabine River.

The draws of the Southern Pacific railroad bridge, mile 19.3 near Echo, the Kansas City Southern railroad bridge, mile 36.2 near Ruliff, and the S7 bridge, mile 40.8, at Starks shall open on signal if at least 24 hours notice is given.

§ 117.495 Superior Oil Canal.

The draw of the S82 bridge, mile 6.3 in Cameron Parish, shall open on signal except that from 9 p.m. to 5 a.m., the draw shall open if at least 12 hours notice is given.

§ 117.497 Stumpy Bayou.

The removable span of the Louisiana highway bridge, mile 1.0 near Weeks Island, shall be removed for the passage of a vessel if at least six days notice is given.

§ 117.499 Tante Phine Pass.

The draw of the Tidewater Associated Oil Company bridge, mile 7.6 near Venice, shall open on signal if at least 24 hours notice is given.

§ 117.501 Teche Bayou.

(a) The draws of all drawbridges, except those listed in paragraphs (d) and (e) of this section, shall open on signal from 5 a.m. to 9 p.m.

(b) The bridges listed in this paragraph shall open on signal from October 1 through January 31 from 9 p.m., to 5 a.m., if at least three hours notice is given and from February 1 through September 30, if at least 12 hours notice is given.

St. Mary Parish bridge, mile 3.9 at Calumet
St. Mary Parish bridge, mile 11.8 at Centerville
S3069 bridge, mile 17.2 at Franklin
S322 bridge, mile 19.8 at Sterling
S323 bridge, mile 22.3 at Oaklawn
St. Mary Parish bridge, mile 27.0 at Baldwin
S324 bridge, mile 32.5 at Charenton
S670 bridge, mile 37.0 at Adeline
St. Mary Parish bridge, mile 38.9 at Sorell
S671 bridge, mile 41.8 at Jeanerette
S671 bridge, mile 43.5 at Jeanerette
S320 bridge, mile 48.7 at Oliver
S37 bridge, mile 52.5 at New Iberia
S86 bridge, mile 53.0 at Loreauville
S3156 bridge, mile 53.3 at New Iberia
S344 bridge, mile 56.7 at New Iberia

(c) The bridges listed in this paragraph shall open on signal from 9 p.m. to 5 a.m., if at least 12 hours notice is given.

Iberia Parish bridge, mile 58.0 at New Iberia
Iberia Parish bridge, mile 60.0 at New Iberia
Missouri Pacific railroad bridge, mile 61.0 at Loreauville
S344 bridge, mile 62.5 at Loreauville
S86 bridge, mile 69.0 at Daspit
St. Martin Sugar Cooperative railroad bridge, mile 77.7 at Loreauville

(d) The draws of the S96 bridge, mile 75.2 at St. Martinville, and the S350 bridge, mile 82.0 at Parks shall open on signal if at least 24 hours notice is given.

(e) The draws of the S31 bridge, mile 87.5 at Ruth, and the S31 bridge, mile 90.5 at Breaux Bridge, and the Southern Pacific railroad bridge, mile 91.0 at Breaux Bridge, shall open on signal if at least 48 hours notice is given.

§ 117.503 Tensas River.

(a) The draw of the Missouri Pacific railroad bridge, mile 27.2 at Clayton, shall open on signal from May 1 through December 31 during normal river stages if at least 12 hours notice is given to the Dispatcher, Missouri Pacific Railroad Little Rock, Arkansas. During high-water periods the District Commander may require the constant attendance of a drawtender, and the draw shall open on signal during such periods.

(b) The draws of the S15 bridge, mile 27.3 at Clayton, and the S128 bridge, mile 61.0 at New Light, shall open on signal if at least 48 hours notice is given.

§ 117.505 Terrebonne Bayou.

(a) The draw of the S24 bridge, mile 28.8 near Presquille Isle, shall open on signal if at least 24 hours notice is given.

(b) The draw of the S3087 bridge, mile 33.9 at Prospect, shall open on signal except that from 9 p.m. to 5 a.m., the draw shall open on signal if at least 12 hours notice is given.

§ 117.507 Tigre Bayou.

The draw of the S330 bridge, mile 2.3 at Delcambre shall open on signal except that from 9 p.m. to 5 a.m. the draw shall open on signal if at least 12 hours notice is given.

§ 117.509 Vermilion River.

(a) The draws of the bridges listed below shall open on signal from 5 a.m. to 9 p.m. From 9 p.m. to 5 a.m., the draw shall open on signal if at least 12 hours notice is given.

S82 bridge, mile 22.4 at Perry
S14 bridge, mile 25.4 at Abbeville
S14 bridge, mile 26.0 at Abbeville
Vermilion Parish bridge, mile 34.2 three miles south of Milton
S92 bridge, mile 37.6 at Milton
S733 bridge, mile 41.0 at Eloi Broussard
S3073 bridge, mile 44.9 at New Flanders

(b) The draw of the S182 bridge, mile 49.0 at Lafayette, shall open on signal if at least 48 hours notice is given.

§ 117.511 West Pearl River.

(a) The draw of the Southern Railway bridge, mile 22.1 at Pearl River Station, shall open on signal if at least six hours notice is given.

(b) The draw of the US90 bridge, mile 7.9 near Pearlington, shall open on signal except that from 9 p.m. to 5 a.m. the draw shall open on signal if at least 12 hours notice is given.

Maine

§ 117.521 Back Cove.

The draw of the Canadian National railroad bridge, mile 0.2 at Portland, shall open on signal if at least 24 hours notice is given.

§ 117.523 Back River.

The draw of the Maine highway bridge, mile 4.6, between Hodgdon and Barter Island at Boothbay, shall open on signal from June 1 through October 31 except that from 5 p.m. to 8 a.m. the draw shall open on signal if notice was given to the drawtender from 8 a.m. to 5 p.m. From November 1 through May 31 the draw shall open on singal if at least 24 hours notice is given to the drawtender or to the Maine State Highway Commission at Augusta.

§ 117.525 Kennebec River.

(a) The draw of the highway-railroad bridge, mile 14.0, between Bath and Woolwich, shall open on signal:

(1) Except that from 6:30 a.m. to 7:30 am. and from 3:45 p.m. to 4:45 p.m., Monday trhough Friday, except legal holidays observed in the locality, the draw need not open. However, loaded commercial fishing vessels proceeding upstream shall be passed at any time.

(2) From 3 a.m. to 7 p.m., from April 15 through June 15 and from October 1 through November 15; and at all times from June 16 through September 30.

(3) From April 15 through June 15 and October 1 through November 15 if at least four hours notice is given from 7 p.m. to 3 a.m.

(4) From February 15 through April 14 and November 16 through December 15 if at least four hours notice is given.

(5) From December 16 through February 15 if at least 24 hours notice is given.

(b) The draw of the Maine highway bridge, mile 27.1, between Richmond and Dresden shall open on signal except from 9 p.m. to 5 a.m. the draw shall open on signal if notice is given to the drawtender from 5 a.m. to 9 p.m.

§ 117.527 Kennebunk River.

The draw of the Maine Dock Square highway bridge, mile 1.0, between Kennebunk and Kennebunkport, shall open on signal except that from 5 p.m. to 7 a.m. the draw shall open on signal if notice is given to the drawtender from 7 a.m. to 5 p.m.

§ 117.529 Narraguagus River.

The draw of the highway bridge, mile 1.8 at Milbridge, shall open on signal if at least 24 hours notice if given to the Maine State Highway Commission, Division Office at Ellsworth.

§ 117.531 Presumpscot River.

The draw of the US1 bridge, mile 0.0, between Portland and Falmouth, need not open for the passage of vessels.

§ 117.533 Sheepscot River.

The draws of the Maine highway bridge, mile 14, and the Maine Central railroad bridge, mile 15.0, both between Wiscasset and North Edgecombe, need not open for the passage of vessels.

§ 117.535 Taunton River.

The draw of the Maine highway bridge, mile 4.3, between Hancock and Sullivan, need not open for the passage of vessels.

Maryland

§ 117.541 Baltimore Harbor-Patapsco River.

(a) The draw of the Hanover Street S2 bridge, mile 12.0 across the Middle Branch of the Patapsco River at Baltimore, shall open on signal from 5 a.m. to 6:30 a.m., 9:30 a.m. to 4 p.m. and 6 p.m. to 9 p.m. The draw need not open from 6:30 a.m. to 9:30 a.m. and 4 p.m. to 6 p.m. When a vessel desires to pass the draw from 9 p.m. to 5 a.m., notice shall be given to the superintendent of the bridge by telephone or otherwise, either at the bridge before 9 p.m. or at this residence thereafter. If the notice is given between the hours of 5 a.m. and 9 p.m., or if at least one-half hour has elapsed since it was given, the draw shall open promptly at the time specified.

(b) The draw of the Western Maryland railroad bridge, mile 12.5 across the Middle Branch of the Patapsco River at Baltimore, shall open on signal from 7 a.m. to 12 noon and 1 p.m. to 4 p.m., Monday through Friday, except legal holidays. At all other times the draw shall open if at least six hours notice is given.

(c) Marine firefighting equipment and pollution control vessels shall be passed as soon as possible but in no event more than 15 minutes after notification that such an opening is required.

§ 117.543 Bear Creek.

(a) The draws of the Baltimore Country Revenue Authority highway toll bridges, miles 1.5 and 2.1 between Dundalk and Sparrows Point, shall open on signal except that from April 16 through November 15 from 12 midnight to 8 a.m., except Saturdays, Sundays, and Federal and State holidays, at least a one-half hour notice is required.

(b) The draw of the Baltimore County highway bridge, mile 3.4 at Wise Avenue between Dundalk and Sparrows Point, shall open on signal if at least four hours notice is given.

§ 117.545 Bohemia River.

(a) The draw of the S213 bridge, mile 4.0 at Cayots, shall open on signal:

(1) From May 30 through September 30 from sunrise to sunset on Saturdays, Sundays, and Federal and State holidays.

(2) From May 30 through September 30 from sunrise to sunset and from October 1 through May 29 from 7 a.m. Monday through 7 p.m. Friday if at least three hours notice is given.

(3) From October 1 through May 29 from 7 p.m. Friday through 7 a.m. Monday, the draw need not open unless the request was made before 7 p.m. Friday.

§ 117.547 Bush River.

The draw of the AMTRAK bridge, mile 6.8 at Perryman, shall open on signal from June 1 through September 30 from 10 a.m. to 5 p.m., twice on Saturdays and twice on Sundays if at least 24 hours notice is given to the Bush River Boat Club. The draw need not open at all other times.

§ 117.549 Cambridge Harbor.

The draw of the S342 bridge, mile 0.1 at Cambridge, shall open on signal from 6 a.m. to 8 p.m., except that from 12 noon to 1 p.m., Monday through Friday, the draw need not open. The draw need not open from 8 p.m. to 6 a.m.

§ 117.551 Chester River.

The draw of the S213 bridge, mile 26l.8 at Chestertown, shall open on signal from April 1 through September 30 from 6 a.m. to 6 p.m. At all other times the draw shall open on signal if at least six hours notice is given.

§ 117.553 Choptank River.

The draw of the CONRAIL bridge, mile 50.9 at Denton shall open on signal from May 30 through September 30 from sunrise to sunset and at all other times if at least four hours notice is given.

§ 117.555 Curtis Creek.

The draw of the I–695 bridge, mile 0.9 at Baltimore, shall open on signal if at least a one-hour notice is given to the Maryland Transportation Authority in Baltimore.

§ 117.557 Dorsey Creek.

The draws of the Naval Academy highway bridge, mile 0.3 at Annapolis,

and the Maryland highway bridge, mile 0.4 at Annapolis, need not open for the passage of vessels.

§ 117.559 Kent Island Narrows.

(a) The draw of the US 301 bridge, mile 1.0 at Kent Island Narrows shall open on signal from November 1 through April 30, from 6 a.m. to 6 p.m. The draw need not open from 6 p.m. to 6 a.m.

(b) From May 1 through October 31:

(1) On Monday (except Monday holidays) through Thursday, the drawbridge shall open for the passage of vessel traffic on the hour from 7 a.m. to 7 p.m., but need not open at any other time.

(2) On Friday, the drawbridge shall open for the passage of vessel traffic on the hour from 6 a.m. to 3 p.m. and at 8 p.m., but need not open at any other time.

(3) On Saturday, the drawbridge shall open for the passage of vessel traffic at 6 a.m., 9 a.m., and 12 noon, and on the hour from 3 p.m. to 8 p.m., but need not open at any other time.

(4) On Sunday and legal holidays falling on Monday, the drawbridge shall open for the passage of vessel traffic on the hour from 6 a.m. to 1 p.m., and at 8 p.m., but need not open at any other time.

(5) The draw shall open at scheduled opening times only if vessels are waiting to pass, and at each opening the draw shall remain open for a sufficient period of time to allow passage of all waiting vessels.

(6) If a vessel is approaching the drawbridge and cannot reach the draw exactly on the hour, the drawtender may delay the hourly opening up to ten minutes past the hour for the passage of the approaching vessel and any other vessels that are waiting to pass.

(c) All public vessels of the United States, and those State or local vessels on public safety missions, shall be passed at any time. The opening signal from these vessels is five or more blasts of a whistle or horn.

§ 117.561 Marshyhope Creek.

The draw of the S14 bridge, mile 5.8 at Brookview, need not open for the passage of vessels. However, the operating machinery shall be maintained in a serviceable condition.

§ 117.563 Miles River.

The draw of the S370 bridge, mile 10.0 at Easton, shall open on signal from sunrise to sunset. A vessel wishing to pass the bridge between sunset and sunrise will notify the drawtender of the time at which it is desired to pass and the draw of the bridge shall open as soon as practicable thereafter.

§ 117.565 Patuxent River.

The draw of S231 bridge, mile 24.4 at Benedict, shall open on signal except that from 6 p.m. to 6 a.m. the draw shall open on signal if notice is given to the Toll Captan at the Administration Building at the east end of the bridge before 6 p.m.

§ 117.567 Pocomoke River.

(a) The draw of the US113 bridge, mile 15.6 at Pocomoke City, shall open on signal except that the draw need not open from 10 p.m. to 6 a.m.

(b) The draw of the S12 bridge, mile 29.9 at Snow Hill, shall open on signal if at least five hours notice is given.

§ 117.569 Sinepuxent Bay.
